Highlights

62056 **Veterans** VA provides for charging of interest on debts and referral of debtor information to consumer reporting agencies.

62059 VA brings effective date for certain educational assistance allowance increases into closer conformance with similar disability compensation increases.

62133 **Grant Programs—Education** ED invites applications for awards under the Graduate and Professional Study Fellowship Program.

62134 **Education** ED lists accrediting and State approval agencies to be reviewed under interim procedure.

62122 **VISTA Program** ACTION outlines certain operating guidelines.

62087 **Pensions** PBGC proposes guidelines for determining whether mergers and transfers between multiemployer plans comply with Employee Retirement Income Security Act.

62226 **Coal** DOE proposes diligence requirements for Federal leases and logical mining units. (Part II of this issue)

62132 **Petroleum—Commodity Futures** CFTC announces availability of proposed contract with Chicago Board of Trade.

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

62053 **Federal Reserve System** FRS amends regulations on reserve requirements of depository institutions.

62181 FRS adopts fee schedule for coin wrapping services.

62179 **Radio—Marine Safety** FCC seeks comments on operational standards for equipment mandatorily fitted aboard vessels subject to the Safety of Life at Sea Convention.

62113 **Radio** FCC proposes changes in radiotelephony criteria in 4000 to 23000 kHz band in maritime mobile services.

62077 **Hunting** Interior/FWS establishes procedures for issuance of annual migratory bird hunting regulations.

62056 **"Woodsy Owl"** USDA/FS decides to retain program in present form.

62098 **Water Pollution Control** EPA announces availability of report on impacts of industrial discharges on publicly owned treatment works.

62049 **Rural Electrification** USDA/REA revises specification for wood poles, stubs, and anchor logs.

62081 **Agricultural Commodities** USDA/CCC withdraws proposal on establishment of price support program for 1981-crop gum naval stores.

62131 **Imports** CITA increases restraint level for certain man-made fiber apparel products from Mexico.

62081 **Administrative Practice and Procedure—Nuclear Energy** NRC proposes to revise regulations on administrative claims under the Federal Tort Claims Act.

62045 **Administrative Practice and Procedure—Government Employees** MSPB discontinues providing free transcript copies to apellants and agencies.

62045 MSPB requires parties to serve all pleadings, documents and other items directly on each other and eliminates requirement that pleadings be by certified mail.

62093 **Privacy and Freedom of Information Act Document** SSS

62213 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 46, No. 245
Tuesday, December 22, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures; Interim Rule

AGENCY: Merit Systems Protection Board.

ACTION: Interim regulation; request for comment.

SUMMARY: The Board amends its regulations to require the parties before it to serve all pleadings, documents, and other items directly on each other instead of having the Board receive and serve the pleadings on the parties and to eliminate the requirement that such pleadings be by certified mail. This action is necessary because of the uncertainty associated with the budgetary limitations under which the Board is currently operating. The intended effect of this action would be to transfer the burden of mailing all pleadings from the Board to the parties. In addition, the Board requests public comment on this regulation.

DATES: Effective date: December 22, 1981. Comments should be submitted in writing on or before January 21, 1982.

ADDRESS: Comments should be submitted in writing and addressed to Robert E. Taylor, Secretary, Merit Systems Protection Board, 1120 Vermont Avenue NW., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: William C. Jenkins (202) 653–8900.

SUPPLEMENTARY INFORMATION: The Board's current regulation at § 1201.26 requires the Board to serve copies of *all* pleadings and attachments on the parties.

The Board amends 5 CFR 1201.26 by eliminating this requirement for pleadings other than the petition to the Board. The Board would continue to serve on the parties copies of the petition for appeal and the petition for review filed with it under 5 CFR 1201.22 and 1201.114, respectively. In all other filings, service would be made by the parties, assisted by a service list provided by the Board that would explain the concept and provide the necessary information for service. One original and three copies of the petition and one original and one copy of all other pleadings would have to be filed with the Board. The parties would be required to serve on each other one copy of all pleadings other than the petition.

Section 1201.26 also presently requires the Board to serve pleadings by certified mail, return receipt requested. The current regulations at § 1201.122(b) impose a similar requirement for actions brought before the Board by the Special Counsel.

The Board amends § 1201.26 and 1201.122(b) to eliminate the certified mail requirement. Under § 1201.26 as amended, service would be made either by mail or personal delivery. Pleadings filed with the Board would have to be accompanied by a certificate specifying how and when service was made.

The amended regulations shall affect all appeals currently pending with the Board as well as all appeals received on or after the publication date of the regulations.

The Merit Systems Protection Board has determined because of uncertainty with the budgetary limitation under which it is currently operating, that good cause exists to require that these regulations be effective immediately upon publication.

Regulatory Flexibility Act

The Vice Chair, Merit Systems Protection Board, certifies that the Board is not required to prepare an initial or final regulatory analysis of this rule, pursuant to section 603 or 604 of the Regulatory Flexibility Act, because of her determination that this rule would not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

PART 1201—PRACTICES AND PROCEDURES

Accordingly, the Merit Systems Protection Board revises 5 CFR 1201.26 to read as follows:

§ 1201.26 Number of pleadings, service, and response.

(a) *Number.* One original and three copies of a petition for appeal or petition for review must be filed with the appropriate Board office. One original and one copy of all other subsequent pleadings must be filed.

(b) Service.—(1) *Service by the Board.* The Board will serve copies of a petition for appeal or petition for review upon the parties to the proceeding by mail. In doing so, the Board will attach a service list indicating the address of the appellant (or designated representative) and the address of the agency.

(2) *Service by the parties.* The parties shall serve on each other one copy of all pleadings filed with the Board other than a petition for appeal or petition for review. Service may be made by mailing or delivering personally a copy of the pleading submitted to the Board to each party on the service list provided by the Board. The pleading must be accompanied by a certificate of service specifying how and when service was made. It shall be the duty of all parties to notify the Board and one another in writing of any changes in the names or addresses on the service list.

(c) *Time limitations for response to pleadings.* Unless otherwise specified by the presiding official or these regulations, a party shall have 10 days from receipt to respond to a pleading served by another party.

§ 1201.122 [Amended]

The Board amends 5 CFR 1201.122(b) by removing the words "by certified mail."

Dated: December 14, 1981.

For the Board.

Ersa H. Poston,

Vice Chair.

[FR Doc. 81-36355 Filed 12-21-81; 8:45 am]
BILLING CODE 7400-01-M

5 CFR Part 1201

Practices and Procedures; Interim Rule

AGENCY: Merit Systems Protection Board.

ACTION: Interim regulation; request for comment.

SUMMARY: The Merit Systems Protection Board amends its regulations so as to

discontinue the practice of providing copies of transcripts to appellants and agencies free of charge. This action is necessary because of the uncertainty associated with the budgetary limitations under which the Board is currently operating. The intended effect would be to reduce the burden of providing transcripts in all cases to the parties free of charge and to shift the responsibility for request of and payment for copies of transcripts to the parties themselves. In addition, the Board requests public comment on this regulation.

DATES: Effective date: December 22, 1981. Comments should be submitted in writing on or before January 21, 1982.

ADDRESS: Comments should be submitted in writing and addressed to Robert E. Taylor, Secretary, Merit Systems Protection Board, 1120 Vermont Avenue, NW., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: William C. Jenkins (202) 653–8900.

SUPPLEMENTARY INFORMATION: The Board's current regulation § 1201.53(a) requires presiding officials of the Board to provide copies of the hearing transcript to appellants and agencies free of cost, and to intervenors and other interested parties copies at their own cost.

The Board amends 5 CFR 1201.53(a) to discontinue the practice of providing copies of transcripts to appellants and agencies free of charge. Under the regulation, copies of hearing transcripts would be available to parties upon payment of costs. The Board would continue to provide for a verbatim record to be kept of each Board hearing. This would constitute the sole official record of the proceeding, unless an official transcription is made.

The Board has concluded that this amendment would not abridge or otherwise curtail an appellant's rights under the Civil Service Reform act of 1978. Inasmuch as the legislative history of the Reform Act indicates that Congress intended that the Board provide each appellant the opportunity for a "hearing on the record," the regulation would abide by that intent. The amendment also would accomplish the goal of providing parties with a hearing that is consistent with those described in the Administrative Procedure Act, which provides that a transcript will be made available to the parties only on payment of lawfully prescribed cost.

Moreover, the ultimate availability of hearing transcripts would not be altered by this regulation. The intended effect would be to reduce the burden of providing transcripts in all cases to the parties free of charge and to shift the responsibility for request of and payment for copies of transcripts to the parties themselves.

This regulation shall affect all appeals currently pending in the Board's regional offices and appeals received on or after the publication date of this regulation for which a hearing is scheduled on or after February 1, 1982.

The Merit Systems Protection Board has determined because of the uncertainty associated with the budgetary limitation under which it is currently operating, that good cause exists to require that this regulation be effective immediately upon publication.

Regulatory Flexibility Act

The Vice Chair, Merit Systems Protection Board, certifies that the Board is not required to prepare an initial or final regulatory analysis of this rule, pursuant to section 603 or 604 of the Regulatory Flexibility Act, because of her determination that this rule would not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

PART 1201—PRACTICE AND PROCEDURES

Accordingly, the Merit Systems Protection Board revises 5 CFR 1201.53(a) to read as follows:

§ 1201.53 Transcript.

(a) *Preparation.* A verbatim record made under the supervision of the presiding official shall be kept of every hearing and shall be the sole official record of the proceeding. Upon request, a copy of a transcript of the hearing shall be made available to the parties upon payment of costs. Exceptions to the payment requirement may be granted in extenuating circumstances for good cause shown. Motions for an exception shall be made in writing and accompanied by an affidavit setting forth the reasons for the request and shall be granted upon a showing of good cause. Requests for copies of transcripts shall be directed to the official hearing reporter, or the presiding official as appropriate. The presiding official may, by agreement with the person making the request, make arrangements with the official hearing reporter for required services to be charged to the requester.

BILLING CODE 7400-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority; Energy Functions

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary of Agriculture and General Officers of the Department of Agriculture to reflect the establishment of a new Office of Energy and realign certain energy functions within the Department.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Earle Gavett, Acting Director, Office of Energy, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–2834.

SUPPLEMENTARY INFORMATION: In order to give added emphasis to energy and energy-related matters, the Department of Agriculture is establishing an Office of Energy. The new office will be responsible for Departmental energy policy development and for the coordination of energy programs and strategies for the allocation of scarce fuel resources. These functions were previously carried out by the Office of Budget and Program Analysis and will be transferred to the new Office of Energy which will report to the Assistant Secretary for Economics.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Lastly, this action is not a rule as defined by Pub. L. 96–354, the Regulatory Flexibility Act and thus is exempt from the provisions of the Act.

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development and Assistant Secretaries

1. Section 2.27 is amended by adding a new paragraph (g) as follows:

§ 2.27 Delegations of authority to the Assistant Secretary for Economics.

* * * * *

(g) *Related to energy.* (1) Advise the Secretary and other policy-level officials of the Department on energy policies and programs, including legislative and budget proposals.

(2) Serve as or designate the Department representative at hearings, conferences, meetings and other contacts with respect to energy and energy-related matters, including liaison with the Department of Energy and other governmental agencies and departments.

(3) Provide Department leadership in:

(i) Analyzing and evaluating existing and proposed energy policies and strategies, including those regarding the allocation of scarce resources;

(ii) Developing energy policies and strategies, including those regarding the allocation of scarce resources;

(iii) Reviewing and evaluating Departmental energy and energy-related programs and program progress;

(iv) Developing agricultural and rural components of national energy policy plans;

(v) Preparing reports on energy and energy-related policies and programs required under Acts of Congress and Executive Orders, including those involving testimony and reports on legislative proposals.

(4) Provide Departmental oversight and coordination with respect to resources available for energy and energy-related activities, including funds transferred to USDA from other departments or agencies of the Federal Government pursuant to interagency agreements.

(5) These delegations exclude the energy management actions related to the internal operations of the Department as delegated to the Assistant Secretary for Administration.

Subpart D—Delegations of Authority to Other General Officers and Agency Heads

§ 2.36 [Amended]

2. Section 2.36 is amended by removing paragraphs (m) through (t).

Subpart K—Delegation of Authority by the Assistant Secretary for Economics

3. A new § 2.88 is added to read as follows:

§ 2.88 Director, Office of Energy.

(a) *Delegations.* Pursuant to § 2.27(g), the following delegations of authority are made by the Assistant Secretary for Economics to the Director, Office of Energy.

(1) Provide Department leadership in:

(i) Analyzing and evaluating existing and proposed energy policies and strategies, including those regarding the allocation of scarce resources;

(ii) Developing energy policies and strategies, including those regarding the allocation of scarce resources;

(iii) Reviewing and evaluating Departmental energy and energy-related programs and program progress;

(iv) Developing agricultural and rural components of national energy policy plans;

(v) Preparing reports on energy and energy-related policies and programs required under Acts of Congress and Executive Orders, including those involving testimony and reports on legislative proposals.

(2) Provide Departmental oversight and coordination with respect to resources available for energy and energy-related activities, including funds transferred to USDA from the departments and agencies of the Federal Government pursuant to interagency agreements.

(3) Represent the Assistant Secretary for Economics at conferences, meetings, and other contacts where energy matters are discussed, including liaison with the Department of Energy and other governmental departments and agencies.

(4) Provide the Assistant Secretary for Economics with such assistance as he may request to perform the duties delegated to him concerning energy.

(5) Work with the Assistant Secretary for Governmental and Public Affairs to maintain Congressional and public contacts in energy matters, including development of legislative proposals, preparation of reports on legislation pending in Congress, appearances before Congressional committees and related activities.

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

For Subparts C and D:

Dated: December 9, 1981.

John R. Block,

Secretary of Agriculture.

For Subpart K:

Dated: December 16, 1981.

William G. Lesher,

Assistant Secretary for Economics.

[FR Doc. 81-36684 Filed 12-21-81; 8:45 am]

BILLING CODE 3410-01-M

Agricultural Stabilization and Conservation Service

7 CFR Part 725

Proclamation, Determinations and Announcements of National Marketing Quotas and Referendum Results; Removal of Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Final rule.

SUMMARY: This rule deletes the regulations codified at 7 CFR 725.1 through 725.3 relating to quota proclamations, determinations, and referendum results. The quota announcements and referendum for flue-cured tobacco are published each year in the **Federal Register** and are also later codified in the Code of Federal Regulations. In order to avoid having to amend the Code of Federal Regulations after each quota announcement or referendum result, the quota results and referendums will no longer be codified in the Code of Federal Regulations but will be published in the **Federal Register** in the notice section.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Robert L. Tarczy, Program Specialist, (ASCS), Analysis Division, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. (202) 447-5187.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified "not major" since the decodification has no annual effect on the economy. The title and number of the Federal Assistance Program that this notice applies to is: Title—Commodity Loan and Purchases; Number—10.051, as set forth in the Catalog of Federal Domestic Assistance. This action will not have a significant impact specifically on area and

community development. Therefore, review as established by OMB Circular A–95 was not used to assure that units of local government are informed of this action.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

The Agricultural Adjustment Act of 1938, as amended, the "Act", requires the Secretary of Agriculture to proclaim quotas for flue-cured tobacco every three years. Included in the proclamation is the determination and announcement of the national marketing quota for flued-cured tobacco. Within 30 days after such proclamation a referendum is conducted to determine whether producers are in favor of marketing quotas. If producers of flue-cured tobacco favor quotas, the marketing quotas are determined and announced for the ensuing two years. The proclamation of marketing quotas, the determination and announcement of marketing quotas and the results of referendums for flue-cured tobacco were previously published in the **Federal Register** as final rules and codified in the Code of Federal Regulations. Effective with the publication of this rule, the marketing quota proclamations, determinations, and referendum results will hereafter appear only as notices in the **Federal Register.**

Since this final rule makes no substantive change in the regulations but merely deletes the quota announcements and referendum results previously published in the Code of Federal Regulations, it has been determined that no further public rulemaking is required. However, the quota announcements and referendum results previously appearing in 7 CFR 725.1 through 725.3 remain applicable to the crops to which each refers.

Final Rule

PART 725—FLUE-CURED TOBACCO

§§ 725.1–725.3 (Subpart—Proclamations, determinations, and announcements of national marketing quotas and referendum results) [Removed]

Accordingly, the regulations at 7 CFR 725.1 through 725.3 relating to marketing quota proclamations, determinations and referendum results for flue-cured tobacco and the subpart and sections hereto are hereby removed from the Code of Federal Regulations.

(Secs. 301, 313, 317, 375, 52 Stat. 38, 47, 66, as amended, 79 Stat. 66 (7 U.S.C. 1301, 1313, 1314c, 1375))

Signed at Washington, D.C., on December 14, 1981.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 81–36967 Filed 12–21–81; 8:45 am]

BILLING CODE 3410–05–M

---

7 CFR Part 729

1981 Peanut Program; Acreage Allotments; Poundage Quotas; Removal of Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Final rule.

SUMMARY: This rule deletes the regulations codified at 7 CFR 729.100 through 729.104 on acreage allotments, poundage quotas, and the results of the marketing quota referendum. The acreage allotments and poundage quotas for peanuts are published each year in the **Federal Register** and are also later codified in the Code of Federal Regulations.

In order to avoid having to amend the Code of Federal Regulations after each allotment and quota announcement and each marketing quota referendum these determinations will no longer be codified in the Code of Federal Regulations but will be published in the **Federal Register** in the Notice section.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Gypsy Banks, Agricultural Economist, (ASCS), Analysis Division, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. (202) 447–5953.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified "not major" since the decodification has no effect on the economy.

The title and number of the Federal Assistance Program that this final rule applies to are: Title—Commodity Loans and Purchases; Number—10.051, as set forth in the Catalog of Federal Domestic Assistance. This action will not have a significant impact specifically on area and community development. Therefore, review as established by OMB Circular A–95 was not used to assure that units of local government are informed of this action.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this final rule.

The Food and Agricultural Act of 1977, hereinafter referred to as the "Act", requires the Secretary of Agriculture to determine and announce acreage allotments and poundage quotas annually. In addition a referendum is conducted to determine whether producers are in favor of marketing quotas. The determinations and announcements of acreage allotments and poundage quotas for peanuts have previously been published in the **Federal Register** as final rules and codified in the Code of Federal Regulations. However, because these determinations are generally made on an annual basis, and are applicable to only a single crop year, it has been found that the permanent codification of such determinations and announcements in the Code of Federal Regulations serves no useful purpose and increases government costs unnecessarily. In most instances, the material contained in these determinations and announcements are obsolete by the time the Code of Federal Regulations is actually compiled and printed. Therefore, effective with the publication of this rule, the allotment and quota determinations, and referendum results will hereafter appear only as notices in the **Federal Register,** and shall not be codified in the Code of Federal Regulations.

Since this final rule makes no substantive change in the regulations but merely deletes the allotment and quota announcements previously published in the Code of Federal Regulations, it has been determined that no further public rulemaking is required. However, the allotment and quota determinations and referendum results previously appearing in 7 CFR 729.100 through 729.104 remain applicable to the crops to which each refers.

Final Rule

PARTS 729—PEANUTS

Accordingly, 7 CFR Part 729 is amended as follows:

§§ 729.100 through 729.104 (Subpart—1981 peanut program; acreage allotments and poundage quotas) [Removed]

1. 7 CFR 729.100 through 729.104, the Subpart and sections there to, are

hereby removed from the Code of Federal Regulations.

2. The material removed by this final rule shall remain in full force and effect with respect to the crop year for which it was published.

(Secs. 301, 358, 375, 52 Stat. 38, as amended, 55 Stat. 88, as amended, 52 Stat. 66, as amended (7 U.S.C. 1301, 1358, 1375))

Signed at Washington, D.C. on December 14, 1981.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 81-36325 Filed 12-21-81; 8:45 am]

BILLING CODE 3410-05-M

Rural Electrification Administration

7 CFR Part 1701

Public Information; REA Bulletins

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: The Rural Electrification Administration (REA) hereby amends Appendix A—REA Bulletins to provide for the revision of REA Bulletin 44–2 (Electric) and 345–1 (Telephone), "Specification for Wood Poles, Stubs, and Anchor Logs and for Preservative Treatment of These Materials to be Purchased by REA Borrowers, Electric and Telephone." The revision reflects changes in national standards, clarifies certain provisions of the 1977 issuance where problems of interpretation arose and involves a change in title to REA Bulletin 44–2 (Electric) and 345–1 (Telephone), "REA Specification for Wood Poles, Stubs, and Anchor Logs."

EFFECTIVE DATE: December 14, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. James A. Taylor, telephone (202) 447–5160. A Final Impact Statement has been prepared and is available from the Director, Engineering Standards Division, Rural Electrification Administration, Room 1270–S, U.S. Department of Agriculture, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et. seq.), REA hereby amends Appendix A—REA Bulletins to provide for the revision of REA Bulletin 44–2 (Electric) and 345–1 (Telephone), "Specification for Wood Poles, Stubs, and Anchor Logs and for Preservative Treatment of These Materials to be Purchased by REA Borrowers, Electric and Telephone." This revision incorporates the following new title: REA Bulletin 44–2 (Electric) and 345–1 (Telephone), "REA Specification for Wood Poles, Stubs, and Anchor Logs."

This final action has been issued in conformance with Executive Order 12291, Federal Regulation. Since no significant effect on the economy will occur; since no significant increase in costs for electric consumers, telecommunication subscribers, industries or Government will result; and since no significant impact on economic conditions will be caused, this action has been determined to be "not major."

The Regulatory Flexibility Act (Pub. L. 96–354) does not apply to this action; therefore, a Regulatory Flexibility Analysis has not been prepared.

A notice of proposed Rulemaking was published in the **Federal Register** on March 31, 1981, Volume 46, Number 61. As a result of this notice in the **Federal Register** the following significant comments were received:

(a) *First paragraph of Section II C—Manufacturers' Warranty.* Three comments were received on this paragraph. Two of the comments suggested that the proposed statement regarding the pole replacement warranty (which is similar to the one that had been in effect) be reworded such that it apply to material defects, except for preservative retention, which are noted *prior to installation* or within one year, *whichever occurs first.* The third comment suggested that the warranty apply to any nonconforming aspect which, evidently, existed prior to delivery to the user.

The first two comments could considerably nullify the conventional one year warranty. As suggested by these two comments, if a pole is installed soon after the date it is delivered, which is not unusual when building new lines, the warranty would cease upon installation. A third comment suggested that we qualify the statement to emphasize the warranty only to cover obvious manufacturer defects. Some noncomforming pole defects can be hidden by the wood preservative and cannot be readily seen until some time after treatment.

REA proposes to maintain the full one year warranty. Rather than revise this as suggested by the commentors, REA decided to use the text of the 1977 issuance of Specification DT–5C:PE–9 which reads:

C. Poles shall be warranted to conform to this specification. If any pole shall be found nonconforming under this specification, in any detail except preservative retention, within one year from date of shipment, it shall be replaced as promptly as possible by the producer. (Preservative retention, see Table 10, shall meet specifications as a minimum at time of shipment. A reduction in preservative retention of not more than 10 percent will be acceptable within 30 days from date of delivery.)

The third comment also suggested that the nonconforming aspects of poles at the time of manufacture be clearly defined. We feel that paragraph C (above) adequately defines the manufacturing defects intended as those that are not in compliance with the requirements of this specification.

(b) *Second paragraph of Section II C (new paragraph II D)—Quality Control.* One commentor requested that the date of issuance be added to the reference of REA Bulletin 44–4:345–9, "Quality Control and Inspection of Timber Products."

Inasmuch as REA intends for Specification DT–5C:PE–9 to pertain to the latest issuances of REA Bulletin 44–4:345–9, REA did not incorporate this suggestion and omitted the issuance date from this reference. This action will allow for revision of the bulletin without affecting Specification DT–5C:PE–9.

(c) *Third paragraph of Section II C (new paragraph II E)—Inspector' Judgement.* Three comments were received objecting to the limitation on the use of judgement as the basis of acceptance of poles.

Two commentors cited that inspectors' judgement can be used to select a marginal pole rather than reject it. One of these commentors cited as an example using judgement to permit excessive knots in the top or butt of a pole.

Another commentor agreed with the proposed provision in that minimum provisions which are in the specification and which are clearly defined in the specification not be subject to change by inspectors' judgement.

REA believes that inspectors' judgement should not be allowed for specified minimum requirements, especially on the prohibited defects cited in ANSI 05.1–1979. We especially take strong objection to allowing judgement on such aspects as knots which have significant effect on pole strength.

(d) *Paragraph II D (new paragraph II F)—Nonconforming Poles.* Two commentors suggested changes for this paragraph. One commentor suggested that REA differentiate between "repeated violations" and "substantial nonconformities" as compared to an occasional slip-up.

The other commentor suggested that the supplier be given an opportunity to

resolve the differences with the customer before any action is taken.

REA believes that these comments are satisfied by provisions adopted in Section X which new paragraph II F references. Section X discusses this matter of nonconformance in detail and provides for means to determine if there is a single "occasional slip-up" or substantial and repeated violations. Section X also defines provisions for resolving the differences between the supplier and the customer.

(e) *Paragraph II F1 (new paragraph II H1)—Insured Warranty Plan.* One commentor objected to the provision for insured warranty poles. This commentor pointed out that the expenses to locate insured warranty poles and inspect these poles to determine if they are claim poles are such that few purchasers actually bother.

This provision has been an alternative for about twenty years and is preferred by some purchasers. Inasmuch as the insured warranty provision is optional, REA sees no reason to delete this provision.

(f) *Paragraph II F2b (new paragraph II H2b)—Verification of Inspection Reports.* Three commentors suggested that REA delete the provision requiring the manufacturer to place comments on an inspector's report when verifying an inspector's report.

REA has modified the proposed revision to give the manufacturer the *option* of placing comments on the inspection report at the time of verification endorsement. This was mandatory in the proposed draft.

(g) *Paragraph II F2c—Plant Evaluation.* Seven comments were received on the provision to require inspection agencies to report biannually on unsatisfactory conditions which they find at treating plants. Two inspection agencies asked who was going to reimburse them for this plant evaluation. Another agency, in contrast, submitted a detailed inspection form, which it has routinely used for several years to evaluate treating plants for their clients.

Pole manufacturers disagreed with the proposal and indicated that they did not believe that the inspection agencies were capable of properly evaluating their treating plants.

REA has evaluated the impact of implementing this provision and has decided to delete this requirement.

(h) *Paragraph II G (new paragraph II I)—Pole Serial Numbers.* Nineteen comments were received discussing the problem of implementing REA's proposal to place a serial number on all transmission poles.

REA has considered the impact of implementing this provision and has decided to delete this requirement.

(i) *Paragraph II H 3—Quality Assurance Plans.* Five comments were received regarding this provision. Two commentors familiar with user-run quality assurance plans praised the concept. One commentor suggested that manufacturers might want to set up and offer such a plan. Two commentors stated another procurement program is not needed because it either will confuse purchasers or not offer any recourse to the purchaser.

This provision was retained in the specification to enable REA borrowers to consider and develop a concept which will not be confusing to purchasers and which will offer meaningful recourse for nonconforming products.

(j) *Paragraph IIIA—Quality Control Performance.* Five comments were received objecting to the provisions for dealing with evidence of unsatisfactory performance on the part of the manufacturer's quality control personnel.

After considering these comments, REA decided to delete the proposed wording and retain the 1977 specification wording on this provision with some changes. The procedure for handling this situation is the same as had been required in the 1977 specification except that unsatisfactory performance will be subject to review by Technical Standards Committee "A" (Electric).

(k) *Paragraph III A1–5—Quality Control Procedures.* Two comments were received regarding the rules pertaining to the quality control procedures suggesting that the quality control person and inspector should work concurrently but independently so as not to delay production.

The 1977 issuance of Specification DT–5C:PE–9 requires quality control and independent inspection procedures which are essentially taken from AWPA Standard M–2. Both cite procedures which require the quality control person and the independent inspector to perform their specified duties and perform them independently. Both documents require specific steps to be accomplished before, during and after treatment.

After consideration of these comments, REA made changes which will allow material to continue to be processed while certain tests are being completed so as not to delay production, providing that the quality control person and the independent inspector work independent of each other in their analytical procedures.

(l) *Paragraph III D—Inspection Agencies Own Central Laboratory.* Three comments stated that the cost of setting up a central laboratory would be burdensome to some of the smaller inspection agencies.

REA believes that although this provision will involve some expense, it is deemed necessary for proper and adequate referee assaying purposes. REA, therefore, retained this provision in the revised specification. REA further clarified this provision to state that the laboratory shall be equipped in accordance with AWPA standards.

(m) *Paragraph V A—Inspection Prior To Framing.* Four comments were received requesting clarification of the provision which will allow "in the white" inspection of poles prior to framing.

REA considered these comments pertinent and, thus, changed the paragraph to read: "Inspection prior to treatment shall be made after the products are manufactured and ready for treatment or, if the poles are trimmed to length, inspection prior to treatment may be done prior to framing providing inspection hammer brands are not removed during framing. When framing is done after white inspection, the framing shall be inspected after treatment. Inspection during and after treatment shall be made as described in detail in REA Bulletin 44–4:345–9, Section V., Paragraph B."

(n) *Paragraph V F—Transmission Poles.* REA proposed in the draft specification that poles 50 feet and longer be designated as transmission poles. Eight comments were received on this provision suggesting that this designation be revised to 55 feet, 60 feet or as based upon the kV of the line.

The provisions pertaining to the quality of white poles is covered in ANSI 05.1–1979. In reviewing this standard there are various characteristics which are designated as applicable to various pole length categories (mostly of either 50 feet and longer or 55 feet and longer). The predominant category used is 50 feet and longer. Perhaps the most critical strength-effecting characteristic is that of knot size and numbers in a cluster. ANSI recognizes a 50 feet and longer category for knot limitation requirements.

AWPA likewise designates a 50 feet and longer category for the double boring penetration testing of transmission poles.

REA decided to retain the 50 feet and longer category because this is used in the most important provisions of the above-mentioned national standards.

(o) *Paragraph VII B—Pentachlorophenol Preservatives.* Several comments were received suggesting that all pentachlorophenol solvent systems permitted by AWPA be permitted by REA. After careful consideration the following systems were incorporated:

Type A solvent—(Conventional solvent.)

Type B solvent—(Liquified petroleum gas (LPG) used in the Cellon process. This system had some restrictions (in the 1977 specification) which have been removed in the revised specification.)

Type D solvent—(Methylene chloride similar in characteristics to LPG in the Cellon process. This solvent is expensive which probably will limit its usage. However, from a technical standpoint, REA is agreeing to its use.)

Type E solvent—(This solvent is a water dispersed penta system currently in the approval process of AWPA. From a technical standpoint, its characteristics are similar to Cellon.)

Note.—Types B, D, and E are proprietary patented processes which are subject to licensing agreements. REA intends to refer to the proprietary names to properly identify the processes.

Type C solvent—REA decided not to include the Type C solvent. Type C solvent is mineral spirits which is not in general use for pole treatments. Poles that have been treated with Type C solvent have shown early problems. It is also highly flammable until fully evaporated.

(p) *Paragraph VII C—Waterborne Preservatives (Salts).* Several comments were received concerning the note in the proposed specification that "ACA treatments, in some cases, have been shown to cause corrosion of galvanized steel hardware." These commentors felt that this statement was prejudicial to ACA and suggested that the REA proposed note be deleted and the following general statement be placed immediately after the heading "Preservatives."

Note.—All approved preservatives, in some cases, have been shown to cause corrosion of galvanized hardware. Purchasers are advised to contact the treated-pole supplier for specific information about such corrosion and its prevention.

REA believes that this proposal has merit and it was incorporated in the revised specification.

(q) *Paragraph VII C-4—Waterborne Preservatives.* Three comments were received pertaining to limitations on the constituents used in the formulation of chromated copper arsenate (CCA) preservatives suggesting that REA follow the wording in AWPA Standards on this matter. The paragraph in the specification proposal was taken verbatim from AWPA Standard C-4. However, AWPA subsequently revised this paragraph as follows:

"Waterborne preservatives are available either as oxides which form non-ionizing chemical compounds in the wood, or as salts which leave ionizing compounds as well as non-ionizing compounds in the wood. If there is a preference for one formulation as compared with the other, the purchaser should so specify."

REA amended the proposal by incorporating the AWPA revised wording. REA also elected to exercise the preference cited by AWPA. REA deleted the last sentence in the above quote and added the following sentence:

"Formulations which leave ionizing compounds in the wood are not acceptable. Examples of such constituents are: copper sulfate, sulfuric acid, sodium arsenate, sodium pyroarsenate and potassium dichromate and sodium dichromate."

(r) *Paragraph VII C-5—Treatment of Douglas Fir and Western Larch with CCA.* One commentor suggested that we remove the western larch reference from this paragraph. He cites that there are problems obtaining consistent CCA treatment in Douglas fir sapwood but these problems are not apparent in larch.

Western larch is a thin sapwood species similar, in this characteristic, to Douglas fir. Since CCA treated larch cannot be steamed in excess of 6 hours (ANSI 05.1-1979 para. 4.1.2.5) sufficient heat cannot be placed in the wood. Any fungi in the non-sterilized, untreated heart could destroy the heart and untreated sapwood in a few years.

Since the proposed specification provides for other treatments which can be used with these species, this restriction does not eliminate the use of the species. REA, therefore, retained this paragraph.

(s) *Paragraph VIII—Preservative Treatment. A2a—Boulton Drying.* One commentor suggested that the Boulton drying criteria as cited in the proposed revision of this provision be deleted as it appears elsewhere in the specification.

REA has agreed to this suggestion. REA which helps to further define heating time durations also inserted the following clause:

"Frozen poles will require additional heating to thaw the wood. Time of Boulton drying shall be counted from the time the wood surface is warmed to approximately 150°F."

This will require a pole to be thawed before the heating time is counted toward conditioning and give a better indication of the effective hours of seasoning.

(t) *Paragraph VIII—Preservative Treatment. D. Results of Treatment. 2b. Testing for Pentachlorophenol.* Several comments were received objecting to REA's proposal provision to require pentachlorophenol testing to be conducted by the copper pyridine method only. The economic impact that such a requirement would pose to some areas of the country was stressed.

REA considered the impact of imposing such a requirement and deleted the proposal, replacing it with the wording of the January 1977 specification which allows both lime ignition and copper pyridine methods, except the copper pyridine method must be used on poles that have been in contact with salt water or other chloride solutions and on all species native to the Pacific Coast region.

(u) *Paragraph VIII D.—Results of Treatment. 3a(4) Penetration Sampling of Poles. 3b(3).* Four commentors suggested that REA permit two re-treatments of poles as per AWPA Standards. REA has traditionally allowed only one re-treatment.

REA decided to incorporate this suggestion and has revised the specification to permit two re-treatments.

(v) *Paragraph VIII D—Results of Treatment. 5. Penetration Boring of Incised or Radial Drilled Poles.* Two commentors suggested that when poles are incised or radial drilled they be sampled "midway on a diagonal between an incision or hole and the one in the next vertical row above or below."

REA considered this suggestion to be more definitive than the REA proposal. The suggestion was, therefore, incorporated into the revised specification.

(w) *Paragraph VIII E—Re-treat Designation on Poles.* Two commentors questioned why REA desired to have a re-treatment mark placed on the butt of a pole when it has been re-treated.

When poles are treated, they may be steam conditioned. ANSI 05.1 has definite limits on the amount of steam conditioning permitted. When poles are retreated, they should not be double steam conditioned. REA, therefore, feels that a re-treatment mark is essential as a means of determining which poles have been steam conditioned and cannot be again steam conditioned. The re-treatment markings on poles was retained in the revised specification.

(x) *Paragraph X—Destination Inspection.* Several comments were received suggesting that the "lot" size

for poles inspected at destination be specifically designated.

REA considered these comments and decided to delete the last sentence in this paragraph and substitute the following:

"Where a difference of opinion arises as to the compliance of materials with this specification, when inspected at destination, it shall be the responsibility of the supplier to attempt to resolve this matter with the purchaser. When both parties fail to agree, the purchaser may select a neutral inspector, whose company does not inspect for the plant involved, and may seek its opinion in resolving this matter. REA shall be notified of the details of this reinspection. REA may elect to participate in this reinspection. Materials shall be considered in lots of 100 pieces. If there are pieces which fail to meet the specification in excess of 5 percent, or if there are repeated shipments of nonconforming material (four occurrences in a 12-month period), of which more than 2.5 percent (considered in lots of 100) are nonconforming, the Technical Standards Committee "A" (Electric) may review the circumstances and, if warranted, remove the supplier and/or the inspection agency from REA approved lists."

(y) *Appendix A.* Paragraph 2—*Definitions*—(*Check*). Paragraph 4.4.11—*Splits and Checks.* Several commentors requested clarification as to the intent of the additions to the definition of a check in paragraph 2 and the application in paragraph 4.4.11. It was mentioned that describing it in both paragraphs was redundant.

After careful consideration, REA decided that the addition to the definition of a check in paragraph 2 was not necessary and it has been deleted in the revised specification.

It was also decided that the addition in paragraph 4.4.11 be amended. REA, therefore, clarified the addition of a provision for checks at the ends of poles to read:

"(Two checks, of approximately the same width, each check terminating at the pith center and separated by 1/2 inch or less of wood fiber at any point on the pole circumference, shall be considered as a single continuous check.)"

Paragraph 4.1.2.1—*Air Seasoning*—(*Time Limits on Seasoning*). Numerous commentors objected to REA proposed limitations on air seasoning of poles and placement of a serial number on poles as a means of monitoring the seasoning of poles. All commentors stated such proposals would have a severe economic impact on the timber treating industry.

After careful consideration of the present impact that such a proposal would have and after considering the advantages of waiting and basing decisions on the results of ongoing research, REA deleted these proposed requirements.

Paragraph 4.1.2.1—*Air Seasoning—(Heat Sterilization).* Several comments were received on the question of REA requiring heat sterilization of air seasoned poles. Commentors pointed out that this heat sterilization concept was costly in terms of fuel and that in the Pacific Northwest and the Rocky Mountain area kiln capacity was limited.

In 1980, an EPRI report and a Forest Products Journal article reported on research which indicated that many problems of premature failure of poles can be related to decay infection which occurred prior to treatment and which was not adequately sterilized during treatment. Such problems were especially true in thin sapwood species where the refractory heartwood is difficult to treat. After careful consideration REA decided to retain the proposed heat sterilization provision.

Agriculture Handbook 40 (1952) published by the U.S. Forest Products Laboratory is the recognized authoritative reference on heat transfer in wood. In this publication, Dr. J. D. MacLean established that temperatures of 150°F for two hours will kill most wood destroying fungi. Higher temperatures will take shorter periods of time

Based upon this work, which to date is still considered the foremost source on the subject, REA will require heat sterilization of all air seasoned poles.

In oil borne treatments, temperatures of at least 150°F for the times indicated are routine. Steam conditioning at 245°F is used for southern pine. Boulton drying at 220°F is used on Douglas fir and western larch. In other species, treating temperatures of 200°F or more can be used.

For poles to be salt treated, REA is requiring that the poles be kiln dried to sterilize the pole. The kiln drying is also necessary to attain the uniform moisture content required for uniform treatment. Once the salt treatment is set in the wood, the preservative cannot move (like other types of preservatives) and migrate to areas where nonuniform conditions prevent initial treatment. Wood that is adequately salt treated is protected. Untreated wood in the same piece is vulnerable.

Paragraph 4.2 (2)—*Decay in Untreated Poles.* Several commentors stated that REA's proposed clarification of the provisions of ANSI 05.1 which prohibits decay was not clear. REA clarified this provision by requiring permanent rejection of material with fruiting bodies or mycelium.

In the 1977 issuance of DT–5C:PE–9, REA interpreted this provision to prohibit any indication of decay except for the cases cited in Section 4.3 of the ANSI 05.1—1979 Specification. While this interpretation may seem rigid, REA believes it to be the intent of the ANSI 05.1 Specification.

Paragraph 4.4.6—Table 2—*Limits of Knot Sizes.* One commentor suggested changing the provisions, which limit knot sizes in certain sizes of poles and permit greater knot sizes in poles.

The provisions cited in Table 2 are quoted verbatim from a similar table in ANSI 05.1. REA retained this provision because it cannot reduce its requirements on knots below that specified by ANSI 05.1; knots have a significant effect on pole strength.

Shrinkage Provisions. Several commentors noted that the shrinkage provisions in the 1977 specification were deleted from the proposed specification.

In the 1977 issuance of Specification DT–5C:PE–9, REA had a provision which allowed a small percentage of poles which meet the minimum circumference requirements when freshly peeled but which shrink slightly during processing to be accepted as conforming.

In some cases, this provision was taken as license to allow excessive numbers of marginally sized poles be accepted.

REA has chosen to delete this provision from the proposed revision to avoid any further misinterpretation.

Paragraph 6.1—*Bark Removal.* Several commentors suggested that REA revise this section to conform to the current ANSI 05.1 Specification.

REA has quoted almost the entire paragraph verbatim from ANSI 05.1—1979. REA deleted only the provisions which apply to butt treated poles because, as in the 1977 specification, butt treated poles are not permitted in the revised specification. REA also merely added a note further defining the interest of the specification regarding excessive patches of bark on the pole.

Paragraph 6.5—*Marking and Code Letters.* Several commentors suggested changes in this section. The primary suggested change was to delete the requirement for serial numbers on transmission poles and to delete the note pertaining to ACA treatments. These comments have been discussed earlier in this review and the requirements were deleted.

Paragraph 6.7—*Incising—Radial Drilling.* Several comments were received pertaining to incising or radial drilling of transmission poles. Commentors suggested that the incising be required primarily on Douglas fir transmission poles and be within the limit of current industry capabilities.

REA considered these comments and incorporated their intent by revising Sections 6.7.2 and 6.7.3 as follows:

6.7.2 *Transmission Poles.* "All Douglas-fir [coast) transmission poles (poles 50 feet or longer) shall be deep-incised or radial drilled to a minimum depth of 2½ inches in the area 2 feet above and 4 feet below the designated groundline. When indicated by experience, a deeper penetration may be specified *by the purchaser* as shown in the table below.

50 through 65 feet	4.0 inches
70 through 85 feet	4.5 inches
90 feet or longer	5.0 inches

"Deep incising or radial drilling shall be, as a minimum spacing, a 3 x 6-inch vertical diamond pattern. Radial-drilled holes shall not exceed ⅝-inch in diameter."

6.7.3 *Incising or Drilling.* "Incising or drilling shall be cleanly done to prevent tearing or excessive shattering of fibers. Incisions shall be along (in line with) the axis of the pole."

Paragraph 7.1—*Storage.* Four comments were received on the provision prohibiting dead piling of poles. They cited that some dead piling was necessary during manufacture.

REA intended the dead piling prohibition to apply to dead piling for seasoning purposes. In order to clarify this, the provision has been edited to read:

"Unseasoned poles shall not be dead piled at any time for air seasoning. This restriction does not apply to short term piling (e.g., 10 days) associated with normal manufacturing procedures. Where special conditions exist, such as in arid areas, a waver of this dead piling restriction may be requested from REA."

Table 10. Several comments were received on various provisions in Table 10.

Several comments indicated that the values for penta retention as determined by copper pyridine were incorrect. These values were corrected.

The provision for penta assay by lime ignition method had been deleted. Several commentors requested that it be replaced. The values for penta retention as determined by lime ignition were replaced.

Some comments were received suggesting that penetration values conform to AWPA recommendations. Penetration values have been corrected to read as per AWPA Standards.

To respond to comments on various penta treating processes, trade names for various processes used to treat with pentachlorophenol have been added.

Several commentors suggested that the provisions for incising or radial drilling refer only to Douglas fir poles. This suggestion was adopted.

Some comments suggested changes in the proposed retention values in the inner assay zone of large poles and suggested that the retention values recommended by AWPA for lumber in ground contact be used for this inner assay zone. The retention values for the second (inner) assay zone have been revised to require 50 percent of the preservative in the standard assay zone. These values are approximately AWPA's recommendation for treatment of wood in ground contact.

The revision of this bulletin will clarify the content of the 1977 issuance of this specification, bring it into conformance with present American National Standards Institute and American Wood Preservers' Association standards, and otherwise improve the specification to provide for better quality timber products to reduce the number of early failures of poles in rural electrification systems.

All written submissions made pursuant to this action will be made available for public inspection during regular hours at the above address.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees, 10.851—Rural Telephone Loans and Loan Guarantees, 10.852—Rural Telephone Bank Loans, and 10.853—Community Antenna Television Loans and Loan Guarantees.

Dated: December 14, 1981.

Harold V. Hunter,

Administrator.

[FR Doc. 81-36359 Filed 12-21-81; 8:45 am]

BILLING CODE 3410-15-M

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R-0378; Reg. D]

Reserve Requirements of Depository Institutions; Reserve Requirement Ratios

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204)—to adjust the dollar amount of transaction accounts subject to a reserve requirement ratio of 3 per cent for depository institutions, Edge and Agreement Corporations and United States branches and agencies of foreign banks, as required by the Monetary Control Act of 1980 (Title I of Pub. L. 96-221). Under the amendment, the first $28 million of an institution's net transaction accounts will be subject to a 3 per cent reserve ratio, and amounts in excess of $26 million will be subject to a 12 per cent reserve ratio. Presently, only the first $25 million of a depository institution's net transaction accounts are subject to a 3 per cent reserve ratio.

EFFECTIVE DATE: December 31, 1981. The first reserve maintenance period to which the amendment applies commences January 14, 1982.

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Associate General Counsel (202/452-3625), Paul S. Pilecki, Senior Attorney (202/452-3281) or Veryl V. Miles, Attorney (202/452-3611), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Monetary Control Act of 1980 (Title I of Pub. L. 96-221) ("MCA") requires each depository institution to maintain with the Federal Reserve System reserves against its transaction accounts and nonpersonal time deposits, as prescribed by Board regulations. Included in the definition of depository institutions that are required to maintain reserves pursuant to the MCA are Federally-insured commercial banks or any such bank that is eligible to apply to become insured by the Federal Deposit Insurance Corporation; any mutual or stock savings bank; any savings and loan association that is a member of a Federal Home Loan Bank or insured by, or eligible to apply for insurance with, the Federal Savings and Loan Insurance Corporation; and any credit union that is insured by, or eligible to apply for insurance with, the National Credit Union Administration Board. One of the major functions of the imposition of universal reserve requirements is to enhance the ability of the Federal Reserve to conduct monetary policy.

The initial reserve requirements imposed under the MCA were set at 3 per cent for each depository institution's transaction accounts of $25 million or less and at 12 per cent on transaction accounts above $25 million, which the Board is authorized to vary between 8 and 14 per cent. The MCA further provides that the Board shall issue a

regulation before December 31 of each year, beginning in 1981, adjusting for the next calendar year the total dollar amount of the transaction account tranche against which reserves must be maintained at a ratio of 3 per cent. The increase in the tranche is to be 80 per cent of the percentage increase in total transaction accounts for all depository institutions determined as of June 30 of each year. The growth in the total net transaction accounts of all depository institutions from June 30, 1980, to June 30, 1981, was 5.25 per cent. In accordance with these provisions of the MCA, the Board is amending Regulation D to increase the amount of the low reserve tranche for transaction accounts for 1982 to $26 million.

The provisions of 5 U.S.C. 553(b) relating to notice and public participation have not been followed in connection with the adoption of this amendment because the change to be effected involves an adjustment prescribed by statute and, thus, the Board believes that notice and public participation is unnecessary. The Board's extended rulemaking procedures (44 FR 3957 (1979)) have not been followed because the amendment relieves a burden on depository institutions and because following such procedures could interfere with necessary and prompt action that would be in the public interest. The effective date of the amendment has not been deferred pursuant to 5 U.S.C. 553(d), since the Board's action relieves a restriction by reducing the reserve requirements of depository institutions and since deferring the effective date would be inconsistent with section 103 of the MCA (12 U.S.C. 461(b)(2)(C)).

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS

Effective December 31, 1981, pursuant to the Board's authority under section 19 of the Federal Reserve Act, 12 U.S.C. 461 *et seq.*, paragraph (a) of § 204.9 of Regulation D, 12 CFR Part 204, is revised to read as follows:

§ 204.9 Reserve requirement ratios.

(a) *Reserve percentages.* The following reserve ratios are prescribed for all depository institutions, Edge and Agreement Corporations and United States branches and agencies of foreign banks:

Category	Reserve requirement
Net transaction accounts:	
0 to $26 million	3 pct of amount.
Over $26 million	$780,000 plus 12 pct of amount over $26 million.
Nonpersonal time deposits:	
By original maturity (or notice period):	
Less than 4 years	3 pct.
4 years or more	0 pct.
Eurocurrency liabilities	3 pct.

By order of the Board of Governors, December 16, 1981.

William W. Wiles,

Secretary of the Board.

CIVIL AERONAUTICS BOARD

14 CFR Part 294

[Docket No. 39000; Reg. ER-1257]

Canadian Charter Air Taxi Operators; Correction

AGENCY: Civil Aeronautics Board.

ACTION: Correction to final rule.

SUMMARY: The Board adopted a simple registration procedure to grant operating authority to Canadian charter air taxi operators (46 FR 52590, October 27, 1981). This erratum corrects § 294.20 which refers to a subsection that is nonexistent.

DATES: Effective: November 25, 1981. Adopted: October 13, 1981.

FOR FURTHER INFORMATION CONTACT: Ira Leibowitz, Bureau of International Aviation, Legal Division, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-5035, or Nancy Pitzer Trowbridge, Bureau of International Aviation, Regulatory Affairs Division, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-5134.

SUPPLEMENTARY INFORMATION:

Erratum

Paragraph (a) of 14 CFR 294.20 is corrected to read:[1]

§ 294.20 Applying for registration.

* * * * *

(a) A currently effective certificate of insurance (see § 294.40); and

* * * * *

Dated: December 16, 1981.

Phyllis T. Kaylor,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Sulfamethazine Injectable Solution

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) providing revised labeling for use of an injectable sulfonamide and to codify the revised conditions of approval. The drug is approved for treating cattle for bacterial pneumonia and bovine respiratory disease complex, colibacillosis, necrotic pododermatitis, calf diphtheria, acute mastitis, and acute metritis. The revised labeling complies with the conclusions of the National Academy of Science/National Research Council (NAS/NRC) evaluation of the product. The regulations are also amended to indicate the conditions of use were NAS/NRC evaluated and found effective.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Emilio R. Viera, Bureau of Veterinary Medicine (HFV-138), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3410.

SUPPLEMENTARY INFORMATION:

American Cyanamid Co., Berdan Ave., Wayne, NJ 07470, filed supplemental NADA 8-774 providing revised labeling for intravenous use of Sulmet (sulfamethazine sodium) Injectable Solution 25 percent for cattle for the treatment of bacterial pneumonia and bovine respiratory disease complex (shipping fever complex), colibacillosis (bacterial scours), necrotic pododermatitis (foot rot), calf diphtheria, acute mastitis, and acute metritis. The NADA originally became effective January 2, 1953, providing for use of a 12.5 percent sulfamethazine injection for the treatment of swine, horses, cattle, and sheep. Sulmet was the subject of a National Academy of Science/National Research Council (NAS/NRC) evaluation published in the **Federal Register** of September 1, 1970 (35 FR 13854). The NAS/NRC evaluation concluded, and FDA concurred, that the product is probably effective for the treatment of: Bacterial enteritis and bacterial pneumonia in dogs and cats;

bacterial scours and bacterial pneumonia in swine; necrotic pododermatitis, shipping fever, coccidiosis, bacterial pneumonia, bacterial scours, and systemic treatment of mastitis and uterine infections in cattle and sheep; calf diphtheria; and strangles, navel ill (joint ill), bacterial enteritis, and bacterial pneumonia in horses.

The NAS/NRC evaluation stated: (1) The drug should be limited to intravenous administration because of irritation by other routes; (2) instructions are not adequate for lay use; (3) each disease claim should be properly qualified as to causative organisms; (4) dose should be expressed as amount of drug per unit of body weight per unit of time for each animal; and (5) claims made regarding "for prevention of" or "to prevent" should be revised to read "as an aid in the control of" or "to aid in the control of".

American Cyanamid Co. submitted a supplemental NADA providing revised labeling with data supporting revised cattle claims from published scientific literature. The data and information submitted and the revised claims support upgrading the NAS/NRC rating for cattle from probably effective to effective. The firm also submitted a 90-day subchronic toxicity study resulting in findings of no toxic effects and information from previously conducted tissue residue depletion work supporting the residue tolerance of 0.1 ppm in cattle. Further studies supported 10-day slaughter withdrawal time for treated animals.

The supplemental NADA is approved and the regulations are amended to reflect the approval. Approval of identical products for the same conditions of use need not include certain types of effectiveness data required by 21 CFR 514.1(b)(8)(ii) or 514.111(a)(5), but may require submission of bioequivalency or similar data as suggested in the guideline for submitting NADA's for NAS/NRC reviewed generic drugs, available from the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this supplement may be seen in the Dockets Management Branch (address above) from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly 5.1; see 46 FR 26052; May 11, 1981)) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 522 is amended by adding § 522.2260, to read as follows:

§ 522.2260 Sulfamethazine injectable solution.

(a) *Specifications.* Each milliliter of sterile aqueous solution contains 250 milligrams of sulfamethazine sodium.

(b) *Sponsor.* See No. 010042 in § 510.600(c) of this chapter.

(c) *Related tolerances.* See § 556.670 of this chapter.

(d) *NAS/NRC status.* The conditions of use are NAS/NRC reviewed and found effective. Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

(e) *Conditions of use.*—(1) *Amount.* 20 milliliters for each 50 pounds of body weight (100 milligrams per pound) initially, 20 milliliters per 100 pounds of body weight (50 milligrams per pound) daily thereafter for cattle.

(2) *Indications for use.* For cattle for treatment of bacterial pneumonia and bovine respiratory disease complex (shipping fever complex) (*Pasteurella* spp.), colibacillosis (bacterial scours) (*Escherichia coli*), necrotic pododermatitis (foot rot) (*Fusobacterium necrophorum*), calf diphtheria (*Fusobacterium necrophorum*), acute mastitis and acute metritis (*Streptococcus* spp.) when caused by one or more pathogenic organisms sensitive to sulfamethazine.

(3) *Limitations.* For intravenous use only. Not for use in lactating dairy animals. Withdraw medication from cattle 10 days prior to slaughter for food. If symptoms persist for 2 or 3 days, consult a veterinarian. Adequate water intake is important for animals treated with sulfonamides. Treatment should continue 24 to 48 hours beyond the remission of disease symptoms, but not to exceed a total of 5 consecutive days.

Effective date. December 22, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: December 12, 1981.

Robert A. Baldwin,

Associate Director for Scientific Evaluation.

BILLING CODE 4160-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

706 Agencies; Amendment and Correction to List

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule; Amendment and Correction.

SUMMARY: The Equal Employment Opportunity Commission is amending its regulations on certified designated 706 agencies by adding the Missouri Commission on Civil Rights.

Additionally, the following correction should be made: Pittsburgh Human Relations Department should be changed to Pittsburgh Commission on Human Relations.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Legal Counsel Division, Office of General Counsel, Equal Employment Opportunity Commission, 2401 E Street, N.W., Washington, D.C. 20506, (202) 634-6595.

SUPPLEMENTARY INFORMATION: Publication of this amendment to § 1601.80 effectuates the designation of the following agency as a Certified 706 Agency: Missouri Commission on Human Rights. In addition to the new designation, changes are being made regarding one previously certified agency. The name Pittsburgh Human Relations Department is changed to read Pittsburgh Commission on Human Relations.

PART 1601—PROCEDURAL REGULATIONS

With the addition of the above mentioned agency and noted correction, in 29 CFR 1601.80, the list is revised as follows:

§ 1601.80 Certified designated 706 agencies.

* * * * *

Alaska Commission for Human Rights
Alexandria (Va.) Human Rights Office
Arizona Civil Rights Division
Baltimore (Md.) Community Relations Commission

BILLING CODE 6570-06-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 272

Use of "Woodsy Owl" Symbol; Completion of Review of Regulation

AGENCY: Forest Service, USDA.

ACTION: Completion of review of regulation.

SUMMARY: In compliance with Executive Order 12291, the Forest Service has reviewed 36 CFR Part 272, Use of "Woodsy Owl" Symbol. The regulation defines the "Woodsy Owl" symbol and sets conditions for authorizing use of the symbol. The regulation was published in the **Federal Register**, March 20, 1975. A notice of intent to review the regulation and a request for public comment were published in the **Federal Register** on June 2, 1981.

Based upon review of public comments and internal administrative review, the Forest Service has determined that the regulation should be retained in its present form. The regulation will be reviewed in five years.

FOR FURTHER INFORMATION CONTACT: Interested persons may contact Robert A. Hartwick, Office of Information, Forest Service, USDA, P.O. Box 2417, Washington, DC 20013, 202/447-5060.

SUPPLEMENTARY INFORMATION: Six letters of public comment were received from individuals or organizations. Five of the comments were simply supportive of the Woodsy Owl program in general. The other letter pointed out that a numerical error had been made in the notice the Forest Service published in the **Federal Register**, to wit: a paragraph designated 273 should have read 272.3. This error is not in the Code of Federal Regulations.

Dated: December 15, 1981.

Douglas Leisz,

Associate Chief.

[FR Doc. 81-36487 Filed 12-21-81; 8:45 am]

BILLING CODE 3410-11-M

VETERANS ADMINISTRATION

38 CFR Part 1

Charging of Interest on Debts

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: Pub. L. 96-466, "Veterans Rehabilitation and Education Amendments of 1980," requires the Veterans Administration to charge interest and administrative costs on delinquent debts and to charge interest on the unpaid balance of debts being paid in installments. The charging of interest has been prompted by the growing problem of collecting debts owed to the Government. It is believed that the charging of interest will motivate debtors to pay more promptly, improve the efficiency and effectiveness of agency collection programs, and reduce the need for referring uncollectible debts to the Department of Justice and District Counsels for suit.

Pub. L. 96-466 also allows the Veterans Administration to refer delinquent debts and related information to consumer reporting agencies. Consequently, a new regulation is created to comply with this legislation, as well as GAO regulations for such referral to consumer reporting agencies. This new VA regulation will improve the effectiveness of agency collection efforts.

EFFECTIVE DATE: December 3, 1981.

FOR FURTHER INFORMATION CONTACT: Peter T. Mulhern, (202) 389-3405.

SUPPLEMENTARY INFORMATION: On pages 43058 through 43061 of the **Federal Register** of August 28, 1981 there was published a notice of proposed regulatory development to issue regulations concerning the charging of interest on debts and referral of debtor information to consumer reporting agencies. Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulations.

One comment was received from the U.S. Department of Treasury. The comment concerned the cash management impact of our § 1.919 "Interest." Their initial concern was with the proposed VA policy of equating our interest rate, on an annual basis, with the rate set forth in the Treasury Fiscal Requirements Manual (TFRM). Treasury believes that we should calculate our interest rate quarterly, as specified in the TFRM, so as to provide the maximum amount of protection to the Government on overdue amounts. Treasury further suggests, in accordance

with the TFRM, that for installment agreements, the VA should set interest rates equivalent to a borrowing rate of a Treasury debt instrument with the same duration period issued at the time the arrangement is consummated. Finally, Treasury requests that we amend § 1.919 so that interest will begin to accrue on the day after the due date specified in the initial notification, rather than from the date the initial notice of debt is mailed to the debtor, as § 1.919 currently reads.

In revising 38 U.S.C. 3115, Pub. L. 96-466 specifically requires that the VA charge interest on delinquent debts. That law also states that the rate of interest charged by the VA be based on the rate of interest paid by the United States for its borrowing but that the rate itself will ultimately be determined by the VA. We believe that this legislation allows the VA a great deal of discretion in establishing our own program for charging interest. We do, however, understand Treasury's concern for providing the maximum amount of protection to the Government on overdue repayment of debts. As a result, we have revised § 1.919 to allow our annual rate of interest to be based on an average of Treasury's quarterly rates. Finally, we note that the revised 38 U.S.C. 3115(b)(1) specifically states that interest shall accrue from the day on which the initial notification of the amount due is mailed to the person who owes such amount.

The Administrator hereby certifies that these rules will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA) 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b), these rules are therefore exempt from the final regulatory flexibility analysis requirement of sections 603 and 604. The reason for this certification is that these rules affect only those individuals indebted to the U.S. Government as a result of participation in the Veterans Administration benefits payment programs.

These regulations have also been reviewed under Executive Order 12291, and have been determined to be non-major because they only affect individuals participating in VA benefit program. There is no Catalog of Federal Domestic Assistance number.

The proposed regulations, as amended, are hereby adopted as final and are set forth below.

Approved: December 3, 1981.

Robert P. Nimmo,

Administrator.

PART 1—GENERAL PROVISIONS

38 CFR Part 1 is amended as follows:

1. Section 1.916 is revised to update gender terminology and reads as follows:

§ 1.916 Liquidation of collateral.

The Veterans Administration will exercise its rights to liquidate security or collateral and apply the proceeds to debts due it through use of a power of sale in the security instrument or a non-judicial foreclosure if the debtor fails to pay his or her debt, within a reasonable time after demand, unless the cost of disposing of the collateral will be disproportionate to its value or the particular circumstances require judicial foreclosure. Collection from other sources, including liquidation of security or collateral, is not a prerequisite to requiring payment by a surety or insurance company unless such action is expressly required by statute or contract.

2. Section 1.919 is revised to read as follows:

§ 1.919 Interest.

(a) Except as otherwise provided by statute, contract, or other regulation to the contrary, the Veterans Administration shall assess: (1) Interest on all indebtedness to the United States arising as a result of Veterans Administration benefit programs which are being paid in installments, and (2) interest and administrative costs of collection on debts where repayment has become delinquent.

(b) Every party entering into an agreement with the Veterans Administration for repayment of indebtedness in installments shall be advised of the interest charges to be added to the debt. All debtors being provided notice of indebtedness, including those entering into repayment agreements, shall be advised that upon the debt becoming delinquent, or in the case of repayment of already delinquent debts, interest and the administrative costs of collection will be added to the principal amount of the debt.

(c) The rate of interest charged by the Veterans Administration shall be equal to the rate paid by the United States for its borrowing as published in Volume I, Part 6, Section 8020.20 of the Treasury Fiscal Requirements Manual. The rate of interest shall be adjusted annually on the first day of the fiscal year to reflect the average rate being charged in accordance with the Treasury Fiscal Requirements Manual. Once the rate of interest has been determined for a particular debt, the rate shall remain unchanged throughout the duration of repayment of that debt.

(d) Interest on amounts covered by § 1.919 shall accrue from the date the initial notice of the debt is mailed to the debtor. Notification shall be considered sufficient when effected by ordinary mail, addressed to the last known address, and such notice is not returned as undeliverable by postal authorities.

(e) Interest under § 1.919 shall not be charged if the debt is paid in full within 30 days of mailing of the initial notice described in paragraph (b) of this section. Once interest begins to accrue, and after expiration of the time period for payment of the debt in full to avoid assessment of interest and administrative costs, any amounts received toward the payment of such debt shall be first applied to payment of the accrued interest and/or costs, and then to principal, unless a different rule is prescribed by statute, contract, or other regulation.

(f) All or any part of the interest and administrative costs assessed under § 1.919 are subject to consideration for waiver under section 3102 of title 38, United States Code and appropriate administrative procedures.

(g) Administrative costs assessed under § 1.919 shall be the average costs of collection of similar debts, or actual collection costs as may be accurately determined in the particular case. No administrative costs of collection will be assessed under § 1.919 in any cases where the indebtedness is paid in full prior to the 30 day period specified in paragraph (e) of this section, or in any case where a repayment plan is proposed by the debtor and accepted by the Veterans Administration within that period, unless such repayment agreement becomes delinquent. (38 U.S.C. 3115)

3. Section 1.920 is amended by changing the word "bases" to "basis" so that the revised material reads as follows:

§ 1.920 Documentation of collection action.

An appropriate file will be maintained for each claim completely documenting all Veterans Administration collection action and the basis for any compromise or for suspension or termination of collection action.

4. A new § 1.922 is added to read as follows:

§ 1.922 Disclosure of debt information to consumer reporting agencies (CRA).

(a) The Veterans Administration may disclose all information determined to be necessary, including the name, address, Veterans Administration file number, Social Security number, and date of birth, to consumer reporting agencies for the purpose of—

(1) Obtaining the location of an individual indebted to the United States as a result of participation in any benefits program administered by the Veterans Administration;

(2) Obtaining a consumer report in order to assess an individuals ability to repay a debt when such individual has failed to respond to the agency's demand for repayment or when such individual has notified the agency that he/she will not repay the indebtedness; or

(3) Obtaining the location of an individual in order to conduct program evaluation studies as required by 38 U.S.C. 219 or any other law.

(b) Information disclosed by the Veterans Administration under paragraph (a) of this section to consumer reporting agencies shall neither expressly nor implicitly indicate that an individual is indebted to the United States nor shall such information be recorded by consumer reporting agencies in a manner that reflects adversely upon the individual. Prior to disclosing this information, the Veterans Administration shall ascertain that consumer reporting agencies with which it contracts are able to comply with this requirement. The Veterans Administration shall also make reasonable efforts to insure compliance by its contractor with this requirement.

(c) Subject to the conditions set forth in paragraph (d) of this section, information concerning individuals may be disclosed to consumer reporting agencies for inclusion in consumer reports pertaining to the individual, or for the purpose of locating the individual. Disclosure of the fact of indebtedness will be made if the individual fails to respond in accordance with written demands for repayment, or refuses to repay a debt to the United States arising out of the individual's participation in any benefits program administered by the Veterans Administration. In making any disclosure under § 1.922, the Veterans Administration will provide consumer reporting agencies with sufficient information to identify the individual, including the individual's name, address, if known, date of birth, Veterans Administration file number, and Social Security number.

(d)(1) Prior to releasing information under paragraph (c) of this section, the Veterans Administration will send a notice to the individual. This notice will inform the individual that—

(i) The Veterans Administration has determined that he or she is indebted to the Veterans Administration;

(ii) The debt is presently delinquent; and

(iii) The fact of delinquency may be reported to consumer reporting agencies after 30 days have elapsed from the date of the notice.

(2)(i) The Veterans Administration will notify each individual of the right to dispute the existence or amount of any debt in accordance with §§ 3.103(e) and 19.109, and to request a waiver of the debt in accordance with §§ 1.955 through 1.970.

(ii) If the Veterans Administration has not previously notified the individual of the rights described in paragrah (d)(2)(i) of this section, the Veterans Administration will include this information in the notice described in paragraph (d)(1) of this section. The individual shall be afforded a minimum of 30 days from the date of the notice to respond to it before information is reported to consumer reporting agencies.

(3) The Veterans Administration will defer reporting information to a consumer reporting agency if the individual disputes the existence or amount of any debt or requests waiver of the debt within the time limits set forth in paragraph (d)(2)(ii) of this section. The Veterans Administration will review any dispute and notify the individual of its findings. If the original decision is determined to be correct, or if the individual's request for waiver is denied, the Veterans Administration may report the fact of delinquency to a consumer reporting agency. However, the individual shall be afforded 30 days from date of the notice of the agency's determination to repay the debt.

(4) Nothing in this section affects an individual's right to appeal an agency decision to the Board of Veterans Appeals. However, information concerning the debt may be disclosed while an appeal is pending before the Board of Veterans Appeals.

(5) Upon request, the Veterans Administration will notify an individual—

(i) Whether information concerning a debt has been reported to consumer reporting agencies;

(ii) Of the name and address of each consumer reporting agency to which information has been released; and

(iii) Of the specific information released.

A notice of the right to request this information will be sent with the notice described in paragraph (d)(1) of this section.

(e) Subsequent to disclosure of information to consumer reporting agencies as described in paragraph (c) of this section, the Veterans Administration shall:

(1) Notify on a monthly basis each consumer reporting agency concerned of any substantial change in the status or amount of indebtedness.

(2) Promptly verify any and all information disclosed if so requested by the consumer reporting agency concerned.

(f) In the absence of a different rule prescribed by statute, contract, or other regulation, an indebtedness is considered delinquent if not paid by the individual by the date due specified in the notice of indebtedness, unless satisfactory arrangements are made by such date.

(g) Notification shall be considered sufficient when effected by ordinary mail, addressed to the last known address, and such notice is not returned as undeliverable by postal authorities.

(h) The Privacy Act (5 U.S.C. 552a) does not apply to any contract between the Veterans Administration and a consumer reporting agency, nor does it apply to a consumer reporting agency and its employees. See 38 U.S.C. 3301(f). This paragraph does not relieve the Veterans Administration of its obligation to comply with the Privacy Act.

(i) The term "consumer reporting agency" means any person or agency which, for monetary fees, dues, or on a cooperative nonprofit basis, regularly engages in whole or in part in the practice of assembling or evaluating consumer credit information or other information on consumers for the purpose of furnishing consumer reports to third parties or to other consumer reporting agencies. The term "consumer reporting agency" shall also mean any person or agency which serves as a marketing agent under arrangements enabling third parties to obtain such information from consumer reporting agencies, or which obtain such information for the purpose of furnishing it to consumer reporting agencies. (38 U.S.C. 3301 (g), (i); 31 U.S.C. 952)

5. Section 1.516 is amended to update gender terminology so that the revised material reads as follows:

§ 1.516 Disclosure of information to undertaker concerning burial of a deceased veteran.

When an undertaker requests information believed to be necessary in connection with the burial of a deceased veteran, such as the name and address of the beneficiary of the veteran's Government insurance policy, name and address of the next of kin, rank or grade of veteran and organization in which he or she served, character of the veteran's discharge, or date and place of birth of the veteran, and it appears that the undertaker is holding the body awaiting receipt of the information requested, the undertaker, in such instances, may be considered the duly authorized representative of the deceased veteran for the purpose of obtaining said information. In ordinary cases, however, the undertaker will be advised that information concerning the beneficiary of a Government insurance policy is confidential and cannot be disclosed; the beneficiary will be advised immediately of the inquiry, and the furnishing of the desired information will be discretionary with the beneficiary. In no case will the undertaker be informed of the net amount due under the policy or furnished information not specifically mentioned in this paragraph.

6. In § 1.518 paragraph (b) (introductory text) and (b)(1) is revised and a new paragraph (d) is added so that the revised and new material reads as follows:

§ 1.518 Addresses of claimants.

* * * * *

(b) The address of a Veterans Administration claimant as shown by Veterans Administration files may be furnished to:

(1) Duly constituted police or court officials upon official request and the submission of a certified copy either of the indictment returned against the claimant or of the warrant issued for his or her arrest

* * * * *

(d) Subject to the conditions set forth in § 1.922, the Veterans Administration may disclose to consumer reporting agencies information contained in a debtor's claims folder. Such information may include the debtor's name and/or address, Veterans Administration file number, Social Security number, and date of birth. (38 U.S.C. 3301(g))

7. In § 1.519, paragraphs (a)(4) and (f) are amended to correct citations and paragraphs (b) and (c) are amended to correct gender-specific terminology so that the revised material reads as follows:

§ 1.519 Lists of names and addresses.

(a) * * *

(4) Contain a certification that the organization, and all members thereof who will have access to the list, are aware of the penalty provisions of 38 U.S.C. 3301(f) and will not use the list for any purpose other than that stated in the application.

(b) If the Director of the regional office concerned finds that the organization requesting the list of names and addresses of educationally disadvantaged veterans is a nonprofit organization and operates an approved program of special secondary, remedial, preparatory or other educational or supplementary assistance to veterans as provided under subchapter V, title 38, United States Code, then he or she may authorize the release of such names and addresses to the organization requesting them.

(c) The Assistant Deputy Administrator for Reports and Statistics, with the concurrence of the General Counsel, is authorized to release lists of names and addresses to organizations which have applied for such lists in accordance with paragraph (a) of this section if he or she finds that the purpose for which the organization desires the names and addresses is directly connected with the conduct of programs and the utilization of benefits under title 38, United States Code. Lists of names and addresses authorized to be released pursuant to this paragraph shall not duplicate lists released to other elements, segments, or chapters of the same organization.

* * * * *

(f) Section 3301(f), title 38, United States Code, provides that any organization, or member thereof, which uses the names and addresses furnished it for any purpose other than one directly connected with the conduct of programs and the utilization of benefits under title 38, United States Code, shall be fined not more than $500 in the case of the first offense and not more than $5,000 in the case of the subsequent offenses. Any instance in which there is evidence of a violation of these penal provisions will be reported in accordance with § 14.560.

8. Section 1.520 is amended to update gender specific terminology so that the revised material reads as follows:

§ 1.520 Confidentiality of social data.

Persons having access to social data will be conscious of the fact that the family, acquaintances, and even the veteran have been willing to reveal these data only on the promise that they will be held in complete confidence. There will be avoided direct, ill-considered references which may jeopardize the personal safety of these individuals and the relationship existing among them, the patient, and the social worker, or may destroy their mutual confidence and influence, rendering it impossible to secure further cooperation from these individuals and agencies. Physicians in talking with beneficiaries will not quote these data directly but will regard them as indicating possible directions toward which they may wish to guide the patient's self-revelations without reproaching the patient for his or her behavior or arousing natural curiosity or suspicion regarding any informant's statement. The representatives of service organizations and duly authorized representatives of veterans will be especially cautioned as to their grave responsibility in this connection.

(38 U.S.C. 210(c))

38 CFR Part 21

Educational Benefits; Effective Date for Increase in Educational Assistance Allowance

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: This regulation brings the effective date for an increase in educational assistance allowance due to an increase in dependents into closer conformance with similar increases in disability compensation. The previous Veterans Administration policy concerning increases in educational allowance due to increases in dependents has been criticized as being more restrictive than the policy regarding similar increases in disability compensation. This proposal is designed to overcome this criticism.

EFFECTIVE DATE: December 3, 1981.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington D.C. 20420 (202-389-2092).

SUPPLEMENTARY INFORMATION: On pages 38547 and 38548 of the **Federal Register** of July 28, 1981, there was published a notice of intent to amend part 21 to change the effective date for an increase in educational assistance allowance following an increase in the number of dependents.

Interested persons were given 30 days in which to submit comments, suggestions or objections regarding the proposal. The Veterans Administration received no comments. Accordingly, the agency is adopting the proposal.

This amended regulation is not a major rule as that term is defined in Executive Order 12291. It will not have an effect on the economy of $100 million or more. It will not cause a major increase in costs for anyone. It will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this final rule therefore is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that this rule applies only to individual veterans. It will therefore have no significant direct impact on small entities (i.e. small businesses, small private and nonprofit organizations and small governmental jurisdictions.)

The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.111.

The proposed change to § 21.4131 is deemed proper and is hereby approved.

Approved: December 3, 1981.

Robert P. Nimmo,

Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

In § 21.4131, paragraph (e) is revised to read as follows. The introductory text is shown for the convenience of the reader.

§ 21.4131 Commencing dates.

The commencing date of an award or increased award of educational assistance allowance will be determined under this section.

* * * * *

(e) *Increase for dependent; chapter 34.*

(1) The veteran may acquire one or more dependents before he or she enters or reenters a program of education. When this occurs, the following rules apply:

(i) The effective date of the increase will be the date of entrance or reentrance if—

(A) The Veterans Administration receives the claim for the increase within 1 year of the date of entrance or reentrance, and

(B) The Veterans Administration receives any necessary evidence within 1 year of its request.

(ii) The effective date of the increase will be the date the Veterans Administration receives notice of the dependent's existence if—

(A) The Veterans Administration receives the claim for the increase more than 1 year after the date of entrance or reentrance, and

(B) The Veterans Administration receives any necessary evidence within 1 year of its request.

(iii) The effective date will be the date the Veterans Administration receives all necessary evidence, if that evidence is received more than 1 year from the date the Veterans Administration requested it.

(2) If the veteran acquires a dependent after he or she enters or reenters a program of education, the increase will be effective on the latest of the following dates:

(i) Date of claim. This term means the following listed in order of their applicability:

(A) Date of the veteran's marriage, or birth of his or her child, or his or her adoption of a child, if the evidence of the event is received within 1 year of the event.

(B) Date notice is received of the dependent's existence if evidence is received within 1 year of the Veterans Administration request.

(C) Date the Veterans Administration receives evidence if this date is more than 1 year after the Veterans Administration request.

(ii) Date dependency arises.

(iii) Date the law permits benefits for dependents generally.

(38 U.S.C. 3010(f)(n))

Cross Reference: See § 3.667 of this chapter as to effective dates with regard to children 18 years of age and older who are attending school.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-4 FRL 1995-4]

Alabama and Florida: New Source Performance Standards and National Emissions Standards for Hazardous Air Pollutant Regulations

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On June 23, 1981, the Alabama Air Pollution Control Commission (AAPCC) approved and adopted revisions to Chapters 12 and 13 and Appendix C of the AAPCC Rules and Regulations. These regulations adopted by reference EPA regulations on New Source Performance Standards (NSPS) and National Emissions Standards for Hazardous Air Pollutants (NESHAPS), with two minor changes in wording. On June 25, 1980, the Florida Department of Environmental Regulation adopted regulations which adopt in part Federal NSPS and NESHAPS regulations by reference. Parts of the EPA regulations were not adopted for various reasons. EPA hereby approves these revisions to the State Implementation Plans.

DATES: These actions will be effective February 22, 1982 unless notice is received on or before January 21, 1982 that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the materials submitted by the States may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460

Library, EPA, Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30365

Office of the Federal Register, Room 8401, 1100 L Street, N.W., Washington, D.C. 20005

Division of Air Pollution Control, Alabama Air Pollution Control Commission, 645 S. McDonough Street, Montgomery, Alabama 36130

Florida Department of Environmental Regulation, Bureau of Air Quality Management, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301

FOR FURTHER INFORMATION CONTACT: Mr. Archie Lee, Air Programs Branch, EPA Region IV at the above address and

telephone number 404/881-3286 or FTS 257-3286.

SUPPLEMENTARY INFORMATION: On March 13, 1981, AAPCC advised EPA of its intention to revise Chapters 12 and 13 of its regulations. A public hearing was held April 14, 1981, at the AAPCC office in Montgomery. The original AAPCC proposal was drafted excluding certain minor sources within Portland cement plants and petroleum refineries which are covered by EPA regulations. As adopted, the revisions make clear that all sources covered by EPA NSPS and NESHAPS regulations are also covered by the state regulations. The revisions were submitted to EPA on June 26, 1981.

The AAPCC regulations differ from EPA's only in that the terms Director and Commission are substituted for Administrator and U.S. Environmental Protection Agency, respectively. While EPA does not object to these changes, it should be made clear that this does not grant to the State Director the authority reserved to the Administrator under 40 CFR Parts 60 and 61 (e.g., approval of alternative testing procedures—40 CFR 60.11(b)).

The Florida Department of Environmental Regulation adopted by reference most of EPA's NSPS and NESHAPS regulations on June 25, 1980. These materials were submitted as SIP revisions on August 28, 1980. The adoption of these regulations was primarily intended to allow the state to receive delegation of authority from EPA to enforce the Federal NSPS and NESHAPS regulations. For various reasons, Florida did not adopt certain parts of the EPA NSPS regulations. Some sections were not adopted because they were inappropriate to state regulations (e.g., list of all EPA and state offices); some, because equivalent state regulations are already in force; others, because the state questioned the technical validity of the regulation (i.e., test methods); others, because litigation challenging the specific EPA regulations is underway (e.g., NSPS Subpart Da for Electric Utility Steam Generating Units); and still others, because certain types of facilities covered by the standards do not exist in the state and are unlikely to be constructed (primary copper and zinc smelters and primary aluminum reduction plants). Certain sections of the NESHAPS regulations were also not adopted, some as inappropriate to state regulations, and others because they were already covered by state regulations as was the case for the NSPS regulations. In addition, certain parts of the asbestos waste disposal regulations were not adopted because they could, under state law, not be enforced by the state air pollution program.

Where substantive differences exist between EPA and state regulations (for example, where the state has failed to adopt NSPS Subpart Da and parts of the NESHAPS asbestos regulation), EPA may be unable to delegate full authority to the state to enforce the EPA regulations not adopted or only partially adopted by the state.

Action

EPA approves the revisions to the Alabama SIP. The revisions only update the existing SIP by adding new source categories which have been promulgated by EPA since the state originally adopted its NSPS and NESHAPS regulations. EPA also approves the revision to the Florida SIP. Because the regulations have been adopted for the purposes of receiving delegation of the program, any substantive difference between the EPA regulations and those adopted by the state will be addressed when determining whether to delegate the NSPS and NESHAPS programs to the state. The approval of these regulations by EPA does not affect in any way EPA's authority to enforce both NSPS and NESHAPS regulations. Because these are minor actions and no comments are expected, EPA is foregoing publication of a notice of proposed rulemaking.

The public should be advised that these actions will be effective February 22, 1982. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on either of these actions, that action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under § 307(b)(1) of the Clean Air Act, judicial review of EPA's approval of this revision is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit on or before February 22, 1982. Under § 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant economic impact on a substantial number of small entities. This action only approves state actions. It imposes no new requirements. The regulations adopted are already enforceable by EPA.

Under Executive Order 12291, EPA must judge whether a regulation is major and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it only approved state actions. It imposes no new requirements.

(Sec. 110, Clean Air Act (42 U.S.C. 7410))

Note.—Incorporation by reference of the State Implementation Plan for the States Alabama and Florida was approved by the Director of the Federal Register on July 1, 1981.

Dated: December 14, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart B—Alabama

1. In § 52.50, paragraph (c) is amended by adding subparagraph (30) as follows:

§ 52.50 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * *

(30) Revisions in Chapters 12 and 13, adopting Federal NSPS and NESHAPS regulations by reference, submitted by the Alabama Air Pollution Control Commission on June 26, 1981.

Subpart K—Florida

2. In § 52.520, paragraph (c) is amended by adding subparagraph (34) as follows:

§ 52.520 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

(34) Revisions in Sections 17-2.21 and 17-2.32 of the Florida Administrative Code, adopting, in part, Federal NSPS and NESHAPS regulations, submitted by the Florida Department of Environmental Regulation on August 28, 1980.

[FR Doc. 81-36641 Filed 12-21-81; 8:45 am]

BILLING CODE 6560-38-M

40 CFR Part 52

[A-1-FRL-2003-2]

Approval and Promulgation of Implementation Plans; Connecticut Revision—Sulfur-in-Fuel Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Revisions to the State Implementation Plan (SIP) for the State of Connecticut were submitted to EPA on November 16, 1981. The purpose of this Notice is to approve the revisions. This will allow the Uniroyal plant in Naugatuck and the Pratt and Whitney Aircraft Division plants in North Haven and Middletown to use fuel oil containing 1.0 percent sulfur by weight or its equivalent under specific operating conditions.

EFFECTIVE DATE: December 22, 1981.

ADDRESSES: Copies of the Connecticut document which is incorporated by reference are available for public inspection during normal business hours at the Environmental Protection Agency, Room 1903 JFK Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C.; the Office of the Federal Register, 1100 L Street, N.W., Room 8401, Washington, D.C.; and the Connecticut Department of Environmental Protection, Air Compliance Unit, State Office Building, Hartford, Connecticut 06115.

FOR FURTHER INFORMATION CONTACT: Sarah Simon, Air Branch, Room 1903, JFK Federal Building, Boston, Massachusetts 02203, (617) 223–4448.

SUPPLEMENTARY INFORMATION: On September 11, 1981, EPA proposed approval in the **Federal Register** (46 FR 45378) of revisions to the Connecticut State Implementation Plan (SIP) proposed by the Connecticut Department of Environmental Protection (DEP). This action supplements the 1% sulfur oil revision approval published in the **Federal Register** on November 18, 1981 (46 FR 56812) by approving the new 1% sulfur-in-oil limit for two sources not previously included and approving a 1% sulfur oil equivalent emission rate for a third source whose operating conditions have been revised. These source approvals were submitted to EPA by the Commissioner of the Connecticut DEP on November 16, 1981.

A thorough discussion of the 1% sulfur oil SIP revision, its technical support, EPA's rulemaking procedures, and EPA's reasons for approval were presented in the Notice of Proposed Rulemaking and will not be repeated here. Briefly, the original screening analyses for 17 sources did not demonstrate compliance with the National Ambient Air Quality Standards (NAAQS), but EPA proposed to approve the revision allowing 1.0% sulfur oil use by all sources provided that further modeling demonstrations or enforceable source operating restrictions that ensure NAAQS compliance were presented to EPA.

Further state review of three sources, with operating conditions imposed, has demonstrated compliance with the NAAQS. These reviews and the necessary operating conditions were submitted to EPA for inclusion in the SIP. Based on the state's technical demonstrations, EPA is approving these sources to burn higher sulfur fuel oil. The new source operating restrictions have been specified in revised state orders and are incorporated into the SIP as part of this rulemaking. These sources are:

1. Uniroyal Chemical Incorporated in Naugatuck;
2. United Technologies Corporation, Pratt and Whitney Aircraft Division in Middletown;
3. United Technologies Corporation, Pratt and Whitney Aircraft Division in North Haven.

After evaluation of the state's submittal, the Administrator has determined that these Connecticut revisions meet the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, they are approved as revisions to the Connecticut SIP.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709, January 27, 1981). The attached rules constitute SIP approvals under Section 110 within the terms of the January 27 certification.

This action only approves state actions and it imposes no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. These regulations are not Major because they approve state actions and add no new requirements.

The Agency finds that good cause exists for making this action effective immediately since these implementation plan revisions are already in effect under state law and EPA approval imposes no additional regulatory burden.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's Notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

(Sec. 110(a) and sec. 301(a) of the Clean Air Act, as amended, 42 U.S.C. 7410 and 7601)

Note.—Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1981.

Dated: December 16, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart H—Connecticut

1. Section 52.370, paragraph (c) is amended by adding subparagraph (19) as follows:

§ 52.370 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(19) Revisions submitted by the Commissioner of the Connecticut Department of Environmental Protection on November 16, 1981. These provisions supersede portions of the revisions identified under (c)(18).

2. Section 52.380 is amended by removing and reserving paragraph (d)(9)(ii) and (9)(iv) as follows:

§ 52.380 Rules and regulations.

* * * * *

(d) Non-Part D—No action:

* * * * *

(9) Use of 1 percent sulfur content fuel by the following residual oil burning sources, identified under section 52.370, subparagraph (c)(18)

* * * * *

(ii) [Reserved]

* * * * *

(iv) [Reserved]

* * * * *

BILLING CODE 6560-38-M

40 CFR Part 52

[A-2-FRL 1993-8]

Approval and Promulgation of Implementation Plans; Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces that the Environmental Protection Agency (EPA) is approving the deletion of certain transportation control measures from the New York State Implementation Plan (SIP) for the New York City metropolitan area. These measures had been made part of the SIP in 1973. However, they are now being deleted because EPA generally agrees with the State that there has been an adequate demonstration that these 1973 transportation control measures are not reasonably available or that they have been adequately addressed in the 1979 SIP revision.

EFFECTIVE DATE: This action is effective December 22, 1981.

ADDRESSES: Copies of the April 17, 1981 report submitted by New York State, public comments, and a "Rulemaking Support Document" are available for inspection during normal business hours at the following addresses:

Environmental Protection Agency, Region II, Air Programs Branch, Room 1005, 26 Federal Plaza, New York, New York 10278

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

A copy of the State report is also available for inspection during normal business hours at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Program Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10278 (212) 264-2517.

SUPPLEMENTARY INFORMATION:

I. Introduction

On June 22, 1973 (38 FR 16550) the Environmental Protection Agency (EPA) published its approval of a State submitted revision to the New York State Implementation Plan (SIP). This revision consisted of a number of transportation control measures designed to attain by May 31, 1975 and maintain thereafter national ambient air quality standards for carbon monoxide and ozone in the New York portion of the New Jersey-New York-Connecticut air quality control region (AQCR). These transportation control measures are collectively referred to as the 1973 transportation control plan (1973 TCP).

Under provisions of the 1977 Amendments to the Clean Air Act, on March 3, 1978 (43 FR 8962), the entire New York portion of the New Jersey-New York-Connecticut AQCR was designated as not meeting national standards for ozone and parts were designated as not meeting standards for carbon monoxide. In response to these "nonattainment designations" and as required by Part D of the Clean Air Act, on May 16, 1979, the State of New York submitted a revision to the SIP for the New York City metropolitan area (1979 SIP). This 1979 SIP revision contained a number of transportation control measures as well as a request to make the 1979 SIP a complete successor to the 1973 TCP and thus delete the 1973 TCP from the SIP. On May 21, 1980 (45 FR 33981) and September 9, 1981 (46 FR 44979) EPA conditionally approved this SIP revision, but did not act on the State's request to delete the 1973 TCP. EPA did not have adequate information at the time of its May 21, 1980 action to conclude that the 1979 SIP adequately accounted for the 1973 TCP (i.e., that the 1979 SIP contained necessary commitments to implement, as expeditiously as practicable, all transportation control measures that are currently reasonably available). Subsequent to EPA's conditional approval actions various submissions made by the State in response to these conditions have been approved in separate actions. As a result of these separate actions, the transportation control measures contained in the 1979 SIP are now fully approved by EPA.

On April 17, 1981 EPA received a report prepared by the New York State Department of Environmental Conservation which demonstrated how the 1973 TCP control measures were addressed in the 1979 SIP. EPA reviewed the 1979 SIP in light of the April 17, 1981 report and generally agrees with the State that there has been an adequate demonstration made that either the 1973 TCP measures are not reasonably available or that they have been adequately addressed, at times in modified form, in the 1979 SIP. On August 4, 1981 (46 FR 39812) EPA published a proposal to delete under certain provisions all measures contained in the 1973 TCP.

II. Comments Received

EPA received three comments in response to its August 4, 1981 proposal. These were received from the New York State Department of Environmental Conservation, the Natural Resources Defense Council, and William Hoppen, an attorney. A detailed summary of these comments and EPA's response to them appear in a separate "Rulemaking Support Document."

Generally, the comments reveived were directed at the degree to which the transportation control measures contained in the 1979 SIP adequately replace those in the 1973 TCP. It was noted by the two non-governmental commentators that some measures are not being implemented as comprehensively or as stringently as originally conceived in the 1973 TCP. It was also noted that, in some cases, the current commitments to implement measures are not as firm as was previously the case. In response, EPA believes that where such situations exist, the State is making an effort to implement control measures to the extent that it is reasonable to do so. The 1979 SIP contains a program for the study of measures which will lead in many cases to their further implementation. Moreover, the State is reevaluating its entire control program in preparation of a 1982 SIP revision and is committed to implement all reasonably available control measures.

Comments were also received on the procedural issue of whether the State followed the required statutory procedures in revising its SIP to delete the 1973 TCP. The State, in fact, requested the deletion of the 1973 TCP when it submitted its 1979 SIP. All necessary procedures were followed at that time. The State's April 17, 1981 document is not a SIP revision and need not be treated as one. However, the public was given an opportunity to comment on the State's document and on EPA's proposed action in the August 4, 1981 issue of the **Federal Register**.

With regard to certain provisions identified in EPA's August 4, 1981 notice of proposed rulemaking, one commenter noted that the intention by EPA to accept the soon to be completed New York City Department of Transportation document, "City Streets," as a replacement to the 1973 control measure related to traffic management was premature. It was pointed out that "City Streets" is not yet available. In response, EPA has had informal communications with the New York City Department of Transportation and is satisfied that the document, when completed, could serve as a traffic management plan. Moreover, EPA is confident that the document will be developed with opportunity for input from the public.

In the August 4, 1981 notice of proposed rulemaking, EPA proposed to delete the 1973 TCP control measures related to public transit improvements once related measures contained in the 1979 SIP were approved or conditionally approved. No comments were received on this issue. On September 9, 1981 (46 FR 44979), EPA approved these 1979 SIP measures. Therefore, EPA is also taking action today to delete the public transit improvement measures contained in the 1973 TCP as well as the other measures identified in its August 4, 1981 proposal.

III. EPA's Final Action

EPA is deleting all transportation control measures as contained in the 1973 TCP from the New York SIP. EPA agrees with the State that there has been adequate demonstration that the 1973 transportation control measures are not reasonably available or that they have been adequately addressed in the 1979 SIP.

On May 12, 1980 and again on May 29, 1981, the State requested that EPA delete from its SIP two state regulations, Part 217, Emissions From Motor Vehicles Propelled by Gasoline Engines, and Part 218, Emissions from Vehicles Propelled by Diesel Engines. (See 46 FR 55690, November 12, 1981). Since these two regulations are related to the 1973 TCP and are adequately replaced, where appropriate, by provisions contained in the 1979 SIP, they can be deleted at this time. Therefore, EPA today is deleting Parts 217 and 218 from the SIP. EPA is also deleting the federally promulgated regulation 40 CFR 52.1683, "Transportation and Land Use Controls" from the SIP. This regulation calls for the State to provide legislative authority and the necessary adopted regulations and administrative policies needed to carry out transportation and land use controls. This regulation is no longer needed because the 1979 SIP meets all appropriate requirements including those related to legal authority, regulations and policy.

Today's action is being made effective immediately since it provides no additional burden on the affected parties.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709; January 27, 1981). The attached rule constitutes a SIP approval under Sections 110 and 172 within the terms of the January 27 certification. This action only approves state actions. It imposes no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because it deletes rather than imposes regulatory requirements.

(Secs. 110, 172 and 301 of the Clean Air Act, as amended (42 U.S.C. 7410, 7502, and 7601))

Dated: December 10, 1981.

Anne M. Gorsuch,

Administrator, Environmental Protection Agency.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40, Chapter I, Subchapter C, Part 52, Code of Federal Regulations is amended as follows:

Subpart HH—New York

§ 52.1679 [Amended]

1. Section 52.1679 is amended to remove reference to the New York State regulations Part 217 and Part 218.

§ 52.1683 [Reserved]

2. Section 52.1683 is removed and reserved.

[FR Doc. 81-36443 Filed 12-21-81; 8:45 am]

BILLING CODE 6560-38-M

---

40 CFR Part 52

[A-10-FRL-1988-8]

Approval and Promulgation of Implementation Plan Revisions; Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice EPA announces its approval of the current Washington SIP regulations as applicable State wide for both attainment and non-attainment areas. This action will be effective on February 22, 1982 unless notice is received before January 21, 1982 that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal 30-day comment period prior to final rulemaking on this action.

EFFECTIVE DATE: This action is effective February 22, 1982.

ADDRESSES: Copies of materials submitted to EPA may be examined during normal business hours at:

Central Docket Section (10A-80-9), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, M/S 629, Seattle, Washington 98101.

State of Washington, Department of Ecology, 4224 Sixth Avenue S.E., Lacey, Washington 98503.

Office of Federal Register, 1100 L Street, Room 8401, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Clark L. Gaulding, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone No. (206) 442-1275, (FTS) 399-1275.

SUPPLEMENTARY INFORMATION: On April 27, 1979 the State of Washington submitted revisions to the Washington SIP designed to "comply with the Federal Clean Air Act requirements to (1) submit a plan for attainment and maintenance of Federal standards in all areas of the State and (2) incorporate additional program elements and procedures into the plan."

EPA's actions to date have been confined to the portion of the SIP dealing with Part D (non-attainment area plans) of the Clean Air Act (herein referred to as the Act). Our purpose was to approve those portions of the plan as soon as possible to avoid imposition of source growth limitations described in Section 110 of the Act. Those actions having been completed, EPA is approving the SIP as described in 40 CFR 52.2470 to be applicable to all areas of the State. Specifically, this approval will clarify the intent of the State and EPA to administer the SIP regulations in all areas of the State, not just in non-attainment areas. This will make the Federally-approved SIP consistent with the current State and local air pollution control programs.

This action will be effective February 22, 1982. However, if notice is received within 30-days from publication that someone wishes to submit adverse or critical comments on any or all of the revisions approved herein, the action on those revisions will be withdrawn and EPA will initiate the normal rulemaking process of proposal and consideration of comments prior to final rulemaking.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60-days of the date of publication of this Notice. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator has certified that SIP approvals under 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709, January 27, 1981). This action constitutes a SIP approval under Section 110 and 172 within the terms of the January 27, 1981 certification.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement for regulatory impact analysis. This regulation is not major because EPA is approving an action taken by the State and, therefore, not establishing new requirements.

(Secs. 110 and 172, Clean Air Act as amended (42 U.S.C. 7410(a) and 7502))

Note.—Incorporation by reference of the Implementation Plan for the State of Washington was approved by the Director of the Office of the Federal Register on July 19, 1981.

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

Subpart WW—Washington

1. Section 52.2479 is amended by adding Note 4 to Table 52.2479

§ 52.2479 Rules and regulations.

* * * * *

Note 4.—The regulations listed in Table 52.2479 are applicable in attainment and nonattainment areas.

BILLING CODE 6560-38-M

40 CFR Part 60

[A-5-FRL 2010-8]

Standards of Performance for New Stationary Sources; Additional Source Categories Delegated to Ohio and Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of delegation of authority.

SUMMARY: The States of Ohio and Indiana have both received delegation of authority to implement certain new source performance standards (NSPS) under section 111(c) of the Clean Air Act. Both States have requested and received authority to implement the NSPS for additional source categories.

DATES: The effective dates of the delegations are February 6, 1981 for Indiana and November 5, 1979 and August 27, 1980 for Ohio.

FOR FURTHER INFORMATION CONTACT: Ronald J. Van Mersbergen, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6056.

SUPPLEMENTARY INFORMATION:

A. Indiana

The State of Indiana received authority on April 21, 1976 to implement the twelve NSPSs published at 40 CFR Part 60 Subparts D through O (Subparts Da and Ka were not promulgated at that time). the April 21, 1976 delegation, issued in accordance with section 111(c) of the Clean Air Act, was published on September 30, 1976 (41 FR 43237). On June 6, 1977 the delegation was amended and twelve more source categories were added so that the delegation then included Subparts D through AA (Subparts Da and Ka were not promulgated at that time). The revised delegation was published on September 12, 1977 (42 FR 45705).

On January 5, 1981 the State requested authority for eight additional source categories and authority for any revisions to the previously delegated source categories. A revised delegation of authority was granted on February 6, 1981 and is as follows:

February 6, 1981.

Certified Mail Return Requested

Mr. Ralph C. Pickard,
Technical Secretary, Indiana Air Pollution Control Board, 1330 West Michigan Street, Indianapolis, Indiana

Dear Mr. Pickard: Thank you for your January 5, 1981 letter requesting an expansion of your existing delegated authority to include the regulations for additional New Source Performance Standards (NSPS) categories and revisions to NSPS which you already have been delegated.

We have reviewed your request and have found your present new source review programs and procedures to be acceptable. Therefore, the U.S. Environmental Protection Agency (USEPA) is delegating to the State of Indiana authority to implement and enforce the NSPS program for additional categories and for regulation revisions of previously delegated source categories. The following represents the NSPS now delegated to Indiana:

40 CFR Part 60 Sub, arts D through HH as amended by 45 FR 66742 October 7, 1980 and 45 FR 74846 November 12, 1980.

The terms and conditions applicable to this delegation are in the delegation letters of April 21, 1976 and June 6, 1977 except that condition 4 of both letters which prevents State enforcement in Federal Facilities is now eliminated. Section 118(a) of the Clean Air Act provides States with authority to enforce permit requirements in Federal Facilities.

A notice of this delegated authority will be published in the **Federal Register.**

This delegation is effective upon the date of this letter unless the USEPA receives written notice from the IAPCB of objections within 10 days of receipt of this letter.

Sincerely yours,

John McGuire,

Regional Administrator.

B. Ohio

On June 3, 1976, the State of Ohio requested delegation of authority to implement the NSPSs promulgated as of that time. EPA on August 4, 1976 delegated authority to Ohio to implement 40 CFR Part 60 Subparts D through AA (Subparts Da and Ka were not promulgated at that time). That delegation was published on December 21, 1976 (41 FR 55575). On October 31, 1979 and May 12, 1980 Ohio requested authority for additional source categories and any revisions of the previously delegated source categories. These requests were granted on November 5, 1979 and August 27, 1980 respectively. The delegation now includes source categories in Subpart D through Subpart BB and Subparts DD, GG, and HH.

The following letters are amendments to the August 4, 1976 delegation.

November 5, 1979.

Mr. James F. McAvoy,
Director, Ohio Environmental Protection Agency, P.O. Box 1049, Columbus, Ohio

Dear Mr. McAvoy: Thank you for your October 3, 1979 letter requesting expansion of your existing Delegation of Authority to include additional New Source Performance Standards (NSPS) categories.

We have reviewed your request, and have found your proposed program and procedures to be acceptable. Therefore, we are delegating to the State of Ohio authority to

implement and enforce the NSPS program for the following source categories:

1. Kraft Pulp Mills (Subpart BB), Promulgation Date—February 23, 1978; Clarifying amendments to the standard and Reference Method 16, Promulgation Date—August 7, 1978.

2. Lignite-fired Steam Generators (Amendments to Subpart D), Promulgation Date—March 7, 1978.

3. Lime Manufacturing Plants (Subpart HH), Promulgation Date—March 7, 1978.

4. New, Modified and Reconstructed Grain Elevators (Subpart DD), Promulgation Date—August 3, 1978.

5. Electric Utility Steam Generating Units (Subpart Da), Promulgation Date—June 11, 1979.

6. (a) Petroleum refineries—Reevaluation of opacity standards, Promulgation Date—June 24, 1977.

(b) Petroleum refinery—Claus sulfur recovery plants, Promulgation Date—March 15, 1978.

(c) Petroleum Refineries—Clarifying Amendments to Subpart J, Promulgation Date—March 12, 1979.

7. Opacity standard for basic oxygen process furnaces (Amendments to Subpart N), Promulgation Date—April 23, 1978.

8. Revisions to Reference Methods 1–8, NSPS Appendix A, Promulgation Date—August 18, 1977; Corrections to Amendments to Reference Methods 1–8 (March 23, 1978).

9. Sewage Sludge Incinerators—Amendments to Subpart O, Promulgation Date—November 16, 1977.

10. Primary Copper Smelters—Amendments to General Provisions and Copper Smelter Standards, Promulgation Date—November 1, 1977.

11. Emission Guidelines and times for compliance for control of sulfuric acid mist (addition to Subpart G), Promulgation Date—October 18, 1977.

12. Revisions to Reference Method 11 for determining the hydrogen sulfide content of fuel gas streams, Promulgation Date—January 10, 1978.

13. Amendments to Reference Method 13 A and B—testing and analysis procedures for fluoride emissions from stationary sources, Promulgation Date—November 29, 1975.

14. Amendment to Reference Method 16—for determining total reduced sulfur emissions from stationary sources, Promulgation Date—January 12, 1979.

15. Amendment to Sec. 60.11(b) Compliance with Standards and Maintenance Requirements, Promulgation Date—May 23, 1977.

We are further amending the existing Delegation of Authority under section 111 dated August 4, 1976, by deleting Condition 3 so that this delegation may reflect recent Amendments to the Clean Air Act which deleted the exception relating to delegated authority with respect to new stationary sources owned or operated by the United States. Ohio can now enforce New Source Performance Standards against Federal sources.

A notice of this amended authority will be published in the **Federal Register** in the near future.

Since this delegation is effective upon the date of this letter, there is no requirement that the Ohio Environmental Protection Agency (OEPA) notify the United States Environmental Protection Agency (USEPA) of its acceptance.

Unless USEPA receives written notice from OEPA of objections within 10 days of the receipt of this letter, the OEPA will be deemed to have accepted all of the terms of this delegation.

Sincerely yours,

John McGuire,

Regional Administrator.

August 27, 1980.

Certified Mail Return Requested

Mr. James F. McAvoy,

Director, Ohio Environmental Protection Agency, P.O. Box 1049, Columbus, Ohio.

Dear Mr. McAvoy: Thank you for your May 12, 1980, letter requesting expansion of your existing Delegation of Authority to include additional New Source Performance Standards (NSPS) categories.

We have reviewed your request, and have found your present program and procedures to be acceptable. Therefore, we are delegating to the State of Ohio authority to implement and enforce the NSPS program for the following source categories.

1. Gas turbines in Subpart GG, promulgated September 10, 1979.

2. Petroleum refinery—Claus sulfur recovery plants, amendment to Subpart O, promulgated October 25, 1979.

3. Petroleum liquid storage vessels construction after June 11, 1973 and prior to May 19, 1979, which is a revision to Subpart K, promulgated April 4, 1980.

4. Petroleum liquid storage vessels constructed after May 18, 1979 in subpart Ka, promulgated April 4, 1980.

The terms and conditions applicable to this delegation are in the delegation letter of August 4, 1976, as amended by the November 5, 1979 letter.

A notice of this delegated authority will be published in the **Federal Register.**

Since this delegation is effective upon the date of this letter, there is no requirement that the Ohio Environmental Protection Agency (OEPA) notify the U.S. Environmental Protection Agency (USEPA) of its acceptance.

Unless USEPA receives written notice from OEPA of objections within 10 days of receipt of this letter, the OEPA will be deemed to have accepted all of the terms of this delegation.

Sincerely yours,

John McGuire,

Regional Administrator.

As additional source categories are promulgated by EPA and delegated to States, the delegation of authority agreements will be amended and published in the **Federal Register.**

Dated: December 3, 1981.

Valdas V. Adamkus,

Regional Administrator.

40 CFR Part 60

[A-10-FRL 2010-6]

Standards of Performance for New Source Performance Standards; Delegation to the State of Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of delegation.

SUMMARY: On December 3, 1981, EPA delegated to the State of Oregon Department of Environmental Quality additional source categories under the New Source Performance Standards as approved in their OAR 340–25–505 to 535. The additional source categories are: coal preparation plant, ferroalloy production facilities, steel plants—electric arc furnaces, kraft pulp mills, grain elevators, stationary gas turbines, electric utility steam generating units, and glass manufacturing plants. This delegation will amend the November 10, 1975 and April 8, 1978 detegations to the State of Oregon.

EFFECTIVE DATE: December 3, 1981.

ADDRESSES: The related material in support of this delegation may be examined during normal business hours at the following locations:

Central Docket Section, (10A–81–6), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20400.

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101.

State of Oregon, Department of Environmental Quality, 522 S.W. Fifth Avenue, Portland, Oregon 97207.

FOR FURTHER INFORMATION CONTACT: Mark H. Hooper, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442–1260, FTS: 399–1260.

SUPPLEMENTARY INFORMATION: On November 10, 1975, the Regional Administrator of EPA, Region 10 delegated to the State of Oregon the authority to implement and enforce NSPS for twelve categories of stationary sources as promulgated by EPA prior to January 1, 1975. A Notice announcing this delegation was published in the **Federal Register** on February 26, 1976 (35 FR 7749). On April 3, 1978 an additional source category under NSPS was delegated to the State and was published in the **Federal Register** on May 10, 1978 (43 FR 20055).

The State of Oregon in a letter dated May 22, 1981 requested delegation of

eight additional source categories under NSPS as promulgated by EPA prior to October 8, 1980. The letter granting this additional delegation of authority to the State of Oregon was dated December 5, 1981 and is as follows:

Hon. Victor Atiyeh,
Governor of Oregon,
Salem, Oregon

Dear Governor Atiyeh: On May 22, 1981, William Young, Director of the Department of Environmental Quality (DEQ), requested that EPA extend the delegation of authority to enforce additional source categories under the New Source Performance Standards (NSPS) granted to the State of Oregon on November 10, 1975. We have reviewed that request and hereby delegate to DEQ the authority to enforce the source categories listed in OAR 340–35–505 to 535 as follows:

Coal Preparation Plants
Ferroalloy Production Facilities
Steel Plants—Electric Arc Furnaces
Kraft Pulp Mills
Grain Elevators
Stationary Gas Turbines
Electric Utility Stream Generating Units
Glass Manufacturing Plants

This delegation is subject to the conditions outlined in the original letter of delegation dated November 10, 1975 and published in the **Federal Register** on February 26, 1976 (36 FR 7749) and in a later delegation dated April 3, 1978 and published in the **Federal Register** on May 10, 1978 (43 FR 20055). In addition, EPA hereby delegates to the State of Oregon the authority to enforce revisions to NSPS which have been promulgated through October 8, 1980.

A Notice announcing this delegation will be published in the **Federal Register** in the future. The Notice will state, among other things, that effective immediately, all reports required pursuant to the Federal NSPS listed in the State should be submitted to the State of Oregon, Department of Environmental Quality, P.O. Box 1760, Portland, Oregon 97207. Any reports which have been or may be received in this Office prior to the publication of the Notice will be forwarded to the Department of Environmental Quality.

Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives from the State written notice of objections within 10 days of the date of receipt of this letter, the State will be deemed to have accepted all the terms of the delegation.

An advance copy of this **Register** is enclosed for your information.

Sincerely yours,

John R. Spencer,
Regional Administrator.

(Sec. 110, Clean Air Act, 42 U.S.C. 7410(a) and 7502)

Dated: December 3, 1981.

L. Edwin Coate,
Acting Regional Administrator.

40 CFR Part 60

[A–6–FRL 2010–7]

Delegation of New Source Performance Standards to State of Utah

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of delegation.

SUMMARY: The Environmental Protection Agency (EPA) hereby places the public on notice of its delegation of additional NSPS authority to Utah. This action is necessary to bring the State of Utah's NSPS program delegation up to date with recent EPA promulgations and amendments of NSPS categories. This action does not create any new regulatory requirements affecting the public. The effect of the delegation is to shift primary program responsibility for the affected NSPS source categories from EPA to the State of Utah.

EFFECTIVE DATE: November 23, 1981.

FOR FURTHER INFORMATION CONTACT: Rex Callaway, 8E–GE, Attorney Advisor, Environmental Protection Agency, (EPA) Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. Telephone (303) 837–2361.

SUPPLEMENTARY INFORMATION: See the letter included in this notice to the Governor of Utah.

Since December 23, 1971, pursuant to section 111 of the Clean Air Act, as amended, the Administrator promulgated several regulations establishing standards of performance (NSPS) for twelve (12) categories of new stationary sources.

Section 111(c) directs the Administrator to delegate his authority to implement and enforce NSPS to any State which has submitted adequate procedures. Nevertheless, the Administrator retains concurrent authority to implement and enforce the standards following delegation of authority to the State.

On July 28, 1975, the Governor of the State of Utah submitted to the EPA Regional Office a request for delegation of authority. Included in that request were procedures for NSPS and information on available resources to implement such review. Also included in that request were copies of the State of Utah regulations which incorporate the Federal emission standards and testing procedures set forth in 40 CFR Part 60. After thorough review of that request and applicable State statutes, the Regional Administrator determined that, for those twelve (12) source categories, delegation was appropriate, subject to certain conditions. On May 13, 1976, by letter to the Governor, NSPS authority was delegated to the State of Utah, subject to certain enumerated conditions. Notice of the delegation appeared in the **Federal Register** on June 15, 1976 (41 FR 24215).

On July 7, 1981, the State of Utah requested a further delegation of authority for all additional NSPS categories. The Environmental Protection Agency revised the twelve (12) categories of new stationary sources delegated to Utah on May 13, 1976, several times between July 28, 1975, and July 7, 1981. The Environmental Protection Agency also established and, subsequently revised the following additional NSPS categories during the same time period: 40 CFR Subparts Da, P, Q, R, S, T, U, V, W, X, Y, Z, AA, BB, CC, DD, HH, GG, JJ, MM and PP.

On July 7, 1981, the Governor of the State of Utah submitted to the EPA Regional Office a request for delegation of authority for these additions and revisions to the NSPS. After a thorough review of the Utah program, the Regional Administrator has determined that, for the source categories set forth in paragraph A of the following official letter to the Governor of the State of Utah, delegation is appropriate. Paragraph B provides that the conditions set forth in paragraphs 1 through 14 of the letter of delegation of May 13, 1976 (41 FR 24215, June 15, 1976) shall be incorporated herein by reference, and shall be fully effective as if they were set forth in full. The text of the letter from the Regional Administrator to the Governor of the State of Utah, dated November 23, 1981, is set forth below:

Dear Governor Matheson: I am pleased to inform you that we are delegating to the State of Utah authority to implement and enforce certain New Source Performance Standards (NSPS) as provided for under the Clean Air Act. This decision is in response to Mr. Alvin E. Rickers' request of July 7, 1981. This delegation includes amendments to 40 CFR Subparts D, E, F, G, H, I, J, K, L, M, N and O as promulgated by EPA through July 7, 1981, and delegation of the following NSPS categories as promulgated and amended by EPA as of July 7, 1981: 40 CFR Subparts Da, P, Q, R, S, T, U, V, W, X, Y, Z, AA, BB, CC, DD, GG, HH, JJ, MM and PP.

We have reviewed the pertinent laws and regulations of the State of Utah and have determined that they provide an adequate and effective procedure for implementation and enforcement of these additional NSPS by the State of Utah. Therefore, we hereby delegate our authority, pursuant to Section 111(c) of the Clean Air Act, as amended, for

implementation and enforcement of the NSPS to the State of Utah as follows:

A. Authority for all sources located in the State of Utah subject to the standards of performance for new stationary sources as amended as of July 7, 1981, including the following categories: Electric Utility Steam Generating Units (40 CFR Subpart Da), Primary Copper Smelters (40 CFR Subpart P), Primary Zinc Smelters (40 CFR Subpart Q), Primary Lead Smelters (40 CFR Subpart R), Primary Aluminum Reduction Plants (40 CFR Subpart S), Phosphate Fertilizer Industry: Wet Process Phosphoric Acid (40 CFR Subpart T), Phosphate Fertilizer Industry: Superphosphoric Acid (40 CFR Subpart U), Phosphate Fertilizer Industry: Diammonium Phosphate (40 CFR Subpart V), Phosphate Fertilizer Industry: Triple Superphosphate (40 CFR Subpart W), Phosphate Fertilizer Industry: Granular Triple Superphosphate (40 CFR Subpart X), Coal Preparation Plants (40 CFR Subpart Y), Ferroalloy Production Facilities (40 CFR Subpart Z), Iron and Steel Plants (40 CFR Subpart AA), Kraft Pulp Mills (40 CFR Subpart BB), Glass Manufacturing Plants (40 CFR Subpart CC), Grain Elevators (40 CFR Subpart DD), Stationary Gas Turbines (40 CFR Subpart GG), Lime Manufacturing Plants (40 CFR Subpart HH), Degreasers (40 CFR Subpart JJ), Automobile and Light-Duty Trucks Surface Coating Operations (40 CFR Subpart MM) and Ammonium Phosphate (40 CFR Subpart PP).

The delegation of these additional categories is based upon the following conditions:

B. All conditions contained in the letter of delegation dated May 13, 1976, from John A. Green, Regional Administrator, Environmental Protection Agency, Region VIII, to Governor Calvin L. Rampton, are incorporated herein by reference, and shall be fully effective as if they were set forth in full.

Since the original delegation to the State of Utah, EPA has also amended the NSPS for certain source categories. EPA revisions to the following categories through July 7, 1981, have been incorporated into the Utah Air Conservation Regulations: Fossil-Fuel Fired Steam Generators (40 CFR Subpart D), Incinerators (40 CFR Subpart E), Portland Cement Plants (40 CFR Subpart F), Nitric Acid Plants (40 CFR Subpart G), sulfuric Acid Plants (40 CFR Subpart H), Asphalt Concrete Plants (40 CFR Subpart I), Petroleum Refineries (40 CFR Subpart J), Storage Vessels for Petroleum Liquids (40 CFR Subpart K), Secondary Lead Smelters (40 CFR Subpart L), Secondary Brass, Bronze and Ingot Production Plants (40 CFR Subpart M), Iron and Steel Plants (40 CFR Subpart N), and Sewage Treatment Plants (40 CFR Subpart O). Authority to implement and enforce these revisions to NSPS is hereby delegated to the State of Utah.

A notice announcing this delegation will be published in the **Federal Register**. Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives written notice of any objections within 10 days of receipt of this letter, the State will be deemed to have accepted all of the terms of this delegation.

As you know, the Clean Air Act gives primary responsibility for control of air pollution to the states, and thus it is EPA's policy to delegate programs such as the New Source Performance Standards to states whenever possible. We look forward to working with the State of Utah in the implementation of the Clean Air Act and other environmental legislation in the challenging days ahead.

Sincerely yours,

Steven J. Durham,

Regional Administrator.

Copies of the request for delegation of authority and the Regional Administrator's letter of delegation are available for public inspection at the following addresses: Utah Air Conservation Committee, State Division of Health, 44 Medical Drive, Salt Lake City, Utah 84113; Environmental Protection Agency, Region VIII, Enforcement Division, 1860 Lincoln Street, Denver, Colorado 80295; Environmental Protection Agency, Division of Stationary Source Enforcement, Waterside Mall, Room 3202, 401 M Street, S.W., Washington, D.C. 20460.

This Notice is issued under the authority of sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 1857, *et seq.*) and places the public on notice of the Regional Administrator's delegation which took effect on November 23, 1981.

Dated: November 30, 1981.

Steven J. Durham,

Regional Administrator, Region VIII.

BILLING CODE 1505-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA-6223]

National Flood Insurance Program; Suspension of Community Eligibility; Alabama et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended effective the dates listed within this rule because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATES: The third date ("Susp.") listed in the fifth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Acting Director, Natural Hazards Division, (202) 287-0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date flood insurance is no longer available in the community.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973

(Pub. L. 93–234), as amended, provides that no direct Federal financial assistance [except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elasped since identification of the community as having flood prone areas, as shown on the Federal Emergency Management Agency's initial flood insurance map of the community. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provision of 5 U.S.C. 605(b), the Associate Director of State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future flood loosses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in non-compliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

BILLING CODE 6718-01-M

44 CFR Part 65

[Docket No. FEMA 6222]

List of Communities With Special Hazard Areas Under National Flood Insurance Program; Idaho et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The effective date shown at the top right of the table or January 21, 1982, whichever is later.

FOR FURTHER INFORMATION CONTACT: Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street Southwest, Donohoe Building—Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply in respect to conventional mortgage loans by federally regulated, insured, supervised, or approved lending institutions.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the **Federal Register** or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the **Federal Register** or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 64 of Title 44 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128).

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information or regarding the completed stages of engineering tasks in delineating the special flood hazard areas of the specified community. This rule imposes no new requirements or regulations on participating communities.

Section 65.3 is amended by adding in alphabetical sequence a new entry to the table:

§ 65.3 List of communities with special hazard areas (FHBMs in effect).

EFFECTIVE DATE December 29, 1981

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 81-234; RM-3744 & 3774]

FM Broadcast Stations in Beaumont, Lake Jackson and Port Lavaca, Texas; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action makes the following FM channel substitutions: Channel 300 for Channel 299 at Beaumont, Texas; Channel 298 for Channel 297 at Lake Jackson, Texas; and Channel 227 for Channel 240A at Port Lavaca, Texas. This action also modifies the licenses of Stations KWIC, Beaumont, KGOL, Lake Jackson, and KGUL–FM, Port Lavaca, to specify operations on the newly assigned channels. These actions are taken in response to petitions filed by ABC Houston Radio, Inc., and KIKK, Inc. These channel substitutions will remove short-spacing restrictions on the proposed transmitter relocation of Houston FM Stations KSRR and KIKK.

DATE: Effective: February 5, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Michael A. McGregor, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: December 1, 1981.

Released: December 10, 1981.

By the Acting Chief, Policy and Rules Division.

1. Before the Commission is a *Notice of Proposed Rule Making*, 46 FR 22008, published April 15, 1981, proposing the following amendments to the FM Table of Assignments: the substitution of FM Channel 300 for Channel 299 at Beaumont, Texas; the substitution of Channel 298 for Channel 297 at Lake Jackson, Texas; and the substitution of Channel 227 or Channel 296A for Channel 240A at Port Lavaca, Texas. Additionally, the licensees of Stations KWIC, Beaumont, Texas, KGOL, Lake Jackson, Texas, and KGUL–FM, Port Lavaca, Texas, were ordered to show cause why their licenses should not be modified to specify operation on the newly assigned channels. These actions were proposed in response to petitions filed by KAUM, Inc., former licensee of Station KSRR(FM), Houston, Texas, and KIKK, Inc., licensee of Station KIKK–FM, Houston, Texas.

2. KSRR and KIKK are two of ten Houston-area FM stations who have applied to the Commission for permission to move their present transmitters from a site in downtown Houston to a site approximately 24 kilometers (15 miles) southwest of the city. According to KSRR and KIKK, this move is necessary because high rise construction adjacent to the stations' present transmitter sites will cause serious signal deterioration which will result in inferior service to the Houston listening area. The new transmitter site was chosen because a tall tower accommodating all 10 stations' transmitters could be constructed there with the Federal Aviation Administration's (FAA) approval. However, if KSRR moves to the proposed new site, its station would be short spaced to Station KGOL in Lake Jackson. Modifying KGOL's license to Channel 298 as proposed would create a short-spacing with Station KWIC, Beaumont, which would also switch to another frequency. Similarly, KIKK's move to the common transmitter site would result in short-spacing with Station KGUL–FM at Port Lavaca, Texas. A substitute channel is proposed for Station KGUL–FM. KSRR and KIKK are proposing these channel substitutions, therefore, in order to remove the short-spacing conflicts.

3. Comments in response to the *Notice* were submitted by ABC Houston Radio, Inc. (formerly KAUM, Inc.), ("KSRR"), licensee of Station KSRR; KIKK, Inc. ("KIKK"), licensee of Station KIKK–FM; joint comments of five Houston-area FM stations, ("Houston stations");[1] Calhoun County Broadcasting, Inc.("Calhoun County"), the previous licensee of Station KGUL–FM, Port Lavaca, Texas; Double R Radio, Inc. ("Double R"), the new licensee of Station KGUL–FM, Port Lavaca; Turner Broadcasting Corporation ("Turner"), licensee of Station KBUC–FM, San Antonio, Texas; and Cosmopolitan Enterprises of Victoria, Inc. ("Cosmopolitan"), licensee of Station KTXN, Victoria, Texas. Reply comments were filed by KSRR; John Brown Broadcasting, Inc. ("JBB"), licensee of Station KGOL, Lake Jackson, Texas; Double R; and Turner. Subsequently, Supplemental Comments were filed by Turner.[2]

Comments applicable to both petitions:

4. In the *Notice*, KSRR and KIKK were requested to indicate the problems which would be encountered if the stations remained at their present transmitter sites, the availability of other non-short spaced sites, and the public interest benefits accruing from the location of the Houston area FM stations at a common antenna site. These three major issues were addressed in detail in the joint comments of the Houston stations. According to the station's engineering study, the buildings being constructed around the existing antenna site will cause "shadowing" to an unusable signal level to approximately 15 percent of the stations' present service area. The Houston stations further assert that multipath interference will cause significant additional problems. The engineering report concludes that ". . . it is not just preferable, but imperative . . ." that the existing antenna location be abandoned.[3] A comparative study of the effects of the tall building construction between the present location and the proposed antenna site southwest of Houston indicates that a signal loss on the order of 26 dB can be expected near the tall buildings, whereas, at a location fifteen miles away, the loss is reduced to approximately 4 dB. A second engineering report details the necessity of the Houston stations to relocate specifically at the proposed site 15 miles southwest of the city. This report indicates that a site was initially found at which the stations could co-locate without causing any new short-spacing, but that the FAA would not permit an antenna of the necessary height at that site. Three sites were than located at which tall antenna towers could be constructed. The first site, approximately 22 miles southeast of the

[1] The stations represented in the joint comments include KSRR, KIKK–FM, KYND, KLEF, and KMJQ.

[2] The Commission's rules do not provide for the filing of "Supplemental Comments" following the close of the pleading cycle. However, in the interest of compiling as accurate a record as possible in this complex proceeding, we shall consider the information submitted by Turner in its Supplemental Comments.

[3] According to the proponents of the site relocations, the FAA will not permit the stations to extend the existing antennas to a height sufficient to overcome the shadowing problem at their present locations.

existing site, was rejected because it created more severe short-spacing than the site ultimately selected plus it would not allow for the placement of a 70 dBu signal over all of Houston. The second site, northeast of the city, was similarly rejected because large sections of Houston would not have received 70 dBu service. For these reasons, the presently proposed site (known as the Senior Road site) was selected as the only site which would allow the construction of antennas of sufficient height to place a 70 dBu signal over the entire metropolitan area. A third engineering report, prepared by an aeronautical consultant, confirms that the Senior Road site is suitable for the construction of tall towers which would meet FAA approval. An environmental statement explaining the ecological advantages of the chosen site is contained in a fourth engineering study. The final engineering study submitted by the Houston stations offers a detailed explanation of the advantages of co-locating the FM transmitters. Briefly, these advantages include: the promotion of safe air navigation by minimizing the number of tall towers; enhancement of the environment; minimization of blanketing interference; and maximizing facilities through use of a tall tower which improves the overall service to the public.[4]

Comments applicable to KSRR's petition:

5. In its individual comments, KSRR reiterates the arguments posed in the Houston stations' comments and adds that Stations KGOL at Lake Jackson, and KWIC at Beaumont have agreed to the channel changes and the levels of reimbursement offered by KSRR. KSRR asserts that the channel substitutions further the public interest by making FM assignments available in other areas such as Port Lavaca, Texas; Lake Charles, Louisiana; Lufkin, Texas; and Abbeville, Louisiana. KSRR concludes, by stating that adequate service to the public can no longer be achieved from its present location, that the only site from which the station can broadcast with sufficient height to serve the Houston metropolitan area is the Senior Road site, and that the Commission should adopt the instant proposals in order to facilitate the proposed transmitter relocation.

6. Turner, the licensee of Station KBUC–FM (Channel 298), San Antonio, objects to the substitution of Channel 298 for Channel 297 at Lake Jackson because Channel 298 at Lake Jackson would be short spaced to the proposed transmitter site relocation of Station KBUC–FM.[5] Turner currently operates KBUC–FM within San Antonio with an antenna of 285 feet HAAT. Turner, in order to improve its service to San Antonio, has applied to relocate its transmitter to a site southeast of the city, where several tall towers are already located. Turner avers that, due to FAA height restrictions, this area southeast of San Antonio is the only area where a tower of the desired height (1,472 feet HAAT) may be located. According to the engineering statement appended to Turner's comments, an antenna of this height is sought in order to comply with the proposals advanced in BC Docket 80–90.[6] The engineering statement further notes that both the FCC and the FAA have favored the co-location of tall antenna towers and that Turner's proposed relocation is in accord with those agencies' policies.

7. In reply comments, KSRR rebuts the position taken by Turner. KSRR notes that Turner submitted its application for a site relocation only ten days before it submitted its comments in this proceeding. KSRR also asserts that Turner has not discussed the availability of other suitable San Antonio sites but has only addressed the "desirability" of the site already selected. KSRR further complains that Turner has failed to explain whether a 1,500 foot tower is necessary to provide adequate service to San Antonio or whether the proposed relocation is the sole means of achieving a better competitive position. KSRR contrasts Turner's situation with that of its own by stating that KBUC–FM presently provides adequate technical service to San Antonio whereas the high-rise construction in Houston is causing severe degradation to FM signals. This degradation compels the relocation of KSRR, while such a compelling showing is not present in KBUC–FM's situation, according to KSRR. Second, KSRR avers that KBUC–FM's technical facilities appear comparable to other FM stations in San Antonio, where no station operates with an effective antenna height of more than 672 feet. KSRR notes that none of the other San Antonio stations have found it necessary to relocate to the "antenna farm" chosen by Turner. Third, KSRR states that there are several alternative sites at which KBUC–FM could improve its facilities while causing no short-spacing to Station KGOL in Lake Jackson. In contrast, KSRR reiterates that the site chosen by the Houston stations is the only location at which sufficient height can be obtained to provide city-grade service to the community of license.

8. John Brown Broadcasting, the licensee of Station KGOL, Lake Jackson, filed reply comments in which it states that an agreement has been reached with KSRR regarding the reimbursement costs for the proposed frequency change. Based on this agreement, JBB states that it has no objection to the proposals.

9. In its reply comments, Turner states that it has attempted to reach a solution of the Lake Jackson-San Antonio short-spacing with Station KGOL–FM at Lake Jackson, and KSRR–FM at Houston. Turner submits that while all the parties have been cooperative, any resolution of the present conflict must come from the Commission. However, Turner states that it is willing to accept the six-mile short-spacing with the Lake Jackson station if that is necessary in order to allow KSRR–FM to participate in its planned move. In its "Supplemental Comments," Turner rebuts three points made by KSRR in its reply. First, Turner submits an engineering statement showing that Station KBUC–FM does not presently cover all of San Antonio with a city-grade signal. With regard to the assertion that other sites are available for KBUC–FM's relocation, Turner admits that there are other locations at which it could increase tower height above its presently authorized height, but that its proposed site is the only location where it is possible to construct a tower providing an effective height greater than 1,001 feet. Finally, Turner counters KSRR's statements that the Senior Road site is the only site to which KSRR can relocate. To support this claim, Turner states that KSRR has already amended its original application to specify a new

[4] The *Notice* also requested information regarding three downtown Houston FM stations which had not applied to move their transmitters to the Senior Road site. The comments of the Houston stations express an opinion why the other three stations have not chosen to relocate. The stations admit that their opinions are based on less than hard facts, but indicate that, in all three cases, the circumstances of the subject station are much different from those seeking to relocate to Senior Road.

[5] The distance between Station KGOL in Lake Jackson and Turner's proposed transmitter site is approximately 174 miles. The required separation between first adjacent Class C stations is 150 miles. Thus, KGOL's present operation on Channel 297 does not conflict with Turner's operation on Channel 298 at the proposed site. However, the mileage separation requirements for co-channel Class C operations is 180 miles. Therefore, Turner's proposed site would be approximately 6 miles short-spaced to KGOL, if KGOL is modified to operate on Channel 298.

[6] *Modification of FM Broadcast Station Rules to Increase the Availability of Commercial FM Broadcast Assignments*, 78 F.C.C. 2d 1235 (1980). The Commission has proposed in this rule making, *inter alia*, that licensees operating minimum facilities on Class C channels upgrade their facilities or forfeit their Class C classifications.

site 1.5 miles away from the previously proposed site. Second, Turner notes that Houston Station KQUE, which currently shares a tower with KSRR, has applied to the Commission to increase the height of its present antenna. Turner opines that these facts suggest that other viable alternatives are available to KSRR. In the engineering exhibit submitted with Turner's pleading, mention again is made of KBUC–FM's need to secure an antenna of over 1,001 feet in order to comply with the Commission's proposals in BC Docket 80–90. The study also suggests that a waiver of the spacing requirements may be an acceptable solution of this dilemma because, assuming both stations were operating at 100 kW and 2,000 feet, each 1.0 mV/m contour would receive interference for a distance of only 2.0 miles along the line between the stations. From an equivalent protection standpoint, Turner states that if the stations operate on the same channel at 100 kW and 1,700 feet, the protection received by both would be the equivalent of that for operation with 100 kW at 2,000 feet under normal spacing of 180 miles.

Comments applicable to the KIKK petition.[7]

10. KIKK incorporates in its comments the factors detailed in the Houston stations' comments, but indicates that it will soon amend its transmitter relocation application to specify a new site approximately 1.5 miles from the originally proposed site. According to KIKK, this move will enable the stations to increase the overall height of the tower above average terrain from 1,549 feet to 2,049 feet. KIKK states that it initially proposed to substitute Channel 296A for Channel 240A at Port Lavaca, but that the licensee of Station KGUL–FM prefers the substitution of Class C Channel 227. In this regard, KIKK asserts that it has agreed to reimburse KGUL for expenses incurred in making its channel change. KIKK avers that it is also willing to provide the same reimbursement to Double R, the new licensee of Station KGUL–FM.

11. Calhoun County, the previous licensee of Station KGUL–FM at Port Lavaca, expressed its support for substitution of Channel 227 for Channel 240A at Port Lavaca, and modification of its license to specify operation on Channel 227. In support of the Class C assignment, Calhoun County asserted that a Class C operation at Port Lavaca would provide a first FM service to 286.16 square kilometers (111.26 square miles) with a population of 3,218 persons, and a second FM service to 1,206.06 square kilometers (466.44 square miles) with a population of 11,736 persons. Calhoun County stated that the assignment would not affect existing FM assignments and would have only minimal effects on future FM assignments to other communities. Double R also expressed its support for the substitution to specify operation on that channel.

12. Cosmopolitan, licensee of Station KTXN–FM, Victoria, Texas, objects to the substitution of a Class C channel at Port Lavaca. According to Cosmopolitan, the Class C channel would not provide any first FM service because stations in Victoria already serve the Port Lavaca area. Cosmopolitan also asserts that Port Lavaca stations seek advertising in the Victoria market, and that the allocation of a Class C channel to Port Lavaca would be a "back door" attempt to add a fourth Class C channel to Victoria.[8]

13. In response to the objections of Cosmopolitan, Double R states that Cosmopolitan's main concern with the proposal to add a Class C channel to Port Lavaca is to avoid any economic injury which the additional competition may cause. On this issue, Double R states that Cosmopolitan has failed to make any showing of adverse economic effects and that its objection should not bar the requested assignment.

Discussion

14. Two major issues have been identified in the comments. The first concerns the conflict between KSRR, with its proposed channel substitutions at Lake Jackson and Beaumont, and the proposed transmitter relocation for Station KBUC–FM at San Antonio. The second issue concerns KIKK's proposed substitution at Port Lavaca and whether a Class A or a Class C channel should be substituted for the existing Class A channel. These two issues are addressed, in turn, below.

15. The channel substitutions proposed by KSRR and Turner's opposition to them present an unfortunate dilemma. If KSRR's petition is granted, and channel substitutions are made at Lake Jackson and Beaumont, Turner would be faced with a short-spacing of approximately six miles at its proposed transmitter site. On the other hand, if the proposals are not adopted, as argued by Turner, KSRR's proposed transmitter site would be approximately eight miles short spaced to the Lake Jackson station. Thus, we must base our decision in this case on which transmitter site relocation appears more compelling.

16. After carefully weighing all the evidence submitted in this proceeding, we have concluded that the Houston station's proposal should be adopted. Several considerations prompt this conclusion. First, the circumstances surrounding the KSRR relocation appear more urgent than those surrounding the KBUC–FM move. KSRR is forced to relocate its transmitter in order to avoid an actual diminution of its present service. As the comments of the Houston stations amply demonstrate, the construction of high rise buildings in the vicinity of the existing transmitter will significantly degrade KSRR's signal. KBUC–FM, on the other hand, is seeking to upgrade its present service; there is no threat of deteriorating service at KBUC–FM's present site. In this type of situation, we feel we must favor the party seeking to maintain its present level of service over the party seeking an improvement in existing service. Second, we are persuaded that acceptable site availability around the Houston area is somewhat more limited than in the San Antonio area, at least for the purposes expressed by the parties to this proceeding. KSRR indicates that alternative sites are available to it which would not cause a short-spacing, but demonstrates reception problems from those sites. Turner, however, makes no showing that the site it has chosen is the only site from which an improved signal may be placed over San Antonio. At most, Turner has proven that the location it has selected is the only site on which a tower of more than 1,000 feet may be constructed. The record indicates several other locations at which Turner could relocate and presumably improve Station KBUC–FM's facilities to a somewhat lesser degree.

From the comments in Turner's engineering statements, it appears that Turner is seeking a site which will accommodate a tower over 1,000 feet in order to comply with the Commission's proposed minimum facilities for Class C stations as proposed in BC Docket 80–90. However, the Commission has consistently stated that it will not speculate at this time on the extent to which the proposals in Docket 80–90 may be adopted. In the interim, we will not make important assignment

[7] This petition was previously considered with the KSRR petition because the substitution of channels at Port Lavaca depended on the Lake Jackson substitutions. Although another substitute channel is to be made at Lake Jackson we have not severed the two petitions. Rather, if complications later develop, the requests can move independently of each other.

[8] Cosmopolitan also suggested several changes in the Table of Assignments. Because Cosmopolitan did not submit the necessary data to support additional assignments, we have not considered these suggestions as *bona fide* counterproposals.

decisions on the basis of what might happen if BC Docket 80–90 is adopted as proposed. *Las Piedras, Puerto Rico*, 87 F.C.C. 2d ——, Mimeo No.30046, released October 8, 1981; and *Rhinelander, Wisconsin, et al.*, 49 RR 2d 1113 (Broadcast Bureau 1981).

17. We certainly do not mean by our actions that Turner should be foreclosed from upgrading its facilities. On the contrary, we encourage maximizing facilities to promote the most efficient use of the spectrum. In this case, however, several reasonable alternatives are available. If Turner elects to proceed with the relocation at the presently proposed site, a waiver of the mileage separation requirements may be sought. Also, Turner may be able to avoid any short-spacing by pursuing the same type of channel substitutions which KSRR has proposed. Finally, as stated above, several other locations appear to be available where Turner could relocate and upgrade the facilities of Station KBUC–FM.[9]

18. We now turn to the issue of the appropriate channel substitution for Port Lavaca, Texas. Both Calhoun County Broadcast and Double R state that a Class C channel should be assigned. Cosmopolitan opposes the Class C substitution and states that a Class C station at Port Lavaca will operate as a *de facto* Victoria station. The engineering study submitted by Calhoun County shows that a Class C assignment to Port Lavaca would provide a first and second service to 3,218 and 11,738 persons, respectively. On the basis of this showing, we believe that it is appropriate to substitute Class C Channel 227 for Channel 240A at Port Lavaca. Cosmopolitan's objections to the Class C assignment are speculative and unsupported by any engineering and economic analyses. Thus, we do not consider them a bar to the actions we are taking. Furthermore, as no other party has expressed an interest in the Class C channel at Port Lavaca, we will modify the license of Station KGUL–FM to specify operation on Channel 227, as proposed. See *Cheyenne, Wyoming*, 62 F.C.C. 2d 63 (1976).

19. In accordance with Commission policy and the expressed agreement of the parties, the licensees of Stations KGOL, Lake Jackson, and KWIC, Beaumont, are entitled to reasonable reimbursement from KSRR for the expenses incurred in changing operating frequencies. Likewise, the licensee of Station KGUL–FM, Port Lavaca, is entitled to similar reimbursement from KIKK. The costs of upgrading to the Class C facility, however, must be borne by Double R.

20. Accordingly, it is ordered, That effective February 5, 1982, the FM Table of Assignments, Section 73.202(b) of the Commission's Rules, is amended as follows for the communities listed:

City	Channel No.
Beaumont, Texas	231, 236, 248, and 300.
Lake Jackson, Texas	298.
Port Lavaca, Texas	227.

21. It is further ordered, pursuant to the authority contained in Section 316 of the Communications Act of 1934, as amended, That the licenses of Station KWIC, Beaumont, Texas, Station KGOL, Lake Jackson, Texas, and Station KGUL–FM, Port Lavaca, Texas, are modified, to specify operations on Channels 300, 298, and 227, respectively, subject to the following conditions:

(a) At least 30 days before operating on the newly specified channel, the licensee shall file with the Commission a minor change application for a construction permit (Form 301).

(b) Within 10 days after commencing operation on the newly specified channel, the licensee shall submit a license application (Form 302) for the new channel.

(c) Nothing contained herein shall be construed to authorize a major change in transmitter location or to avoid the necessity of filing an environmental impact statement pursuant to Section 1.1301 of the Commission's Rules.

22. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

23. It is further ordered, That the Secretary of the Commission shall send by certified mail, return receipt requested, a copy of this *Order* to Gibson Broadcasting Company, P.O. Box 6067, Beaumont, Texas 77705; John Brown Broadcasting, Inc., 8500–A Kirby Drive, Houston, Texas 77054; and Double R Radio, Inc., 213 Colorado Street, Port Lavaca, Texas 77979.

24. It is further ordered, That this proceeding is terminated.

25. For further information concerning this proceeding, contact Michael A. McGregor, Broadcast Bureau, (202) 632–7792.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

[FR Doc. 81–36195 Filed 12–21–81; 8:45 am]

BILLING CODE 6712–01–M

[9] In this case we have compared the relative merits of two proposed transmitter site relocations and have concluded that the Houston site relocation is the more compelling of the two. However, this conclusion should not be considered dispositive of the other pending Houston-area assignment proceedings, where the Houston site relocation conflicts with first FM assignments at Freeport and Lockhart, Texas, in Docket 21513 and BC Docket 79–256, respectively.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Special Procedures for Issuance of Annual Migratory Bird Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: These regulations establish certain procedures to govern the issuance of the annual migratory bird hunting regulations. They provide for public participation in certain meetings of the Service's Migratory Bird Regulations Committee, establish certain requirements to govern the Department's attendance at meetings of the regional waterfowl Flyway Councils, and require that copies or summaries of significant communications occurring during the rulemaking process for the hunting regulations be included in a public file.

EFFECTIVE DATE: January 21, 1982.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (AC 202–254–3207).

SUPPLEMENTARY INFORMATION:

Background

On May 8, 1980, a petition for rulemaking was submitted to the Department on behalf of Defenders of Wildlife, the Sierra Club, the Humane Society of the United States, and Friends of the Earth. The petition requested that the Department charter the Atlantic, Mississippi, Central, and Pacific Flyway Councils and the Service's Migratory Bird Regulations Committee as advisory committees pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. I. The petition also requested the issuance of certain regulations to govern any *ex parte* communications which may occur

during informal rulemakings dealing with the hunting of migratory birds.

After review of petition and related correspondence, the Service issued a notice of proposed rulemaking (45 FR 82975; December 17, 1980). For the reasons stated in that notice, the Service omitted from the proposed rules a number of the recommendations made by the petitioners. However, comments on those recommendations were invited and have been considered. The petition is available for public inspection and copying between the hours of 8 a.m. and 4 p.m. at Room 525 B, Matomic Building, 1717 H Street NW., Washington, D.C.

Discussion of Comments

The Service received a number of comments on the proposed rules.

Several organizations expressed general support for the proposed rules as written, and other organizations expressed general opposition to the proposed rules.

Nearly all commenting organizations urged that the rules not impose on the Technical Section of the Flyway Councils the same requirements for notice of meetings and attendance by Department officials as were proposed for the Councils themselves. It was pointed out that the Technical Sections are small, informal working groups with no decision-making authority. They must consider a large volume of complex material and need the flexibility to meet frequently, often on short notice, in response to a wide variety of technical problems. Application of the proposed rules to the Technical Sections was described as "unnecessary, over-encumbering, and possibly downright paralytic * * *" The Service agrees with these comments and has exempted the Technical Sections from the final rules.

It was also recommended that the rules allow Department officials to participate in Flyway Council executive sessions that may be closed to the public. It was asserted that such meetings are not necessarily for the purpose of discussing regulations. In any event, attendance by Department officials, such as Flyway Representatives, is for the purpose of facilitating exchange of technical information.

The Service agrees with these comments and has removed the prohibition on participating in executive sessions from the final rule. Exchange of technical information is an important part of the Flyway Council function. Department officials should be allowed to attend Flyway Council executive sessions, if invited, and provide technical information. However, the public should be informed of any significant communications about proposed rulemakings that may occur. Accordingly, Department officials will be required to describe and summarize any such communications for inclusion in the public file discussed elsewhere in this rulemaking.

Several organizations questioned the desirability of including summaries of oral communications in the public file for the hunting regulations. Oral communications may on occasion be just as significant to the decision-making process as written communications. Accordingly, the Service has decided to retain the requirement that summaries of significant oral communications be included in the public file.

It was pointed out that the word "involving" in the fifth line of the definition of "significant" in paragraph (c) of § 20.152 could be interpreted restrictively to mean that the official concerned must have prepared the data or information. It was suggested that it might be better to refer to data or information "* * * involving, relied upon or influencing * * *" a decision-making official. The Service recognizes the problem with the word "involving," but believes that adding the terms "relied upon or influencing" would also prove troublesome, since whether an official relied upon or was influenced by a particular piece of information often could not be determined until after the decision was made. Instead of inserting additional language, the Service has deleted the term "involving" and substituted in its place the words "received, utilized, or transmitted by."

It was suggested that notices of Regulations Committee meetings to be attended by persons outside the Department state the extent of public involvement as well as the time, place, and subject matter of the meeting. This suggestion has been included in the final rules.

It was recommended that for each meeting of the Regulations Committee to be attended by persons outside the Department provision be made for the submission of written comments in addition to opening the meeting to the public for observation. This recommendation has been adopted in the final rules.

Petitioners and one other organization argued that certain oral communications should be transcribed verbatim before placement in the public file. It was asserted that the benefits of such a requirement would outweigh the administrative burdens. The Service has utilized verbatim transcripts on certain occasions in the past and will do so in the future, but it does not believe that such transcripts should be a requirement. The Administrative Conference of the United States has encouraged the use of summaries, and, as was pointed out in the notice of proposed rulemaking (45 FR 82976), a verbatim transcript requirement would involve a significant burden from the standpoint of physical equipment, to say nothing of other costs.

Petitioners also continued to recommended **Federal Register** notice of each *ex parte* communication, to be followed by a two-week comment period on the communication. The Service declines to adopt this recommendation. The notices of proposed rulemaking for the hunting regulations will set forth the location and inspection hours for the public file. The public file will contain copies of significant written *ex parte* communications and summaries of significant oral communications. The notices of proposed rulemaking will provide that the public file will be open for inspection and copying both during and after the comment period. This procedure will provide reasonable notice of any *ex parte* communications and examination of the file will disclose their contents.

With respect to the two-week comment period, the Administrative Conference of the United States urges that its recommendations concerning placement of *ex parte* communications in the public file should not result in extensions of comment periods unless the agency decides that an extension is appropriate. In certain instances, the nature of the *ex parte* communication may warrant an extension of the comment period and the Service will do so. However, in view of the severe time constraints faced by the Service in issuing the annual hunting regulations, the Service cannot agree that an extension should be mandatory in all cases.

Petitioners continue to insist that the public file should contain a record of *ex parte* communications which occur before a notice of proposed rulemaking if the official involved "knows, or has reason to know, that a notice of proposed rulemaking on the subject of the communication will be issued within a year of the date of the communication." Petitioners assert that it is "* * * probable that decision-making officials within the Department will have significant knowledge of the contents of the proposed waterfowl rules before they are published * * *"

The situation is not as simple as petitioners suppose. While some decision-making officials of the Service

may be able to predict some of the contents of future proposed rulemakings, it cannot be said that all significant decision-makers in the Department would have reason to know the contents of proposed rulemakings occurring months in the future. Also, as was stated in the notice of proposed rulemaking, it may be true that if information obtained before the notice of proposed rulemaking constitutes an important basis for the agency's action it should be made a matter of public record, but in general *ex parte* communications that occur before a notice of proposed rulemaking do not have to be included in the public file.

Petitioners further requested that the public file for hunting regulation rulemakings be organized by species and that it should contain only complete copies of documents rather than references to documents. To grant petitioners' request would require costly duplication of numerous and often voluminous studies which deal with more than one species, and would require such duplication and filing at a time when the Service's support staff is extremely busy trying to keep pace with hunting regulation deadlines.

Petitioners also argued that all Service Regulations Committee meetings should be open to persons outside the Department. The Service disagrees. The full, frank, and free evaluation of ideas and arguments that is vital to sound decision-making on the hunting regulations requires that Department officials be able on occasion to meet privately, with no outsiders present. It must be remembered that the ultimate responsibility for hunting regulation decisions is vested in the Department, and the best governmental decisions usually require some private deliberation and contemplation beyond public observation.

Finally, petitioners contend that the Department should charter the Service's Migratory Bird Regulations Committee and the four regional Flyway Councils as advisory committees under the Federal Advisory Committee Act (FACA), or in the alternative should restructure these groups "* * * so as to fully comply with the notice, open meetings, disclosure, and balanced representation provisions of the Act."

The Service believes that the provisions in these rules requiring notice of meetings, open meetings, and the opportunity for public participation constitute the functional equivalent of compliance with FACA. In any event, the Service continues to maintain that neither the Regulations Committee nor the Flyway Councils are subject to FACA. The fact that non-Government flyway consultants attend two meetings of the Regulations Committee does not cause that Committee to lose its exemption from FACA, because the Committee holds a number of other meetings and its actual members are all "* * * full-time officers or employees of the Federal Government." *See* 5 U.S.C. App. I, § 3(2)(iii). With respect to the Flyway Councils, petitioners' argument that the Councils are not entitled to the contract exemption of FACA ignores the facts that the Service's memoranda of understanding with the Councils are mutual agreements with consideration flowing to each party and that the exemption is based on the contractual nature of the relationship and not on technical compliance with Government contracting procedures.

Description of Final Rules

Section 20.151 describes the purpose and scope of the rules. The rules apply only to the issuance of the annual migratory bird hunting regulations dealing with seasons, bag limits, zones and other seasonal matters. They do not apply to the promulgation of other regulations under the Migratory Bird Treaty Act, such as, for example, the "basic" taking regulations in Subpart C of 50 CFR Part 20. Section 20.152 defines several important terms. For example, the term "significant," when used in reference to a communication or other form of data or information, means that the information relates to the merits of the hunting regulations and is received, utilized, or transmitted by an official of the Department who is or may reasonably be expected to be involved in the decision-making process on the regulations.

Section 20.153 establishes a number of procedures governing notices, minutes, written comments, and public observation and participation with regard to any meetings of the Service's Migratory Bird Regulations Committee which are attended by persons outside the Department. It should be noted that there are a number of internal meetings of the Regulations Committee which are attended only by persons employed by the Department. The provisions of § 20.153 do not apply to these internal meetings.

Section 20.154 establishes certain procedures governing attendence by Departmental personnel of meetings of the regional Flyway Councils. The section requires notice in the **Federal Register** of any Flyway Council meeting to be attended by Department officials.

Section 20.155 requires the establishment of a public file for annual hunting regulation rulemakings. This file will include minutes of Regulations Committee meetings open to the public, comments, significant *ex parte* communications or summaries thereof, and copies of or references to any other significant data or information.

Effective Date

This rule will become effective January 21, 1982. This will afford the public ample time to become aware of the rule before the process for developing migratory bird hunting regulations for the 1982–83 season gets underway.

Pursuant to Executive Order 12291, the Department has determined that this rule is not a major rule, nor does it have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The rule would impose no costs on society, and the public should benefit from the increased opportunities for participation in the hunting regulations process. The rule is not subject to the Regulatory Flexibility Act because it was proposed before January 1, 1981; furthermore, it would have no impact upon small entities as it relates solely to intra-agency procedures.

Authorship

The primary author of this rulemaking is Ronald E. Swan, Office of the Solicitor, Department of the Interior (AC 202–343–2172).

Accordingly, Part 20 of Title 50, Code of Federal Regulations, is hereby amended as follows:

1. The table of contents for Part 20 is amended by adding at the end thereof the following:

Subpart N—Special Procedures for Issuance of Annual Hunting Regulations

Sec.
20.151 Purpose and scope.
20.152 Definitions.
20.153 Regulations committee.
20.154 Flyway Councils.
20.155 Public file.

Authority: 16 U.S.C. 704, 712(2); 5 U.S.C. 301.

2. A new Subpart N is added to read as follows:

Subpart N—Special Procedures for Issuance of Annual Hunting Regulations

§ 20.151 Purpose and scope.

The rules of this Subpart N apply to the issuance of the annual regulations establishing seasons, bag limits, and other requirements for the seasonal hunting of migratory birds. The rules of this Subpart N do not apply to the issuance of regulations under Part 21 of

this title or under Subparts A–J and L–M of this Part 20.

§ 20.152 Definitions.

As used in this Subpart N:

(a) "Flyway Council" means the Atlantic, Mississippi, Central, or Pacific Flyway Council;

(b) "Regulations Committee" means the Migratory Bird Regulations Committee of the Fish and Wildlife Service; and

(c) "Significant," as used in reference to a communication or other form of information or data, means related to the merits of the regulation and received, utilized, or transmitted by an official of the Department who is or may reasonably be expected to be involved in the decisional process on the regulation.

20.153 Regulations committee.

(a) *Notice of meetings.* Notice of each meeting of the Regulations Committee to be attended by any person outside the Department will be published in the **Federal Register** at least two weeks before the meeting. The notice will state the time, place, and general subject(s) of the meeting, as well as the extent of public involvement.

(b) *Public observation and written comment.* Each meeting of the Regulations Committee for which notice is published pursuant to paragraph(a) of this section will be open to the public for observation and the submission of written comments.

(c) *Public participation.* Except for the mid-summer meetings held in Washington, D.C., in conjuction with the public hearing on waterfowl and other late season frameworks, the public may participate in any meeting of the Regulations Committee for which notice is published pursuant to paragraph (a) of this section through the submission of oral statements that comply with the rules stated in the notice.

(d) *Minutes of meetings.* Minutes will be made of each meeting of the Regulations Committee for which notice is published pursuant to paragraph (a) of this section.

20.154 Flyway councils.

(a) *Notice of meetings.* Notice of each meeting of a Flyway Council to be attended by any official of the Department will be published in the **Federal Register** at least two weeks before the meeting or as soon as practicable after the Department learns of the meeting. The notice will state the time, place, and general subject(s) of the meeting.

20.155 Public file.

(a) *Establishment.* A public file will be established for each rulemaking to which this Subpart N is applicable.

(b) *Contents.* Except for information exempt from disclosure under 5 U.S.C. 552, a public file established pursuant to paragraph (a) of this section will contain:

(1) The minutes of Regulations Committee meetings made pursuant to paragraph (d) of § 20.153;

(2) Any written comments and other significant written communications which occur after the notice of proposed rulemaking;

(3) Summaries, identifying the source, of any significant oral communications which occure after the notice of proposed rulemaking; and

(4) Copies of or references to any other significant data or information.

Dated: November 18, 1981.

J. Craig Potter,

Acting Deputy Assistant Secretary for Fish and Wildlife and Parks.

Proposed Rules

Federal Register
Vol. 46, No. 245
Tuesday, December 22, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 225

Summer Food Service Program; Extension of Comment Period

AGENCY: Food and Nutrition Service, USDA.

ACTION: Extension of comment period.

SUMMARY: This notice informs the public that the comment period for the proposed Summer Food Service Program (SFSP) rulemaking, which appeared in the **Federal Register** on Friday, December 11, 1981 (46 FR 238 P.60592–P.60614), is to be extended until January 11, 1982.

DATE: Comments must be submitted on or before January 11, 1982.

FOR FURTHER INFORMATION CONTACT: Jordan Benderly, Director, or Beverly Walstrom, Child Care and Summer Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Alexandria, Virginia 22302 or by telephone at (703) 756–3888.

SUPPLEMENTARY INFORMATION: The comment period for the proposed Summer Food Service Program (SFSP) rulemaking of December 11, 1981, was established as 20 days. The Department generally allows 60 days for public comment, in keeping with the guidelines implementing Executive Order 12291. However, shorter comment periods are permitted if good reason exists. Since the efficient administration of the SFSP ordinarily requires that the final SFSP rulemaking be published by January 1 of each year, the Department considered that on this occasion the comment period could be no longer than 20 days if timely publication of the final regulation were to be ensured.

Recognizing that 20 days would be an unusually short comment period, the Department took special steps to make the proposed rulemaking available to interested parties in order to allow them sufficient opportunity for comment. Nevertheless, it has been brought to the Department's attention that some parties still may not be able to submit comments prior to December 31, 1981. The Department, therefore, is extending the comment period for 11 days. This action allows for a total comment period of 31 days.

Although the longer comment period will prevent the Department from meeting the January 1, 1982, publication deadline, the Department expects to publish final regulations shortly after the comment period expires. This extension will not, therefore, seriously inconvenience administering agencies or delay the implementation of the 1982 Summer Food Service Program.

Commodity Credit Corporation

7 CFR Part 1438

1981 Crop Gum Naval Stores Support Program; Withdrawal of Proposed Rule

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of withdrawal of proposed rulemaking.

SUMMARY: The purpose of this section is to withdraw the Notice of Proposed Rulemaking published at 45 FR 79492 on December 1, 1980. The proposed rule announced that the Commodity Credit Corporation was considering whether a price support program for the 1981-crop gum naval stores should be established pursuant to section 301 of the Agricultural Act of 1949, as amended, and, if so, level of support. If the program were implemented, price support would have been available to producers for the 1981-crop gum naval stores. Written comments were invited from interested persons. Due to economic considerations and because of the extensive time that has elapsed since the publication of the proposed rule and the apparent lack of public interest on the part of the industry, the Secretary has determined that no price support program will be implemented for 1981-crop gum naval stores. Therefore, the Proposed Rule of December 1, 1980, is hereby withdrawn.

EFFECTIVE DATE: December 22, 1981.

ADDRESS: Tobacco & Peanuts Division, Agricultural Stabilization and Conservation Service, P.O. Box 2415, U.S. Department of Agriculture, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Roger A. P. Cooley, (ASCS) (202) 447–8413.

Signed at Washington, D.C. on December 15, 1981.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 14

Administrative Claims Under Federal Tort Claims Act

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is proposing to revise its regulations on administrative claims under the Federal Tort Claims Act. the proposed regulation is intended to—

(1) Clarify procedures used when the same claim is submitted to the NRC and one or more other agencies when a claims affects NRC and one or more other agencies;

(2) Change the office where claims are filed and the NRC officials who are authorized to act on claims; and

(3) Provide procedures when NRC employee drivers are sued in State courts.

In addition, changes are made in organization and language to improve the clarity of the regulation.

DATES: Comments must be received on or before January 21, 1982. Comments received after this date will be considered if it is practical to do so, but

assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit written comments or suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of documents received may be examined at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. David J. Clarke, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Phone 301–492–7241).

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission is considering an amendment to Part 14 of its regulations. The proposed amendment primarily would:

(1) Clarify the procedures applicable to a claim which is filed with the NRC and one or more other agencies;

(2) Change the NRC office with which claims are filed and the NRC offices which are authorized to adjust, determine, compromise, and settle claims;

(3) Require claimants, to the extent reasonably practicable, to furnish evidence and information of specified types when the claim is initially presented.

(4) Inform claimants that if evidence and information which is necessary for a determination of the claim is not furnished within 6 months from the date the claim was initially presented, the claim will be considered a nullity.

(5) Adopt 28 CFR 14.10 regarding the funds from which claims are paid;

(6) Add provisions found in the governing statute regarding the exclusiveness of the remedy against the United States when a NRC employee driver is acting within the scope of the driver's employment; and

(7) Add provisions found in the governing statute regarding the limit on attorney fees and penalties for exceeding the limit.

Secondarily, the proposed amendment provides procedures when Federal employee drivers are sued in State courts, adds headings to numerous sections, and otherwise clarifies and improves the language and the arrangement of the existing Part 14.

The Federal Tort Claims Act, as amended, provides in part, that the head of each Federal agency, in accordance with regulations prescribed by the Attorney General, may consider, adjust, determine, compromise, and settle any claim for money damages against the United States for damage to or loss of property or personal injury or death caused by the negligent or wrongful act or ommission of any of the agency while acting within the scope of his or her office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred. The regulation prescribed by the Attorney General in 28 CFR Part 14, (31 FR 16616, December 29, 1966, 42 FR 62001, December 8, 1977, and 45 FR 2650, January 14, 1980), authorized each agency to issue regulations and establish procedures consistent with the regulations in 28 CFR Part 14, as amended.

The Nuclear Regulatory Commission's regulation which will be amended is set forth in 10 CFR Part 14. The proposed amendment will delete the current 10 CFR Part 14 and substitute, in lieu thereof, a new Part 14. Some sections and paragraphs of the part to be deleted remain unchanged in the new Part 14. The new Part 14 shall apply to claims presented to the NRC after the effective date of the final rule.

Environmental Impact Statement

This proposed rule does not significantly affect the environment. An environment impact statement is not required under the National Environmental Policy Act of 1969.

Paperwork Reduction Act

Although the proposed rule may involve the "collection of information" as that term is defined in the Paperwork Reduction Act, the exemption provided by the Act applies to this proposed rule. The filing of an administrative claim is a statutory prerequisite to the commencement of a civil action against the United States. 28 U.S.C. 2675(a). The furnishing of evidence and information in support of a claim occurs during the conduct of an administrative action involving the NRC against a specific individual or entity. The collection of such evidence and information is therefore exempt under 44 U.S.C. 3518. The proposed rule imposes no requirement on persons or entitites to maintain specified information, except to the extent necessary to furnish evidence and information in support of a claim.

Regulatory Flexibility Certification Statement

In accordance with Section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the undersigned hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

During the past 4 years, approximately 48 claims were filed with the NRC under the Federal Tort Claims Act. Of these, 22 were filed by car rental agencies and were allowed in the average amount of $242.00; 18 were filed by individuals and were allowed in the average amount of $1,562.00; 6 were for personal injuries alleged to have resulted from radiation accidents or at testing sites and were transferred to other agencies; and 2 were for losses alleged to have resulted from the shut down of nuclear power plants. One of the 2 was filed by the Commonwealth of Massachusetts which asserted losses of $7,740,000.00. The owners of Three Mile Island filed the other claim and asserted losses of $4,010,000,000.00. Both of those claims were denied. It appears, therefore, that the proposed rule will not have a significant economic impact on a substantial number of small entities. Whatever economic impact the proposed rule may have upon small entities (the expense of asserting a claim) in most cases is fully recovered when the claim is allowed.

The Proposed Rule

For the reasons set out in the preamble and pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, section 553 of Title 5, United States Code, the Federal Tort Claims Act, as amended (28 U.S.C. 1346b and 2671–2680) and the regulations of the Department of Justice, as amended (28 CFR Parts 14 and 15), notice is hereby given that the Commission proposes to adopt the following amendment to 10 CFR Part 14.

1. Part 14 is revised to read as follows:

PART 14—ADMINISTRATIVE CLAIMS UNDER FEDERAL TORT CLAIMS ACT

Subpart A—General

Sec.

14.1 Scope of regulations.
14.3 Limit on attorney fees; penalty.

Subpart B—Filing Procedures and Requirements

14.11 Who may file a claim.
14.13 When is a claim presented to NRC.
14.15 Where to present a claim to NRC.
14.17 A claim must be presented to the appropriate agency.
14.19 When a claim is filed with more than one agency.
14.21 Filing a claim after an agency final denial.
14.23 Evidence and information to be submitted.
14.25 Amending a claim.
14.27 Time limit.

Subpart C—Commission Action and Authority

Sec.
14.31 Investigation.
14.33 Officials authorized to act.
14.35 Limitation on NRC's authority.
14.37 Final denial of claim.
14.39 Reconsideration of a claim.
14.41 Payment of approved claims.
14.43 Acceptance of payment constitutes release.

Subpart D—Employee Drivers

14.51 Procedures when employee drivers are sued.
14.53 Scope of employment report.
14.55 Removal of state court proceedings.
14.57 Suit against the United States exclusive remedy.

Authority: Sec. 1, 80 Stat. 306 (28 U.S.C. 2672); Sec. 2679, 62 Stat. 984 as amended (28 U.S.C. 2679); Sec. 161, Pub. L. 83–703, 68 Stat. 951 as amended (42 U.S.C. 2201). 31 FR 16616, 28 CFR 14.11

Subpart A—General

§ 14.1 Scope of regulations.

(a) The terms "Nuclear Regulatory Commission" and "NRC" as used in this part mean the agency established by section 201(a) of the Energy Reorganization Act of 1974, but do not include any contractor with the Nuclear Regulatory Commission.

(b) The regulations in this part supplement the Department of Justice's regulations in 28 CFR Parts 14 and 15.

(c) These regulations apply to administrative claims asserted under the Federal Tort Claims Act, as amended, accruing on or after the effective date of this rule, for money damages against the United States for damage to or loss of property or personal injury or death caused by the negligent or wrongful act or omission of any employee of the NRC while acting within the scope of his or her office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred.

(d) These regulations also set forth the procedures when lawsuits are commenced against an employee of the NRC resulting from the operation of a motor vehicle while acting within the scope of his or her employment.

§ 14.3 Limit on attorney fees; penalty.

(a) An attorney may not charge or receive fees in excess of—

(1) 25 percent of any judgment rendered under section 28 U.S.C. 1346(b);

(2) 25 percent of any settlement made under 28 U.S.C. 2677; or

(3) 20 percent of any award, compromise, or settlement made under 28 U.S.C. 2672.

(b) Any attorney who charges or receives any amount in excess of that allowed under this section is subject to a fine of not more than $2,000 or imprisonment for not more than one year, or both. (28 U.S.C. 2678)

Subpart B—Filing Procedures and Requirements

§ 14.11 Who may file a claim.

(a) A claim for damage to or loss of property may be presented by the owner of the property interest which is the subject of the claim, his or her duly authorized agent, or his or her legal representative.

(b) A claim for personal injury may be presented by the injured person, his or her duly authorized agent, or his or her legal representative.

(c) A claim based on death may be presented by the executor or administrator of the decedent's estate, or by any other person legally entitled to assert the claim under applicable State law.

(d) A claim for loss wholly compensated by an insurer with the rights of a subrogee may be presented by the insurer. A claim for loss partially compensated by an insurer with the rights of a subrogee may be presented by the insurer or the insured individually, to the extent of their respective interests, or jointly. Whenever an insurer presents a claim asserting the rights of a subrogee, the insurer shall present with the claim appropriate evidence that the insurer has the rights of a subrogee.

(e) If a claim is presented by an agent or legal representative that person shall—

(1) Present the claim in the name of the claimant;

(2) Sign the claim;

(3) Show the title or legal capacity of the person signing the claim; and

(4) Include with the claim evidence of his or her authority to present a claim on behalf of the claimant as agent, executor, administrator, parent, guardian, or other representative.

§ 14.13 When is a claim presented to NRC.

For purposes of the provisions of 28 U.S.C. 2672, a claim is presented when NRC receives from a claimant, or the claimant's duly authorized agent or legal representative, an executed Standard Form 95 or other written notification of an incident. An executed Standard Form 95 or written notification must be accompanied by a claim for money damages in a sum certain for damage to or loss of property, personal injury, or death alleged to have occurred by reason of the incident.

§ 14.15 Where to present a claim to NRC.

A claimant shall mail or deliver the claim to the office of employment of the NRC employee whose negligent or wrongful act or omission is alleged to have caused the loss or injury. If the office of employment is not known, the claimant shall file the claim with the Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555.

§ 14.17 A claim must be presented to the appropriate agency.

A claimant shall present the claim to the Federal agency whose activities gave rise to the claim. If a claim is erroneously presented to the NRC, the NRC shall transfer it to the appropriate agency, if the proper agency can be identified from the claim, and shall advise the claimant of the transfer. If transfer is not feasible, the NRC shall return the claim to the claimant. The fact of transfer does not, in itself, preclude further transfer, return of the claim to the claimant, or other appropriate disposition of the claim. A claim shall be presented, as required by 28 U.S.C. 2401(b), as of the date it is received by the appropriate agency.

§ 14.19 When a claim is filed with more than one agency.

(a) If the NRC and one or more other Federal agencies is or may be involved in the events giving rise to the claim, and if the claim is filed with the NRC, the NRC shall contact all other affected agencies in order to designate the single agency which will investigate and decide the merits of the claim.

(1) In the event that an agreed upon designation cannot be made by the affected agencies, the Department of Justice will be consulted and will designate a primary agency to investigate and decide the merits of the claim. If the NRC is designated as the primary agency, it shall notify the claimant that all future correspondence concerning the claim shall be directed to the NRC.

(2) All involved Federal agencies can agree either to conduct their own administrative reviews and to coordinate the results or to have the investigations conducted by the primary agency. In either event, the primary agency is responsible for the final determination of the claim.

(b) A claimant presenting a claim arising from an incident to more than one agency should identify each agency to which the claim is submitted at the time each claim is presented. If a claim arising from an incident is presented to more than one Federal agency without

any indication that more than one agency is involved, and any one of the concerned Federal agencies takes final action on that claim, the final action is conclusive on the claims presented to the other agencies in regard to the time required for filing suit set forth in 28 U.S.C. 2401(b). However, if NRC, as a subsequently involved Federal agency, desires to take further action with a view towards settling the claim, the NRC may treat the matter as a request for reconsideration of the final denial under 10 CFR 14.39, unless suit has been filed in the interim, and advise the claimant of the action.

§ 14.21 Filing a claim after an agency final denial.

If, after a final denial by another agency, the claimant files with the NRC a claim arising out of the same incident on which the claim filed with the other agency was based, the submission of the claim to NRC will not toll the requirement of 28 U.S.C. 2401(b) that suit must be filed within six months of the final denial by the other agency, unless the other agency specifically and explicitly treats the submission to NRC as a request for reconsideration under 10 CFR 14.30 and advises the claimant of the action.

§ 14.23 Evidence and information to be submitted.

(a) *Death.* In support of a claim based on death, the claimant may be required to submit the following evidence or information:

(1) An authenticated death certificate or other competent evidence showing cause of death, date of death, and age of decedent.

(2) Decedent's employment or occupation at time of death, including his or her monthly or yearly salary or earnings (if any), and the duration of his or here last employment or occupation.

(3) Full names, addresses, birth dates, kinship, and marital status of the decedent's survivors, including identification of those survivors who were dependent for support upon the decedent at the time of death.

(4) Degree of support afforded by the decedent to each survivor dependent upon him or her for support at the time of death.

(5) Decedent's general physical and mental condition before death.

(6) Itemized bills for medical and burial expenses incurred by reason of the incident causing death, or itemized receipts of payment for these expenses.

(7) If damages for pain and suffering prior to death are claimed, a physician's detailed statement specifying the injuries suffered, duration of pain and suffering, any drugs administered for pain, and the decedent's physical condition in the interval between injury and death.

(8) Any other evidence or information which may have a bearing on either the responsibility of the United States for the death or the amount of damages claimed.

(b) *Personal injury.* In support of a claim for personal injury, including pain and suffering, the claimant may be required to submit the following evidence or information:

(1) A written report by the attending physician or dentist setting forth the nature and extent of the injury, nature and extent of treatment, any degree of temporary or permanent disability and prognosis, period of hospitalization, and any diminished earning capacity. In addition, the claimant may be required to submit to a physical or mental examination by a physician employed by the NRC or another Federal agency. The claimant may request in writing a copy of the report of the examining physician if the claimant has—

(i) Furnished the report referred to in paragraph (a)(1) of this section on request; and

(ii) Made or agrees to make available to the NRC all other reports of the claimant's physical or mental condition which have been or are made by any physician.

(2) Itemized bills for medical, dental, and hospital expenses incurred, or itemized receipts of payment for these expenses.

(3) If the prognosis reveals the necessity for future treatment, a statement of expected expenses for the treatment.

(4) If a claim is made for loss of time from employment, a written statement from his or her employer showing actual time lost from employment, whether he or she is a full- or part-time employee, and wages or salary actually lost.

(5) If a claim is made for loss of income and the claimant is self-employed, documentary evidence showing the amount of earnings actually lost.

(6) Any other evidence or information which may have a bearing on either the responsibility of the United States for the personal injury or the damages claimed.

(c) *Property damage.* In support of a claim for damage to or loss of property, real or personal, the claimant may be required to submit the following evidence of information:

(1) Proof of ownership of the property interest which is the subject of the claim.

(2) A detailed statement of the amount claimed with respect to each item of property.

(3) An itemized receipt of payment for necessary repairs or itemized written estimates of the cost of these repairs.

(4) A statement listing date of purchase, purchase price, and salvage value, where repair is not economical.

(5) Any other evidence or information which may have a bearing on either the responsibility of the United States for the injury to or loss of property or the damages claimed.

§ 14.25 Amending a claim.

The claimant may amend a claim presented in compliance with 10 CFR 14.13 at any time prior to final agency action or prior to the exercise of the claimant's option under 28 U.S.C. 2675(a). The claimant or his or her duly authorized agent or legal representative shall sign each amendment and submit it in writing. Upon the timely filing of an amendment to a pending claim, the agency shall have six months in which to make a final disposition of the claim as amended and the claimant's option under 28 U.S.C. 2675(a) does not accrue until six months after the filing of an amendment.

§ 14.27 Time limit.

The claimant shall furnish evidence and information of the types described in 10 CFR 14.23, to the extent reasonably practicable, when the claim is initially presented. If the claimant fails to furnish sufficient evidence and information within six months after the claim was initially presented to enable NRC to adjust, determine, compromise and settle the claim, NRC may consider the claim a nullity.

Subpart C—Commission Action and Authority

§ 14.31 Investigation.

The NRC may—

(a) Require the claimant to furnish any evidence or information which is relevant to its consideration of the claim;

(b) Examine the claimant; or

(c) Investigate, or request any other Federal agency to investigate, a claim filed under this part.

§ 14.33 Officials authorized to act.

The Executive Legal Director or the Executive Legal Director's designee shall exercise the authority to adjust, determine, compromise and settle a claim under the provisions of 28 U.S.C. 2672.

§ 14.35 Limitation on NRC's authority.

(a) The NRC shall effect an award, compromise, or settlement of a claim hereunder in excess of $25,000 only with the prior written approval of the Attorney General or his designee. For the purposes of this paragraph, a principal claim and any derivative or subrogated claim are treated as a single claim.

(b) The NRC may adjust, determine, compromise, or settle a claim under this part only after consultation with the Department of Justice if, in the opinion of the Office of the Executive Legal Director—

(1) A new precedent or a new point of law is involved;

(2) A question of policy is or may be involved;

(3) The United States is or may be entitled to indemnity or contribution from a third party and the NRC is unable to adjust the third party claim; or

(4) The compromise of a particular claim, as a practical matter, will or may control the disposition of a related claim in which the amount to be paid may exceed $25,000.

(c) The NRC may adjust, determine, compromise, or settle a claim under this part only after consultation with the Department of Justice if the NRC is informed or is otherwise aware that the United States, or an employee, agent, or cost-plus contractor of the United States, is involved in litigation based on a claim arising out of the same incident or transaction.

(d) When Department of Justice approval or consultation is required under this section or the advice of the Department of Justice is otherwise requested, the NRC shall direct the referral or request to the Assistant Attorney General, Civil Division, Department of Justice, in writing. The NRC shall ensure that the referral or request contains—

(1) A short and concise statement of the facts and the reasons for the referral or request;

(2) Copies of relevant portions of NRC's claim file; and

(3) A statement of the recommendations or views of the NRC.

A referral or request to the Department of Justice may be made at any time after presentment of a claim to the NRC.

§ 14.37 Final denial of claim.

The NRC shall send notice of a final denial of a claim in writing to the claimant, his or her attorney or legal representative, by certified or registered mail. The notification of final denial may include a statement of the reasons for the denial. The NRC shall include a statement in the notification of final denial that, if the claimant is dissatisfied with NRC's action, he or she may file suit in an appropriate U.S. District Court not later than 6 months after the date of mailing of the notification.

§ 14.39 Reconsideration of a claim.

Prior to the commencement of suit and prior to the expiration of the 6-month period provided in 28 U.S.C. 2401(b), a claimant, of his or her duly authorized agent, or legal representative, may file a written request with the NRC for reconsideration of a final denial of a claim. Upon the timely filing of a request for reconsideration, the NRC shall have 6 months from the date of filing in which to make a final disposition of the claim, and the claimant's option under 28 U.S.C. 2675(a) does not accrue until 6 months after the filing of a request for reconsideration. Final NRC action on a request for reconsideration shall be effected in accordance with the provisions of 10 CFR 14.37.

§ 14.41 Payment of approved claims.

(a) The NRC shall pay any award, compromise, or settlement in an amount of $2,500 or less made under the provisions of 28 U.S. 2672 out of the appropriations available to it. The NRC shall obtain payment of any award, compromise, or settlement in excess of $2,500 from the Department of the Treasury by forwarding Standard Form 1145 to the Payment Branch, Claims Group, General Accounting Office. If an award, compromise, or settlement is in excess of $25,000, Standard Form 1145 must be accompanied by evidence that the award, compromise, or settlement has been approved by the Attorney General or the Attorney General's designee. When the use of Standard Form 1145 is required, it must be executed by the claimant or it must be accompanied by either a claims settlement agreement or a Standard Form 95 executed by the claimant.

(b) If a claimant is represented by an attorney, the voucher for payment must designate both the claimant and his or her attorney as payees, and the check must be delivered to the attorney, whose address appears on the voucher.

§ 14.43 Acceptance of payment constitutes release.

Acceptance by the claimant, his agent, or legal representative, of any award, compromise, or settlement made under the provisions of 28 U.S.C. 2672 or 2677, is final and conclusive on the claimant, his or her agent or legal representative and any other person on whose behalf or for whose benefit the claim has been presented. Acceptance constitutes a complete release of any claim against the United States and against any employee of the Government whose act or omission gave rise to the claim.

Subpart D—Employee Drivers

§ 14.51 Procedures when employee drivers are sued.

(a) Any NRC employee against whom a civil action or proceeding is brought for damage to property, or for personal injury or death, on account of the employee's operation of a motor vehicle in the scope of his of her office or employment with the NRC, shall promptly deliver all process and pleadings served upon the employee, or an attested true copy, to the Office of the Executive Legal Director. If the action is brought against an employee's estate, this procedure applies to the employee's personal representative.

(b) In addition, upon the employee's receipt of any process or pleadings, or any prior information regarding the commencement of a civil action or proceeding, the employee shall immediately advise the Office of the Executive Legal Director by telephone or telegraph.

(c) The Executive Legal Director or designee shall promptly inform the General Counsel of NRC concerning the commencement of the action and furnish to the General Counsel:

(1) Copies of all process and pleadings, and

(2) Copies of all accident, police, and investigation reports and other evidence relating to the action or proceeding.

§ 14.53 Scope of employment report.

Copies of the documents received by the General Counsel from the Executive Legal Director and a report containing all data bearing upon the question whether the employee was acting within the scope of his or her office or employment will be furnished by the General Counsel or designee to the United States Attorney for the district encompassing the place where the civil action or proceeding is brought. A copy of such documents and the report also will be furnished to the Chief of the Torts Section, Civil Division, Department of Justice, at the earliest possible date, or within the time specified by the United States Attorney.

§ 14.55 Removal of state court proceedings.

Upon a certification by the United States Attorney that the defendant employee was acting within the scope of his or her office or employment at the time of the incident out of which the suit arose, any civil action or proceeding commenced in a State court may be

removed to the district court of the United States for the district and division encompassing the place where the action or proceeding is pending in accordance with 28 U.S.C. 2679.

§ 14.57 Suit against United States exclusive remedy.

The remedy against the United States provided by 28 U.S.C. 1346(b) and 2672 for damage to or loss of property or personal injury or death, resulting from the operation by an employee of the Government of any motor vehicle while acting within the scope of his of her office or employment, is exclusive of any other civil action or proceeding by reason of the same subject matter against the employee or his or her estate whose act or omission gave rise to the claim.

Dated at Bethesda, Maryland the 14th day of December 1981.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76 (Texas—9 Addition II)]

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Travis Peak Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on January 14, 1982.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on December 30, 1981.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511 or Walter W. Lawson, (202) 357-8556.

SUPPLEMENTARY INFORMATION:

I. Background

On November 2, 1981, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Travis Peak Formation located in the northeastern part of the State of Texas and covering Railroad Commission Districts 5 and 6, be designated as a tight formation. The Commission previously adopted recommendations that the Travis Peak Formation in the Sym-Jac, West (Hosston) Field and the Bear Grass Area of east Texas be designated as tight formations (Docket No. RM79-76 (Texas—9) and (Texas—9 Addition), Order No. 154, issued June 10, 1981 and Order No. 180, issued October 8, 1981, respectively). Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that this additional area of the Travis Peak Formation be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas' recommended addition to the Travis Peak Formation is encountered in the northeastern part of the State of Texas, in the east Texas basin, and consists of all of Texas Railroad Commission Districts 5 and 6. This recommendation includes the previously designated areas of the Sym-Jac, West (Hosston) Field and the Bear Grass Area, both of which are located in Texas Railroad Commission District 5. Accordingly, the description of the formation in the rule has been amended to consolidate the three Travis Peak recommendations. The Travis Peak Formation is the basal formation of the Lower Cretaceous series and overlies the Jurassic Cotton Valley Sands and is below the Pettit Formation. The area recommended for designation consists of Lower Cretaceous age, lenticular, alternating sandstone and shale beds. The top of the Travis Peak Formation is encountered immediately below the last limestone zone of the overlying Sligo/Pettit Formation. The base of the Travis Peak is the top of the Cotton Valley Group, where a black shale zone is found. The top of the Travis Peak Formation is found at a depth of 3,140 feet in Lamar County, in the northern area of the east Texas basin, and at 10,850 feet in the southern area of Cherokee County, The Travis Peak Formation ranges in thickness from approximately 500 to 2,500 feet.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No, RM80-68 (45 *FR* 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Travis Peak Formation in Texas Railroad Commission Districts 5 and 6 as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the

Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 14, 1982. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76 (Texas–9 Addition II), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than December 30, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18 Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director Office of Pipeline and Producer Regulation.

PART 271—CEILING PRICES

Section 271.703(d) is amended in subparagraph (36) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79–76, subindexed as indicated, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(36) *Travis Peak Formation in Texas.* RM79–76 (Texas–9).

(i) *Delineation of formation.* The Travis Peak Formation in the east Texas basin consists of the 47 counties that make up Texas Railroad Commission Districts 5 and 6. The area is irregular in shape. The northern boundary is the Texas-Oklahoma border. The eastern boundary is the Texas-Louisiana border. The southern and western boundaries consist of the limits of Railroad Commission Districts 5 and 6.

(ii) *Depth.* The top of the Travis Peak Formation is found at a depth of 3,140 feet in Lamar County, in the northern area of the east Texas basin, and at 10,850 feet in the southern area of Cherokee County. The Travis Peak Formation ranges in thickness from approximately 500 feet to 2,500 feet.

BILLING CODE 1505-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2670 and 2672

Mergers and Transfers Between Multiemployer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Proposed rule.

SUMMARY: This proposed regulation provides guidance for determining whether a merger, spinoff or transfer of assets or liabilities between multiemployer plans complies with the requirements of the Employee Retirement Income Security Act of 1974, as amended. That law requires the Pension Benefit Guaranty Corporation to issue regulations concerning notice requirements for such mergers and transfers. This proposed regulation sets forth those notice requirements and interprets the other requirements of the act. The effect of this regulation if adopted would be to prescribe a procedure under which plan sponsors must notify the PBGC of any merger, spinoff or transfer between multiemployer plans. The regulation if adopted would also provide needed guidance to plan sponsors in complying with other requirements of the law concerning such transactions.

DATE: Comments must be received on or before February 22, 1982.

ADDRESSES: Comments should be addressed to the Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, Suite 7300, 2020 K Street NW., Washington, D.C. 20006. Written comments will be available for public inspection at the PBGC, Suite 7100, at

the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Suite 7300, 2020 K Street NW., Washington, D.C. 20006; 202–254–4862.

SUPPLEMENTARY INFORMATION:

Background

The Multiemployer Pension Plan Amendments Act of 1980, Pub. L. No. 96–364, 94 Stat. 1208, ("Multiemployer Act"), became law on September 26, 1980 and amended the Employee Retirement Income Security Act of 1974 ("ERISA"). (As used herein, "ERISA" means the Act as amended, unless the context requires otherwise.) Under section 4231 of ERISA, mergers between multiemployer plans and transfers of assets and liabilities between multiemployer plans must comply with four requirements:

(1) The plan sponsor must notify the Pension Benefit Guaranty Corporation ("PBGC") at least 120 days before the effective date of the merger or transfer;

(2) No participant's or beneficiary's accrued benefit may be lower immediately after the effective date of the merger or transfer than the benefit immediately before that date;

(3) The benefits of participants and beneficiaries cannot be reasonably expected to be subject to suspension as a result of plan insolvency; and

(4) An actuarial valuation of the assets and liabilities of each of the affected plans must have been performed during the plan year preceding the effective date of the merger or transfer, based upon the most recent data available as of the day before the start of that plan year, or other valuation of such assets and liabilities performed under such standards and procedures as the PBGC may prescribe by regulation.

Section 4231(a) grants authority to the PBGC to vary these requirements by regulation.

Prior to enactment of the Multiemployer Act, section 208 of ERISA and section 414(1) of the Internal Revenue Code prohibited mergers, spinoffs and transfers between pension plans unless "each participant in the plan would (if the plan then terminated) receive a benefit immediately after the merger, consolidation, or transfer which is equal to or greater than the benefit he would have been entitled to receive immediately before the merger, consolidation, or transfer (if the plan had then terminated)."

Both section 208 of ERISA and section 414(1) of the Internal Revenue Code provided that these rules were only applicable to multiemployer plans to the extent the PBGC determined that they should be. PBGC did not apply the rules to multiemployer plans, and in the Multiemployer Act, Congress made sections 208 of ERISA and sections 401(a)(12) and 414(1) of the Internal Revenue Code applicable only to plans that are not multiemployer plans covered by Title IV of ERISA. For mergers, spinoffs and transfers between multiemployer plans, Congress substituted the requirements of section 4231 described above. This regulation deals with those requirements.

Section 4232 of ERISA sets forth requirements for mergers, spinoffs and transfers between a multiemployer plan and a single-employer plan (i.e., a plan that is not a multiemployer plan). For example, a spinoff of a single-employer plan from a multiemployer plan would be covered by section 4232. These transactions are not covered by this proposed regulation.

Definitions

Part 2670 contains all the definitions for Subchapter H in which this regulation will be included. Section 2670.3 defines "merger," "transfer of assets or liabilities," and "spinoff." The definitions are similar to those used in a regulation under section 414(1) of the Internal Revenue Code governing mergers, spinoffs and transfers involving single-employer plans (Treas. Reg. 1.414(1)–1(b) (2), (3), and (4)). Under both the Treasury regulation and the regulation proposed in this notice, a transfer involves both a decrease in the assets or liabilities of one plan and a corresponding increase in the assets or liabilities of another plan. A transfer of assets or liabilities pursuant to a written reciprocity agreement is not treated as a transfer under the proposed regulation, although transfers under reciprocity agreements between single employer plans are treated as transfers under the Treasury regulation. Section 4234(c) of ERISA authorizes the PBGC to issue regulations under which such transfers pursuant to a reciprocity agreement would be subject to the merger and transfer rules. However, PBGC has determined that imposition of the merger and transfer requirements on such transfers is unnecessary at this time to protect participants and beneficiaries and the insurance system.

Several rules in the proposed regulation distinguish between mergers and spinoffs. As under the Treasury regulations, "merger" means the combining of two or more plans into a single plan, and "spinoff" means the splitting of a single plan into two or more plans. Transfers other than spinoffs are divided into significant and non-significant transfers, with significant transfers treated like spinoffs and non-significant transfers treated like mergers. For these purposes, a transfer is significant if assets transferred exceed 15% of the assets of the transferring plan or unfunded liabilities assumed exceed 15% of the assets of the assuming plan.

Accrued Benefits

Under section 4231(b)(2) of ERISA, a merger, spinoff or transfer is prohibited unless each participant and beneficiary is entitled to an accrued benefit immediately after the transaction that equals or exceeds the accrued benefit immediately before the transaction. Under § 2672.3 of this regulation, the plan or plans to which liabilities are transferred must contain a provision stating that no accrued benefits will be reduced as a result of the transaction. Plans involved in a merger, spinoff or transfer frequently have different benefit structures. The inclusion of a provision preserving accrued benefits will permit mergers, spinoffs and transfers involving such plans to satisfy the accrued benefit rule of ERISA without requiring detailed and costly computations by the affected plans and the PBGC.

Valuation Requirement

Under section 4231(b)(4) of ERISA, each plan affected by a merger, spinoff or transfer must have an actuarial valuation performed for the plan year preceding the effective date of the transaction "or other valuation of such assets and liabilities performed under such standards and procedures as the corporation may prescribe by regulation." PBGC has determined that the requirement for a valuation in the year preceding a merger or non-significant transfer would be unnecessarily burdensome. Plans are already required to have an actuarial valuation performed every three years under section 302(c)(9) of ERISA and section 412(c)(9) of the Internal Revenue Code. An additional valuation would add to the plans' expenses and could discourage otherwise desirable mergers and non-significant transfers. Therefore, § 2672.4(a) permits plans to rely on the last actuarial valuation performed for funding purposes within the three years preceding the effective date of the merger or non-significant transfer, updated to reflect any material changes.

The proposed regulation does not waive the requirement of a recent valuation for spinoffs and significant

transfers. Both spinoffs and significant transfers pose a danger that plan assets and the plan's contribution base will be divided in a manner that would favor certain employers or participants, creating a weak plan or weakening an existing plan. This danger does not normally exist with mergers and is less likely in a non-significant transfer. Therefore under proposed § 2672.4(b), plans involved in a spinoff or significant transfer must comply with the statutory requirement that a valuation be performed for the plan year preceding the spinoff or transfer.

The Act requires that the valuation be based on data as of the day before the start of the plan year preceding the spinoff or transfer. Some plans may routinely perform valuations as of a date other than the last day of a plan year. Therefore, § 2672.4(b) permits the actuary to use any date in the last plan year ending before the effective date of the spinoff or transfer. The date used for this valuation must be the same day of the plan year as that used for funding valuations.

Plan Solvency Safe Harbors

Section 4231(b)(3) of ERISA prohibits a merger, spinoff or transfer unless "the benefits of participants and beneficiaries are not reasonably expected to be subject to suspensions under section 4245." Under section 4245, an insolvent plan must suspend benefits above the level guaranteed by PBGC to the extent the plan has insufficient assets to pay such benefits. Section 2672.5 of the proposed regulation provides plan solvency tests that will operate as safe harbors in satisfying section 4231(b)(3). Satisfaction of one of these tests constitutes satisfaction of section 4231(b)(3). Theses tests are designed to demonstrate the ability to pay expected benefits over a long-range period.

For a merger or non-significant transfer, the regulation provides two safe harbors. A plan will satisfy section 4231(b)(3) if assets of the merged plan (or each plan involved in a transfer) equal 5 times the benefit payments made by the plan (or plans) in the last plan year ending before the date on which the notice of the transaction must be filed. Plans are already required to report the fair market value of assets and the amount of benefit payments on the Form 5500. These same numbers may be used in calculating the plan solvency test. Benefit payments may be estimated if data for the full plan year is not available when plan solvency is calculated. Alternatively, plans invloved in a merger or non-significant transfer will satisfy the plan solvency requirement if expected assets plus expected contributions in the 5 full plan years after the merger or transfer are sufficient to meet expected benefit payments in those years.

The regulation establishes a more rigorous safe harbor for spinoffs and significant transfers. The test for spinoffs and significant transfers requires a demonstration for each plan that (1) the plan is expected to satisfy minimum funding standards (including reorganization funding, if applicable) for the five plan years after the spinoff or transfer, (2) assets immediately after the spinoff or transfer will be sufficient to meet expected benefit payments in the first three full plan years after the spinoff or transfer, (3) expected contributions in the first full plan year after the spinoff or transfer are sufficient to meet benefit payments in that year, and (4) future contributions are expected to equal unfunded accrued benefits and future normal costs.

In addition to the safe harbors set forth in the proposed regulation, § 2672.2(a)(3)(ii) of the proposed regulation permits the plan actuary to demonstrate by other means that, based on methods and assumptions acceptable to the PBGC, benefits are not reasonably expected to be suspended due to insolvency. PBGC request members of the public who identify alternative tests for plan solvency to include these alternative tests in their comments on the proposed regulation.

Notice of Intent To Merge or Transfer

Section 4231(b)(1) authorizes the PBGC to establish notice requirements for proposed mergers, spinoffs and transfers. Section 2672.7 of the proposed regulation establishes a procedure for notifying PBGC of a proposed merger, spinoff or transfer. A single notice filed by the plan sponsors of the plans involved in a merger, spinoff or transfer is preferred.

In addition to information necessary to identify the plans involved in the merger, spinoff or transfer and their plan sponsors, the proposed regulation requires that each plan submit: (1) A copy of its most recent actuarial valuation, updated to reflect any material modifications; (2) a statement, signed by an enrolled actuary, that the merger, spinoff or transfer satisfies the applicable plan solvency test or a statement of the other basis on which the actuary has determined that benefits are not likely to be suspended as a result of plan insolvency; and (3) the plan provision that protects accrued benefits. Section 2672.7(e)(6) requires additional information in a notice of a spinoff or significant transfer to enable PBGC to determine how assets and liabilities are being divided.

ERISA requires PBGC to be notified at least 120 days before the effective date of the merger, spinoff or transfer. Section 2672.7(f) permits the PBGC to waive all or a portion of the notice requirement if it determines that refusal to permit the merger, spinoff or transfer when scheduled would adversely affect the participants and beneficiaries.

Compliance Determination

Under section 4231(c) of ERISA, a merger, spinoff or transfer is deemed not to constitute a prohibited transaction under section 406 (a) and (b)(2) of ERISA if the PBGC determines that the merger, spinoff or transfer has satisfied the requirements of section 4231. PBGC will determine whether the transaction complies with section 4231 upon the request of the plan sponsor. Requests for a compliance determination are voluntary.

PBGC will not determine whether a proposed merger, spinoff or transfer would be a prohibited transaction absent compliance with section 4231. Further, PBGC's determination that a transaction fails to comply with section 4231 does not automatically mean that the transaction is a prohibited transaction.

The transactions addressed in this regulation will, in many instances, involve conduct which is also subject to the fiduciary responsibility standards of part 4 of Title 1 of ERISA. Among other things, these standards require that a fiduciary with respect to a plan act prudently, solely in the interest of the participants and beneficiaries, and for the exclusive purpose of providing benefits to participants and their beneficiaries. The fact that a transaction satisfies the conditions of this regulation and the fact that a plan secures a compliance determination under this regulation is not determinative of whether it satisfies the requirements of part 4 of Title 1 other than sections 406 (a) and (b)(2).

To make the determination that a merger, spinoff or transfer complies with section 4231, PBGC cannot rely on a certification. Therefore, in addition to the information required in the notice, a plan sponsor requesting a compliance determination must submit a copy of the proposed merger or transfer agreement and a copy of the calculations on which the actuary based the determination that the plan satisfied the applicable plan solvency requirement. If the actuary did not use the plan solvency tests set forth in the proposed regulation, the calculations on which the actuary based

his or her determination should already be included in the notice. The request for a compliance determination should accompany the notice.

De Minimis Merger or Transfer

Under section 4234(b) of ERISA, the PBGC has authority to exempt *de minimis* mergers and transfers from the requirements of ERISA. Section 2672.7(e)(5)(i) of the proposed regulation provides that the notice of a *de minimis* merger or transfer need not include a determination from an enrolled actuary that the *de minimis* merger or transfer satisfies the plan solvency requirement. Under § 2672.8(c), of the proposed regulation, however, a request that the PBGC make a compliance determination with respect to a *de minimis* merger or transfer must include a certification that the plans meet the plan solvency requirement set forth in § 2672.5(b) of the proposed regulation. The enrolled actuary may use the most recent actuarial valuation in determining that the merger or transfer satisfies the solvency requirement without adjusting for other *de minimis* mergers and transfers that have occurred since the valuation date.

Under § 2672.6(b) of the proposed regulation, a merger is *de minimis* if the accrued benefits of one plan are less than 3% of the assets of the other plan involved in the merger. Similarly, a transfer is *de minimis* if the value of the assets being transferred, if any, is less than 3% of the transferring plan's assets and if the value of the liabilities being assumed, if any, is less than 3% of the assets of the assuming plan. A merger or transfer is not *de minimis*, however, if it exceeds the 3% limits when aggregated with prior mergers or transfers in the same plan year.

Effective Date

The proposed regulation provides that this Part will be effective 30 days after publication of the final regulation in the **Federal Register**. Section 4231(b)(1) of ERISA requires that notices be filed for all mergers, spinoffs or transfers that occur after September 25, 1980. Notices required to be filed before the effective date of the regulation (*i.e.* for transactions occurring less than 120 days after the effective date) will not have to comply with the specific notice requirements of the regulation. Until publication of the final regulation, a notice that identifies the plans involved in the transaction is sufficient to satisfy the Act, although plan sponsors are encouraged to submit additional information. Plans requesting a compliance determination may be required to submit some or all of the data set forth in this proposed regulation before a determination can be made. Plans must, of course, comply with the substantive requirements of section 4231(b) (2) through (4), as well as the notice requirement of section 4231(b)(1).

The Pension Benefit Guaranty Corporation has determined that this regulation is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This conclusion is based on the fact that this regulation, itself, neither permits nor prohibits mergers or transfers between multiemployer pension plans. ERISA permits such transactions subject to certain specified conditions. This regulation merely interprets those conditions.

Under section 605(b) of the Regulatory Flexibility Act, the Pension Benefit Guaranty Corporation certifies that this rule will not have a significant economic impact on a substantial number of small entities. Pension plans with fewer than 100 participants have traditionally been treated as small plans. The proposed regulation affects only multiemployer plans covered by PBGC. Defining "small plans" as those with under 100 participants, such plans represent only 10% of all multiemployer plans covered by PBGC (200 out of 2000). Further, small multiemployer plans represent only .3% of all small plans covered by the PBGC (200 out of 61,200) and less than .05% of all small plans (200 out of 427,900). Therefore compliance with sections 603 and 604 of the Regulatory Flexibility Act is waived.

Interested parties are invited to submit comments on this proposed regulation. Comments should be addressed to: Assistant Executive Director for Policy and Planning, Pension Benefit Guaranty Corporation (140), Suite 7300, 2020 K Street, N.W., Washington, D.C. 20006. Written comments will be available for public inspection at the above address, Suite 7100, between the hours of 9:00 a.m. and 4:00 p.m. Each person submitting comments should include his or her name and address, identify this proposed regulation, and give reasons for any recommendation. This proposal may be changed in light of the comments received.

In developing this proposed regulation, PBGC solicited comments from knowledgeable individuals outside the corporation. Copies of these comments are available for public inspection at the above address.

In consideration of the foregoing, it is proposed to amend Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, as follows:

The Table of Contents for Part 2670 is revised to read as follows:

PART 2670—DEFINITIONS

Sec.
2670.1 Purpose and scope.
2670.2 General definitions.
2670.3 Merger and transfer definitions.

Authority: Sec. 4002(b)(3), Pub. L. 93-406, as amended by sec. 403(1), Pub. L. 96-364, 94 Stat. 1208, 1302 (1980) (29 U.S.C. 1302).

2. A new § 2670.3 is added to Part 2670 to read as follows:

§ 2670.3 Merger and transfer definitions.

For purposes of Part 2672—

"Acturial valuation" means a valuation of assets and liabilities performed by an enrolled actuary using the actuarial assumptions used for purposes of determining the charges and credits to the funding standard account under section 302 of ERISA and section 412 of the Code.

"Certified change of collective bargaining representative" means a change of collective bargaining representative certified under the Labor-Management Relations Act of 1947, as amended, or the Railway Labor Act, as amended.

"Merger" means the combining of two or more plans into a single plan. For example, a consolidation of two plans into a new plan is a merger.

"Significant transfer" means the transfer of assets that equal or exceed 15% of the assets of the transferor plan before the transfer or the transfer of unfunded accrued benefits that equal or exceed 15% of the assets of the transferee plan before the transfer.

"Spinoff" means the splitting of a single plan into two or more plans, at least one of which is a new plan.

"Transfer" and "transfer of assets of liabilities" mean a diminution of assets or liabilities with respect to one plan and the acquisition of these assets or the assumption of these liabilities by another plan or plans. However, the shifting of assets or liabilities pursuant to a written reciprocity agreement between two multiemployer plans in which one plan assumes liabilities of another plan is not a transfer of assets or liabilities. In addition, the shifting of assets between several funding media

used for a single plan (such as between trusts, between annuity contracts, or between trusts and annuity contracts) is not a transfer of assets or liabilities.

2. A new Part 2672 is added as follows:

PART 2672—MERGERS AND TRANSFERS BETWEEN MULTIEMPLOYER PLANS

Sec.
2672.1 Purpose and scope.
2672.2 Requirements for mergers, spinoffs and transfers.
2672.3 Preservation of accrued benefits.
2672.4 Valuation requirement.
2672.5 Plan solvency tests.
2672.6 *De minimis* mergers and transfers.
2672.7 Notice of merger, spinoff or transfer.
2672.8 Request for compliance determination.

Authority: Secs. 4002(b)(3), 4231(a), (b)(1) and (b)(4), and 4234(b), Pub. L. 93–406, 88 Stat. 829, 1004 (1974), as amended by secs. 403(1) and 104 (respectively), Pub. L. 96–364, 94 Stat. 1302, 1244 and 1247 (1980) (29 U.S.C. 1302(b)(2), 1411(a), (b)(1) and (b)(4), and 1414(b)).

§ 2672.1 Purpose and scope.

(a) *Purpose.* The purpose of this part is to prescribe notice requirements for mergers, spinoffs and transfers of assets or liabilities among multiemployer pension plans. This part also interprets the other requirements of sections 4231 and 4234 of the Act and prescribes special rules for *de minimis* mergers and transfers.

(b) *Scope.* This part applies to mergers, spinoffs and transfers among multiemployer plans if any of the plans is covered by section 4021(a) of the Act either immediately before or immediately after the merger or transfer. This part applies to those mergers and transfers for which a notice is required to be filed after the effective date of this part.

§ 2672.2 Requirements for mergers, spinoffs and transfers.

(a) *General requirements.* A plan sponsor may not cause a multiemployer plan to merge with one or more multiemployer plans or transfer assets or liabilities (including a spinoff) to or from another multiemployer plan unless the merger, spinoff or transfer satisfies all of the following requirements:

(1) No participant's or beneficiary's accrued benefit will be lower immediately after the effective date of the merger, spinoff or transfer than the benefit immediately before the merger, spinoff or transfer.

(2) Actuarial valuations of the plans involved in the merger, spinoff or transfer have been performed in accordance with § 2672.4.

(3) For each plan involved in the transaction, an enrolled actuary—

(i) Determines that the plan involved meets the plan solvency requirement set forth in § 2672.5; or

(ii) Otherwise demonstrates to the satisfaction of the PBGC that benefits under the plan are not reasonably expected to be subject to suspension under section 4245 of the Act.

(4) The plan sponsor notifies the PBGC of the merger, spinoff or transfer in accordance with § 2672.7.

(b) *Compliance determination.* If a plan sponsor requests a determination that a merger, spinoff or transfer that may otherwise be prohibited by section 406(a) or (b)(2) of the Act satisfies the requirements of section 4231 of the Act, the plan sponsor shall submit the information described in § 2672.8 in addition to the information required by § 2672.7. PBGC may request additional information if necessary to determine whether a merger, spinoff or transfer complies with the requirements of section 4231 and this part. Plan sponsors are not required to request a compliance determination. Under section 4231(c(of the Act, if the PBGC determines that the merger, spinoff or transfer complies with section 4231 of the Act and this part, the merger, spinoff or transfer will not constitute a violation of the prohibited transaction provisions of section 406(a) or (b)(2) of the Act.

(c) *Change in bargaining representative.* Transfers of assets and liabilities pursuant to a change in bargaining representative are governed by section 4235 of the Act. Plan sponsors involved in such transfers are not required to comply with this part. However, under section 4235(f)(1) of the Act, the plan sponsors of the plans involved in the transfer may agree to a transfer that complies with sections 4231 and 4234 of the Act. Plan sponsors that elect to comply with sections 4231 and 4234 must comply with the rules in this part.

§ 2672.3 Preservation of accrued benefits.

Section 4231(b)(2) of the Act and § 2672.2(a)(1) of this part require that no participant's or beneficiary's accrued benefit will be lower immediately after the effective date of the merger, spinoff or transfer than the benefit immediately before the merger, spinoff or transfer. A plan that assumes an obligation to pay benefits for a group of participants satisfies this requirement if the plan contains a provision preserving all accrued benefits, without detailing the benefits. The determination of what is an accrued benefit shall be made in accordance with section 411 of the Code and the regulations thereunder.

§ 2672.4 Valuation requirement.

(a) *Mergers and non-significant transfers.* A merger or a transfer that is not significant ("non-significant transfer") satisfies section 4231(b)(4) of the Act and § 2672.2(a)(2) of this part (requiring an actuarial valuation) if an actuarial valuation has been performed for each plan involved in the merger or transfer based on the assets and liabilities of the plan as of a date not more than three years before the date on which the notice of the merger or transfer is filed.

(b) *Spinoffs and significant transfers.* A spinoff or significant transfer satisfies section 4231(b)(4) of the Act and § 2672.2(a)(2) of this part if an actuarial valuation has been performed for each plan involved in the transfer, based on the assets and liabilities of the plan as of a date not earlier than the first day of the last plan year ending before the effective date of the spinoff or transfer. The valuation should separately identify assets, contributions and liabilities being transferred or spun-off. The valuation should be based on the actuarial assumptions and methods that are reasonably expected to be used for the first plan year beginning after the spinoff or transfer.

(c) *Most recent valuation.* All calculations required by this part must be based on the most recent actuarial valuation, updated to show any material changes.

§ 2672.5 Plan solvency tests.

(a) *Spinoffs and significant transfers.* A spinoff or significant transfer satisfies the plan solvency requirement if all of the following requirements are met for each plan involved in the spinoff or transfer:

(1) Expected contributions shall equal or exceed the estimated amount necessary to satisfy the minimum funding requirement of section 412(a) of the Code for the five plan years beginning on or after the effective date of the spinoff or transfer.

(2) The fair market value of plan assets immediately after the spinoff or transfer shall equal or exceed the total amount of expected benefit payments during the first five plan years beginning on or after the effective date of the spinoff or transfer.

(3) Expected contributions for the first plan year beginning on or after the effective date of the spinoff or transfer shall equal or exceed expected benefit payments for that plan year.

(4) Net contributions for the amortization period shall equal or exceed unfunded accrued benefits.

(i) "Unfunded accrued benefits" means the excess of the present value of accrued benefits over the fair market value of the assets, determined on the basis of the actuarial valuation required under § 2672.4.

(ii) "Net contributions" means the present value of the excess of expected contributions over expected normal costs.

(iii) "Amortization period" means either 25 plan years or the amortization period for the resulting base when the combined charge base and the combined charge base are offset under section 412(b)(4) of the Code. The actuary may select either period.

(b) *Mergers and non-significant transfers.* A merger or non-significant transfer satisfies the plan solvency requirement if, for the merged plan or for each plan that continues after the transfer—

(1) The fair market value of plan assets immediately after the merger or transfer equals or exceeds 5 times the benefit payments in the last plan year ending before the effective date of the merger or transfer; or

(2) In each of the first 5 plan years beginning after the merger or transfer, expected plan assets plus expected contributions and investment earnings equal or exceed expected expenses and benefit payments for the plan year.

(c) *Assumptions to be used.* All calculations required by this part shall be based on methods and assumptions that are reasonable in the aggregate, based on generally accepted actuarial principles. In determining whether a transaction satisfies one of the plan solvency requirements set forth in this section, the following rules apply:

(1) Expected contributions after a merger, spinoff or transfer shall be determined by assuming that contributions will equal contributions received in the last full plan year ending before the date on which the notice of merger, spinoff or transfer is filed with the PBGC. Contributions shall be adjusted, however, to reflect any change in the rate of employer contributions that has been negotiated (whether or not in effect) or a trend of declining contribution base units over the preceding 5 plan years.

(2) Expected normal costs shall be determined under the funding method and assumptions used by the plan actuary for purposes of determining the minimum funding requirement under section 412 of the Code if those assumptions are reasonable in the aggregate. If the plan is using an aggregate funding method, normal costs shall be determined under the entry age normal method.

(3) Expected benefit payments shall be determined by assuming that current benefits remain in effect and that all scheduled changes in benefits occur.

(4) The fair market value of plan assets immediately after the merger or transfer shall be based on the most recent data available to the plan sponsor immediately before the date on which the notice is filed.

(5) Expected investment earnings shall be determined using the same interest assumption used for determining the minimum funding requirement.

(6) Expected expenses shall be determined using expenses in the last plan year ending before the notice is filed, adjusted to reflect any anticipated changes.

(7) Expected plan assets for a plan year shall be determined by adjusting the most current data on fair market value of plan assets to reflect expected contributions, investment earnings, benefit payments and expenses for each plan year in the period between the date of the most recent fair market valuation and the beginning of the plan year for which expected assets are being determined.

§ 2672.6 De minimis mergers and transfers.

(a) *Special plan solvency rule.* For a *de minimis* merger or transfer, the plan assets, expected contributions and expected benefits may be determined for the plan solvency requirement in § 2672.5(b) without regard to any *de minimis* mergers or transfers that have occurred after the last valuation performed to established charges and credits to the minimum funding standard account under section 412(b) of the Code.

(b) De minimis *merger defined.* A merger is *de minimis* if the present value of accrued benefits (whether or not vested) of one plan is less than 3-percent of the fair market value of the other plan's assets.

(c) De minimis *transfer defined.* A transfer of assets or liabilities is *de minimis* if—

(1) The fair market value of the assets transferred, if any, is less than 3 percent of the fair market value of all the assets of the transferor plan; and

(2) The present value of the accrued benefits transferred is less than 3 percent of the fair market value of all assets of the transferee plan.

(d) *Value of assets and benefits.* For purposes of paragraphs (b) and (c), the value of plan assets and accrued benefits may be determined as of any date prior to the proposed effective date of the merger but not earlier than the date for the most recent valuation performed for purposes of section 412(b) of the Code.

(e) *Aggregation required.* In determining whether a merger or transfer is *de minimis*, previous *de minimis* mergers and transfers within the same plan year shall be aggregated as follows:

(1) A merger is not *de minimis* if the total present value of accrued benefits merged into or transferred to a plan, when aggregated with all prior *de minimis* mergers and transfers to that plan effective within the same plan year, equals or exceeds 3 percent of the value of the plan's assets.

(2) A transfer is not *de minimis* if, when aggregated with all previous mergers and transfers effective within the same plan year—

(i) The value of all assets transferred from the plan equals or exceeds 3 percent of the value of the plan's assets; or

(ii) The present value of all accrued benefits transferred to the plan equals or exceeds 3 percent of the plan's assets.

(3) For purposes of paragraph (e)(1) and (2), the value of plan assets is determined as of the date during the plan year on which the total value of the plan's assets is the highest.

§ 2672.7 Notice of merger, spinoff or transfer.

(a) *When to file.* Except as provided in paragraph (e) of this section, a notice of a proposed merger, spinoff or transfer shall be filed not less than 120 days before the effective date of the transaction. For purposes of this part, the effective date of a merger, spinoff or transfer is the earlier of—

(1) The date on which one plan assumes liability for benefits accrued under another plan involved in the transaction; or

(2) The date on which one plan transfers assets to another plan involved in the transaction.

(b) *Who shall file.* The plan sponsors of all plans involved in a merger, spinoff or transfer, or a duly authorized representative acting on behalf of the plan sponsors, shall file the notice required by this section.

(c) *Where to file.* The notice shall be delivered by mail or submitted by hand to the Division of Case Classification and Control (542), Office of Program Operations, Pension Benefit Guaranty Corporation, Room 5300A, 2020 K Street, N.W., Washington, D.C. 20006.

(d) *Filing date.* For purposes of paragraph (a)—

(1) The notice is considered filed on the date of the postmark stamped on the

cover in which the notice is mailed. *Provided,* That—

(i) The postmark was made by the United States Postal Service, and

(ii) The notice was mailed postage prepaid, properly packaged and addressed to the PBGC.

(2) If the conditions stated in paragraph (d)(1)(i) and (ii) are not met, the notice is considered filed on the date it is received by the PBGC. Notices received after regular business hours are considered filed on the next regular business day.

(e) *Information required.* Each notice shall contain the following information:

(1) For each plan involved in the merger, spinoff or transfer—

(i) The name of the plan;

(ii) The name, address and telephone number of the plan sponsor and of the plan sponsor's duly authorized representative, if any; and

(iii) The nine-digit Employer Identification Number (EIN) assigned by the Internal Revenue Service to the plan sponsor and the three-digit Plan Identification Number (PIN) assigned by the plan sponsor to the plan, and, if different, the EIN or PIN last filed with the PBGC. The notice should indicate if no EIN or PIN has been assigned.

(2) The kind of transaction being reported (merger, spinoff, significant transfer or non-significant transfer).

(3) The proposed effective date of the merger, spinoff or transfer.

(4) A copy of the plan provision stating that no participant's or beneficiary's accrued benefit will be lower immediately after the merger, spinoff or transfer than the benefit immediately before the transaction.

(5) One of the following statements, certified by an enrolled actuary:

(i) A statement that the merger or transfer is *de minimis* as defined in § 2672.6. A notice of a *de minimis* merger or transfer is not required to include the information described in paragraph (e) (6) or (7) of this section.

(ii) A statement that the merger, spinoff or transfer satisfies the applicable plan solvency test set forth in § 2672.5, indicating which test was satisfied. For a non-significant transfer, the statement shall include a certification that the transfer is not significant.

(iii) A statement of the basis on which the actuary has determined that benefits under the plan are not reasonably expected to be subject to suspension under section 4245 of the Act, including supporting calculations, assumptions and methods.

(6) For mergers, spinoffs or transfers (other than *de minimis* mergers or transfers), a copy of the most recent actuarial valuation that satisfies the requirements of § 2672.4.

(7) For a spinoff or significant transfer, the following information used in making the plan solvency determination under § 2672.5(a):

(i) The present value of the accrued benefits in each plan after the spinoff or transfer.

(ii) The fair market value of assets in each plan after the spinoff or transfer.

(iii) The expected benefit payments for each plan in the first plan year beginning on or after the effective date of the spinoff or transfer (determined in accordance with § 2672.5(c)(3)).

(iv) The contribution rates in effect for each plan for the first plan year beginning on or after the effective date of the spinoff or transfer.

(v) The expected contributions for each plan in the first plan year beginning on or after the effective date of the spinoff or transfer (determined in accordance with § 2672.5(c)(1)).

(f) *Waiver of notice.* PBGC may waive the notice requirements of this section and section 4231(b)(1) of the Act if the plan sponsor demonstrates to the satisfaction of the PBGC that failure to complete the merger, spinoff or transfer will cause harm to participants or beneficiaries of the plans involved in the merger, spinoff or transfer.

§ 2672.8 Request for compliance determination.

(a) *Submitting request.* A request for a determination that a merger, or transfer complies with the requirements of section 4231 of the Act may be filed by the plan sponsor or sponsors of one or more plans involved in a merger or transfer.

(1) The request shall be delivered to the address set forth in § 2672.7(c). Except as provided in paragraph (a)(2), the request shall be filed at the same time as the notice described in § 2672.7.

(2) Because the plan solvency test for *de minimis* mergers and transfers is based on the most recent valuation (without adjustment for intervening *de minimis* transactions), a plan sponsor may submit a single request for a compliance determination covering all *de minimis* mergers or transfers that occur between one plan valuation and the next. This special *de minimis* transaction determination may be requested at the time the first notice of a *de minimis* merger or transfer is filed after the valuation. Receipt of this *de minimis* transaction determination does not relieve these plan sponsors of the obligation to notify PBGC of each *de minimis* merger or transfer in accordance with § 2672.7.

(b) *Merger or transfer that is not* de minimis. A request for a compliance determination concerning a merger or transfer that is not *de minimis* shall contain—

(1) A copy of the merger or transfer agreement;

(2) A Summary of the required calculations, including a complete description of assumptions and methods on which the enrolled actuary based the certification that the merger or transfer satisfied a plan solvency test described in § 2672.5;

(3) For a spinoff or significant transfer, copies of all actuarial valuations performed within the 5 years preceding the effective date of the spinoff or transfer; and

(c) De minimis *merger or transfer.* A request for a compliance determination concerning a *de minimis* merger or transfer shall contain one of the following statements, certified by an enrolled actuary:

(1) A statement that the merger or transfer has satisfied one of the plan solvency tests set forth in § 2672.5(b).

(2) A statement described in § 2672.7(e)(5)(iii).

Effective date. This part is proposed to be effective 30 days after publication in the final regulation in the Federal Register.

Issued at Washington, D.C. on this 16th day of December, 1981.

Raymond Donovan,

Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued on the date set forth above, pursuant to a resolution of the Board of Directors authorizing its Chairman to issue this Notice of Proposed Rulemaking.

Henry Rose,

Secretary, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

SELECTIVE SERVICE SYSTEM

32 CFR Parts 1608, 1662 and 1665

Selective Service Regulations; Revised Procedures To Implement the Freedom of Information Act and the Privacy Act of 1974

AGENCY: Selective Service System.

ACTION: Proposed rule.

SUMMARY: Procedures under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act of 1974 (5 U.S.C. 552a) are revised in the interest of clarity and efficiency.

DATES: Comment date: Written comments received on or before January 25, 1982 will be considered. Effective

date: Subject to the comments received the amendments are proposed to become effective upon republication in the **Federal Register** not earlier than January 25, 1982.

ADDRESS: Written comments to: Selective Service System, ATTN: Associate Director for Policy Development, Washington, D.C. 20435.

FOR FURTHER INFORMATION CONTACT: Edward A. Frankle, Associate Director for Policy Development, Selective Service System, Washington, D.C. 20435, Phone: (202) 724–0844.

SUPPLEMENTARY INFORMATION: These amendments to Selective Service Regulations are published pursuant to section 13(b) of the Military Selective Service Act (50 U.S.C. App. 463(b) and 5 U.S.C. 552 and 552a. These Regulations implement 5 U.S.C. 552 and 552a. An earlier draft of these amendments was published at 45 FR 80125 (December 3, 1980).

Interested persons are invited to submit written comments on the proposed regulation. All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Associate Director for Policy Development from 9:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, I have determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612). I have determined that these regualtions do not have significant economic impact on a substantial number of small entities.

December 17, 1981.

Thomas K. Turnage,

Director of Selective Service.

The amendments are:

PART 1608 [REMOVED]

1. Part 1608—Public Information is removed.

2. Parts 1662 and 1665 are added.

PART 1662—FREEDOM OF INFORMATION ACT (FOIA) PROCEDURES

Sec.

1662.1 Applicability of this Part.
1662.2 Procedure for requesting information.
1662.3 Identification of information requested.
1662.4 Consideration of requests for information.
1662.5 Inspection, copying, and obtaining copies.
1662.6 Fees.

Authority: 5 U.S.C. 552, as amended.

§ 1662.1 Applicability of this part.

The provisions of this part prescribe the procedures for requests for information under 5 U.S.C. 552, as amended (Freedom of Information Act).

§ 1662.2 Procedure for requesting information.

Requests for information under the Freedom of Information Act (FOIA) shall be in writing and should be addressed to the Director, Selective Service System, ATTN: Records Manager, Washington, D.C. 20435.

§ 1662.3 Identification of information requested.

Any person who requests information under FOIA shall provide a reasonably specific description of the information sought so that it may be located without undue search. If the description is not sufficient, the records manager will notify the requester and, to the extent possible, indicate the additional information required. Every reasonable effort shall be made to assist a requester in the identification and location of the record or records sought.

§ 1662.4 Consideration of requests for information.

(a) Upon receipt of any request for information or records, the records manager will determine within 10 days (excepting Saturdays, Sundays, and legal federal holidays) whether it is appropriate to grant the request and will immediately provide written notification to the person making the request. If the request is denied, the written notification to the person making the request will include the reasons therefor and a notice that an appeal may be lodged with the Director of Selective Service.

(b) Appeals shall be in writing and addressed to the Director of Selective Service at the address specified in § 1662.2 of this part. The appeal shall include a statement explaining the basis for the appeal. Determinations of appeals will be in writing and signed by the Director, or his designee, within 20 days (excepting Saturdays, Sundays, and legal federal holidays). If, on appeal, the denial is in whole or in part upheld, the written determination will include the reasons therefor and also contain a notification of the provisions for judicial review.

§ 1662.5 Inspection, copying, and obtaining copies.

When a request for information has been approved in accord with § 1662.4, the person making the request may make an appointment to inspect or copy the materials requested during regular business hours by writing or telephoning the records manager at the address listed in § 1662.2. Such materials may be copied manually without charge, and reasonable facilities will be made available for that purpose. Also, copies of individual pages of such materials will be made available in as specified in § 1662.6; however, the right is reserved to limit to a reasonable quantity the copies of such materials which may be made available in this manner.

§ 1662.6 Fees.

(a) Search of records is made without charge.

(b) The charge for office copy reproduction is 25 cents per page. The charge for shelf stock is 10 cents per page.

(c) Copies will not be released to any requester until the required fee is paid in full by cash, check or money order. Checks and money orders should be made payable to the Selective Service System.

(d) Documents will be furnished without charge or at a reduced charge where it is determined that the waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

PART 1665—PRIVACY ACT PROCEDURES

Sec.

1665.1 Rules for determining if an individual is the subject of a record.
1665.2 Requests for access.
1665.3 Access to the accounting of disclosures from records.
1665.4 Requests to amend records.
1665.5 Request for review.
1665.6 Schedule of fees.
1665.7 Information available to the public or to former employers of registrants.

Authority: 5 U.S.C. 552a.

§ 1665.1 Rules for determining if an individual is the subject of a record.

(a) Individuals desiring to know if a specific system of records maintained by the Selective Service System (SSS) contains a record pertaining to them should address their inquiries to the Director, Selective Service System, ATTN: Records Manager, Washington, D.C. 20435. The written inquiry should contain a specific reference to the system of records maintained by Selective Service listed in the SSS Notices of Systems of Records or it should describe the type of record in sufficient detail to reasonably identify the system of records. Notice of SSS System of Records subject to the Privacy

Act is in the Federal Register and copies of the notices will be available upon request to the records manager. A compilation of such notices will also be made and published by the Office of Federal Register, in accord with section 5 U.S.C. 552a(f).

(b) At a minimum, the request should also contain sufficient information to identify the requester in order to allow SSS to determine if there is a record pertaining to that individual in a particular system of records. In instances when the information is insufficient to insure that disclosure will be to the individual to whom the information pertains, in view of the sensitivity of the information, SSS reserves the right to ask the requester for additional identifying information.

(c) Ordinarily the requester will be informed whether the named system of records contains a record pertaining to the requester within 10 days of receipt of such a request (excluding Saturdays, Sundays, and legal federal holidays). Such a response will also contain or reference the procedures which must be followed by the individual making the request in order to gain access to the record.

(d) Whenever a response cannot be made within the 10 days, the records manager will inform the requester of the reason for the delay and the date by which a response may be anticipated.

§ 1665.2 Requests for access.

(a) *Requirement for written requests.* Individuals desiring to gain access to a record pertaining to them in a system of records maintained by SSS must submit their request in writing in accord with the procedures set forth in paragraph b. below.

(b) *Procedures.*—(1) *Content of the Request.* (i) The request for access to a record in a system of records shall be addressed to the records manager, at the address cited above, and shall name the system of records or contain a description of such system of records. The request should state that the request is pursuant to the Privacy Act of 1974. In the absence of specifying solely the Privacy Act of 1974 and, if the request may be processed under both the Freedom of Information Act and the Privacy Act and the request specifies both or neither act, the procedures under the Privacy Act of 1974 will be employed. The individual will be advised that the procedures of the Privacy Act will be utilized, of the existence and the general effect of the Freedom of Information Act, and the difference between procedures under the two acts (e.g. fees, time limits, access). The request should contain necessary information to verify the identity of the requester (see § 1665.2(b)(2)(vi)). In addition, the requester should include any other information which may assist in the rapid identification of the record for which access is being requested (e.g., maiden name, dates of employment, etc.) as well as any other identifying information contained in and required by SSS Notice of Systems of Records.

(ii) If the request for access follows a prior request under § 1665.1, the same identifying information need not be included in the request for access if a reference is made to that prior correspondence, or a copy of the SSS response to that request is attached.

(iii) If the individual specifically desires a copy of the record, the request should so specify.

(2) *SSS action on request.* A request for access will ordinarily be answered within 10 days, except when the records manager determines that access cannot be afforded in that time, in which case the requester will be informed of the reason for the delay and an estimated date by which the request will be answered. Normally access will be granted within 30 days from the date the request was received by the Selective Service System. At a minimum, the answer to the request for access shall include the following:

(i) A statement that there is a record as requested or a statement that there is not a record in the system of records maintained by SSS;

(ii) A statement as to whether access will be granted only by providing copy of the record through the mail; or the address of the location and the date and time at which the record may be examined. In the event the requester is unable to meet the specified date and time, alternative arrangements may be made with the official specified in § 1665.2(b)(1);

(iii) A statement, when appropriate, that examination in person will be the sole means of granting access only when the records manager has determined that it would not unduly impede the requester's right of access;

(iv) The amount of fees charged, if any (see § 1665.6) (Fees are applicable only to requests for copies.);

(v) The name, title, and telephone number of the SSS official having operational control over the record; and

(vi) The documentation required by SSS to verify the identity of the requester. At a minimum, SSS's verification standards include the following:

(A) *Current or former SSS employees.* Current or former SSS employees requesting access to a record pertaining to them in a system of records maintained by SSS may, in addition to the other requirements of this section, and at the sole discretion of the official having operational control over the record, have his or her identity verified by visual observation. If the current or former SSS employee cannot be so identified by the official having operational control over the records, identification documentation will be required. Employee identification cards, annuitant identification, drivers licenses, or the "employee copy" of any official personnel document in the record are examples of acceptable identification validation.

(B) *Other than current or former SSS employees.* Individuals other than current or former SSS employees requesting access to a record pertaining to them in a system of records maintained by SSS must produce identification documentation of the type described herein, prior to being granted access. The extent of the identification documentation required will depend on the type of record to be accessed. In most cases, identification verification will be accomplished by the presentation of two forms of identification. Any additional requirements are specified in the system notices published pursuant to 5 U.S.C. 552a(e)(4).

(C) *Access granted by mail.* For records to be accessed by mail, the records manager shall, to the extent possible, establish identity by a comparison of signatures in situations where the data in the record is not so sensitive that unauthorized access could cause harm or embarrassment to the individual to whom they pertain. No identification documentation will be required for the disclosure to the requester of information required to be made available to the public by 5 U.S.C. 552. When in the opinion of the records manager the granting of access through the mail could reasonably be expected to result in harm or embarrassment if disclosed to a person other than the individual to whom the record pertains, a notarized statement of identity or some similar assurance of identity will be required.

(D) *Unavailability of identification documentation.* If an individual is unable to produce adequate identification documentation the individual will be required to sign a statement asserting identity and acknowledging that knowingly or willfully seeking or obtaining access to a record about another person under false pretenses may result in a fine of up to $5,000. In addition, depending upon the

sensitivity of the records sought to be accessed, the official having operational control over the records may require such further reasonable assurances as may be considered appropriate; e.g., statements of other individuals who can attest to the identity of the requester. No verification of identity will be required of individuals seeking access to records which are otherwise available to any person under 5 U.S.C. 552, Freedom of Information Act.

(E) *Access by the parent of a minor, or legal guardian.* A parent of a minor, upon presenting suitable personal identification, may access on behalf of the minor any record pertaining to the minor maintained by SSS in a system of records. A legal guardian may similarly act on behalf of an individual declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction. Absent a court order or consent, a parent or legal guardian has no absolute right to have access to a record about a child. Minors are not precluded from exercising on their own behalf rights given to them by the Privacy Act.

(F) *Granting access when accompanied by another individual.* When an individual requesting access to his or her record in a system of records maintained by SSS wishes to be accompanied by another individual during the course of the examination of the record, the individual making the request shall submit to the official having operational control of the record, a signed statement authorizing that person access to the record.

(G) *Denial of access for inadequate identification documentation.* If the official having operational control over the records in a system of records maintained by SSS determines that an individual seeking access has not provided sufficient identification documentation to permit access, the official shall consult with the records manager prior to finally denying the individual access.

(H) *Review of decision to deny access.* Whenever the records manager determines, in accordance with the procedures herein, that access cannot be granted, the response will also include a statement of the procedures to obtain a review of the decision to deny in accord with § 1665.5.

(vii) *Exceptions.* (A) Nothing in these regulations shall be construed to entitle an individual the right to access to any information compiled in reasonable anticipation of a civil action or proceeding. The mere fact that records in a system of records are frequently the subject of litigation does not bring those systems of records within the scope of this provision. This provision is not intended to preclude access by an individual to the records which are available to that individual under the other processes such as the Freedom of Information Act or the rules of civil procedure.

(B) Within any system of records pertaining to possible violations of the Military Selective Service Act, the identity of or any information pertaining to any individual who provides information relating to a suspected violator will not be revealed to the suspected violator. This exemption is made under the provision of 5 U.S.C. 552a(k)(2).

§ 1665.3 Access to the accounting of disclosures from records.

Rules governing the granting of access to the accounting of disclosure are the same as those for granting accesses to the records (including verification of identity) outlined in § 1665.2.

§ 1665.4 Requests to amend records.

(a) *Requirement for written requests.* Individuals desiring to amend a record that pertains to them in a system of records maintained by SSS must submit their request in writing in accord with the procedures set forth herein. Records not subject to the Privacy Act of 1974 will not be amended in accord with these provisions. However, individuals who believe that such records are inaccurate may bring this to the attention of SSS.

(b) *Procedures.* (1)(i) The requests to amend a record in a system of records shall be addressed to the records manager. Included in the request shall be the name of the system and a brief description of the record proposed for amendment. In the event the request to amend the record is the result of the individual's having gained access to the record in accordance with the provisions concerning access to records as set forth above, copies of previous correspondence between the requester and SSS will serve in lieu of a separate description of the record.

(ii) When the individual's identity has been previously verified pursuant to § 1665.2(b)(2)(vi), further verification of identity is not required as long as the communication does not suggest that a need for verification is present. If the individual's identity has not been previously verified, SSS may require identification validation as described in § 1665.2(b)(2)(vi). Individuals desiring assistance in the preparation of a request to amend a record should contact the records manager at the address cited above.

(iii) The exact portion of the record the individual seeks to have amended should be clearly indicated. If possible, the proposed alternative language should also be set forth, or at a minimum, the facts which the individual believes are not accurate, relevant, timely, or complete should be set forth with such particularity as to permit SSS not only to understand the individual's basis for the request, but also to make an appropriate amendment to the record.

(iv) The request must also set forth the reasons why the individual believes his record is not accurate, relevant, timely, or complete. In order to avoid the retention by SSS of personal information merely to permit verification of records, the burden of persuading SSS to amend a record will be upon the individual. The individual must furnish sufficient facts to persuade the official in charge of the system of the inaccuracy, irrelevancy, timelines or incompleteness of the record.

(v) Incomplete or inaccurate requests will not be rejected categorically. The individual will be asked to clarify the request as needed.

(2) *SSS action on the request.* To the extent possible, a decision upon a request to amend a record will be made within 10 days, (excluding Saturday, Sundays, and legal Federal holidays). The response reflecting the decisions upon a request for amendment will include the following:

(i) The decision of the Selective Service System whether to grant in whole, or deny any part of the request to amend the record.

(ii) The reasons for determination for any portion of the request which is denied.

(iii) The name and address of the official with whom an appeal of the denial may be lodged.

(iv) The name and address of the official designated to assist, as necessary and upon request of, the individual making the request in preparation of the appeal.

(v) A description of the review of the appeal with SSS (see § 1665.5).

(vi) A description of any other procedures which may be required of the individual in order to process the appeal.

(3) If the nature of the request for the correction of the system of records precludes a decision within 10 days, the individual making the request will be informed within 10 days of the extended date for a decision. Such a decision will be issued as soon as it is reasonably possible, normally within 30 days from the receipt of the request (excluding

Saturdays, Sundays, and legal Federal holidays) unless unusual circumstances preclude completing action within that time. If the expected completion date for the decision indicated cannot be met, the individual will be advised of the delay and of a revised date when the decision may be expected to be completed.

§ 1665.5 Request for review.

(a) Individuals wishing to request a review of the decision by SSS with regard to any initial request to access or amend a record in accord with the provisions of §§ 1665.2 and 1665.4, should submit the request for review in writing and, to the extent possible, include the information specified in § 1665.5(b). Individuals desiring assistance in the preparation of their request for review should contact the records manager at the address provided herein.

(b) The request for review should contain a brief description of the record involved or in lieu thereof, copies of the correspondence from SSS in which the request to access or to amend was denied and also the reasons why the requester believes that access should be granted or the disputed information amended. The request for review should make reference to the information furnished by the individual in support of his claim and the reasons as required by §§ 1665.2 and 1665.4 set forth by SSS in its decision denying access or amendment. Appeals filed without a complete statement by the requester setting forth the reasons for the review will, of course, be processed. However, in order to make the appellate process as meaningful as possible, the requester's disagreement should be set forth in an understandable manner. In order to avoid the unnecessary retention of personal information, SSS reserves the right to dispose of the material concerning the request to access or amend a record if no request for review in accord with this section is received by SSS within 180 days of the mailing by SSS of its decision upon an initial request. A request for review received after the 180 day period may, at the discretion of the records manager, be treated as an initial request to access or amend a record.

(c) The request for review should be addressed to the Director of Selective Service.

(d) The Director of Selective Service will inform the requester in writing of the decision on the request for review within 20 days (excluding Saturdays, Sundays, and legal federal holidays) from the date of receipt by SSS of the individual's request for review unless the Director extends the 20 days period for good cause. The extension and the reason therefor will be sent by SSS to the requester within the initial 20 day period. Such extensions should not be routine and should not normally exceed an additional thirty days. If the decision does not grant in full the request for amendment, the notice of the decision will provide a description of the steps the individual may take to obtain judicial review of such a decision, a statement that the individual may file a concise statement with SSS setting forth the individual's reasons for his disagreement with the decision and the procedures for filing such a statement of disagreement. The Director of Selective Service has the authority to determine the "conciseness" of the statement, taking into account the scope of the disagreement and the complexity of the issues. Upon the filing of a proper, concise statement by the individual, any subsequent disclosure of the information in dispute will be clearly noted so that the fact that the record is disputed is apparent, a copy of the concise statement furnished and a concise statement by SSS setting forth its reasons for not making the requested changes, if SSS chooses to file such a statement. A notation of a dispute is required to be made only if an individual informs the agency of his disagreement with SSS's determination in accord with §§ 1665.5 (a), (b), and (c). A copy of the individual's statement, and if it chooses, SSS's statement will be sent to any prior transferee of the disputed information who is listed on the accounting required by 5 U.S.C. 552a(c). If the reviewing official determines that the record should be amended in accord with the individual's request, SSS will promptly correct the record, advise the individual, and inform previous recipients if an accounting of the disclosure was made pursuant to 5 U.S.C. 552a(c). The notification of correction pertains to information actually disclosed.

§ 1665.6 Schedule of fees.

(a) Prohibitions against charging fees. Individuals will not be charged for:

(1) The search and review of the record.

(2) Any copies of the record produced as a necessary part of the process of making the record available for access.

or

(3) Any copies of the requested record when it has been determined that access can only be accomplished by providing a copy of the record through the mail.

(4) Where a registrant has been charged under the Military Selective Service Act and must defend himself in a criminal prosecution, or where a registrant submits to induction and thereafter brings habeas corpus proceedings to test the validity of his induction, the Selective Service System will furnish to him, or to any person he may designate, one copy of his Selective Service file free of charge.

(b) *Waiver.* The Director of Selective Service may at no charge, provide copies of a record if it is determined the production of the copies is in the interest of the Government.

(c) *Fee schedule and method of payment.* Fees will be charged as provided below except as provided in paragraphs (a) and (b) of this section.

(1) *Duplication of records.* Records will be duplicated at a rate of $.25 per page.

(2) Fees should be paid in full prior to issuance of requested copies. In the event the requester is in arrears for previous requests, copies will not be provided for any subsequent request until the arrears have been paid in full.

(3) Remittance shall be in the form of cash, a personal check or bank draft drawn on a bank in the United States, or postal money order. Remittances shall be made payable to the order of the Selective Service System and mailed or delivered to the records manager, Selective Service System, Washington, D.C. 20435.

(4) A receipt of fees paid will be given upon request.

§ 1665.7 Information available to the public or to former employers of registrants.

(a) Each area office maintains a classification record which contains the name, Selective Service number, and the current and past classifications for each person assigned to that board. Information in this record may be inspected at the area office at which it is maintained.

(b) Any compensated employee of the Selective Service System may disclose to the former employer of a registrant who is serving in or who has been discharged from the Armed Forces whether the registrant has or has not been discharged and, if discharged, the date thereof, upon reasonable proof that the registrant left a position in the employ of the person requesting such information in order to serve in the Armed Forces.

(c) Whenever an office referred to in this section is closed, the request for information that otherwise would be submitted to it should be submitted to

the National Headquarters, Selective Service System, Washington, D.C. 20435.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 1

[PRM-FRL-2012-1]

Regulatory Agenda, Corrections

AGENCY: Environmental Protection Agency.

ACTION: Regulatory agenda; correction.

SUMMARY: The Agency published its most recent Regulatory Agenda on October 30, 1981, in the **Federal Register**. This notice corrects certain errors that appeared in the Agenda.

FOR FURTHER INFORMATION CONTACT: David Sahr, Regulation Management Staff, Environmental Protection Agency. PM-223, Washington, D.C. 20460, (202) 382-2730.

SUPPLEMENTARY INFORMATION: EPA published its most recent Regulatory Agenda on October 30, 1981 (46 FR 53990). This notice corrects errors that appeared in that Agenda. It does not update the information in the Agenda to reflect any changes in EPA's plans made since October 30. The corrections appear below.

Page 54015. *Standards Applicable to Owners and Operators of Hazardous Waste Facilities.* SAN 1194. EPA has *proposed* to suspend the effective date of its existing storage surface impoundment standards (see 46 FR 51407, 10/20/81). EPA is under a court order to promulgate by February 1982 permitting standards for existing hazardous waste land disposal facilities, including landfills, land treatment facilities, and disposal surface impoundments.

Page 54016. *Finalize Definition of Existing Facility.* This action temporarily lifts the construction ban on expanding existing facilities.

Page 54034. *Effluent Guidelines for Seafood Processing.* SAN 1625. EPA has *not* cancelled this action. EPA will issue final Best Conventional Technology (BCT) regulations for seafood processing after it revises the BCT methodology.

Page. 50434. *Effluent Guidelines for Meat Packing.* SAN 1514. Same as Seafood Processing.

Page 54036. *Emissions Trading Policy* (formerly *Controlled Trading*). SAN 1605. EPA has *not* cancelled this policy. It will be issued as interim policy in the near future.

Page 54037. *Hazardous Waste Management System: General Requirements for Storage Facilities.* EPA has *not* postponed the July 13 effective date for tanks, containers, and waste piles in 40 CFR 264.

Page 54037. *Paperwork Reduction under RCRA.* The timetable for completing this review was October 1981.

Page 54037. *Incinerator Standards for Hazardous Waste Disposal.* EPA has *proposed* to suspend the effective date for existing incinerator standards under 40 CFR 264 (see 46 FR 51407, 10/20/81).

BILLING CODE [illegible]

40 CFR Part 403

[WEN-FRL-2010-3]

National Pretreament Program; Availability of Contractor's Report on Regulatory Impact Analysis

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of contractor's report.

SUMMARY: This notice announces the availability of a contractor's report to the Environmental Protection Agency (EPA) on options for possible reform of the National Pretreatment Program entitled "Assessment of the Impacts of Industrial Discharges on Publicly Owned Treatment Works." The report will be used to support a Regulatory Impact Analysis (RIA) of the program under Executive Order 12291. The report presents preliminary results of a study of the environmental, health, and interference impacts of industrial discharges of toxic and other pollutants to publicly owned treatment works (POTWs). The contractor's report also includes a comparison of several pollution control options to address these impacts.

The contractor's report has undergone limited review and comment by EPA staff and may be changed significantly after further analysis and Agency review. The report is being made available to inform the public of progress on the RIA, to solicit additional data to be included in the analysis, and to request comments on the methodology, data base, options, and preliminary results. Generally, the results of the contractor's analysis as described in the report would support a move in the direction of greater local control and responsibility for pretreatment requirements. Therefore, the Agency is focusing further analysis and feasibility reviews on options allowing increased local program flexibility and control and decreased reliance on national technology based standards.

A limited number of reports are available for public distribution free of charge. When this supply is exhausted, the report will be available for copying at EPA Headquarters and regional office libraries at a cost of $.20 per page.

DATES: Comments must be submitted on or before February 5, 1982.

ADDRESSES: Interested persons may request a copy of the draft report from: Pretreatment Section, NPDES Programs Branch, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460.

Comments and data should be submitted to: Thomas O'Farrell, Office of Water Enforcement and Permits (EN-335), U.S. Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460, (202) 755-6867.

FOR FURTHER INFORMATION CONTACT: William R. Diamond, Office of Water Enforcement and Permits (EN-336), U.S. Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460, (202) 426-4793.

SUPPLEMENTARY INFORMATION: Pursuant to Executive Order 12291, EPA's Office of Water is conducting a Regulatory Impact Analysis of the national pretreatment program. The RIA is a re-examination of the pretreatment program and regulations. The analysis is focused on the impacts of industrial discharges to POTW's in terms of water quality, interference with POTW operation, sludge contamination, worker health and safety, and air pollution. A range of pollution control options to address these impacts will be considered and analyzed.

The initial phase of the RIA involves extensive data gathering and evaluation to create a comprehensive data base. The contractor's report to EPA contains results of preliminary data analyses and comparisons of pollution control options. The report and its appendices do not constitute a complete RIA but do describe the preliminary findings, data, and methods used in the analysis to date.

The contractor's report received limited EPA staff review and may be changed substantially after public comment, detailed Agency review, and further analysis. The contractor's report contains assumptions regarding technical data and Agency policy that are subject to review by Agency

decision-makers. Parts of the report may require revisions to assure consistency with current efforts to reform or re-evaluate related programs (e.g., revision of Construction Grant Regulations; formulation of a comprehensive Agency sludge policy; review of Secondary Treatment Standard).

The Agency is making the interim report available at this time in order to inform the public of the Agency's progress on the RIA, to solicit additional information to be included in the data base, and to invite comment on the analysis methodology, data base, preliminary results, and the options discussed in the report. Anyone wishing to submit relevant technical data or other material to be considered in the analysis should do so during the 45-day comment period.

There are substantial data in the report and appendices which support the current program and a number of alternatives. EPA has not completed the analysis needed to determine the feasibility and legality of the various options. However, a Federal requirement for development of certain aspects of local pretreatment programs appears to be appropriate. Based on the Agency's limited review of the report to date, it may also be appropriate to increase municipal control and flexibility, and to reconsider the value of mandatory, national, technology-based categorical pretreatment standards. The options for the program which EPA will be considering most closely at this time are:

1. Requiring publicly owned treatment works (POTWs) to develop their own pretreatment programs, as needed based on local water quality considerations, and limiting Federal involvement to enforcement of toxic effluent limits (and related conditions) to be included in permits issued to individual POTWs;

2. Allowing POTWs complete discretion to implement categorical pretreatment requirements if they determine that a need exists and limiting Federal involvement to providing non-mandatory guidance on appropriate categorical requirements; and

3. Continuing the present pretreatment program with a provision for waiver of some or all requirements of the program where the POTW demonstrates to EPA that there is no need for the requirements.

These options are very similar to options (4), (6) and (1.b) in the contractor's report, although some variations on regulatory strategies which are not now reflected in the report will be considered for further analysis. EPA specifically invites comments on the environmental, policy, economic, implementation, and resource implications of these options.

During the comment period, the Agency may schedule meetings with groups or individuals to discuss the report and its implications. Subsequent to the comment period, EPA will determine whether administrative action, regulatory changes, or recommendations for statutory modifications should be undertaken. If regulatory changes are appropriate, a notice of proposed rulemaking will provide for public comment on specific regulatory provisions.

Dated: December 8, 1981.

Bruce R. Barrett,

Acting Assistant Administrator for Water.

[FR Doc. 81-35297 Filed 12-21-81; 8:45 am]

BILLING CODE 6560-29-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6218]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Arizona et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, P.E., National Flood Insurance Program, (202) 287-0230, Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Arizona	Tucson (city), Pima County	Airport Wash	Intersection of Drexel Road and Airport Wash	*2,477
			Intersection of Ginter Road and Euclid Avenue	*2,526
		Silvercroft Wash	Intersection of West Grant Road and Coyote Drive	*2,301
			25 feet downstream of the intersection of St. Marys Road and Silvercroft Wash.	*2,369
		Tucson Arroyo	Intersection of Brady Avenue and Davis Street	#2
			Intersection of East 6th Street and 9th Avenue	*2,386

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 81-705]

Amendment To Eliminate the Requirement That Licensees Retain Letters Received From the Public; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment/reply comment period.

SUMMARY: Action taken herein extends the time for filing comments and reply comments in BC Docket No. 81-705, regarding elimination of the licensee requirement concerning retention of letters received from the public, in response to a request filed by the National Citizens Committee for Broadcasting, Media Access Project, and Citizens Communications Center.

DATES: Comments must be filed on or before January 7, 1982, and reply comments on or before January 22, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Israel Teitelbaum, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of the Commission's Rules, § 73.1202, to eliminate the requirement that licensees retain letters received from the public, BC Docket No. 81-705.

Adopted: December 2, 1981.

Released: December 7, 1981. (Published at 46 FR 54787; 11-4-81.)

1. On November 24, 1981, the National Citizens Committee for Broadcasting (NCCB), Media Access Project (MAP), and Citizens Communications Center (Citizens) filed a Motion for Extension of Time in which to file comments in this proceeding. Comments are due on December 7, 1981. The petitioners ask that this date be extended to January 7, 1982. We are granting this request for the following reasons.

2. The Commission initiated this proceeding to consider elimination of 47 CFR 73.1202, which requires that licensees retain letters from the public in their public inspection files. The petitioners contend that the period from release of the *Notice of Proposed Rule Making* on October 27, 1981,[1] to the comment date of December 7, 1981, "* * * is unusually brief, particularly in view of the significance of the issue to citizens and public interest organizations around the nation." The petitioners assert that they are undertaking extensive research and outreach efforts to build the best possible record in this rule making. NCCB has run a feature on the rule making in its bi-weekly publication and has mailed a Bulletin on this matter to its group members. Moreover, MAP and Citizens intend to undertake an extensive review of their legal files, and to consult other groups in order to obtain pertinent information.

3. We believe that petitioners have demonstrated good cause for the requested extension of time. While no basis has been provided to support their conclusion that the time for comment is "unusually brief," we believe the public interest is served by providing petitioners additional time to support a case for retention of this rule. With the fullest available record before us, we will be in a position to consider the issue to be resolved in this proceeding.

4. For this reason we conclude that the petitioners have shown good cause for a grant of the requested extension of time. Therefore, it is ordered, that the "Motion for Extension of Time for Filing Comments" submitted by the National Citizens Committee for Broadcasting, Media Access Project and Citizens Communications Center, is granted. The times for filing comments and reply comments in this proceeding are extended to and including January 7, 1982, and January 22, 1982, respectively.

5. Authority for this action is contained in Sections 4(i), 5(d)(1), 303 and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

6. For further information concerning this proceeding, contact Israel Teitelbaum, Broadcast Bureau, (202) 632-7792.

[1] The *Notice* was published in the **Federal Register** on November 4, 1981, 46 FR 54787.

Federal Communications Commission.

BILLING CODE 6712-01-M

47 CFR Parts 81 and 83

[Docket No. 21349; FCC 81-547]

Changes in Frequencies, Operating Procedures and Other Criteria Relating to Radiotelephony in Certain kHz Band in Maritime Mobile Services.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes to amend the rules to implement the new frequency allotment plan for coast stations operating in the exclusive maritime mobile bands between 4000 and 23000 kHz adopted at the World Maritime Administrative Radio Conference, Geneva, 1974. In addition to the new frequency plan, several rule sections have been editorially reorganized and rewritten. The effect of these amendments would be to bring the rules into conformance with international frequency allotments.

DATES: Comments must be received on or before February 9, 1982, and Reply Comments must be received on or before February 24, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nicholas G. Bagnato, Private Radio Bureau (202) 632-7175.

SUPPLMENTARY INFORMATION:

Adopted: November 24, 1981.

Released: December 11, 1981.

In the matter of amendment of Parts 81 and 83 to implement changes in frequencies, operating procedures and other criteria relating to radiotelephony in the band 4000 to 23000 kHz in the maritime mobile services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974.

1. A Notice of Inquiry (NOI) in this matter was released on August 5, 1977, and was published in the **Federal Register** on August 9, 1977 (42 FR 40224). A subsequent erratum was also released on August 5, 1977, deleting FCC Form 501 which was inadvertently included in the Appendix to the NOI.

2. In the NOI, the Commission sought comments on the assignment of frequencies to radiotelephone public coast and ship stations operating in the

maritime services and on the following topics:

a. Temporary assignments of frequencies in order to develop operational experience and make adjustments to clear interference;

b. Assignment of 4 MHz frequencies to both Class I and Class II coast statons; and

c. Continued use of HF frequencies (4000 to 23000 kHz) operating in the simplex mode on the inland waterways.

3. Comments were filed by the American Commercial Barge Line Company and AMCOM, Inc. (ACBL and AMCOM), the American Telephone & Telegraph Company (AT&T), GTE Service Corporation and its affiliated domestic telephone operating companies (GTE), and Mobile Marine Radio, Inc. (MMR). Late comments were received from WJG Telephone Company (WJG).

Temporary Frequency Assignment Plan

4. In the NOI we stated that we were considering the feasibility of making temporary assignment of approximately half of the frequencies and permanent assignment of the remainder. It was felt that the combination of permanent and temporary assignments would allow more flexibility in arriving at a final assignment plan. AT&T, in its comments, questioned the feasibility of designating certain channels as "temporary assignments". AT&T felt that the users would naturally avoid implementing these channels on their vessels, thereby overloading the permanently assigned channels. MMR suggested that permanent assignment of two frequencies in each band be made to each of the four existing high seas coast stations and the remainder be divided equally among them on a temporary basis.

5. On November 16, 1977, the Commission released an Order, FCC 77-785, which appeared in the **Federal Register** of November 28, 1977, 42 FR 60145, which made temporary assignment of all frequencies to implement the new ITU Radio Regulations (RR) Appendix 25 MAR2 frequencies. The temporary assignment plan was released because there were several problem areas which could not be resolved by following the usual administrative procedures and still permit implementation by January 1, 1978. The frequencies for each station were selected after an analysis of the study by the International Frequency Registration Board (I.F.R.B.) of the provisional assignment notices submitted by administrations. We believed that the major sources of potential interference to and by major maritime nations were identified and considered, and that there would be a minimum number of changes for these reasons. Temporary assignment of all frequencies allocated to the United States was used to obtain operational experience.

6. In the NOI we stated that we would make an evaluation of the temporary assignment plan after an analysis of the utilization reports submitted by the carriers. Both AT&T and MMR supported the requirement that the carriers provide utilization data. MMR suggested that the Commission develop a frequency assignment plan based on a saturation figure of 33,000 completed calls per year on a family of frequencies. MMR endorsed the concept of reevaluating an assignment plan after a period of time. MMR suggested that the Commission detail the type of evaluation to be conducted and the nature of the information that will be required. On March 27, 1980, we requested the carriers to provide utilization data on all assigned frequencies for a period of six months at bi-monthly intervals. After reviewing the first submittal, it was determined that representative information could be obtained in a three month period, and all carriers were so notified on July 8, 1980. Utilization data was requested on assigned frequencies including negative reports on unused frequencies. All carriers, with the exception of WJG, Memphis, Tennessee submitted reports. Since the frequencies for river stations were simplex and assigned on a shared basis, we are proposing frequencies for WJG. We will evaluate WJG's comments to determine whether permanent assignment should be made or the frequencies could be more effectively utilized by other coast stations.

Use of Frequencies Between 4 and 23 MHz on the Mississippi River System[1]

7. In the NOI, we requested comments on whether frequencies between 4 and 23 MHz should continue to be used in the simplex mode on the inland waterways. Comments were also requested on whether a new class of station should be designated to differentiate between public coast stations providing a regional service in the duplex mode and the inland waterways stations operating in the simplex mode.

8. ACBL and AMCOM's comments, as well as those of WJG, supported the continued use of simplex frequencies in the band 4 to 23 MHz. MMR in its comments questioned the need for river stations to have frequencies in the 8-22 MHz band for regional service since these frequencies propagate over long distances. MMR is correct in the statement that these frequencies progagate to distances in excess of what can normally be construed as "regional". MMR regularly communicates with vessels in the Gulf of Mexico and off the coast of South America on 4 MHz frequencies on their Class II-B (regional) license. WJG stated that they failed to see any reason for a "new Class" station designation. It further stated that the facilities of WJG have never been, nor should they ever in the future, be limited to service on the rivers. WJG indicated that they routinely provide service to vessels in the Gulf of Mexico.

9. The Commission was unaware of WJG's communication with vessels in the Gulf of Mexico. WJG is licensed as a Class II station at Memphis, Tennessee to provide a regional service to vessels. Simplex operation[2] on the Mississippi River System is permitted since the service is primarily local and inland and the potential for interference to ship and coast stations operating in the high seas marine radiotelephone service is minimized. However, when a ship station operating on the coast station transmit frequency of a duplex pair is located in the Gulf of Mexico, its potential to interfere with stations operating in accordance with the allotment plan is increased. Therefore, river stations operating in the simplex mode should not be communicating with ships in the Gulf of Mexico.

10. The communications problems experienced from the length of the river system, meandering rivers, loss of range due to attenuation over land masses, make it difficult for communication of a regional character to be supported by frequencies in the 2 MHz band. While the ultimate goal is to have all river traffic on VHF, this will not be practicable until a river system on line of sight frequencies is developed and adequate frequencies to support the system are assigned. In another docket, the Commission has allocated frequencies in the band 216-220 MHz for use by Inland Waterways Communications Systems.[3] Therefore, recognizing that there will be a requirement to continue the present operation until the Inland Waterways Communications System is in full

[1] Mississippi River System means the Mississippi River and connecting waterways.

[2] Simplex frequencies in the U.S. are derived from duplex coast and ship transmit frequencies. Some stations are assigned coast station transmit frequencies and others ship station transmit frequencies.

[3] Report and Order, Gen Docket No. 80-1, FCC 81-24, released March 11, 1981, (46 FR 15690).

operation, we propose to assign frequencies in the band 4–23 MHz to stations operating in the simplex mode on the Mississippi River system.

Discussion of Proposed Frequency Assignments

11. The temporary assignment plan made assignments to public coast stations substantially on a one for one replacement basis for frequencies then assigned. In the temporary assignment plan, we attempted to make an equitable distribution of the available frequencies and eliminate cross licensing as far as practicable. For example, 4 MHz assignments to high seas coast stations by channel numbers, as proposed in the temporary assignment plan are as follows:

KMI (San Francisco)	
401	417 (s)
416 (s)	
WOM (Miami)	
403	417 (s)
412	[illegible]
WOO (New York)	
410	416 (s)
411	[illegible]
WLO (Mobile)	
414	419

(s) shared channel

Each of the AT&T stations except KMI was assigned 3 frequencies for use on an exclusive basis, and in addition one shared frequency. KMI was assigned one exclusive frequency and 2 shared frequencies based on a lower requirement for 4 MHz service on the west coast.[4]

12. The 4 remaining 4 MHz frequencies were temporarily assigned to public coast station operating in the Mississippi River system and the Great Lakes. Station WAK, New Orleans, Louisiana was granted permission to cease operations on Channel 405. WLO, Mobile, Alabama filed an application for the channel. The Commission had reports of interference to station WLC, Rogers City, Michigan from the river stations. In order to provide temporary relief from this interference and to satisfy the request from station WLO, we modified the temporary assignment plan by assigning channel 405 to both stations on a shared basis.

13. During the period of time in which the temporary assignment plan was in effect, the Commission has not received any complaints from user groups. However, there were requests for additional frequencies in the 4 and 8 MHz bands from existing stations serving the Gulf of Mexico and the Caribbean. There are currently two outstanding requests for 4 MHz frequencies to serve ships in the Gulf of Mexico.[5] We have recently received a request for a new high seas radiotelephony station at St. Thomas, U.S. Virgin Islands.[6] These applications will be considered as part of this proceeding.

14. Since all of the frequencies allotted to the United States have been assigned to non-Government or Government stations, these requests can only be satisfied by obtaining additional allotments to the United States, frequencies deleted from existing stations or a sharing arrangement adopted between coast stations. We derived information from the utilization reports which permits us to consider the feasibility of coast stations sharing frequencies on geographical separation, time sharing and service areas. In addition, preliminary review of the utilization reports indicate that some frequencies may be underutilized and may be available for new entry. Accordingly, while we are proposing the continuation of the temporary frequency assignment plan at this time, we request comments on these matters.

15. The requirement for 4 MHz frequencies in the Mississippi River System, as previously discussed in paragraph 8, still exists. The safety system on the Great Lakes is now VHF. While VHF is satisfactory for safety and an automated system provides good communications over most of the Great Lakes, the ship operators find that HF radiotelephone communications is still necessary for efficient control over their ships during the entire voyage. The operations on the Great Lakes and on the river system differ from normal public correspondence in that the coast station generally has a contract to provide specific operators with communications with their ships. This is usually done on a scheduled basis by a roll call in some predetermined sequence and the frequency is occupied for a longer period of time than normal public correspondence. For this reason, it was not possible for the river stations and the Great Lakes stations to share the same frequencies. A temporary assignment of channel 405 was made to station WLC to relieve the interference and to station WLO to satisfy operational requirements. This sharing arrangement has been satisfactory and we are proposing to continue this sharing arrangement.

16. In keeping with the Commission's policy to simplify its rules and regulations, we are also proposing to editorially reorganize and rewrite several rule sections, as shown in the Appendix.

17. The proposed amendments to the rules, as set forth in the Appendix, are issued under authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

18. Under the applicable procedures set forth in § 1.415 of the Rules and Regulations, 47 CFR 1.415, interested persons may file comments on or before February 9, 1982, and reply comments on or before February 24, 1982. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

19. In accordance with the provisions of § 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

20. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments)

[4] The report submitted by AT&T on the use of 4 MHz frequencies confirms this earlier decision.

[5] General Telephone Company, Pardee Key, Florida, and Gulf Coast Communications Corporation, Palmetto, Florida.

[6] Global Communications Corporation, FCC File Number 8–M–ML–110, St. Thomas, USVI.

between a person outside the Commision and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231.

21. The frequency plan proposed in this proceeding essentially maintains the status quo among the high seas radiotelephone stations and those operating on the Mississippi River system and the Great Lakes. Therefore, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rulemaking proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

22. Regarding questions on matters covered in this document contact Nicholas G. Bagnato, telephone number (202) 632–7175.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALSKA-PUBLIC FIXED STATIONS

1. In § 81.134, paragraph (c)(1) is revised as follows:

§ 81.134 Transmitter power.

* * * * *

(c) * * *

(1) For carrier frequencies other than 2638 kHz and those frequencies listed in § 81.361(a):

Frequency band (kHz)	Class of emission	Power (peak envelope power)
2500 to 4000	A3A, A3H,[1], A3J	500 watts by day. 400 watts by night.
4000 to 27500	A3A, A3J	10 kilowatts.

[1] Use of A3H on 2182 kHz is limited for communications with foreign vessels. When using 2182 kHz for purposes other than distress calls and distress traffic, and urgency and safety signals and messages, the carrier power of limited coast stations shall not exceed 50 watts for A3J emission.

* * * * *

2. In § 81.180, paragraph (d) is revised as follows:

§ 81.186 Hours of service of stations on land.

* * * * *

(d) Unless otherwise specified for particular stations, the hour of service of each public coast station operating in the band 1605–4000 kHz or in the band 156–174 MHz shall, within the scope of its normal operation, be such as to meet the requirements of the particular region served by the station.

* * * * *

3. In § 81.304 the table in paragraph (a) and the introductory language in paragraph (b) is revised, and paragraphs (b)(4), (b)(5), (b)(51) and (b)(61) are removed and reserved as follows:

§ 81.304 Frequencies available.

(a) * * *

Carrier frequency	Conditions of use	
	Section	Limitations
(kHz)		
1618	81.307	11, 29, 50

(b) Authorization and use of carrier frequencies in paragraph (a) of this section shall be in accordance with the following limitations and conditions.

* * * * *

(4) [Reserved]

(5) [Reserved]

* * * * *

(51) [Reserved]

* * * * *

(61) [Reserved]

* * * * *

4. In § 81.305 the introductory language of paragraph (a) is revised to read as follows:

§ 81.305 Frequencies for calling and distress.

(a) In the band 1605–4000 kHz, the frequency 2182 kHz is the international radiotelephone distress, safety and calling frequency and shall be assigned to all public coast stations operating on frequencies in the band 1605–4000 kHz. In the band 156–162 MHz, the frequency 156.800 MHz is the international distress, safety and calling frequency and shall be assigned to all public coast stations operating in the band 156–162 MHz. 2182 kHz and 156.8 MHz may be used by public coast stations solely for the transmission of:

* * * * *

5. Section 81.306 is revised to read as follows:

§ 81.306 Frequencies available below 27.5 MHz.

(a) Frequencies between 4000 and 23000 kHz available for assignment to public coast stations:

Coast station location	Channel designation	Coast station carrier frequency (kHz)	
		Transmit	Receive
San Francisco, CA	401	4357.4	4063.0
	416	4403.5	4109.5
	417	4407.0	4112.6
	804	8720.2	8204.3
	809	8743.7	8219.8
	814	8759.2	8235.3
	822	8784.0	8260.1
	1201	13,100.8	12,330.0

Los Angeles-San Diego, CA	2486	2382	1,6.
	2522	2126	7 a.m. to 7 p.m., P.s.t. only.
	2566	2009	
	2598	2206	7 a.m. to 7 p.m., P.s.t. only.
San Francisco-Eureka, CA	2450	2003	
	2506	2406	
Astoria, OR	2442	2009	2.
Astoria-Portland, OR	2598	2206	
Coos Bay, OR	2566	2031.5	7 a.m. to 7 p.m., P.s.t. only.
Seattle, WA	2522	2126	
	2482	2430	7.
Kahului, HI	2530	2134	
St. Thomas Island, VI	2506	2009	8 a.m. to 9 p.m., A.s.t. only.

(1) Available on the condition that harmful interference is not caused to any ship station operating within 3000 nautical miles of New Orleans, LA and is transmitting to a coast station in that port.

(2) Day only.

(3) Unlimited hours of use from December 15 to April 1, annually, and day only from April 1 to December 15, annually, on the condition that harmful interference shall not be caused to the service of any ship station in the Great Lakes area.

(4) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Boston, Mass., or San Francisco-Eureka, Calif.

(5) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Norfolk-Quantico, Va.

(6) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Tampa, Fla.

(7) Authorized for use south of 51 degrees north latitude and east of 142 degrees west longitude exclusively during the following daily periods on the condition that harmful interference is not caused to the service of any station in the Alaska area to which this carrier frequency is assigned: Annually from April 1 to September 30, inclusive, from 5 a.m. to 9 p.m., P.s.t., only; and annually from October 1 to March 31, inclusive, from 6 a.m. to 11 p.m., P.s.t., only.

(8) The frequencies 2514, 2550 and 2582 kHz are authorized for use in the Great Lakes area on a shared basis with stations of Canada. Except in the case of distress, the frequency 2550 kHz shall not be used for transmission to ship stations of Canada since the associated ship station transmit frequency 2158 kHz is not available to Canadian ship stations for transmission and 2582 kHz shall not be used for transmission to U.S. ship stations since the associated ship transmit frequency 2206 kHz is not available to U.S. ship station for transmission.

6. Section 81.307 is revised to read as follows:

§ 81.307 Frequencies below 27.5 MHz available for assignment on the Mississippi River System.[1]

(a) The following frequencies are available for assignment to coast stations located on the inland waterways for use on a simplex basis, as indicated below:

Coast station location	Carrier frequency (kHz)
Jeffersonville, IN	[1] 2086.0
Louisville, KY	2782.0
	4115.7
	[illegible]
	8725.1
	13,103.9
	17,291.8
Memphis, TN	[1] 2086.0
	[illegible]

Seattle, WA	2126	2522	
	2430	2482	8.
Kahuku, HI	2134	2530	
St. Thomas Island, VI	2009	2506	8 a.m. to 9 p.m., P.s.t. only.

(1) Available on the condition harmful interference is not caused to the service of any coast station located in the vicinity of New Orleans, La.

(2) Day only.

(3) Unlimited hours of use from December 15 to April 1, annually, and day only from April 1, to December 15, annually, on the condition that harmful interference shall not be caused to the service of any ship station in the Great Lakes area.

(4) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Boston, Mass., or San Francisco-Eureka, Calif.

(5) Available on the condition that harmful interference is not caused to the service of any station located in the vicinity of Norfolk-Quantico, Va.

(6) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Tampa, Fla., or any ship station located in the vicinity of New Orleans.

(7) Available on the condition that harmful interference is not caused to any ship station located in the vicinity of Los Angeles or San Diego, Calif.

(8) Authorized for use south of 51 degrees north latitude and east of 142 degrees west longitude exclusively during the following daily periods on the condition that harmful interference is not caused to the service of any station in the Alaska area to which this carrier frequency is assigned: Annually from April 1 to September 30, inclusive, from 5 a.m. to 9 p.m., P.s.t., only; and annually from October 1 to March 31, inclusive, from 6 a.m. to 11 p.m., P.s.t. only.

(9) Not available to U.S. ship stations for transmission, except in the case of a distress.

4. A new § 83.356 is added to read as follows:

§ 83.356 Frequencies below 27.5 MHz available for use on inland waterways.

The following frequencies are authorized for use by ship stations in a simplex mode for communication with coast stations on inland waterways, as indicated below:

Coast station location	Carrier frequency (kHz)
Jeffersonville, IN	[1] 2086.0
Louisville, KY	2782.0
	4415.7
	6518.8
	8725.1
	13,103.9
	17,291.8
Memphis, TN	[1] 2086.0
	2782.0
	4087.0
	6209.3
	8201.2
	12,331.1
	16,518.9
Pittsburgh, PA	[1] 2086.0
	2782.0

	13,103.9
	17,291.8

[1] Limited to a maximum output power of 150 watts (PEP)

5. Section 83.370 is revised to read as follows:

§ 83.370 Frequencies below 27.5 MHz available in Alaska.

(a) The carrier frequencies set forth in the following table are authorized for use by ship stations for communication with common carrier coast stations in Alaska.

Coast station location	Carrier frequency (kHz)	
	Transmit	Receive
Cold Bay	2134	2312
Cordova	2237	2397
Juneau	2190	2400
Ketchikan	2237	2397
Kodiak	2131	2309
Nome	2230	2400
Sitka	2134	2312

(b) The carrier frequencies set forth in the following table are authorized for use by ship stations for communication with public coast stations, other than common carrier, in Alaska. Frequencies designated for use in a zone of the Alaska area are available only to coast stations located in that zone.

Alaska zone	Carrier frequency [1] (kHz)
All	1619
	1622

Notices

Federal Register
Vol. 46, No. 245
Tuesday, December 22, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

VISTA Guidelines

AGENCY: ACTION.

ACTION: Final notice of VISTA guidelines.

SUMMARY: This notice outlines some of the guidelines under which the VISTA program will operate. The present three sections of the Guidelines set out the overall program philosophy, the new VISTA Guidance Papers which provides information to sponsors on VISTA's project selection process, and specific policies in the area of project review procedures. The fourth section of the Guidelines is being withheld in order to allow further review by the Agency of the comments received.

EFFECTIVE DATE: The VISTA Guidelines shall take effect on February 5, 1982.

FOR FURTHER INFORMATION CONTACT: Arthur F. Fergenson, General Counsel, ACTION, 806 Connecticut Ave., NW., Washington, D.C. 20525; 202–254–3116.

SUPPLEMENTARY INFORMATION: Section 420 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5060) was amended in 1979 to define the term regulation and to detail the procedures to be followed in prescribing regulations. Through its broad definition of a regulation, the section requires that "any rule, regulation, guideline, interpretation, order, or requirement of general applicability" issued by the Director of ACTION must be published with a 30 day comment period except in certain limited circumstances. These Guidelines, although not regulations under the Administrative Procedure Act (5 U.S.C 551 et seq.), may, in whole or in part, be required by our Act to be published in proposed form for comments.

The Guidelines were published in proposed form in the **Federal Register** for comment on Monday, November 9, 1981 (46 FR 55287–91). At the time of publication in proposed form, the VISTA Guidelines contained the three sections presently being promulgated in final form herein and a fourth section entitled "Invovlement of VISTA Volunteers in Demonstrations." The Agency has considered the public comments received and has determined to adopt as final the first three sections of the proposed Guidelines without change. Below is a brief description of the final Guidelines and the Agency's response to the comments received on the sections published in final herein.

I. Description of the Guidelines

The present VISTA Guidelines are divided into three parts:

I. Program Directions.
II. VISTA Guidance Papers.
III. VISTA Project Review Procedures.

Each of the parts deals with specific areas of the new approach to the VISTA program. The first Part outlines the programmatic approach for VISTA espoused by the new Administration. This approach includes a commitment to encouraging those projects which significantly contribute toward the development of those skills in the poor that enable them to escape from poverty.

The second Part supersedes the VISTA Guidance Papers published on September 10, 1979, at page 52704 *et seq.* of No. 176, Volume 44 of the **Federal Register**, and republishes with minor changes the VISTA Guidance Papers published on April 15, 1981, at Pages 22013–4 of No. 72, Volume 46 of the **Federal Register**. The September 1979 Papers are eliminated and are of no force or effect. The present Guidelines differ from the September 1979 Papers as follows:

(1) Deletion of the requirement that VISTA projects must emphasize community organizing as a necessary element of a VISTA project;

(2) Insertion of the requirement that all VISTA projects have the approval of the Director of VISTA;

(3) Provision of a mechanism for the orderly phasing out of projects which do not meet VISTA requirements; and

(4) Deletion of the "decision day" mechanism in the review process.

Part three outlines specific procedures to be followed by agency personnel in the handling of project reviews. This is to ensure both consistent, nationwide handling of all project reviews and to inform the applicants of the various procedures available to the Agency in any given circumstance.

Discussion of Public Comments

During the formal 30-day comment period, the Agency received many comments from the public. The following is the Agency's response to the comments to each Part of the Guidelines.

Part I. Program Directions

Several comments were received by the Agency questioning the factual basis of the new program philosophy and directions. Specifically, the comments questioned the commitment of the private sector to the poor and thus, the subsequent effectiveness of a cooperative approach being taken by VISTA to fight poverty. It is VISTA's belief that the local, private sector has traditionally been the major force in providing for the poor in their community and has only stopped such endeavors when this area was usurped by the federal government. With the necessary reductions in governmental interference in such areas, and the restimulation of the private sector by VISTA, the role of the local community vis-a-vis its poor will regain its rightful place.

Part II. VISTA Guidance Papers

The majority of comments received in this part involved three areas: The deletion of community organizing as a required emphasis; the requirement of project approval by the Director of VISTA; and the need for more specific criteria for project selection.

The Agency has reviewed the recent hisory of VISTA when community organizing was emphasized. Although there may have been individual successes using this technique and approach, we do not believe that the results it produced justify its previous emphasis. The poor should be treated as individuals, not as the undifferentiated mass which is the approach of those who subscribe to community organizing. In its time remaining, VISTA will focus on the enhancement of the particular skills and abilities of those persons most in need and most able to benefit from the type of personal commitment which is this program's hallmark.

Several other comments viewed with dismay the change in the approval

process, namely that the Director of VISTA has the sole power to approve VISTA projects. The comments alleged that this "politicized" the process and eroded all decision-making power from the local offices. The withdrawal of the final approval to the Director of VISTA was done to ensure that a procedure of review consistent with the new directions of VISTA would occur. Actions taken to ensure consistency are certainly allowable, as are those taken to direct VISTA in new directions within its statutory mandate. The opinions and recommendations of the local and regional offices remain an important and integral part of this present decision-making process. These offices, contrary to when the National Grants Program operated to limit their participation from the process, are involved in every decision concerning the placement of VISTA Volunteers. Indeed, the State and regional offices retain the important authority to deny VISTA projects under this new procedure.

The last area of concern in a majority of the comments received concerning the subject matter of this Part involved the lack of specificity in the criteria used to evaluate projects. The Agency is puzzled by the comments since the present VISTA Guidance Papers delete only one substantive requirement—the emphasis on community organization—and has retained the remaining criteria. The Agency does not wish to limit the acceptable range of diversity that has always characterized the VISTA projects selected. As in the past, sponsors and project activities qualifying for VISTA Volunteers will differ widely as long as the requirements and criteria present in the Guidance Papers are met. To require additional criteria would be a narrowing of the rich diversity of sponsors and activities presently acceptable under the existing Papers.

Another comment suggested an additional criterion be considered in the Agency's selection of a VISTA sponsor; to wit, that the sponsor's philosophy be required to be consistent with the basic philosophy of VISTA. Although the Agency agrees that a sponsoring organization's overall history of performance may be reviewed to determine its ability to fulfill the obligations of a VISTA sponsor, it is outside our authority to require that a sponsors's overall philosophy be consistent with VISTA. Our relationship to the sponsoring organization concerns only its segment that uses VISTA Volunteers. Outside of that particular segment, VISTA may only require information that is necessary to the maintenance of the VISTA project, e.g. nonprofit status of the sponsor; fiscal and financial management, etc.

Part III. VISTA Project Review Procedures

The majority of comments received by the Agency concerning this Part complained that there was a severe problem of timeliness in VISTA's review process for continuation applications. It is precisely because of this problem that the time guidelines were implemented in early 1981 and are included in this Part. Frequently, projects have been tardy in submitting applications; in other instances, the review process has been delayed because projects submitted incomplete application packages. However, the Agency would like to note that regardless of the source of delay in the review, the Agency continues the applicant's present level of funding until a final decision is rendered. Thus the sponsoring organization suffers no financial harm during the time taken by VISTA necessary to ensure a full and deliberate review of each application.

Part I—Program Directions

Underlying Philosophy

The new Administration is commited to the fulfillment of VISTA's statutory mandate "to eliminate poverty and poverty-related human, social, and environmental problems in the United States by encouraging and enabling persons from *all walks of life and all age groups*, including elderly and retired Americans, to perform *meaningful* and *constructive volunteer services* in agencies, institutions, and situations where the application of human talent and dedication may assist in the solution of poverty and poverty-related problems and *secure and exploit opportunities for self-advancement* by persons afflicted with such problems" (42 U.S.C. 4951) (emphasis added). Projects which encourage long-term dependency on government entitlement programs contribute nothing to VISTA's statutory goal of eliminating poverty and encouraging self-advancement on the part of low-income people.

The U.S. economy has severe problems which will take time to solve; but it has tremendous potential to resume its historical pattern of real, rather than illusory, growth. Two major elements of the new Administration's economic plans are curtailment of the recent explosive growth of the public sector and stimulating greater private sector activity. VISTA can best serve the poor by encouraging projects which develop in individuals the skills and attitudes necessary to survive and prosper in the private sector.

Projects recognizing the individuality of those categorized as "the poor" and designed to address the unique set of problems each person has are consistent with the goals of the new Administration. On the other hand, projects which have a substantial risk of resulting primarily in increasing the anger and frustration of the poor without contributing significantly to their chances of working their way out of poverty do not meet such goals; nor are the goals attained by projects designed with more concern for the self-aggrandizement of their leadership than for the needs of the poor.

Organizations which have a demonstrable pattern of approaching people and problems in a constructive, cooperative way have the best chance of fulfilling the goals of the Act and of the particular project. Organizations with a philosophy or pattern of "confrontational" attacks on other segments of the community have little chance of eliciting the aid and support of many of the people who can best assist the poor in improving their lot in life, and will be much less likely to be able to institutionalize their projects when VISTA funds are no longer available.

Both new and renewed VISTA projects should display evidence of local public and/or private sector support or active participation which will enhance their chance of success, as well as plans for institutionalizing the VISTA activities after the volunteers leave.

(42 U.S.C. 4951; 4952)

Part II. Vista Guidance Papers

A. Procedures on Selection of VISTA Sponsors and Projects

1. The following procedures will be employed by ACTION staff in the selection of VISTA sponsors and in the approval of view and continuation VISTA projects. All the stated elements must be found in the applicant's proposal. The project must:

(a) Be poverty-related in scope and otherwise comply with the provisions of the Domestic Volunteer Service Act of 1973, as amended (42 U.S.C. 4951 *et seq.)* applicable to VISTA and all applicable plublished regulations and ACTION policies.

(b) Comply with applicable financial and fiscal requirements established by ACTION or other elements of the Federal Government.

(c) Show that the goals, objectives and volunteer tasks are attainable within the time frame during which the volunteers

will be working on the project and will produce a measurable result.

(d) Provide for reasonable efforts to recruit and involve low-income community residents in the planning, development and implementation of the VISTA project.

(e) Provide for frequent and effective supervision of the volunteers.

(f) Identify resources needed and make them available for volunteers to perform their tasks.

(g) Have the management capability to carry out the project.

2. Additional Factors. ACTION personnel may use the following additional tests in choosing between applicants who meet the criteria specified above:

(a) How important is the proposed project to the target community? Who will benefit from the project?

(b) Does the project show evidence of skillful and careful planning to attain project goals?

(c) Did the sponsor answer project application questions with specificity or somewhat vaguely?

(d) What evidence of local support does the project have? What local opposition does it have?

(e) Does the sponsoring organization have the managerial and technical skills and expertise to implement the project successfully?

(f) Sponsor's staff:

(1) What are the procedures for on-the-job training of the staff?

(2) What kind of supervision do staff members receive?

(3) What are the procedures for staff accountability?

(4) What position on the staff will be responsible for VISTA supervision?

(g) Is the number of volunteers being requested appropriate for project goals and objectives as stated?

3. Prohibited Activities. Applicants and sponsors must furnish adequate assurances that the following prohibitions on volunteer and sponsor activity are observed:

(a) VISTA Volunteers are prohibited by law from participating in:

(1) Partisan and nonpartisan political activities, including voter registration activities.

(2) Direct or indirect attempts to influence legislation, or proposals by initiative petition.

(3) Labor and anti-labor organization and related activities.

(b) VISTA sponsors are prohibited by law from:

(1) Carrying out projects resulting in the identification of such projects with partisan and nonpartisan political activities, including voter registration activities and providing voters with transportation to the polls.

(2) Assigning volunteers to activities which would result in the displacement of employed workers.

(3) Accepting, or permitting the acceptance of compensation for the services of volunteers.

(4) Using volunteers as part of the sponsor organization as opposed to the project. The project sponsor is responsible to insure that all segments of the community are aware of the distinction between the project and the sponsor, and that the VISTA Volunteers work on the former and not for the latter.

4. VISTA Sponsor Selection Process.

Project Approval Process for New Sponsors. In order to assure all potential sponsors equal consideration, the VISTA project approval process for new projects listed below is to be followed.

(1) When a potential sponsor contacts an ACTION State Office to apply for VISTA resources the State Office will send the sponsor a Pre-Application Inquiry Form or a VISTA Project Application Form.

(2) Returned VISTA Project Application Forms should be reviewed by the State Director as they are received.

(a) Potential projects which appear to the State Director to be out of compliance with VISTA policies should be disapproved and the sponsoring agency/organization should be notified in writing.

(b) Potential projects that have been found to meet minimum VISTA requirements should be scheduled for a second review as soon as possible.

(3) Programming Review—The recommendation as to which projects will be developed for the placement of VISTA Volunteers will be made at the second review of the VISTA Project Application Forms to be held by each State/district.

(a) Participating in the review will be:

(1) The State Director and whoever he/she deems necessary from his/her staff.

(2) The Regional Director or his/her designee.

(b) The State Director will rank the VISTA Project Application Forms under consideration. Rank will be determined on the basis of how projects compare to each other as they are judged against both VISTA policies and requirements and the State programming strategy (e.g., rural/urban, program focus, etc.).

(c) The State Director will propose to the Regional Director which projects will be developed according to their rank and the number of training entries which can be placed during the coming quarter.

(d) The Regional Director will send a copy of the joint recommendation of the State and Regional Directors to the Regional of VISTA for approval along with the complete project application package.

(e) The Director of VISTA will promptly notify the Regional and State Directors of all decisions. Formal action necessary to implement the decisions will be initiated by the State Director after all approved VISTA Project Application Forms and necessary auxiliary documents (e.g., Memoranda of Understanding) have been reviewed for technical and legal sufficiency by the Regional Director.

(f) The Regional Office will forward a copy of the complete document file to VISTA headquarters.

Procedures for Existing Sponsors.

(1) Notice. All State Offices will review existing VISTA projects to determine whether they would be in compliance with VISTA requirements if they were applied to the project as currently constituted. Those that do not appear to comply will be notified of this fact with the reasons for noncompliance explained. Sponsors will be reminded that any new application for renewal must comply with VISTA requirements.

(2) Review of Continuation Applications.

(a) Project applications from existing sponsoring organizations which desire renewal will be reviewed by the State and Regional Director and the Director of VISTA. If the application is denied at the State, regional or national level, the sponsor will be notified that ACTION intends to deny the application for renewal, and the sponsor will be given an opportunity to show cause why the application should not be denied in accordance with ACTION procedures. See Part 1206, Title 45, Code of Federal Regulations.

(b) If the application for renewal is approved by the State and Regional Directors and the Director of VISTA, the project will be renewed for one year, subject to the availability of funds.

(42 U.S.C. 4953)

Part III—Vista Project Review Procedures

A. Submission of New or Renewal Project Packages.

B. Extensions of Memoranda of Agreement.

1. Extensions for Less than Six Months.

a. Requests for Approval of Extension.

b. Denial of Extension.

2. Approval of Project Extensions in Lieu of Full Year Renewals.

C. Denial of Project Renewal Applications.

1. Tentative Denial at Regional Level.

2. Continuation of Assistance During Denial of Renewal Process.

D. Freedom of Information Act Requests Related to Project Review.

E. Timeliness.

The following procedures will serve as guidelines for VISTA project review:

A. Submission of New or Renewal Project Packages

Regional Directors requesting approval for full-year renewal or new project applications shall submit such packages at the earliest possible date (see Section E below regarding timeliness of renewal applications). To the extent possible, new or renewal project packages should address all of the "Additional Factors" contained in Section A.2. of the Revised VISTA Guidance Papers. In particular, packages should provide evidence of local public and/or private sector support or active participation which would enhance the project's chance of success, and should indicate plans for "institutionalizing" VISTA-supported activities after volunteers leave.

B. Extension of Memoranda of Agreement

1. *Extensions of Less than Six Months.* a. *Requests for Approval of Extension.* Project packages should be submitted to the Director of VISTA for approval in his/her complete discretion if a Memorandum of Agreement extension is requested in order to allow existing volunteers to complete their first full year of service. In such cases, no more than three (3) additional months of project activity will be permitted if any additional time is allowed at all, with the understanding that a full-year renewal is desired neither by ACTION nor by the sponsoring organization.

The Director of VISTA will notify the Regional and State Directors of his/her decision in writing as soon as possible after receipt of the extension request package. Where an extension is approved, State and Regional Offices will take all necessary actions to implement that decision, including extension of the Memorandum of Agreement and applicable support grants. In no instance shall volunteers assigned to such projects be extended beyond their first year of service.

b. *Denial of Extension.* Regional Directors and the Director of VISTA may deny requests for project extensions of less than six (6) months without allowing for an informal "show cause" meeting, regardless of the duration of the project. In such cases, Regional Directors and the Director of VISTA shall issue a denial letter to the sponsor which shall constitute a *final,* non-appealable decision.

2. *Approval of Project Extensions in Lieu of Full-Year Renewals.* In a number of instances in the past, ACTION State and/or Regional Directors have recommended approval of project extensions of less than 12 months although the sponsor had submitted an application for a full-year renewal. In future similar cases, procedures for denial of refunding as required by 45 CFR 1206.2–4(d) shall apply (*i.e.,* the Regional Director shall issue a tentative denial notice for the one-year request, stating in such notice, however, that he/she is recommending to the Director of VISTA that the project be extended for a specified number of months). Copies of such letters shall be forwarded to the VISTA Director upon issuance.

If an informal meeting is held on a one-year renewal request, the Regional Director shall collect all material furnished by the sponsor and shall forward all such material, the project renewal file, and the Regional Director's own recommendations, to the Director of VISTA for *final* decisions on both the sponsor's renewal application and the Regional Director's extension recommendation. The required documents shall be forwarded to the Director of VISTA within five (5) days of the meeting. (See section C(2) below regarding continuation of assistance.)

If the sponsor does not request an informal meeting as required in the tentative letter, the Regional Director's tentative decision to deny the renewal application will become final. In such cases, only the Regional Director's extension request, together with supporting documents, shall be submitted to the Director of VISTA for final review and decision.

Regardless of their proposed duration these ACTION-initiated project extensions are not covered by the denial of renewal procedures.

C. Denial of Project Renewal Application

1. *Tentative Denial at Regional Level.* All tentative denial decisions made *prior* to a project's submission to the Director of VISTA will be issued by the ACTION Regional Director. The tentative denial notice shall be sent to the sponsor as far in advance of the end date of the current Memorandum of Agreement as possible. It must contain: Reasons for the tentative decision to which the sponsor can address itself should it wish to contest the decision to deny refunding; notification of the date by which the sponsor must request an informal meeting; and a copy of 45 CFR Part 1206, Subpart B.

The Regional Director shall conduct the informal meeting required by 45 CFR Part 1206 2–4(d) as appropriate with the State Director (or designee) in attendance if feasible. Meetings shall be scheduled approximately two weeks after issuance of a tentative denial (assuming the sponsor has responded in a timely manner to the letter and requested a meeting). If the sponsor does not request an informal meeting in a timely manner, the Regional Director's denial decision will become final.

At the informal meeting, the Regional Director shall collect all information furnished by the sponsor and shall indicate to the sponsor only that all such material, the project renewal file, and the Regional Director's own recommendations will be forwarded to the Director of VISTA for a final decision. The required documents shall be forwarded to the VISTA Director within five (5) working days of the meeting. (See section C(2) below regarding continuation of assistance during the appeal process.)

2. *Continuation of Assistance During Denial of Renewal Process.* If the project duration period specified in the Memorandum of Agreement between ACTION and the sponsor expires before a final decision has been made regarding the sponsor's application for renewal or extension (where the sponsor has made timely application as specified in Section E below), the project shall be continued at the same level of support until a final decision is made and communicated to the sponsor.

The Memorandum of Agreement in such cases shall be amended to extend its period "until a final decision is rendered on the project's renewal status"; all volunteers assigned to the project shall be continued in "active" status (with the provision, however, that volunteers who have reached their scheduled termination dates, and who do not wish to continue in service, will be allowed to leave). Support grants for supervision or transportation of volunteers shall be extended for a period not to exceed 30 days.

Where a final decision denies project renewal, volunteers whose terms of service extend beyond the project's expiration date shall be notified by mailgram from the Regional Director that they have been placed on Administrative Hold effective the day after the project's expiration, shall continue to receive all regular

allowances, shall no longer engage in any project-related activities, and shall contact the ACTION State Office within three (3) working days to clarify their status. A follow-up letter shall be sent to such volunteers by the State Office as soon as the volunteers notify the State Office that they wish to be considered for reassignment or wish to resign from VISTA service. If the State Office receives no such notification, or if no reassignment can be found, volunteers shall be terminated from VISTA service pursuant to volunteer termination procedures contained in 45 CFR Part 1210.

D. Freedom of Information Act Requests Related to Project Review

All Freedom of Information Act [FOIA] requests generated by the project review process shall be directed to the FOIA Officer in Washington for reply (even if initially addressed to the State or Regional Offices).

E. Timeliness

Equitable and expeditious treatment of both sponsors and volunteers requires that documentation be submitted and processed at all levels in a timely manner.

All sponsors shall be notified by the appropriate State Office that renewal applications must be submitted to the State Office at least 115 days prior to the expiration date of the current Memorandum of Agreement. Renewal application packages shall be submitted to the Regional Office at least 80 days prior to the expiration date, and to the Director's Office at least 60 days prior to the expiration date.

(42 U.S.C. 4953; 5052)

Dated in Washington, D.C. on December 17, 1981.

Thomas W. Pauken,

Director, ACTION.

BILLING CODE 6050-01-M

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Intent To Prepare Draft Environmental Impact Statement and Conduct Public Scoping Meetings; Soyland Power Cooperative

Notice is hereby given that the Rural Electrification Administration (REA), if lead agency, intends to prepare a draft Environmental Impact Statement (EIS) and conduct public scoping meetings in order to fulfill its requirements under the National Environmental Policy Act of 1969 in connection with possible financing assistance for Soyland Power Cooperative, Inc., (Soyland), P.O. Box A1606 Decatur, Illinois 62525, for the construction of certain peaking power generation facilities and related transmission facilities. Soyland tentatively proposes that the project be located in the State of Illinois, and is currently investigating possible sites in Menard, Pike and Adams Counties.

The sites are being investigated for a possible 220 MW compressed air energy storage facility. The plant technology will include combustion turbines, a specially designed motor-generator, an air compression system, and underground air storage cavern that is connected by piping to a hydraulic compensation reservoir on the land surface, and other ancillary facilities.

Alternatives to be considered by REA are described in REA Bulletin 20-21:320-21 and may include among other options: (1) No project; (2) load management; (3) purchase power from other utilities; and (4) alternative sites for the proposed plant.

REA will hold public scoping meetings with the following schedule: on January 19, 1982, at the Seymour Elementary School, 404 West State Street, Payson, Illinois, at 7:30 p.m.; on January 20, 1982, at the Pike County Courthouse, Washington Street, in Pittsfield, Illinois, at 7:30 p.m.; and on January 21, 1982, at Porta Junior-Senior High School, Rural Route 2 (at the end of Sheridan Road), Petersburg, Illinois, at 7:30 p.m.

The public scoping meetings, conducted by a representative of REA, will be held to solicit public input and comments including but not limited to the nature of the proposed project, its possible location, alternatives, and any significant issues and environmental concerns that should be addressed in the EIS. A record will be made of the meetings and comments made will be addressed in the draft EIS.

All agencies, groups, and individuals are invited to attend and participate in this series of public scoping meetings. All interested parties are invited to submit written comments to REA prior to, at, or within 30 days after the scoping meetings, in order for the comments to be part of the formal record. Comments should be sent to Mr. Joe S. Zoller, Assistant Administrator—Electric, REA, U.S. Department of Agriculture, Washington, D.C. 20250. Requests for additional information concerning the scoping meeting may be directed to Soyland at the above address.

REA's financing assistance to Soyland will be subject to and contingent upon reaching satisfactory conclusions with respect to the environmental effects of the project, and final action will be taken only after compliance with EIS procedures required by NEPA of 1969 have been satisfied.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated at Washington, D.C., this 16th day of December 1981.

Harold V. Hunter,

Administrator.

Soil Conservation Service

Pollock Recreation Area RC&D Measure, South Dakota; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Robert D. Swenson, State Conservationist, Soil Conservation Service, Federal Building, 200 Fourth Street S. W., Huron, South Dakota 57350, telephone (605) 352-8651, Ext. 333 (commercial), or 782-2333 (FTS).

NOTICE: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice than an environmental impact statement is not being prepared for the Pollock Recreation Area, RC&D Measure, Campbell County, South Dakota.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Robert D. Swenson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for recreation facilities and critical area treatment. The planned works of improvement include access roads, parking and turnaround areas, beach area, campgrounds (3), picnic areas (2), RV dump station, diversion and bank stabilization.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. Basic data developed during the environmental

assessment are on file and may be reviewed by contacting Robert D. Swenson. An environmental impact appraisal has been prepared and sent to various Federal, State and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until January 21, 1982.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Robert D. Swenson,

State Conservationist.

BILLING CODE 3410-16-M

Lower Florida Farm Irrigation RC&D Measure, Colorado

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Sheldon G. Boone, State Conservationist, Soil Conservation Service, P.O. Box 17017, Denver, Colorado 80217, telephone (303) 837-4275.

NOTICE: Pursuant to § 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lower Florida Farm Irrigation RC&D Measure, La Plata County, Colorado.

The environmental assessment of this federally assisted action indicates that the measure will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Sheldon G. Boone, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this measure.

The measure concerns a plan to rehabilitate a farm irrigation system to improve irrigation water management, reduce operation and maintenance and reduce energy costs. The planned works of improvement include replacing irrigation canals and ditches with approximately 7 miles of gravity pressured pipeline. The pipeline will deliver water to the individual farm sprinkler systems from the Florida Canal.

The Notice of Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental evaluation are on file and may be reviewed by contacting Mr. Sheldon G. Boone. The FNSI has been sent to various Federal, State and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until January 21, 1982.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Date: December 15, 1981.

Sheldon G. Boone,

State Conservationist.

BILLING CODE 3410-16-M

CIVIL AERONAUTICS BOARD

[Docket 38638; Order 81-12-69]

Air Carrier Rules Governing Confirmation of Reserved Space; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 11th day of December 1981.

Rules 115 of the domestic passenger rules tariff, CAB No. 352, describes the conditions under which most U.S. airlines confirm reservations on their flights. In Order 80-9-57 (September 12, 1980), the Board tentatively concluded that this rule is unlawful because it does not make clear an airline's obligation to passengers whose reservations do not appear in the airline's reservations records, but who have been issued tickets showing a confirmed status.[1] We asked all interested parties to show cause why we should not order the airlines to amend the rule to clarify their obligations to these people. We have received few objections to our proposed action,[2] and we have decided to make it final.

In Rule 115, most airlines explain that they consider a reservation confirmed when an agent of the airline confirms the requested space and records the transaction in the airline's electronic reservations system. Usually, the rule provides that reservations will then be held for the passenger subject to the timely purchase of a ticket. However, as we explained in Order 80-9-57, we are concerned because Rule 115 does not specifically address the status of passengers whose ticket shows a confirmed reservation, but whose reservations do not appear in the airline's computer. Arguably, Rule 115 now requires both a confirmed ticket and a record of the reservation transaction in the airline's reservations records.

Applying Rule 115 in this manner concerns us for two reasons. First, such an interpretation of Rule 115 means that a passenger with a confirmed ticket whose reservation does not appear in the airline's reservation system might not be considered to have "confirmed reserved space." This is significant because "confirmed reserved space" is a prerequisite to entitlement to compensation or amenities in the event a passenger is not accommodated on a flight. As we noted in Order 80-9-57, we have long considered a passenger with a confirmed ticket to hold "confirmed reserved space" even if there is no other record of the reservation. A possible interpretation of Rule 115 which conflicts with this view is clearly unlawful. Also, we noted in Order 80-9-57 that most airlines do, in fact, honor confirmed tickets even when no other record of the transaction can be found. Undoubtedly they do this because they recognize that most such discrepancies are caused by mistakes of their employees or agents. However, if Rule 115 is read to require both a confirmed ticket and a record of the reservation, the burden of these mistakes is shifted from the airline to the passenger. We think that is unreasonable.[3] The reservations records are in the exclusive control of the airline and there is no realistic way for a passenger to verify their accuracy. Under these

---

[1] This is usually indicated by the notation "OK" in the status box on the ticket.

[2] Aloha Airlines, New Haven Airways, Air New England and the Commuter Airline Association of America objected to our proposed actions. Mr. Donald Pevsner objected in part, and the American Society of Travel Agents responded to his suggestion. Pacific Southwest Airlines and Ozark Air Lines commented on our proposal but did not object. No party requested an evidentiary hearing on our proposal and we conclude that none is required.

[3] Section 404(a)(2) of the Federal Aviation Act requires carriers to establish tariff rules which are, *inter alia*, reasonable. Thus, because we conclude that the effect of Rule 115 is unreasonable, we also conclude the rule is unlawful.

circumstances, we believe a carrier must be responsible for the actions of its own employees and agents.

None of the few objections filed in this docket really addressed these issues. Rather they focused on the purported burdens imposed by our denied boarding scheme in general, especially on carriers operating small aircraft. We have recently acted to relieve small aircraft (60-seat or smaller) operators from the burdens of the DBC rules. ER–1237 (August 6, 1981). In addition, we are preparing a comprehensive review of the denied boarding rules, and we can address problems with the rules in that proceeding. The objections filed here are simply misplaced. We have made it clear before that passengers with "OK" tickets have "comfirmed reserved space" even if no other record of the reservation can be found.[4] This action does no more than ensure that Rule 115 accurately reflects that obligation.

No comments provided any evidence that this proposal would be unduly burdensome. This is not surprising since the proposal reflects the actual practice of all but a few airlines.

One comment urged that we limit an airline's obligation to honor "OK" tickets to those written by its own employees. This suggestion was prompted by a fear that airlines might retaliate unfairly against travel agents if forced to pay DBC to their passengers. It is true that this limitation might protect airlines from loss caused by travel agent mistakes, but we do not think this loss should be shifted to passengers. We are confident that airlines have adequate and reasonable means to protect themselves from losses caused by travel agent mistakes, and we do not believe the airlines will unfairly penalize an agent who makes an honest mistake.[5]

Two comments pointed out issues which need to be clarified. First, although we used the customary term "OK" to refer to the ticket notation reflecting confirmed space, we did not intend to imply that airlines must use that notation. Any notation may be used that is recognized by the airlines themselves. Also, we do not intend to require an airline to honor the various types of "write-your-own" tickets [6] unless there is a record of the reservation.

Finally, we will not prescribe language to supplement the present Rule 115. Airlines are free to design their own language, as long as it clearly reflects their obligation to their passengers.

Accordingly,

1. We find that Rule 115 of CAB No. 352 is unjust, unreasonable and unlawful and we direct that Rule 115 be amended to make it clear that a passenger who obtains a ticket that reflects confirmed space on a specific flight and date from a carrier, or its authorized agents, shall be regarded as having confirmed reserved space even if no other record of the reservation can be found.

2. This proceeding is terminated.

We shall serve this order on all U.S. certificated air carriers and all other parties filing comments in this docket. This order will also be published in the **Federal Register.**

Note.—All Members concurred.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

[FR Doc. 81–36477 Filed 12–21–81; 8:45 am]

BILLING CODE 6320–01–M

[4] *See, e.g., Air New England Inc. Violations of Part 250,* Order 79–10–52 (October 9, 1979).

[5] In fact, the American Society of Travel Agents filed comments opposing this suggested limitation.

[6] "Write-your-own" tickets, as the name implies, are blank ticket forms made available by airlines to selected passengers. The passenger fills in the chosen destinations, flights and dates, and presents the form to the carrier for passage.

Bassett and Tesini d.b.a. Amerijet International; Application for All-Cargo Air Service Certificate

December 16, 1981.

In accordance with Part 291 (14 CFR Part 291) of the Board's Economic Regulations (effective November 8, 1978), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 40281, from Bassett and Tesini d.b.a. Amerijet International, P.O. Box 21126, Ft. Lauderdale, FL 33335 for an all-cargo air service certificate to provide domestic cargo transportation.

Under the provisions of § 291.12(c) of Part 291, interested persons may file an answer in opposition to this application on or before January 12, 1982. An executed original and six copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. It shall set forth in detail the reasons for the position taken and must relate to the fitness, willingness, or ability of the applicant to provide all-cargo air service or to comply with the Act or the Board's orders and regulations. The answer shall be served upon the applicant and state the date of such service.

Phyllis T. Kaylor,

Secretary.

Mansfield Aviation, Inc., d.b.a. Air Vermont, et al.; Commuter Fitness Determination

The Board is proposing to find the following carriers fit, willing, and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended, and that aircraft used in this service conform to applicable safety standards.

Order	Applicant	Response date
81-12-67	Mansfield Aviation, Inc., d.b.a. Air Vermont.	Dec. 30, 1981.
81-12-77	Airpac, Inc.	Jan. 4, 1982.
81-12-78	Dorado Wings, Inc., d.b.a. Crownair.	Jan. 4, 1982.
81-12-79	Newair Flight, Inc.	Jan. 4, 1982.
81-12-94	Devoe Airlines, Inc.	Jan. 4, 1982.

All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed in Attachment A of the respective orders and file response or additional data for Orders 81-12-67, -78, and -94 with the Special Authorities Division, Room 915, for Order 81-12-79 with the Essential Air Services Division, Room 921, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, and for Order 81-12-77 with the Alaska Field Office, Civil Aeronautics Board, 701 C Street, Box 27, Anchorage, Alaska 99513.

The complete text of the orders is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request to the above address.

For further information contact: Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, Washington, D.C. 20428 for Order 81-12-67: Mr. James Lawyer, (202) 673-5088; for Order 81-12-78: Mr. J. Kevin Kennedy, (202) 673-5918; for Order 81-12-94: Ms. Patricia Szrom, (202) 673-5088; for Order 81-12-79: Gerard N. Boller, (202) 673-5330; and for Order 81-12-77: Ms. Donna Strain, (907) 271-5148.

By the Civil Aeronautics Board, December 15, 1981.

DEPARTMENT OF COMMERCE

International Trade Administration

[Order No. 41-4; Amdt. 4]

Assistant Secretary for Trade Administration; Organization and Function Order

Effective date: October 30, 1981.

This order further amends ITA Organization and Function Order 41-4 of August 26, 1980 (45 FR 65003, 46 FR 31911, 46 FR 48736) to establish two divisions in the Office of Antiboycott Compliance.

1. A new subparagraph d is added to Part V, Section 2.05 and the succeeding subparagraphs are relettered as e, f, g, and h. New subparagraph d reads:

"d. Director, Enforcement Division, Office of Antiboycott Compliance"

2. Part V, Section 5 is revised to read:

"Section 5. Office of Antoboycott Compliance.

".01 The *Office of the Director* includes the *Director* who shall plan and direct the execution of policies and programs of the Office. The Director serves as the primary contact point relating to administration of Departmental responsibilities under the Export Administration Act of 1979 regarding foreign boycotts against countries friendly to the United States. The Director shall supervise and direct the following organizational components:

".02 The *Enforcement Division* shall investigate suspected violations of the antiboycott regulations and, in consultation with the Department's Office of General Counsel, prepare cases on violations for referral to the Administrative Law Judge or for other legal action; provide support, as requested, to the Department's Office of General Counsel in connection with litigated cases; ensure respondent compliance with terms and conditions of orders entered as a result of enforcement actions; develop intelligence; and maintain liaison with other agencies and groups having mutual enforcement concerns.

".03 The *Compliance Policy Division* shall develop and coordinate policies and measures for opposing restrictive trade practices or boycotts under the Export Administration Act of 1979; review proposed compliance actions for policy consistency; provide advice to the business community on the application of antiboycott regulations; maintain a program for educating the affected public on the Department's antiboycott policies and regulations; maintain liaison with interest groups, other Government agencies, and embassies of foreign governments on antiboycott matters; in consultation with the Department's Office of General Counsel, prepare amendments, interpretations, and clarifications to the antiboycott regulations; and operate the automated boycott reporting system to provide statistical summaries and enforcement data."

3. The attached organization chart [1] supersedes the chart attached to Amendment 3 to ITA Organization and Function Order 41–4 of September 17, 1981.

Approved:

Lionel H. Olmer,

Under Secretary for International Trade.

Lawrence Brady,

Assistant Secretary for Trade Administration.

Vincent F. Decain,

Acting Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

William H. Hamner; Issuance of Permit To Take Marine Mammals and Endangered Species

On November 12, 1981, Notice was published in the **Federal Register** (46 FR 55739), that an application had been filed with the National Marine Fisheries Service by Dr. William H. Hamner, for a Scientific Research and Scientific Purposes Permit to take an unspecified number of marine mammals by harassment.

Notice is hereby given that on December 13, 1981, the National Marine Fisheries Service issued a Scientific Research and Scientific Purposes Permit as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) to Dr. William H. Hamner subject to certain conditions set forth therein.

[1] Filed as part of the original document.

Issuance of this Permit as required by the Endangered Species Act of 1973 is based on a finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of this Permit; (3) will be consistent with the purposes and policies set forth in section 2 of the Endangered Species Act of 1973. This Permit was also issued in accordance with, and is subject to Parts 220–222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: December 14, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Hochseefischerei Nordstern AG; Receipt of Application for General Marine Mammals Permit

Notice is hereby given that the following application has been received to take marine mammals incidental to the pursuit of commercial fishing operations within the U.S. fishery conservation zone, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the regulations thereunder.

Hochseefischerei Nordstern AG, Bremerhaven, West Germany has applied for a Category I: "Towed or Dragged Gear" general permit to incidentally take 60 Otariid seals, 60 Phocid seals, and 60 Cetaceans within the U.S. fishery conservation zone in 1982.

The application is available for review in the Office of the Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW, Washington, D.C.

Interested parties may submit written views on the application on or before January 21, 1982, to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Washington, D.C. 20235.

Dated: December 14, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Johns Hopkins School of Hygiene and Public Health; Receipt of Application for Marine Mammals Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1544), the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222).

1. Applicant:

a. Name: Dr. Darlene R. Ketten (P289).

b. Address: Department of Pathobiology, Johns Hopkins School of Hygiene and Public Health, 615 North Wolfe Street, Baltimore, Maryland 21205.

2. Type of Permit: Scientific Research/Scientific Purposes, Importation and Exportation.

3. Name and Number of Animals: Unspecified number of cetacean specimens

4. Type of Take: Taken legally in the country of origin for scientific purposes. No animals will be taken for the purposes of importation by the Applicant.

5. Location of Activity: Worldwide.

6. Period of Activity: 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not

necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: December 15, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

December 16, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing from 276,728 dozen to 297,984, the import restraint level established for man-made fiber woven blouses in Category 641, exported from Mexico during the year which began on January 1, 1981, by the application of swing.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409))

SUMMARY: The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended, between the Governments of the United States and Mexico, provides, among other things, that specific ceilings may be increased by designated percentages (swing). Pursuant to the terms of the bilateral agreement, and at the request of the Government of Mexico, the import restraint level for Category 641 is being increased to 297,984 dozen during the agreement year which began on January 1, 1981 and extends through December 31, 1981, by the application of swing.

EFFECTIVE DATE: December 16, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Boyd, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

SUPPLEMENTARY INFORMATION: On December 19, 1980, a letter dated December 16, 1980 was published in the **Federal Register** (45 FR 83648) from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established the levels of restraint applicable to certain specified categories of cotton and man-made fiber textile products, including Category 641, which have been produced or manufactured in Mexico and exported to the United States during the twelve-month period which began on January 1, 1981. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to permit entry for consumption, or withdrawal from warehouse for consumption, of man-made fiber textile products in Category 641 at the increased level of restraint of 297,984 dozen during the agreement year which began on January 1, 1981.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 16, 1981.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On December 16, 1980, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the

twelve-month period beginning on January 1, 1981 and extending through December 31, 1981 of cotton, and man-made fiber textile products in certain specified categories, produced or manufactured in Mexico, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 20, 1979, as amended, between the Governments of the United States and Mexico; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on December 16, 1981, to increase the twelve-month level of restraint for Category 641 to 297,984 dozen.[2]

The action taken with respect to the Government of Mexico and with respect to imports of man-made fiber textile products from Mexico has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade; Proposed Crude Petroleum Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Chicago Board of Trade ("CBOT") has applied for designation as a contract market in crude petroleum. The Commodity Futures Trading Commission (the "Commission") has determined that the terms and conditions of the proposed futures contract are of major economic significance and that, accordingly, making the proposed contract available for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before February 22, 1982.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Reference should be made to the CBOT crude petroleum futures contract.

FOR FURTHER INFORMATION CONTACT: Richard Shilts, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C., (202) 254-7303.

SUPPLEMENTARY INFORMATION: A copy of the terms and conditions of the CBOT proposed crude petroleum futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Copies can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the CBOT in support of its application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1981)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CBOT in support of its application, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, by February 22, 1982. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C. on December 17, 1981.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Milwaukee Waterway; Intent To Prepare Draft Environmental Impact Statement

December 7, 1981.

AGENCY: U.S. Army Corps of Engineers, Seattle District, DOD.

ACTION: Preparation of a draft environmental impact statement (DEIS) for the proposed placement of fill material and riprap in Milwaukee Waterway, Commencement Bay, Tacoma, Washington.

SUMMARY: The Port of Tacoma has applied to the Corps of Engineers for a section 10/404 permit to fill the Milwaukee Waterway in Commencement Bay, Tacoma, Washington. In order to assess the potential impacts of the proposed fill and alternatives to the fill, the Corps of Engineers will prepare a Federal environmental impact statement. The proposed plan calls for the placement of approximately 2,151,000 cubic yards (c.y.) of material in and near Milwaukee Waterway, Commencement Bay, Tacoma, Washington. Approximately 2,013,000 c.y. of material would be generated by hydraulic dredging of nearby waterways and placed in Milwaukee Waterway. This material may contain substantial concentrations of contaminants. The remainder of the material, about 137,000 c.y., would be clean material from an upland source and would be deposited in a 2-foot layer over the top of the dredged material. Retaining walls and weir structures would be constructed near the present mouth of the Milwaukee Waterway to contain the fill material and allow temporary retention of effluent water. The purpose of the proposed fill is to provide land for a containerized cargo terminal in the Port of Tacoma area.

The Corps of Engineers has three alternative courses of action available:

(1) The section 10/404 permit could be denied. This option would prohibit all pile driving and disposal activity, as well as preventing environmental impacts associated with the proposed action.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 20, 1979, as amended, between the Governments of the United States and Mexico, which provide, in part, that: (1) Specific limits or specific sublimits may be exceeded by not more than seven percent in any agreement period; (2) these same limits may be increased for carryover and carryforward up to 11 percent of the applicable category limit or sublimit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] The level of restraint has not been adjusted to reflect any imports after December 31, 1980.

(2) The permit could be issued as described in the public notice.

(3) The permit could be issued with special conditions that would mitigate adverse impacts resulting from the proposed action.

Alternatives to the proposed action currently being considered by the Port of Tacoma include: (a) No action, (b) fill a portion of the waterway, (c) construction of a pier structure in lieu of fill, and (d) use of a different site.

a. *No-action.* This alternative would mean no involvement by the Corps of Engineers. No containerized cargo terminal would be developed.

b. *Filing a portion of Milwaukee Waterway.* This alternative would allow construction of a smaller containerized cargo terminal at the same site. Impacts associated with this alternative would be less than the proposed action due to the smaller area to be filled. The remainder of the waterway would be left in its present condition or modified (as a mitigative measure) to provide shallow water rearing and feeding area for salmonids, or intertidal wetlands.

c. *Construction of a pier structure.* This alternative would provide the area needed for the proposed containerization cargo terminal but would not provide a disposal area for dredged material from the maintenance dredging of nearby waterways. Potential long-term impacts for this alternative would not approach the magnitude of impacts associated with the proposed action.

d. *Use of a different site.* This might be either an existing site requiring little or no modification for use or a site requiring substantial modification to prepare it for construction of the proposed containerization cargo terminal. No specific alternative site is being considered at this time. Any fill or placement of pilings in navigable water would require permits from the Corps of Engineers.

Significant issues to be addressed in the DEIS include: The need for the proposed action, fisheries and food-chain impacts due to removal of shallow water habitat, water quality impacts due to disposal of dredged material, long-term water quality impacts due to removal of shallow water and wetland areas, and alternatives to the proposed action.

Other environmental review and consultation requirements include preparation of a section 404(b)(1) analysis by the Corps of Engineers, acquisition of a Washington State water quality certificate by the applicant, and acquisition of a certificate of compliance with the Coastal Zone Management Act by the applicant.

Public involvement: An EIS scoping meeting is presently scheduled to be held in Seattle, Washington, in january 1982. The purpose of the meeting is to clarify issues of major concern and identify information that is needed in order to analyze and evaluate project impacts. Announcement of the scoping meeting will be mailed, along with an information package, to all persons identified as having interest in this or other actions in Commencement Bay. Further meetings will be scheduled as needed. It is anticipated that at least one public meeting or workshop will be held during the DEIS review period.

DEIS availability: The DEIS for this proposed action is scheduled to be in mid 1982.

ADDRESS: Questions and/or comments on this proposed action or the DEIS should be directed to: David Masters, Environmental Resources Section, U.S. Army Corps of Engineers, Seattle, District, Post Office Box C–3755, Seattle, Washington 98124, Telephone (206) 764–3624 (FTS 399–3624).

Dated: December 14, 1981.

Norman C. Hintz,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 81–38522 Filed 12–21–81; 8:45 am]

BILLING CODE 3710–ER–M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Fellowships for Graduate and Professional Study; Application Notice for Fiscal Year 1982

Applications from institutions of higher education for grants to make fellowship awards are invited under the Graduate and Professional Study Fellowship Program (G*POP).

Authority for this program is contained in Part B of Title IX of the Higher Education Act of 1965, as amended. (20 U.S.C. 1134d–1134g)

The Graduate and Professional Study Program provides grants to institutions of higher education to support fellowships for graduate and professional study to students who demonstrate financial need and who are from groups which are underrepresented in graduate and professional study areas of importance to the national interest.

Closing date for transmittal of applications: An application for a grant must be postmarked or hand delivered by February 8, 1982.

Applications delivered by mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.094, Washington, D.C. 20202–3561.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should noter that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: An application that is hand delivered must be taken to the Department of Education, Application Control Center, Room 5673, GSA/ROB–3 Building, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information:

The Graduate and Professional Study Fellowship Program

The budget request of the Department for fiscal year 1982 to continue the Graduate and Professional Study Fellowship Program authorized by Title IX–B of the Higher Education Act was $9,680,000. The Department's budget did not include a request for funds to make institutional awards under authority of Title IX–A, or separate budget requests for funds to support awards for Public Service Education Fellowships or for Domestic Mining and Mineral Fuel Conservation Fellowships. The budget request also asked Congress to waive the minimum ($75,000) fellowship award to each institution.

If funds are appropriated, as requested, for the Graduate and Professional Study Fellowship Program, the Department expects, in academic

year 1982–1983, to provide support for continuation awards to fellows in good standing and to provide funds for approximately 482 new fellowships.

Each institutional applicant applying for new fellowships under this Application Notice will be ranked according to the selection criteria set out as 34 CFR 649.12, governing the Graduate and Professional Fellowship Program. Under these criteria, each institutional applicant may apply for fellowships in up to six academic or professional areas of study, provided, among other criteria, that the choice of the area of study is justified by providing evidence of underrepresentation and evidence of national need. If Congress appropriates funds specifically for either Public Service Education Fellowships or Domestic Mining or Mineral Fuel Conservation Fellowships, the Secretary will accept and rank applications under 34 CFR 649.13 or 34 CFR 649.14, as appropriate. If no funds are specifically appropriated for the cited fellowships, the Secretary will accept and rank applications in these two areas of study as well as other areas of study meeting the criteria in 34 CFR 649.12. The Department, in making fellowship awards, normally allocates two or three new fellowships in each approved academic or professional area of study to an institution receiving an award.

The Department makes only one-year fellowship awards. Any continuation support needed for students to complete degree programs will be provided in subsequent years, subject to conditions in the regulations and the appropriation of funds.

These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Application forms: Application forms and program information packages are expected to be ready for mailing by December 23, 1981, and may be obtained by writing to the Graduate Programs Branch, Department of Education, (Room 3060, ROB–3), 400 Maryland Avenue, S.W., Washington, D.C. 20202–3366.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. An applicant must submit only one application to cover all fellowship categories in Part B. The Secretary strongly urges that the narrative portion of a Graduate and Professional Opportunities Grant application not exceed 40 pages in length.

Applicable regulations: Regulations applicable to these programs include the following:

(1) Regulations governing the Fellowships for Graduate and Professional Study Program (34 CFR part 649) which were published in final form in the **Federal Register** on November 9, 1981.

(2) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77, formerly 45 CFR Parts 100a and 100c).

Further information: For further information contact Dr. Donald N. Bigelow, Office of Postsecondary Education, U.S. Department of Education (Room 3060, ROB–3), 400 Maryland Avenue, S.W., Washington, D.C. 20202–3366. Telephone: 245–2347.

(20 U.S.C. 1134d–1134g)

(Catalog of Federal Domestic Assistance No. 84.094, Fellowships for Graduate and Professional Study Program)

Dated: December 14, 1981.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

List of Accrediting and State Approval Agencies

AGENCY: Department of Education.

ACTION: Notice—List of Accrediting and State approval agencies to be reviewed under an Interim Procedure.

SUMMARY: The Secretary lists nationally recognized accrediting agencies and State approval agencies that he determines to be reliable authorities concerning educational quality. This is the second group of accrediting and State approval agencies to be reviewed under the interim procedure published August 25, 1981.

DATE: Comments on these analyses must be received no later than February 3, 1982.

ADDRESS: Comments may be submitted, in writing, to Dr. L. W. Friedrich, Acting Chief, Agency Evaluation Section, Eligibility and Agency Evaluation Staff, Office of Postsecondary Education, 400 Maryland Avenue, S.W. (Room 3030, ROB–3), U.S. Department of Education, Washington, D.C. 20202–3316.

FOR FURTHER INFORMATION CONTACT: Dr. L. W. Friedrich, Telephone: (202) 245–9573.

SUPPLEMENTARY INFORMATION: In the August 25, 1981 issue of the **Federal Register**, (Vol. 46, No. 164, page 43029), the Secretary announced an interim procedure for listing accrediting and State agencies as required by 20 U.S.C. 1141(a), 20 U.S.C. 1085 (b) and (c), 20 U.S.C. 1094 (b)(3) and other statutes.

This notice provides the names of the second group of agencies, the reports and petitions of which the Secretary is reviewing. The Department's Eligibility and Agency Evaluation Staff has made an analysis of each of these agencies according to the criteria in 34 CFR 603.6 and has prepared proposed recommendations.

The Secretary is offering the public an opportunity to comment on these analyses before the Secretary makes determinations on them.

The reports and petitions of the following agencies are being reviewed.

Interim Reports

American Bar Association, Council of the Section of Legal Education and Admissions to the Bar.

Proposed Recommendation: Accept the report.

American Veterinary Medical Association, Council on Education.

Proposed Recommendation: Accept the report.

Minnesota State Board for Vocational Education.

Proposed Recommendation: Accept the report but indicate that the Board, in its next full review, should provide information concerning whether the policy reviews conducted by its advisory committee comply with that component of criterion (b)(1)(vii) calling for the evaluative process to "support constructive analysis, emphasize factors of critical importance, and reflect the educational and training needs of the student."

Missouri State Board of Education.

Proposed Recommendation: Accept the report.

National Accrediting Commission of Cosmetology Arts and Sciences.

Proposed Recommendation: Accept the report. Indicate that the analysis of the interim report lists concerns which should be addressed during the next review of NACCAS regarding criteria (a)(3)(iii)(A), and (b)(5).

Petitions for Continuation of Recognition

American Association of Nurse Anesthesists, Council on Accreditation of Educational Programs of Nurse Anesthesia.

Proposed Recommendation: Continue recognition for four years.

Council on Social Work Education, Committee on Accreditation.

Proposed Recommendation: Continue recognition for four years.

National Accreditation Council for Agencies Serving the Blind and Visually Handicapped.

Proposed Recommendation: Continue recognition for four years.

National Association for Practical Nurse Education and Service, Inc.

Proposed Recommendation: Continue recognition for four years.

Petitions for Expansion of Scope of Recognition

Accrediting Bureau of Health Education Schools (expansion of scope of recognition to include institutional accreditation of private, postsecondary institutions offering allied health education).

Proposed Recommendation: Grant expansion of scope of recognition for the time extending up to the next regular review of ABHES's current scope of recognition. Request an interim report in one year on the issues identified in the staff analysis.

Invitation to Comment

A copy of the analysis of any of the reports and petitions submitted by the agencies to be reviewed by the Secretary may be obtained from Dr. Lawrence W. Friedrich at the address listed above.

Dated: December 14, 1981.

T. H. Bell,

Secretary of Education.

Ethics in Government Financial Disclosure Records

AGENCY: Department of Education.

ACTION: Notice of ethics in Government financial disclosure records.

SUMMARY: The Secretary of Education issues a Notice of Ethics in Government Financial Disclosure Records for the Department of Education (ED) and designates the Agency Ethics Official and custodian of those records.

FOR FURTHER INFORMATION CONTACT: Ms. Norma Baumgartner, Freedom of Information Specialist, Room 2089, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245-8907.

SUPPLEMENTARY INFORMATION: This notice is published to implement provisions of the Ethics in Government Act of 1978 (Pub. L. 95-521, as amended), requiring that financial disclosure records of those officers and employees in the Department of Education covered by the Act be made available for public inspection. The Notice also designates the Agency Ethics Official and custodian of those records.

Mr. Richard S. Werksman, Office of the General Counsel, is the Designated Agency Ethics Official and systems manager.

Requests for access to the records should be directed to Mr. Jack L. Billings, custodian of records, in the Office of Legislation and Public Affairs, Room 2089, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: 245-8564

Dated: December 14, 1981.

T. H. Bell,

Secretary of Education.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Enserch Corp.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of a final Consent Order.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager for Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, [phone] (214) 767-7745.

SUPPLEMENTARY INFORMATION: On October 27, 1981, 46 FR 52413 1981, the Office of Enforcement of the ERA published notification in the **Federal Register** that it had executed a proposed Consent Order with Enserch Corporation on September 30, 1981, which would not become effective sooner than thirty days after publication. Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order. Although interested persons were invited to submit comments regarding the proposed Consent Order, no comments were received. The proposed Consent Order, therefore, was finalized and made effective on December 22, 1981.

Issued in Dallas, Texas, on the 7th day of December, 1981.

Wayne I. Tucker,

Southwest District Manager, Economic Regulatory Administration.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before January 6, 1982.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft. rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before January 6, 1982.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1,000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

and 18 CFR
determinati
before the s
annual proc
cubic feet (
Control (JD
purchasers
notice.

The appli
available fo
extent such

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before January 6, 1982.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36381 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-131-000]

Arizona Public Service Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that Arizona Public Service Company (Arizona) on December 3,.1981, tendered for filing Amendment No. 2 dated October 30, 1981 to the Firm Transmission Service Agreement between the Department of Water and Power of the City of Los Angeles (Los Angeles) and Arizona.

Arizona requests waiver of the Commission's notice requirements to allow for an effective date of November 1, 1981.

A copy of this filing was served upon Los Angeles and the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-132-000]

Arizona Public Service Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that on December 4, 1981, Arizona Public Service Company (Arizona) tendered for filing as an initial rate schedule an Agreement for Sale of Energy Interchange between City of Riverside, California (Riverside) and Arizona dated October 5, 1981.

Arizona requests that this Agreement become effective in 30 days.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-130-000]

Arizona Public Service Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that on December 4, 1981, Arizona Public Service Company (Arizona) tendered for filing as an initial rate schedule an agreement for Sale of Energy Interchange between City of Anaheim, California (Anaheim) and Arizona dated August 21, 1981.

Arizona requests that this Agreement become effective in 30 days.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-144-000]

Arizona Public Service Co.; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that Arizona Public Service Company (Arizona) on December 9, 1981, tendered for filing Amendment No. 2 dated October 31, 1981 to the Interruptible Transmission Service Agreement between the Department of Water and Power of the City of Los Angeles (Los Angeles) and Arizona.

Arizona requests waiver of the Commission's notice requirements to allow for an effective date of November 1, 1981.

Arizona states that copies of the filing were served upon Los Angeles and the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-146-000]

Commonwealth Edison Co.; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that Commonwealth Edison on December 9, 1981, tendered for filing proposed changes in its FERC Electric Service Tariff, Rate 78 and proposed a new Rate 79 for service to its two partial requirements customers now served under Rate 78. The proposed changes would increase revenues from jurisdictional sales and service by $11,828,800 based on the 12 month period ending December 31, 1982.

Commonwealth Edison Company also proposes a change in Rider 20, fuel adjustment and certain changes in the

Terms and Conditions in its FERC Electric Service Tariff.

Copies of the filing were served upon the public utility's jurisdictional customers and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 81-36383 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-133-000]

Connecticut Light and Power Co.; Filing

December 15,1981.

The filing Company submits the following:

Take notice that on December 7, 1981, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule with respect to Transmission Agreement dated March 25, 1981 between (1) CL&P, The Hartford Electric Light Company (HELCO) and Western Massachusetts Electric Company (WMECO) and (2) Braintree Electric Light Department (BELD).

CL&P states that the Transmission Agreement provides for a transmission service to BELD for the whelling of BELD's weekly entitlement in the Vermont Yankee nuclear generating facility pursuant to an agreement between BELD and the Village of Lyndonville, Vermont, for an indefinite period commencing on April 4, 1981.

CL&P further states that the transmission charge rate is a weekly rate equal to 1/52nd of the annual average cost of transmission service on the Northeast Utilities system determined in accordance with Schedule A of the Transmission Agreement. The weekly transmission charge is determined by the product of (i) the transmission charge rate ($/kW-week), and (ii) the number of kilowatts which BELD is entitled to receive during such week. The weekly transmission charge is reduced by 50% to give due recognition for payments made by BELD to intervening transmission systems.

CL&P requests that the Commission waive its standard notice period and permit the Transmission Agreement to become effective on April 4, 1981.

CL&P states that copies of this rate schedule have been sent to HELCO, WMECO and BELD.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

December 11, 1981.

Take notice that on November 30, 1981, East Tennessee Natural Gas Company (East Tennessee) tendered for filing Second Revised Sheet Nos. 4, 5 and 6 to Original Volume No. 1 of its FERC Gas Tariff to be effective January 1, 1982.

East Tennessee states that the sole purpose of these tariff sheets is to reflect various rate adjustments pursuant to the General Terms and Conditions of its tariff as follows:

(1) A PGA Rate Adjustment pursuant to Section 22;

(2) A Curtailment Credit Rate Adjustment pursuant to Section 24;

(3) A GRI Rate Adjustment pursuant to Section 25; and

(4) Estimated Incremental Pricing Surcharges pursuant to Section 26.

East Tennessee also states that copies of the filing have been mailed to all affected customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA82-1-13-000 (PGA82-1)]

Gas Gathering Corp.; Proposed Change in Rates Under Purchased Gas Adjustment Clause Provision

December 11, 1981.

Take notice that Gas Gathering Corporation (GGC), on November 24, 1981, tendered for filing proposed changes in its FERC Gas Tariff providing for increased charges to Transcontinental Gas Pipe Line Corporation (Transco), its sole jurisdictional customer, under GGC's PGA clause. The proposed changes would increase the rate charged Transco by 90.67011 cents per Mcf from those rates presently in effect. The proposed changes are proposed to be made effective January 1, 1982. GGC states that the filing is made to allow it to recover increased current costs of purchased gas, and to reduce the balance of its Unrecovered Purchased Gas Cost as of September 30, 1981, through a six-month surcharge.

A copy of this filing has been served upon Transco.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are

on file with the Commission and are available for public inspection.

[Docket No. TA82-1-4-000 (PGA82-1) (IPR82-1)]

Granite State Gas Transmission, Inc.; Proposed Change In Rates Pursuant To Purchased Gas Cost Adjustment Provision

December 11, 1981.

Take notice that Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021, on November 30, 1981 tendered for filing Thirty-Second Revised Sheet No. 3A in its FERC Gas Tariff, Original Volume No. 1, containing proposed changes in rates for effectiveness on January 1, 1982.

According to Granite State, the instant rate adjustment reflects an increase in its cost of gas purchased from Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) which Tennessee proposes to make effective January 1, 1982, and the amortizaton of Unrecovered Purchased Gas Costs. It is stated that Granite State's filing is made pursuant to the purchase gas cost adjustment provision in its tariff, approved on December 14, 1972, in Docket No. RP73-17, as amended.

Granite State further states that its rate adjustment is applicable to its sales to Northern Utilities, Inc. (Northern), which is Granite State's sole jurisdictional customer. According to Granite State, the effect of the proposed rates contained on Thirty-Second Revised Sheet No. 3A on Northern's purchases from Granite State is an increase of $3,469,043 annually, based on purchases from Tennessee and sales to Northern for the twelve months ended September 30, 1981.

According to Granite State, copies of the filing were served upon Northern and the regulatory commissions of the States of Maine and New Hampshire.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wising to become a party must file a petiton to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-137-000]

Hartford Electric Light Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that on December 7, 1981, The Hartford Electric Light Company (HELCO) tendered for filing as an initial rate schedule and exchange agreement (the "Agreement") between HELCO and Montaup Electric Company (Montaup). The Agreement, dated as of March 20, 1981, provides for HELCO to exchange system capacity having the characteristics of HELCO's Middletown Unit No. 4, a mid-range oil-fired steam unit, for non-operable capacity from Montaup's entitlements in either Canal Unit No. 1 or 2, and/or the Someret Unit No. 5 or 6, which are base load, oil-fired steam units (the "Montaup Units"). HELCO states that the timing of exchanges cannot be accurately estimated but that Montaup would be expected to enter into an exchange only when one or more of the Montaup Units was unavailable for energy production.

The Agreement provides that the parties will determine prior to Monday of each week during the term of the Agreement whether it is economically advantageous to the parties that an exchange, pursuant to the Agreement, shall take place during that week.

Montaup will pay capacity charges to HELCO in an amount equal to the kilowatts of capacity exchange during each hour of an exchange multiplied by $0.00300 multiplied by the number of hours during each week during which Montaup actually received associated energy deliveries. Montaup will purchase energy from HELCO at the incremental cost of providing such energy from HELCO's Middletown Unit No. 4.

HELCO requests that the Commission waive its customary notice period and allow the Agreement to become effective on March 20, 1981. HELCO further states that the filing is in accordance with Section 35 of the Commission's Regulations.

Montaup has filed a certificate of concurrence in this docket. The Agreement has been executed by HELCO and by Montaup and copies have been mailed to each of them.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kansas Gas and Electric Co.; Filing

December 14, 1981

The filing Company submits the following:

Take notice that Kansas Gas and Electric Company (KG&E) on December 7, 1981, tendered for filing a proposed change in its FPC Electric Service Tariff No. 139. The proposed Amendment changes the minimum and maximum amounts of power.

KG&E states that the Amendment is necessary because the customer requested an increase in the amount of power to be delivered, and requests an effective date of November 18, 1981.

Copies of this filing were served upon The Radiant Electric Cooperative, Inc.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Midwestern Gas Transmission Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

December 11, 1981.

Take notice that on November 30, 1981, Midwestern Gas Transmission Company (Midwestern) tendered for filing Second Revised Sheet Nos. 5, 6, 7 and 8 to its FERC Gas Tariff, Original Volume No. 1, to be effective January 1, 1982. Midwestern states that the sole purpose of the revised tariff sheets is to reflect adjustments to its rates pursuant to rate adjustment provisions of the General Terms and Conditions of its tariff as follows:

(1) PGA Rate Adjustments for the Southern System pursuant to Sections 2 and 3 of Article XVII;

(2) PGA Rate Adjustments for the Northern System pursuant to Sections 2 and 3 of Article XVIII.

(3) a GRI Rate Adjustment pursuant to Section 2 of Article XXI;

(4) Estimated Incremental Pricing Surcharges for the Southern System pursuant to Section 2 of Article XXII; and

(5) Estimated Incremental Pricing Surcharges for the Northern System pursuant to Section 2 of Article XXIII.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER82-142-000]

Mississippi Power Co.; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that Mississippi Power Company (Mississippi) on December 8, 1981, tendered for filing a proposed agreement with Municipal Energy Agency of Mississippi for a Special Short Term Power Sale to Municipal Energy Agency of Mississippi. The agreement provides for short term power sales for the period December 1, 1981 through April 30, 1982. The charges are identical with those recently approved by the Commission for wholesale electric power association customers in FERC Docket No. ER81-379-000.

This filing is a new special short term power sale. No like wholesale service is provided by Mississippi and the only similar service is to the wholesale customer identified in FERC Docket No. ER81-379-000. Mississippi requests an effective date of December 7, 1981.

Copies of the filing were sent to the Municipal Energy Agency of Mississippi, Mississippi Power and Light Company and the Mississippi Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER82-136-000]

Niagara Mohawk Power Corp.; Proposed Tariff Change

December 14, 1981.

The filing Company submits the following:

Take notice that Niagara Mohawk Poer Corporation (Niagara), on December 7, 1981, tendered for filing as a rate schedule an agreement between Niagara, The Hartford Electric Light Company (HELCO), the Connecticut Light and Power Company (CL&P) and Western Massachusetts Electric Company (WMECO), collectively called the NU Companies, dated October 1, 1981.

The agreement provides for the transmission of intermittent, short term power as scheduled by Consolidated Edison Company of New York, Inc. to be delivered to the NU Companies. Niagara requests an effective date of October 1, 1981, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon HELCO, CL&P, WMECO and the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-143-000]

New York State Electric & Gas Corp.; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that New York State Electric & Gas Corporation (NYSEG) on December 7, 1981, tendered for filing proposed changes in its FERC Rate Schedules Nos. 27, 28, 30, 33 and 35. It is

estimated that the proposed changes would increase revenues from jurisdictional sales and service by about $27,500 based on the 12 month period ended September 30, 1981.

After hearings, and pursuant to Opinions 81-18 and 81-21 issued by the Public Service Commission of the State of New York on October 20, 1981 and October 21, 1981, respectively, NYSEG filed revised leaves to Schedule PSC No. 115—Electricity, which the above Opinions allowed to become effective October 25, 1981. Rate Schedule PSC No. 115 is incorporated in the previously noted FERC schedules. NYSEG requests an effective date of October 25, 1981. NYSEG states that copies of the filing were sent to all jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. EL82-3-000]

City of Oakland, California v. Pacific Gas & Electric Co.; Filing

December 15, 1981.

Take notice that on December 4, 1981, the City of Oakland, California, by and through its Board of Port Commissioners (Port of Oakland), filed a complaint pursuant to section 1.6 of the Commission's Rules of Practice and Procedure against the Pacific Gas and Electric Company (PG&E). The complainant requests that the Commission (1) declare that the sale of electricity by PG&E to the Port of Oakland at Metropolitan Oakland International Airport is a sale for resale in interstate commerce; (2) determine a just and reasonable wholesale rate applicable to the above transaction, taking into account price squeeze considerations; (3) order PG&E to file rates with the Commission for service to the Port of Oakland; (4) consolidate these issues with the proceedings in Docket No. ER81-679-000; and (5) grant other necessary relief.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 18, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Oklahoma Gas and Electric Co.; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that on December 9, 1981, Oklahoma Gas and Electric Company (OG&E) tendered for filing an agreement for electric service to City of Newkirk, Oklahoma and agreements for additional delivery points to the City of Paris, Arkansas and the Town of Manchester, Oklahoma. OG&E states the municipalities have been receiving service under the Company's FERC Electric Tariff for some time, and the Company is hereby placing copies of the agreements on file with the Commission. OG&E further requests waiver of the 60-day notice requirement. The Company has requested that the agreements become effective on October 4, 1979 for the additional point of delivery to the City of Paris, Arkansas, August 13, 1980 for the City of Newkirk, Oklahoma, and June 6, 1978 for the additional point of delivery to the Town of Manchester, Oklahoma.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. [Docket No. ER82-141-000]

Public Service Company of New Hampshire; Filing

December 15, 1981.

The filing Company submits the following:

Take notice that on December 7, 1981, the Public Service Company of New Hampshire (PSNH) tendered for filing a tariff for non-firm transmission service designated FERC Electric Tariff, Original Volume No. 1. PSNH states that the tariff is intended to bring such transmission service under uniform rates and terms and conditions. The tariff would not apply to service provided under the New England Power Pool (NEPOOL) Agreement and would not supersede existing agreements.

PSNH states that the tariff rate is based on annual transmission costs and NEPOOL capability data. It is to be updated annually. The rate based on 1981 data is $9.87 per kilowatt per year. PSNH requests an effective date of February 5, 1982.

Copies of the filing have been sent to NEPOOL members, other utilities which have recently taken non-firm transmission service and the New Hampshire Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. [Docket No. QF82-24-000]

Pacific Telephone and Telegraph Co.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

December 15, 1981.

On November 27, 1981, Pacific Telephone and Telegraph Company of San Diego, California filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The facility will be a topping-cycle cogeneration facility located at 7337 Trade Street, San Diego, California. The primary energy source will be natural gas. Capacity of the facility is approximately 5.5 megawatts and 20.95 million Btu/hour will be used in thermal applications. Installation of the facility began in November 1981. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed by January 21, 1982 and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Southwestern Electric Power Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that on December 7, 1981, Southwestern Electric Power Company (SWEPCO) tendered for filing an interconnection agreement between SWEPCO and The Empire District Electric Company (EDE). SWEPCO indicates the agreement provides for the parties to obtain mutual benefits in planning and operation and opportunities from time to time to purchase, sell and/or exchange energy.

SWEPCO requests waiver of the prior notice requirement to allow an effective date of December 1, 1981.

A Copy of the filing was furnished to the Arkansas Public Service Commission, the Missouri Public Service Commission and The Empire District Electric Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF82-25-000]

Stone Container Corp.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

December 15, 1981.

On November 30, 1981, Stone Container Corp. of Chicago, Illinois filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The facility will be a topping-cycle cogeneration facility located at 500 North Fourth Street, Coshocton, Ohio 43812. Wood waste will provide an estimated 80% of the annual average heat reqirement with the remaining 20% of the heat input to the boiler provided by natural gas or petroleum. Capacity of the facility is 16.5 megawatts and 360,000 lbs. per hour of 165 psig steam will be extracted for process use. Installation of the facility began in May 1981. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed by January 21, 1982 and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make

protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA82-1-9 (PGA82-1) (IPR82-1) (DCA82-1) (R&D82-1)]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Rate Change Under Tariff Rate Adjustment Provisions

December 11, 1981.

Take notice that on November 30, 1981, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) tendered for filing Second Revised Sheet Nos. 23 through 30, Third Revised Sheet No. 21, and Fourth Revised Sheet Nos. 20 and 22 to Original Volume No. 1 of its FERC Gas Tariff to be effective January 1, 1982.

Tennessee states that the purposes of the revised tariff sheets are to adjust Tennessee's rates pursuant to Articles XXIII, XXIV, XXV, XXVII and XXIX of the General Terms and Conditions of its FERC Gas Tariff, consisting of a PGA rate adjustment, a rate adjustment to reflect curtailment credits, an R&D rate adjustment, and Estimated Incremental Pricing Surcharges.

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36367 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA82-1-10-000]

Tennessee Natural Gas Lines, Inc.; PGA Tariff Filing

December 11, 1981.

Take notice that on December 1, 1981, Tennessee Natural Gas Lines, Inc. ("TNGL") tendered for filing a rate change, pursuant to the purchased gas cost adjustment ("PGA") provisions of its F.E.R.C. Gas Tariff, First Revised Volume No. 1, and pursuant to Section 282.602 of the Commission's regulations under the Natural Gas Policy Act of 1978 ("NGPA"), consisting of the following tariff sheets:

Thirty-Seventh Revised Sheet No. PGA-1
Fourth Revised Sheet No. PGA-1-A

TNGL requests that such tariff sheets be allowed to become effective on January 1, 1982.

TNGL states that the purposes of its filing are: to reflect in its rates the changed rates of its sole supplier Tennessee Gas Pipeline Company, a Division of Tenneco, Inc. ("TGP"), which will become effective on January 1, 1982; and, to set forth the estimated Maximum Absorption Capabilities ("MSAC") of its customers as required by Section 282.602 of the Commission's regulations under the NGPA.

TNGL states that copies of the filing were served upon its jurisdictional customer, the interested state regulatory commission, its non-jurisdictional customers estimated to be billed for NGPA incremental pricing surcharges, and are available for public inspection at TNGL's offices in Nashville, Tennessee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings.

Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER82-136-000]

Union Electric Co.; Filing

December 14, 1981.

The filing Company submits the following:

Take notice that on December 7, 1981, Union Electric Company (Union) tendered for filing a notice to Missouri Power & Light Company revising the rate for transactions under the Boundary Line Agreement between the parties.

Union requests an effective date of July 9, 1981, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. QF82-23-000]

Vulcan Materials Co.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

December 15, 1981.

On November 25, 1981, Vulcan Materials Co. of Birmingham, Alabama, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The facility will be a topping-cycle cogeneration facility located in Wichita, Kansas. The primary energy source will be natural gas with No. 2 fuel oil used as a standby fuel. Capacity of the facility will be 33.73 megawatts electric power and approximately 210.74 million Btu of steam per hour will be used in chemical production processes. Installation is scheduled to begin in January 1982: No electric utility, electric utility holding company or any person owned by either has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be file by January 21, 1982 and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 2903-001]

Calaveras County Water District; Application for License For Major Project—Existing Dam

December 16, 1981.

Take notice that Calaveras County Water Distict (Applicant) filed on October 13, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for a major license for the unconstructed New Hogan Power Plant Project No. 2903. The project would be located at the U.S. Army Corps of Engineers' New Hogan Dam on the Calavaras River in Calaveras County, California. Correspondence with the Applicant should be directed to: Mr. Steve Felte, Manager, Calaveras County Water District, P.O. Box 846, San Andreas, California 95249.

Project Description—The proposed New Hogan Power Plant Project would consist of: (1) an exting intake structure with a modified log rack; (2) a 54-inch diameter steel penstock located inside of the left barrel of an existing four barrel outlet conduit through the dam; (3) a powerhouse at the toe of the dam containing a 2,000 kW generating unit and a 500-W generating unit; (4) an 80-foot long tailrace channel excavated in rock; (5) a 2.3/12-kV switchyard adjacent to the powerhouse; and (6) a 1,000-foot long, 12-kV transmission line to an existing Pacific Gas and Electric Company distribution line.se containing two turbine-generator units with a total rated capacity of 3 MW and a 3-mile long transmission line.

The proposed project would have an average annual generation of 10,110 MWh at an estimated 1983 cost of $5,114,000. Project power would be sold.

All project facilities would be constructed on U.S. lands administered by U.S. Army Corps of Engineers.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 19, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d)] or a notice of intent [See 18 CFR 4.33(b) and (c)] to file a competing application. Submision of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et. seq. (1981).

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petitaion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 19, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street,

NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representataive of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36495 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5325-000]

Capital Development Co.; Application for Preliminary Permit

December 16, 1981.

Take notice that Capital Development Company (Applicant) filed on September 4, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5325 to be known as the Silver Creek Water Power Project located on Silver Creek, near Randle, within the lands of Gifford Pinchot National Forest in Lewis County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Robert L. Blume, President, Capital Development Company, Suite 4, South Sound Center, P.O. Box 3487, Lacey, Washington 98503.

Project Description—The project would consist of: (1) a 15-foot high, 50-foot long concrete diversion dam and intake structure; (2) a reservoir with 3-acre surface area and 5-acre foot storage capacity; (3) a 3-mile long, 108-inch diameter conduit; (4) a 0.2-mile long, 108-inch diameter penstock; (5) a powerhouse with total installed capacity of 12 MW; and (5) a 1-mile long, 96-kV transmission line from the powerhouse to the Lewis County P.U.D. 96-kV mainline. The Applicant estimates that the average annual energy production would be 45.9 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would conduct technical, environmental and economic analysis, and prepare an FERC license application. No new roads would be required for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $150,000.

Competing Applications—This application was filed as a competing application to Hydro Resource Company's application for Project No. 5275 filed on August 25, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36496 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5631-000]

City of Astoria; Application for Preliminary Permit

December 16, 1981.

Take notice that City of Astoria (Applicant) filed on November 9, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5631 to be known as the Youngs River Project located on Youngs River in Clatsop County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. John F. Crockett, Public Works Director, City of Astoria, 1095 Duane Street, Astoria, Oregon 97103.

Project Description—The proposed project would consist of: (1) a 15-foot high concrete diversion dam with negligible storage; (2) penstock 700 feet long; (3) a powerhouse containing two turbine generators with a total capacity of 1600 kW and annual energy production of 7.7 GWh; (4) 300 feet of new transmission line and 3.6 miles of existing line to be upgraded; and (5) appurtenant facilities. The proposed market for power output is the Pacific Power and Light Company.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The applicant seeks issuance of a preliminary permit for a term of 18 months, during which engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $75,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 16, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et. seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file

an application for license or exemption must be submitted to the Commission on or before February 18, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than March 18, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 18, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb

Secretary.

[FR. Doc. 81-36497 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5492-000]

The City of New York; Application For Preliminary Permit

December 17, 1981.

Take notice that The City of New York (Applicant) filed on October 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5492 to be known as the Shandaken Tunnel Intake Water Power Project located on Schoharie Creek in Delaware, Green, and Schoharie Counties, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Francis X. McArdle, Department of Environmental Protection, City of New York, 2358 Municipal Building, New York, New York 10007.

Project Description—The proposed project would redevelop the existing Applicant-owned facilities and would consist of: (1) the 2,280-foot long and 155-foot high masonry Gilboa Dam having a 1,324-foot long spillway discharging into Schoharie Creek; (2) the Schoharie Reservoir having a surface area of 1,145-acres at spillway crest elevation 1,130 feet m.s.l.; (3) the intake works receiving water from Schoharie Reservoir and modified to contain a new generating unit having a rated capacity of 2,000 kW; (4) the 18-mile long Shandaken Tunnel to Esopus Creek; (5) a new 1-mile long transmission line; and (6) appurtenant facilities. Applicant estimates that the average annual energy output would be 6,000 MWh.

The system would continue to be operated essentially to provide water supply to The City of New York. Project energy would be used by Applicant for municipal purposes or would be sold.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would complete feasibility, engineering, and hydrologic studies, conduct field surveys, prepare environmental reports and detailed plans, consult with Federal, State, and local agencies, and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $64,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 19, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 19, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTESTS", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative

of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36480 Filed 12-21-81; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 5623-000]

County of Mono; Application for Preliminary Permit

December 17, 1981.

Take notice that County of Mono (Applicant) filed on November 6, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5623 to be known as the Robinson Creek Hydroelectric Project located on Robinson Creek partially on lands in the Toiyobe National Forest in Mono County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Neil B. Van Winkle County Counsel, County Courthouse, Bridgeport, California 93517.

Project Description—The proposed project would consist of: (1) a diversion intake structure to direct water through a trashrack to; (2) a 16,000-foot long pipeline and channel combination; (3) a 60-inch diameter, 100-foot long penstock; (4) a powerhouse containing two generating units with a total rated capacity of 2,200 kW; and (5) a transmission line. Applicant estimates that the average annual energy output would be 9.5 million kWh. A potential market for project-generated power is the Southern California Edison Company.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested as 36-month permit to prepare a definitive project report including technical, environmental, economic and financial feasibility studies. The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with the U.S. Forest Service and other Federal, State and local agencies, preparing an FERC license application, conducting final field surveys, and preparing final designs is estimated by the Applicant to be $50,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 22, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 22, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than March 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5650-000]

Gary and Catherine Wright; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 17, 1981.

Take notice that on November 10, 1981, Gary and Catherine Wright (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5650) would be located on Kanaka Creek in Gooding County, Idaho. Correspondence with the Applicant should be directed to: Dale Hatch, P.O. Box 1071, Twin Falls, Idaho 83301.

Project Description—The proposed project would consist of: (1) a 1000-foot long canal diverting flows from Kanaka Creek; (2) a 24-inch diameter, 1400-foot long steel pipeline; (3) a powerhouse located on the north bank of the Snake River containing one or more generating units with a total rated capacity of 90 kW; and (4) a 1300-foot long, 12.5-kV transmission line. The project would have an average annual generation of 400 MWh.

Purpose of Project—Project power would be sold to the Idaho Power Company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Idaho Department of Fish and Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the fish and wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that

agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before February 1, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determing the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 1, 1982.

Filing and Service of Responsive Documents—Any filings, must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's reguatins to Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, N.E., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5632-000]

Malcolm Harris and Orin Harris; Application for Preliminary Permit

December 17, 1981.

Take notice that Malcom Harris and Orin Harris (Applicant) filed on November 10, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)] for Project No. 5632 to be known as the Marble Creek Power Project located on Marble Creek in Mono County, California. The majority of the lands included in the project area are under the jurisdiction of the Bureau of Land Management. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Richard L. Schafer, R. L. Schafer & Associates, Inc., P.O. Box 1388, Porterville, California 93258.

Project Description—The proposed project would consist of two consecutive developments along Marble Creek with: (1) two stream diversion structures; (2) two off-stream retention basins each having a capacity of three acre-feet; (3) two 12-inch diameter, 7,920 and 9,500-foot long penstocks; (4) two powerhouses containing single generating units with a combined capacity of 250 kW; and (5) a ¼ mile long transmission line. Applicant estimates that the average annual energy output would be 1.1 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 24-month permit to prepare a definitive project report including results of geological, environmental and economic feasibility studies. The cost of the above activities along with preparation of an environmental impact report, obtaining agreements with the Bureau of Land Management, and other Federal, State and local agencies, preparing an FERC license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be between $30,000 and $50,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before March 22, 1982, the competing application itself or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 22, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than March 22, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be

filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5620-000]

Patricia L. Mayer; Application for Preliminary Permit

December 16, 1981.

Take notice that Patricia L. Mayer (Applicant) filed on November 6, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5620 to be known as the Mayer Ranch Hydropower Project located on Roaring Creek in Shasta County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Dennis E. Dorratcague, Ott Water Engineers, Inc., 2334 Washington Avenue, Redding, California 96001.

Project Description —The proposed project would consist of: (1) a 5-foot high, 120-foot long diversion structure; (2) a 48-inch diameter, 250-foot long diversion conduit; (3) a 48-inch diameter, 1,200-foot long penstock; (4) a powerhouse containing one or more generating units with a total capacity of 1,450 kW; and (5) a 1-mile long transmission line. Applicant estimates that the average annual energy production would be 5.8 million kWh. Power output will be purchased by the Pacific Gas and Electric utility system.

Proposed Scope of Studies Under Permit A preliminary permit, if issued, does not authorize construction. Applicant has requested a 24-month permit, during which time engineering, economic and evironmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of these activities is $50,000.

Competing Applications —Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 16, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 16, 1982, and should specify the type of application forthcoming. Any application for license or exemptionm from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than March 16, 1982.

Agency Comments —Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene —Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determing the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents —Any filings, must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Secretary.

[FR Doc. 81-36502 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5648-000]

San Gabriel Valley Municipal Water District; Application For Exemption Of Small Conduit Hydroelectric Facility

December 16, 1981.

Take notice that on November 12, 1981, the San Gabriel Valley Municipal Water District (Applicant) filed an application under Section 30 of the Federal Power Act (Act) [16 U.S.C. 823(a)], for exemption of a proposed hydroelectric project from requirements of Part I of the Act. The proposed Etiwanda, Emerald, and San Dimas Wash Generation Stations Project (FERC Project No. 5648) would be located on the Devil Canyon-Azusa Pipeline in Los Angeles and San Bernardino Counties, California. Correspondence with the Applicant should be directed to: Ernest Lee, San Gabriel Valley Municipal Water District, 5 South Stoneman Avenue, P.O. Box 428, Alhambra, California 91802.

Project Description—The proposed project would consist of: (1) the Etiwanda Powerhouse, adjacent to the Etiwanda Pressure Reduction Station, and containing a 335-kW generating unit; (2) the Emerald Powerhouse, adjacent to the Emerald Pressure Reducing Station, and containing a 420-kW generating unit; and (3) the San Dimas Wash Powerhouse, next to the San Dimas Wash Turnout, and containing a 1,050-kW generating unit. The average annual energy generation is estimated to be 6.25 million kWh.

Purpose of Project—The energy generated by the project would be sold to a public utility.

Agency Comments—The U.S. Fish and Wildlife Service and the California Department of Fish and Game are requested, pursuant to Section 30 of the Federal Power Act, to submit within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife

resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. If no comments are filed within this time period, an agency will be presumed to have determined that no terms or conditions to the exemption are necessary. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. Comments are due within 45 days from the date of issuance of this notice. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. One copy of an agency's comments must also be sent to the Applicant's representatives.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protests, or petitions to intervene must be received on or before January 29, 1982. The Commission's address is: 825 North Capitol Street, N.W., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36503 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5611-000]

Town of Skykomish; Application for Preliminary Permit

December 16, 1981.

Take notice that Town of Skykomish (Applicant) filed on November 5, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5611 to be known as the Trout Creek Project located on Trout Creek, near Skykomish, in Snohomish County, Washington. The project would be located within the Snoqualmie National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mayor, Town of Skykomish, P.O. Box 308, Skykomish, Washington 98288.

Project Description—The proposed project would consist of: (1) a 6-foot high concrete diversion dam; (2) a 2.3.-mile long, 4-foot diameter fiberglass or concrete pipeline; (3) a steel surge tank; (4) a 2,500-foot long, 42-inch diameter steel penstock; (5) a powerhouse containing one generating unit rated at 5.5. MW; (6) an access road; and (7) a 4-mile long transmission line. The average annual energy generation is estimated to be 29 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time it would conduct engineering, economic, environmental, and feasibility studies, and prepare an FERC license application. No new roads would be required to conduct the studies.

The cost of the work to be performed under the preliminary permit is estimated to be $100,000.

Competing Applications—This application was filed as a competing application to Western Power, Inc.'s application for Project No. 5342 filed on September 8, 1981. Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before January 8, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et. seq. (1981); and Docket No. RM81–15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before January 8, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than March 29, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 27, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36504 Filed 12-21-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-23-000]

West Texas Utilities Co.; Order Accepting for Filing and Suspending Revised Rates, Denying Motion To Reject, Granting Summary Disposition in Part, Granting Waiver of Notice, Granting Interventions, and Establishing Price Squeeze, CWIP, and Hearing Procedures

Issued December 15, 1981.

On October 16, 1981, West Texas Utilities Company (WTU) tendered for filing increased rates for service to one municipal and fourteen cooperative customers [1] and to Texas-New Mexico Power Company (TNP), which is served under a separate agreement.[2] The proposed rates would result in increased revenues of approximately $4,369,000 (10.0%) for the twelve-month period ending December 31, 1982. WTU requests an effective date of December 15, 1981, for these rates. Concurrently, WTU filed alternative rates, pursuant to section 2.16(b) of the Commission's regulations, to reflect full inclusion of construction work in progress (CWIP) in rate base. Following a hearing, WTU seeks authorization to prospectively implement the CWIP-based rates, which represent an increase in revenues of approximately $5,758,000 (13.1%) for the calendar year 1982 test period.

Notice of the filing was issued on October 23, 1981, with responses due on or before November 13, 1981. On November 12, 1981, TNP filed a petition to intervene, which requested a hearing and summary disposition with respect to WTU's method of calculating the proposed unit demand charge for service to TNP. TNP asserted that WTU used billing demands reflecting an 85% ratchet rather than the 100% ratchet set forth in the proposed rate schedule thereby overstating the unit demand charges. On November 20, 1981, WTU filed a motion to correct its rate filing, indicating that its filed rate schedule for service to TNP erroneously provided for a 100% ratchet. WTU therefore requests that the Commission accept its revision to the rate schedule and that the Commission waive the regulations insofar as is necessary to make this revised rate effective as of WTU's originally proposed effective date.

On November 13, 1981, the affected municipal and cooperative customers (customers) [3] filed a petition to intervene, protest, motion to reject, motion for maximum suspension, motion to institute price squeeze procedures and complaint. The customers request rejection of WTU's CWIP-based rates for failure to make a facial showing of severe financial difficulty in compliance with the Commission's Order No. 555. The customers also request a maximum suspension of WTU's non-CWIP rates, alleging (1) that the return on equity is excessive, (2) that regulatory expense is overstated and amortized over an improper time period, (3) that improper items are included as plant held for future use, (4) that operation and maintenance (O&M) expenses are overstated, (5) that depreciation rates are improper, (6) that working capital is overstated, and (7) that the forecast of customer billing determinants is incorrect.

In addition to the cost of service issues, the customers allege price squeeze and also claim that the proposed rates are discriminatory because the charges to TNP are less than those applicable to the municipal and cooperative customers. Additionally, the customers raise a complaint concerning service reliability, alleging that WTU has failed to install oil circuit reclosers at a number of delivery points as negotiated in the settlement of WTU's last rate filing. Therefore, the customers request that this and other service problems be pursued at hearing.

On November 30, 1981, WTU filed an answer to the petition to intervene. WTU objects to the intervention of Mid-Tex Electric Cooperative (Mid-Tex), stating that it is not a customer of WTU and that its members would be adequately represented as individual intervenors. In addition, WTU (1) responds to the cost of service, rate of return, and rate design issues raised by the customers; (2) denies that the rates would result in a price squeeze or other discrimination; (3) argues that its CWIP-based rates are justified and, in any event, could be properly accepted for prospective application following a phased proceeding; (4) responds to the customers' complaints concerning service reliability; and (5) argues that a maximum suspension is unnecessary.

Discussion

Initially, the Commission finds that participation in this proceeding by TNP and the municipal and cooperative customers, including Mid-Tex, is in the public interest. Accordingly, the petitions to intervene will be granted.

As noted, WTU has indicated that its rate schedule for TNP incorrectly provides for a 100% ratchet, although the rates have been developed on the basis of an 85% ratchet. In view of this apparent oversight, we shall waive the notice requirements and grant WTU's request to file its revised rate schedule to eliminate the error while retaining the originally proposed effective date. In view of this determination, we shall deny as moot TNP's request that WTU be ordered to file revised rates.

Our analysis further reveals that WTU has proposed a change in its fuel adjustment clause which would use the costs in Accounts 501, 547, and 513 of the Commission's Uniform System of Accounts as the fuel costs for purposes of calculating the monthly fuel adjustment factors. The use of such accounts is not in compliance with section 35.14 of the Commission's regulations which states that the fuel costs recorded in Accounts 151 and 518 are the costs to be used in calculating any monthly fuel adjustment factor. Accordingly, summary disposition of this issue will be ordered and WTU will be required to file a revised fuel adjustment clause which includes only the fuel accounts prescribed by section 35.14 in determining the monthly fuel adjustment factor.

Our preliminary analysis indicates that WTU's non-CWIP rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept these rates for filing as modified by this order and we shall suspend them as ordered below.

In a number of suspension orders,[4] we have addressed the considerations underlying the Commission's policy regarding rate suspensions. For the reasons given there, we have concluded that rate filings should generally be suspended for the maximum period permitted by statute where preliminary study leads the commission to believe that the filing may be unjust and unreasonable or that it might run afoul of other satutory standards We have acknowledged, however, that shorter suspensions may be warranted in circumstances where suspension for the maximum period may lead to harsh and inequitable results. No such circumstances have been presented here. Accordingly, we shall suspend the non-CWIP rates for a period of five months to become effective, subject to refund, on May 16, 1982.

With regard to WTU's CWIP-based rates, we note that under the

[3] The intervenor group includes Mid-Tex Electric Cooperative, Inc., a generation and transmission cooperative authorized to transact business in the state of Texas, whose membership includes all but two of the WTU's cooperative customers.

[4] *E.g., Boston Edison Co.*, Docket No. ER 80-506 (August 29, 1980) (five month suspension); *Alabama Power Co.*, Docket Nos. ER80-506, *et al.* (August 29, 1980) (one day suspension); *Cleveland Electric Illuminating Co.*, Docket No. ER80-486 (August 22, 1980) (one day suspension).

Commission's present standards, a utility requesting the inclusion of CWIP in rate base [5] must show clearly and convincingly that it is experiencing severe financial difficulty which cannot be alleviated by traditional forms of rate relief without materially increasing the cost of electricity.[6] The Commission, however, recently issued a notice of proposed rulemaking in order properly to reconsider the CWIP issue and the appropriate standards to apply.[7] In light of WTU's request to place the full-CWIP rates into effect only prospectively after a hearing pursuant to section 2.16, we shall deny the customers' motion to reject the filing and, instead, we shall set the issue for hearing. However, in order to maintain the *status quo ante* pending further Commission action and to avoid any prejudice to the parties, the hearing on WTU's CWIP application will be phased to follow the rulemaking proceeding. Such phasing will allow WTU to go forward on its CWIP application under such standards as will be developed through public notice and comment on the proposed rulemaking.[8]

In accordance with the Commission's policy established in *Arkansas Power and Light Company*, Docket No. ER79–339 (August 6, 1979), we shall also phase the price squeeze issue raised by the intervenors. As we have noted in prior orders, this procedure will allow a decision first to be reached on the cost of service, capitalization, rate of return, wholesale rate discrimination, and service reliability issues. If, in the view of the intervenors or staff, a price squeeze persists, a second phase of the proceeding may follow.

The Commission orders:

(A) The customers' motion to reject WTU's CWIP-based filing is hereby denied.

(B) WTU's request for permission to file revised rates to correct the determination of billing demands is hereby granted. Waiver of the notice requirements is also granted with respect to this revision. TNP's request for summary disposition of this issue is denied as moot.

(C) Summary disposition is hereby ordered, as noted in the body of this order, with respect to WTU's use of Accounts 501, 547, and 513 in determining its monthly fuel adjustment factor. Within thirty (30) days of the issuance of this order, WTU shall refile its fuel adjustment clause and supporting data to reflect this summary diposition.

(D) WTU's proposed non-CWIP rates are hereby accepted for filing, as modified above, and are suspended for five months from 60 days after filing, to become effective, subject to refund, on May 16, 1982.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, the pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning WTU's rates and the remaining matters raised in the customers' petition to intervene.

(F) The petitions to intervene in this proceeding are hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act: *Provided, however,* That participation by such intervenors shall be limited to the matters set forth in their petitions to intervene; and *provided, further,* That the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order of the Commission in this proceeding.

(G) The Commission staff shall serve top sheets in this proceeding on or before December 16, 1981.

(H) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to consolidate or sever and motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(I) Consideration of WTU's CWIP-based rates is hereby phased so that the CWIP issue will be heard subsequent to Commission action in Docket No. RM81–38–000.

(J) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(K) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[Project No. 5244–000]

Western Hydro Electric Inc.; Application for Short-Form License (Minor)

December 17, 1981.

Take notice that Western Hydro Electric Incorporated (Applicant) filed on August 18, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as Causey Hydro Project No. 5244. The project would be located on the South Fork of the Ogden River in Weber County, Utah. Correspondence with the Applicant should be directed to: J. Kirk Rector, Attorney at Law, 4832 Colony Circle, Salt Lake City, Utah 84117.

Project Description—The proposed project would utilize the existing Bureau of Reclamation's Causey Dam and Reservoir, operated and maintained by the Weber Basin Water Conservation District, and would consist of: (1) a 42-inch diameter steel penstock utilizing the existing outlet works near the left dam abutment and leading to (2) a new powerhouse containing two generating units having a rated capacity of 300 kW and 1,100 kW, respectively, for a total rate capacity of 1,400 kW; (3) a tailrace;

(4) new and replacement 12.5–kV transmission lines; (5) a switchyard; and (6) appurtenant facilities. The Applicant estimates that the average annual energy output would be 5,393,760 kWh.

Purpose of Project—Project energy would be sold to the Utah Power and Light Company.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 16, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d)] or a notice of intent [See 18 CFR 4.33 (b) and (c)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et seq. (1981).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

Office of Assistant Secretary for International Affairs

Civil Uses of Atomic Energy; Agreement Between U.S. and Canada; Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Canada Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following sale:

Contract Number S–CA–310, for 30 micrograms of plutonium-242 for use as standard for ecological studies in the Great Lakes Basin by the Canada Centre for Inland Waters, Ontario, Canada.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been detemined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: December 16, 1981.

Harold D. Bengelsdorf,

Director, Office of International Nuclear and Non-Proliferation Policy.

ENVIRONMENTAL PROTECTION AGENCY

[AAA–FRL–2011–1]

Appointments to the Performance Review Board

AGENCY: Environmental Protection Agency.

ACTION: Notice of Appointments to the Performance Review Board.

SUMMARY: This Notice announces the appointment by the Administrator of the Environmental Protection Agency of the eleven individuals who will serve on and constitute the Agency's Performance Review Board, as provided for in section 4314 of Title 5, United States Code. The Purpose of the Performance Review Board is to review initial senior executive appraisals and to make recommendations to the Administrator concerning performance of senior executives in the Agency and performance awards.

ADDRESSES: The names, titles, and addresses of the individuals now appointed to the EPA Performance Review Board are as follows:

1. Mr. Herbert Barrack, Assistance Regional Administrator for Planning and Management, Region II, Environmental Protection Agency, New York, NY 10007
2. Mr. Gerald A. Bryan, Director, Office of Program and Management Operations, Office of Legal and Enforcement Counsel, Environmental Protection Agency, Washington, D.C. 20460
3. Mr. Don Clay, Director, Office of Toxic Substances Office of Pesticides and Toxic Substances Environmental Protection Agency, Washington, D.C. 20460
4. Mr. Lewis S. Crampton, Director, Office of Management Systems and Evaluation, Office of Policy and Resource Management, Environmental Protection Agency, Washington, D.C. 20460
5. Mr. Gary N. Dietrich, Director, Office of Solid waste, Office of Solid Waste and Emergency Response, Environmental Protection Agency, Washington, D.C. 20460
6. Mr. Seth C. Hunt, Special Assistant to the Administrator, Office of the Administrator, Environmental Protection Agency, Washington, D.C. 20460
7. Ms. Marian Mlay, Deputy Director, Office of Drinking Water, Office of Water, Environmental Protection Agency, Washington, D.C. 20460
8. Ms. Victoria Pierce, Director, Management and Organization

Division, Office Administration, Environmental Protection Agency, Washington, D.C. 20460

9. Mr. William Rice, Deputy Regional Administrator, Region VII, Environmental Protection Agency, Kansas City, MO 64106
10. Dr. Courtney Riordan, Director, Office of Monitoring Systems and Quality Assurance, Office of Research and Development, Environmental Protection Agency, Washington, D.C. 20460
11. Mr. John M. Ropes, Director, State and Local Programs Division, Office of Air, Noise and Radiation, Environmental Protection Agency, Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Persons desiring any further information about the Environmental Protection Agency performance Review Board may contact Mr. Clarence Hardy, Director, Personnel Management Division, Environmental Protection Agency, Washington, D.C. 20460; telephone (202) 382-3300.

Anne M. Gorsuch,

Administrator.

BILLING CODE 6560-30-M

FEDERAL COMMUNICATIONS COMMISSION

Mobile Services Advisory Committee; Meeting

December 16, 1981.

The Mobile Services Advisory Committee will meet on Monday, January 18, 1982, to discuss possible formulations for more consistent approximation, interpolation, and extrapolation of the propagation curves in Section 22.504 of FCC Rules and FCC Report No. 6404, "Technical Factors Affecting the Assignment of Facilities in the Domestic Public Land Mobile Radio Service," R. B. Carey. The Committee will meet at 10:30 a.m. in Room 650 at the Commission headquarters, 1919 M Street, NW, in Washington, DC.

This meeting is a follow-up on a request at the Committee's November 9, 1981, meeting for in-dept engineering study of Carey propagation computation methods. In anticipation of such a study, some Committee members have prepared and submitted to the Committee file certain engineering materials which are available to the public for copying and review. Persons wishing to review these materials should contact Claudia Borthwick, Room 644, 1919 M Street, NW, Washington, DC 20554. (202) 632-6450. If at the January 18, 1982, meeting, the Committee is able to formulate specific recommendations, the Mobile Services Division staff will make every effort to consider these and other recommendations in CC Docket 80-57, the ongoing rulemaking to revise and update Part 22 of the Rules. If, on the other hand, it shoud appear that additional discussions are needed, they will be scheduled without delaying the rulemaking.

It is recommended that each attendee have in his possession a copy of § 22.504 of the Rules and the Carey Report above. In addition, the Commission is interested in any past or pending applications in which substantial problems have arisen from alleged or apparent inconsistencies in interpolation or extrapolation of Carey curves. During the meeting the Commission staff plans on requesting citations of specific applications in which such problems have occurred. No applications which are contested in pleadings or in hearing status will be discussed during the meeting.

For further information, contact Michael A. Menius, (202) 632-6450.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

[Docket No. 20274; FCC 81-550]

Inter-Governmental Maritime Consultative Organization (IMCO): Preparation of Recommended Operational Standards Applicable to Equipment Mandatorily Fitted Aboard Vessels Subject to the Safety of Life at Sea Convention (SOLAS)

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: The Commission has adopted a Notice to inform the public and to obtain comments concerning actions taken by the Inter-Governmental Maritime Consultative Organization (IMCO) at its Twenty-third Session. IMCO has further developed its Future Global Maritime Distress and Safety System as well as other related maritime matters. Comments will be used by the U.S. Delegation preparing for the Twenty-fourth Session.

DATES: Comments must be received on or before January 11, 1982, and reply comments must be received on or before January 26, 1982.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert C. McIntyre, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

In the matter of Inter-Governmental Maritime Consultative Organization: Preparation of Recommended Operational standards applicable to equipment mandatorily fitted aboard vessels subject to the Safety of Life at Sea Convention, Docket No. 20274. Seventh notice of inquiry.

Adopted: November 24, 1981.

Released: December 10, 1981.

By the Commission:

Purpose

1. The Commission is issuing this Notice as a means to inform the public and to obtain comments of interested persons in regard to actions by the Inter-Governmental Maritime Consultative Organization (IMCO), through its Maritime Safety Committee (MSC) and Subcommittee on Radiocommunications (SR), to develop operational standards applicable to radio equipment mandatorily fitted aboard vessels subject to the Safety of Life at Sea Convention (SOLAS).

Background

2. The Subcommittee on Radiocommunications established a Technical Working Group which holds its meetings concurrently with scheduled meetings of the subcommittee. The working group is charged with the responsibility of preparing operational standards and considering technical matters applicable to radio equipment mandatorily fitted aboard vessels subject to the SOLAS Convention. Operational standards, when adopted by the Subcommittee on Radiocommunications and approved by MCS, will take the form of recommendations associated with the SOLAS Convention. When in the Commission's opinion it was appropriate certain IMCO recommendations have been incorporated in our rules.[1]

3. The Subcommittee on Radiocommunications at its Twenty-third Session, May 11–May 15, 1981, considered a number of operational and technical matters prepared for it by various working groups including the Technical Working Group. The Subcommittee approved documents concerning the following matters:

—Future Global Maritime Distress and Safety System (FGMDSS).

[1] E.g., Docket 21089, Report and Order, adopted March 15, 1979, FCC 79-162, 44 FR 18501.

—Radio Operator Functions with regard to operational, maintenance and administrative requirements.

—IMCO Recommendations on the 1982 World Administrative Radio Conference (WARC) for Mobile Telecommunications.[2]

—IMCO Recommendations for the International Radio Consultative Committee (CCIR) Study Group 8.

—Draft Regulations on Emergency Position Indicating Radio Beacons (EPIRB's) and two way radiotelephones for use in lifeboats.

Future Global Maritime Distress and Safety System (FGMDSS)

4. In order to implement the FGMDSS the Subcommittee on Radiocommunications recognized that various elements of the system approved by the Maritime Safety Committee will have to be internationally agreed upon and defined in conventions and other instruments. This will require amendment of the 1974 SOLAS Convention, 1979 Search and Rescue Convention, 1978 Standards of Training and Watchkeeping and the International Radio Regulations. The Subcommittee approved the Report of the FGMDSS Working Group (COM XX111/WP/4) which further developed requirements to be included in Chapter IV of the SOLAS Convention and carriage requirements for vessels participating in the future system. Particular attention is directed to WP.4, paragraph 7.6, which states that there will be no differentiation of carriage requirements concerning radio equipment based on tonnage such as now specified in the SOLAS Convention and the Communications Act of 1934, as amended. Thus, all vessels above a minimum specified tonnage will be subject to the SOLAS Convention when the FGMDSS comes into force. Carriage requirements may be related to and depend upon the ship's area of operation, e.g., coastwise or high seas. While carriage requirements based on area of operation would present administrative difficulties for administrations, of primary concern is what should be recommended by the U.S. as the minimum tonnage requirement. Comments are requested on this matter.

5. We wish at this time to call attention to the technical and operational aspects of the FGMDSS. This system relies more heavily on ship-to-shore alerting rather than the ship-to-ship alerting used in the present system. As ship-to-ship alerting range in the order to 100 nautical miles is being advanced by IMCO. Preliminary studies indicate that a 1000 watt transmitter operating in the 2 MHz frequency band using narrow-band direct-printing would provide an alerting range of approximately 75–85 nautical miles on the Gulf and East Coast of the U.S. The transmitter power to increase the narrow-band direct-printing communication range to 100 miles is approximately 1600 watts. A voice modulated 2 MHz transmitter (1000 W) provide a range of 18–25 nautical miles in the same coastal areas. Interested parties are advised that implementation of the FGMDSS will require a different complement of radio equipment aboard ships from that which is currently mandated by international treaty and national statute. Comments concerning the FGMDSS and adequacy of the ship-to-ship alerting range proposed by IMCO are requested.

IMCO Recommendations on 1982 Mobile WARC and CCIR Study Group 8

6. The Subcommittee on Radiocommunications prepared recommendations to the 1982 Mobile WARC (COM XX111/WP.3) and to CCIR Study Group 8 (COM XX111/WP.5) concerning technical and operational matters affecting the maritime mobile service. These recommendations prepared by the Subcommittee will not be further developed at future sessions and are included in this Notice primarily for informational purposes. The FCC preparation for this Mobile WARC is being addressed through General Docket No. 80–184.

Emergency Position Indicating Radiobeacons

7. The Subcommittee on Life Saving Appliances (LSA) is in the process of revising Chapter III of the SOLAS Convention. The Subcommittee on Radiocommunications prepared draft amendments to Chapter IV consequential to the LSA proposed revisions to Chapter III concerning Emergency Position Indicating Radiobeacons (EPIRB). It was agreed that the primary functions of satellite EPIRB's were both alerting and homing. The primary function of a survival craft (terrestrial) EPIRB was homing; nevertheless, it was decided that regulations should not preclude an alerting function. In the latter instance administrations were urged to consider the possible overloading of satellite alerting systems due to the large number of survival craft performing the alerting function. These draft amendments will be considered further and comments on possible overloading of satellite communication systems are solicited.

Radio Operator Functions

8. During this session the Subcommittee gave consideration to the operator function in the FGMDSS. A working group was established to develop a provisional draft text (COM XX111/WP.6) of operator functions including operational, maintenance and administrative matters. When functions have been agreed upon consideration will be given to the skills necessary for their performance. Specific knowledge and training requirements will be developed in coordination with the Subcommittee on Standards of Training and Watchkeeping. The Subcommittee requested members to submit substantive comments on COM XX111/WP.6 for consideration at the Twenty-fourth Session.

Conclusion

9. Comments received on the above matters will be used to aid the members of the United States Delegation to prepare for the Radiocommunications Subcommittee meeting tentatively scheduled for May 1982 in London, England and subsequent meetings. The Commission is represented on the IMCO Delegation and in the Technical Working Group on Operational Standards.

10. In view of the foregoing, this Notice of Inquiry is hereby adopted. Authority for this action is contained in Sections 4(i), 303 and 403 of the Communications Act of 1934, as amended.

11. Interested persons may file comments on or before January 11, 1982 and reply comments on or before January 26, 1982. Comments and reply comments shall be filed pursuant to § 1.419(b) which requires, among other things, an original and 5 copies of all filings. All relevant and timely comments and reply comments filed in this Docket will be considered by the Commission before further action is taken. The Commission may also take into account other pertinent information before it in addition to specific comments elicited by the Notice in this proceeding.[3]

12. Responses will be available for public inspection during regular business hours in the Commission's

[2] The date of the conference has been changed to 1983.

BILLING CODE 6712–01–M

Policy on Cable Ownership; Order Extending Time for Filing Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of Time for filing Comments on Office of Plans & Policy's Staff Study *FCC Policy on Cable Ownership.*

SUMMARY: This action, by the General Counsel pursuant to delegated authority, grants in part the joint motion by the National Telephone Cooperative Association, Telephone and Data Systems, Inc., Organization for the Protection and Advancement of Small Telephone Companies, and the United States Independent Telephone Association to extend the time for filing comments in response to the Office of Plans and Policy's staff study entitled *FCC Policy on Cable Ownership.*[1]

DATES: The deadline for filing comments has been extended from December 17, 1981 to January 18, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Randy Thomas, Office of General Counsel (202) 632–6990.

SUPPLEMENTARY INFORMATION:

In the matter of comments on Office of Plans and Policy staff study *FCC policy on cable ownership.*

Adopted: December 10, 1981.

Released: December 11, 1981.

1. The General Counsel has under consideration a joint motion to extend the time within which to file comments addressing the Office of Plans and Policy's staff study entitled *FCC Policy on Cable Ownership,* released November 17, 1981. The joint motion was filed on December 7, 1981, by the National Telephone Cooperative Association, Telephone and Data Systems, Inc., Organization for the Protection and Advancement of Small Telephone Companies, and the United States Independent Telephone Association. The movants request that comment period be extended from December 17, 1981, to February 12, 1982. They assert that additional time is needed in order to address the complex issues presented by the staff report and concurrently analyze the Report of the House Subcommittee on Telecommunications, Consumer Protection and Finance.

2. Based upon the foregoing, I find that under the circumstances presented the request for an extension of time should be granted only in part pursuant to the authority delegated to the General Counsel. *See* 47 CFR 0.251(b) (1980).

3. Accordingly, it is hereby ordered that the Joint Motion for Extension of Time filed by the National Telephone Cooperative Association, Telephone and Data Systems, Inc., the Organization for the Protection and Advancement of Small Telephone Companies, and the United States Independent Telephone Association is hereby granted in part and that the time for filing comments in the above-captioned proceeding is extended to and including January 18, 1982.

Stephen A. Sharp,

General Counsel.

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 1597–R]

John L. Ross, d.b.a. J. L. Ross & Co.; Order of Revocation of Freight Forwarder License

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.15(d) of Federal Maritime Commission General Order 4 further provides that a license shall be automatically revoked for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of John L. Ross, dba J. L. Ross & Co., c/o World Cargo Agency, Inc., Bay 40 Lewis Wharf, Boston, MA 02110 was cancelled effective November 14, 1981.

By letter dated October 26, 1981, John L. Ross, dba J. L. Ross & Co. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1597–R would be automatically revoked unless a valid surety bond was filed with the Commission.

John L. Ross, dba J. L. Ross & Co. has failed to furnish a valid bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised), § 10.01(f) dated November 12, 1981;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 1597–R be and is hereby revoked effective November 14, 1981.

It is ordered, that Independent Ocean Freight Forwarder License No. 1597–R issued to John L. Ross, dba J. L. Ross & Co. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the Federal Register and served upon John L. Ross, dba J. L. Ross & Co.

Albert J. Klingel, Jr.,

Director, Bureau of Certification and Licensing.

FEDERAL RESERVE SYSTEM

[Docket No. R–0324]

Fee Schedules for Federal Reserve Bank Services; Coin Wrapping

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Fee schedule for coin wrapping.

SUMMARY: The Monetary Control Act of 1980 (Title I of Public Law 96–221) requires that a schedule of fees be established for Federal Reserve Bank services. The Board has previously adopted a set of pricing principles for Federal Reserve Bank services and has established implementation dates on which fee schedules for each of the services will become effective. The Board has now adopted fee schedules for coin wrapping services.

EFFECTIVE DATE: January 28, 1982.

FOR FURTHER INFORMATION CONTACT: Lorin S. Meeder, Associate Director for Federal Reserve Bank Operations (202/452–2738); Earl G. Hamilton, Assistant Director for Federal Reserve Bank Operations (202/452–3879); Merphil S. Kondo, Senior Economist (202/452–3875); Steven O. App, Manager, Cash Services (202/452–2705); Gilbert T. Schwartz, Associate General Counsel (202/452–3625); Daniel L. Rhoads, Attorney (202/452–3711).

SUPPLEMENTARY INFORMATION: The Monetary Control Act of 1980 requires that fee schedules be developed for Federal Reserve Bank services based on pricing principles established by the Board. The Act provides that the Board shall begin putting into effect a schedule of fees not later than September 1, 1981, and that services covered by the fee schedule are to be made available to all

depository institutions. The Board, in accordance with the requirements of the Act, published for comment proposed pricing principles and fee schedules for services on August 28, 1980 (45 FR 58689). On December 30, 1980, after considering the comments received from the public, the Board took the following actions: adopted revised pricing principles; approved the fee schedules for several services, and established implementation dates on which fee schedules for each service will become effective. The Board has now adopted a fee schedule for coin wrapping services.

1982 Fee Schedule

The Monetary Control Act of 1980 requires that "[o]ver the long run fees shall be established on the basis of all direct and indirect costs actually incurred in providing the Federal Reserve services priced * * * except that the pricing principles shall give due regard to competitive factors and the provision of an adequate level of such services nationwide." The Act also requires that fees for Federal Reserve services take into account "the taxes that would have been paid and the return on capital that would have been provided had the services been furnished by a private business firm." This markup is referred to as the private sector adjustment factor (PSAF).

Two Federal Reserve Banks are planning to offer coin wrapping services in 1982. The fee for the coin wrapping service to be offered by the Federal Reserve Bank of Cleveland is based on the estimated 1982 full costs of providing this service. A private sector adjustment factor of 16 percent has been applied to these costs. The Federal Reserve Bank of Cleveland will charge 3.2 cents per roll for its coin wrapping service.

The Federal Reserve Bank of Boston also plans to offer a coin wrapping service in 1982. This service will be subcontracted by the Reserve Bank. A private sector adjustment factor of 16 percent has been applied to the administrative costs of coin wrapping incurred by the Federal Reserve Bank of Boston but not to payments made to the subcontractor, since the cost of capital and taxes is already included in these payments. The Federal Reserve Bank of Boston will charge 2.8 cents per roll for its coin wrapping service.

The remaining Federal Reserve Banks are not currently planning to offer a coin wrapping service 1982.

By order of the Board of Governors of the Federal Reserve System, December 16, 1981.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Peoples Ban Corp.; Proposed Acquisition of Tellus Financial Services, Inc.

Peoples Ban Corporation, Seattle, Washington, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire through its subsidiary, Peoples Mortgage Company, Seattle, Washington, voting shares of Tellus Financial Services, Inc., Seattle, Washington.

Applicant states that the proposed subsidiary would engage in the activities of servicing loans and extensions of credit, including the servicing of contract collections for the time sharing industry. These activities would be performed from offices of Applicant's subsidiary in Seattle, Washington, and the geographic area to be served is the United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce

benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received no later than January 15, 1982.

Board of Governors of the Federal Reserve System, December 16, 1981.

Theodore E. Downing, Jr.,

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Early Termination of the Waiting Period of the Premerger Notification Rules; Kuwait Petroleum Corp.

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the waiting period of the premerger notification rules.

SUMMARY: Kuwait Petroleum Corp. is granted early termination of the waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of certain voting securities of Santa Fe International Corp. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both parties. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: December 4, 1981.

FOR FURTHER INFORMATION CONTACT: Roberta Baruch, Senior Attorney, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580 (202) 523-3894.

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

By direction of the Commission.

Carol M. Thomas,

Secretary.

Public Health Services

Block Grant Funds; Delegation of Authority

Notice is hereby given that on November 24, 1981, the Secretary of Health and Human Services delegated to the Assistant Secretary for Health the authority vested in the Secretary under Title XVII, Subtitle C, Chapter 2 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35), Block Grant Funds,

insofar as the authority pertains to Part A of Title XIX of the Public Health Services Act, Preventive Health and Health Services Block Grant, and Part B of Title XIX of the Public Health Services Act, Alcohol and Drug Abuse and Mental Health Services Block Grant. The Assistant Secretary for Health may redelegate the authority to the PHS agency heads. The PHS agency heads may redelegate to officials who report directly to them, except that the Director, Centers for Disease Control, may redelegate to officials within the Office of the Director, Centers for Disease Control. The authority may also be delegated through customary channels to the Regional Health Administrators.

In addition, the Secretary affirmed and ratified all actions taken on behalf of the Secretary of Health and Human Services from October 1, 1981 to the effective date of the delegation, insofar as those actions pertain to the authority delegated.

Dated: December 14, 1981.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4160-17-M

Block Grant Programs; Delegation of Authority

Notice is hereby given that on November 23, 1981, the Secretary of Health and Human Services delegated to the Assistant Secretary for Health the authorities vested in the Secretary under Title XIX of the Public Health Services Act, as amended, concerning the Preventive Health and Health Services Block Grant; Alcohol and Drug Abuse and Mental Health Services Block Grant; and Primary Care Block Grants. The Secretary also affirmed and ratified actions taken by the Assistant Secretary or his subordinates which, in effect, involved the exercise of these authorities prior to the effective date of the delegation. The delegation to the Assistant Secretary for Health did not include the authority to promulgate regulations, submit reports to Congress, take final action to withhold funds from States, or act under the nondiscrimination provisions of the Act.

Under the delegation, the Assistant Secretary for Health may redelegate the authorities delegated to him to an official who reports directly to him, and that official may redelegate no further than an official who reports directly to him.

Dated: December 14, 1981.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4160-17-M

Maternal and Child Health Services Block Grant; Delegation of Authority

Notice is hereby given that on November 23, 1981, the Secretary of Health and Human Services delegated to the Assistant Secretary for Health the authorities vested in the Secretary under Title V of the Social Security Act, as amended, concerning the Maternal and Child Health Services Block Grant. The Secretary also affirmed and ratified actions taken by the Assistant Secretary or his subordinates which, in effect, involved the exercise of these authorities prior to the effective date of the delegation. The delegation to the Assistant Secretary for Health did not include authority to promulgate regulations, submit reports to Congress, take final action to withhold funds from States, or act under the nondiscrimination provisions of the Act.

Under the delegation, the Assistant Secretary for Health may redelegate the authorities delegated to him to an official who reports directly to him, and that official may redelegate no further than an official who reports directly to him.

The delegation supersedes the April 15, 1980 delegation from the Secretary (45 FR 30139) to the Assistant Secretary for Health of authority under Title V of the Social Security Act. Redelegations of authority based on the April 15, 1980 delegation made to other PHS officials may continue in effect until new redelegations are issued provided they are consistent with the delegation to the Assistant Secretary for Health.

Dated: December 14, 1981.

Orderly Closure, Transfer, and Financial Self-sufficiency of Public Health Service Hospitals and Clinics; Delegation of Authority

Notice is hereby given that on November 23, 1981, the Secretary of Health and Human Services delegated, with authority to redelegate, the authorities vested in the Secretary under Pub. L. 97-35 (Omnibus Budget Reconciliation Act of 1981) and Pub. L. 97-85 concerning the orderly closure, transfer, and financial self-sufficiency of Public Health Service Hospitals and Clinics, as follows:

1. To the Assistant Secretary for Management and Budget the authority to execute and implement the transfer of HHS owned real property and related personal property of the Public Health Services Hospitals and Clinics.

2. To the Assistant Secretary for Health all other authorities including the authorities to dispose of personal property other than that identified in 1. above, except that authority to determine the feasibility of the proposals for transfer or achievement of financial self-sufficiency shall remain with the Secretary.

The Secretary affirmed and ratified actions taken by the Assistant Secretary for Health or his subordinates which, in effect, involved the exercise of these authorities prior to the effective date of the delegation.

Dated: December 14, 1981.

Social Security Administration

Delegation of Authority

Notice is hereby given that on November 23, 1981, the Secretary of Health and Human Servies delegated to the Commissioner of Social Security the authorities vested in the Secretary under the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35) concerning the Low-Income Home Energy Assistance Program authorized by sections 2601-2610 of the Act. The Secretary also affirmed and ratified actions taken by the Commissioner or his subordinates which, in effect, involved the exercise of these authorities prior to the effective date of the delegation. The delegation to the Commissioner did not include authority to promulgate regulations, submit reports to Congress, take final action to withhold funds from States, or act under the nondiscrimination provisions of the Act.

Under the delegation, the Commissioner of Social Security may redelegate the authorities delegated to him to an official who reports directly to him, and that official may redelegate no further than an official who reports directly to him.

The delegation supersedes the December 31, 1980 delegation from the Secretary to the Commissioner of Social

Security concerning the Home Energy Assistance Act of 1980.

Dated: December 14, 1981.

Containing 502, 792 acres, more or less.

The Luke Air Force Range also encompasses approximately 2,161,629 additional acres withdrawn for use by the Department of the Defense. The Department of Defense desires to continue using all of the 2,664,423 acres in the existing Luke Air Force Range for training aircraft pilots by the United States military forces. During the course of processing the Withdrawal Application A-9973, public hearings were held in Phoenix on March 9, 1978, and Ajo on April 28, 1978, and an Environmental Impact Statement was prepared. The entire 2,664,423 acres on the existing range were the subject of these hearings and the Environmental Statement.

It is therefore proposed that, subject to valid existing rights, the following described lands also remain withdrawn from settlement, sale, location, or entry under the general land laws, including the mining and mineral leasing laws, and be incorporated into a single withdrawal along with the above listed lands in Areas "A", "B", and "C":

Area "D"

T. 8, 9 and 10 S., R. 5 W., partially unsurveyed.
T. 7 S., R. 6 W.,
Secs. 13 to 36, inclusive.
T. 8, 9 and 10 S., R. 6 W., partially unsurveyed.
T. 7 S., R. 7 W.,
Secs. 13 to 36, inclusive.
T. 8 to 12 S., R. 7 W., partially unsurveyed.
T. 7 S., R. 8 W.,
Secs. 13 to 36, inclusive.
T. 8 to 12 S., R. 8 W., unsurveyed.
T. 7 S., R. 9 W.,
Secs. 13 to 36, inclusive.
T. 8 to 12 S., R. 9 W., unsurveyed.
T. 8 to 12 S., R. 10 W., partially unsurveyed.
T. 8 to 12 S., R. 11 W., partially unsurveyed.
T. 8 and 9 S., R. 11½ W.
Area "H"
T. 6 S., R. 5 W.,
Sec. 24.
Area "J"
T. 11 S., R. 6 W.,
Sec. 22, W½.

All of the above areas described aggregate approximately 2,664,423 acres in Maricopa, Pima and Yuma Counties, Arizona.

For a period of 90 days from the date of publication of this notice all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

The Environmental Statement and Map No. 11–M–169.2 delineating the lands involved are of record in the Arizona State Office, in case file A–9973.

All correspondence in connection with this withdrawal should be directed to the undersigned officer, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310–84–M

Colorado; Amendment to the Williams Fork Management Framework Plan for Coal

Notice is hereby given in accordance with Pub. L. 94–579, section 603 and 43 CFR, Parts 3400 and 1601, that the Bureau of Land Management, Craig District Colorado, has applied the coal unsuitability criteria through the land use planning process. The results of this application are available for public comment as the Draft Williams Fork Management Framework Plan Coal Amendment Environmental Assessment (Draft WFMFP Coal Amendment EA).

Public comment is invited on this environmental assessment of the application of the unsuitability criteria. Copies of the Draft WFMFP Coal Amendment EA are available on request from the Official BLM Contact listed below.

Comments on the Draft WFMFP Coal Amendment EA must be received by January 30, 1981, in order to be considered in the final WFMFP Coal Amendment EA. Please address comments to the Official BLM Contact listed below.

Official BLM Contact: Duane Johnson, Team Leader, Bureau of Land Management, P.O. Box 1136, Little Snake Resource Area, Craig, CO 81626 or telephone (303) 824–4441.

Vernie D. Armstrong,

Acting District Manager.

BILLING CODE 4310–84–M

[Serial No. OR 33844]

Designation of Woodcock Bog Research Natural Area

Pursuant to the authority in 43 CFR Subpart 2070, and authorization from the Director dated November 19, 1981, I hereby designate lands within the following described area and displayed on a map labeled "Proposed Woodcock Bog Research Natural Area" as Woodcock Bog Research Natural Area:

Willamette Meridian

T. 39 S., R. 8 W.,
Sec. 31, N ½SW¼, SW¼SW¼.

The designated area aggregates approximately 111.19 acres in Josephine County.

In accordance with 43 CFR 2071.4(a), this designation action is only for the purpose of identifying the Bureau's current management objectives for the area, and, unto itself, has no effect upon established use or management of the lands and resources involved. The area is designated under the category of Natural Resources Experiment and Research Areas, which covers relatively small areas used for research or experimental purposes (43 CFR 2071.(b)(4)). The primary management objectives for Woodcock Bog are to maintain its quality as a significant example of natural diversity, and to facilitate its use by authorized persons and groups for nonmanipulative and nondestructive scientific research and education. The area has been determined to meet the criteria for BLM Research Natural Areas prescribed by 43 CFR 8223.0–5. It will be managed under regulations in 43 CFR 8223.1 and in accordance with applicable provisions in the Josephine Management Framework Plan approved September 30, 1979.

William G. Leavell,

State Director.

December 14, 1981.

BILLING CODE 4310–84–M

Geological Survey

Leasing of Federal Coal, Powder River Coal Region; Request for Public Comment on Fair Market Value and Maximum Economic Recovery

AGENCY: Geological Survey, Interior.

The U.S. Geological Survey has delineated Federal coal tracts located in the Powder River Basin of southeastern Montana and northeastern Wyoming. Nineteen of these tracts are currently under consideration for public lease sale

by the Department of the Interior. Leasing of Federal coal in the Powder River Coal Region is a result of the Secretary of Interior's decision to offer coal in specific Federal coal regions.

Descriptions of the tracts are in Table I and Table II. More complete geologic data on these tracts are available in tract delineation reports and the economic recovery potential analysis reports for each tract. These reports are available for public inspection at the Office of the Deputy Conservation, Manager for Resource Evaluation, North Central Region, Conservation Division, U.S. Geological Survey, 100 East "B", Room 2001, Casper, Wyoming. Additional information on the tracts located in the State of Wyoming is available from the Bureau of Land Management Casper District Office, 951 Rancho Road, Casper, Wyoming. For information on tracts located in the State of Montana contact Bureau of Land Management, Miles City District Office, West of Miles City, Miles City, Montana.

A final Secretarial decision on any public lease sale is expected to be made in January, 1982. Information regarding any changes of acreages or tonnages on the final selected tracts to be offered may be obtained from the aforementioned BLM District offices.

The public is invited to submit written comments on the fair market value and the maximum economic recovery of the listed tracts to the U.S. Geological Survey. Comments should address, but not necessarily be limited to the following information:

1. The quality and quantity of the coal resources for each tract;
2. The mining method or methods which would achieve maximum economic recovery of the coal, including specification of seams to be mined on each tract and the most desirable timing and rate of production;
3. The quantity of coal by seam on each tract;
4. Which of the tracts, if any, should be evaluated as part of a larger mining unit (i.e., those tracts which do not in themselves form a logical mining unit);
5. The configuration of any larger mining unit of which the tract may be a part;
6. Restrictions to mining which may affect coal recovery;
7. The price that the mined coal would bring in the market place;
8. Costs, including mining and reclamation, of producing the coal;
9. The percentage rate at which anticipated income streams should be discounted, either in the absence of inflation or with inflation, in which case the anticipated rate of inflation should be given;
10. Depreciation and other accounting factors;
11. The value of any surface estate where held privately;
12. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area; and
13. Any comparable sales data of similar coal lands.

If any information submitted is considered to be proprietary, the information must be so labeled on the first page of any written comment(s). the U.S. Geological Survey will treat any submitted information as being confidential if so requested by any person(s), firm(s), or organization(s), and if authorized by the exemption provisions of the Freedom of Information Act. Comments should be sent to the Conservation Manager, North Central Region, Conservation Division, U.S. Geological Survey, Post Office Box 2859, Casper, Wyoming 82602. Comments should be received no later than January 21, 1982.

This request for comments should not be interpreted as a firm commitment by the Federal Government to lease any of the tracts mentioned. Any decision to offer for public lease sale any of the tracts will be made in a public notice of sale issued by the BLM not less than 30 days prior to any sales. These procedures are set forth in Federal Coal Regulations in 43 CFR Group 3400.

In addition to the information regarding reserves, Departmental policy calls for release of all nonproprietary data which are used as input in the discounted cash flow evaluation model. Under this policy, the U.S. Geological Survey is releasing for public comment and review our initial estimates of:

1. The coal selling price, which is an estimate of the range of current market prices and is based upon the quality of the coal;
2. The unit mining cost, which is an estimate of the range of all operating costs used to produce the coal;
3. applicable discount rates and inflation rates.

TABLE I.—DESCRIPTION OF POSSIBLE LEASE TRACTS IN POWDER RIVER COAL REGION [MONTANA]

Tract name	County	Township and range	Acres	Estimated recovery reserves (mm tons)	Btu per pound	Sulphur content (percent)	Ash content (percent)
Ashland (Decker-Birney)	Powder River	T3-4S, R45E	1,949	119.0	8,354	.16	5.37
Coal Creek [1]	Powder River/Rosebud	T3S, R44-45E	1,033	60.0	8,246	.14	4.19

West Decker	Big Horn	T9S, R40E	40	5.0	8,553	.33	3.73

[1] Designated as SBA tract.

TABLE II.—DESCRIPTION OF POSSIBLE LEASE TRACTS IN POWDER RIVER COAL REGION [WYOMING]

Tract name	County	Township and range	Acres	Estimated recovery reserves (mm tons)	BTU per pound	Sulphur content (percent)	Ash content (percent)
Duck Nest Creek	Campbell	T47-48N, R71-72W	2,642	316	8,400	.40	5.00
Fortin Draw	do	T50N, R71W	320	48	8,000	.50	6.00
Keeline [1]	do	T44-45N, R70W	3,327	174	8,368	.60	6.56

TABLE II.—DESCRIPTION OF POSSIBLE LEASE TRACTS IN POWDER RIVER COAL REGION [WYOMING]—Continued

Tract name	County	Township and range	Acres	Estimated recovery reserves (mm tons)	BTU per pound	Sulphur content (percent)	Ash content (percent)
Kintz Creek	do	T45N, R70W	3,259	193	8,365	.60	6.50
Little Rawhide Creek	do	T51N, R72W	491	90	8,070	.40	8.00
Rocky Butte	do	T48-49N, R71W	4,874	445	8,462	.30	5.00
Spring Draw	do	T52N, R72-73W	4,098	393	7,800	.46	6.80
Timber Creek [1]	do	T48N, R70W	3,779	167	7,582	.70	7.70

[1] Designated as SBA tracts.

It should be noted that the above values are current estimates only. The values may or may not change as a result of comments received from the public, and/or changes in market conditions between now and when final economic evaluations are completed (approximately February 15, 1982). To obtain preliminary estimates, contact may be made with the U.S. Geological Survey—Conservation Division, North Central Region, Economic Evaluation Office, Room 116, 111 S. Wolcott, Casper, Wyoming (307–265–5550, extension 5735).

Dwayne E. Hull,

Conservation Manager, North Central Region.

BILLING CODE 4310-31-M

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Texaco U.S.A.

AGENCY: Geological Survey, Interior.

ACTION: Notice of the Receipt of a Proposed Development and Production Plan.

SUMMARY: Notice is hereby given that Texaco U.S.A. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS 0697, Block 37, South Pass Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Geological Survey is considering approval of the Plan and that it is available for public review at the Office of the Conservation Manager, Gulf of Mexico OCS Region, U.S. Geological Survey, 3301 North Causeway Blvd., Room 147, Metarie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: U.S. Geological Survey, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the U.S. Geological Survey makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: December 15, 1981.

Lowell G. Hammons,

Conservation Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-70-M

S.G. Leoffler Co.; Intention To Negotiate Concession Contract and Concession Permit

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that thirty (30) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with the S.G. Leoffler Company authorizing it to provide golf facilities and services for the public at East Potomac Park for a period of approximately ten (10) years from 1/1/82 through 12/31/91. In addition, the National Park Service proposes to negotiate a concession permit with the S.G. Leoffler Company authorizing it to provide golf facilities and services for the public at Rock Creek Park for a period of approximately one (1) year from 1/1/82 through 12/31/82.

This contact renewal and permit renewal has been determined to be a categorical exclusion under the National Park Service regulations implementing the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary at both locations under an existing contract which expired by limitation of time on 12/31/73 and has been continued on a short term basis, and therefore, pursuant to the Act of October 9, 1965, as cited above is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants the S.G. Leoffler Company, as the present satisfactory concessioner, the right to meet the terms of responsive proposals for the proposed new contract and a preference in the award of the contract, if thereafter, the proposal of the S.G. Leoffler Company is substantially equal to others received. In the event a responsive proposal superior to that of the S.G. Leoffler Company, (as determined by the Secretary) is submitted, the S.G. Leoffler Company will be given the opportunity to meet the terms and conditions of the superior proposal the Secretary considers desirable, and if it does so, the new contract will be negotiated with the S.G. Leoffler Company. The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the thirtieth (30th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, National Capital Parks-Central, 900 Ohio Drive, SW., Washington, D.C. 20042, and the Superintendent, Rock Creek Park, N.W., Washington, D.C. 20015, for information as to the requirements of the proposed contract.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carrier Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980 at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later become unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries to the Ombudsman's Office, (202) 275-7326.

Secretary.

[FR Doc. 81–36435 Filed 12–21–81; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

BILLING CODE 7035-01-M

[Ex Parte No. 387 (Sub-71)]

Ashley, Drew & Northern Railway; Exemption for Contract Tariff ICC–ADN–C–0001

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Petitoner is granted a provisional exemption under 49 U.S.C. 10505 from the notice requirement of 49 U.S.C. 10713(e). This contract tariff to be filed may become effective on one day's notice. This exemption may be revoked if protests are filed within 15 days of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall, (202) 275–7656.

SUPPLEMENTARY INFORMATION: The Ashley, Drew & Northern Railway Company (ADN) filed a petition on December 10, 1981, seeking an exemption under 49 U.S.C. 10505 from the statutory notice provisions of 49 U.S.C. 10713(e), to advance the effective date of its contemporaneously-filed contract tariff ICC–ADN–C–0001 (now scheduled to become effective January 4, 1982), to become effective on one day's notice. The contract permits track storage of pulp, paper, and paper products at stations on the ADN, in its own and another railroad's cars.

Under 49 U.S.C. 10713(e), contracts must be filed on not less than 30 nor more than 60 days' notice. There is no provision for waiving this requirement.

Cf former section 10762(d)(1). However, the Commission has granted relief under our section 10505 exemption authority in exceptional situations.

ADN has excess equipment standing idle. As a result, it is offering to allow use of surplus boxcars for short-term storage, when excess production exhausts other available storage capacity. A charge for this service is provided in the contract. In the case of specific contract for which relief is here requested, the shipper has an excess production problem and requires additional storage space immediately. Thus, the shipper has requested that the contract be made effective as soon as possible.

ADN's contract tariff ICC–ADN–C–0001 may become effective on one day's notice. We will apply the following conditions which have been imposed in similar exemption proceedings:

If the Commission permits the contract to become effective on one day's notice, this fact neither shall be construed to mean that this is a Commission approved contract for purposes of 49 U.S.C. 10713(g) nor shall it serve to deprive the Commission of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to disapprove it.

Subject to compliance with these conditions, under 49 U.S.C. 10505(a) we find that the 30 day notice requirement in these instances is not necessary to carry out the transportation policy of 49 U.S.C. 10101a and is not needed to protect shippers from abuse of market power. Further, we will consider revoking these exemptions under 49 U.S.C. 10505(c) if protests are filed within 15 days of publication in the **Federal Register**.

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10505)

Dated: December 16, 1981.

By the Commission, Division 1, Commissioners Clapp, Gresham, and Taylor. Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[I.C.C. Order No. P-38]

Atchison, Topeka and Santa Fe Railway Co.; Passenger Train Operation

It appearing, That the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Chicago, Illinois, and Oakland, California. The operation of these trains requires the use of the tracks and other facilities of Burlington Northern Railroad (BN). A portion of the BN tracks between Galesburg and Chicago, Illinois, are temporarily out of service because of a derailment. An alternate route is available via the Atchison, Topeka and Santa Fe Railway Company.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided October 30, 1981, and of the authority vested in the Commission by section 402(c) of the Rail Passenger Service Act of 1970 (45 USC 562(c)), The Atchison, Topeka and Santa Fe Railway Company (ATSF) is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with Burlington Northern Railroad (BN), at Galesburg, Illinois, and Chicago, Illinois.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 8:00 p.m., December 9, 1981.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., December 11, 1981, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon The Atchison, Topeka and Sante Fe Railway Company and upon the National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 9, 1981.

Interstate Commerce Commission.

John H. O'Brien,

Agent.

[FR Doc. 81-36431 Filed 12-21-81; 8:45 am]

BILLING CODE 7035-01-M

[Ex Parte No. 285]

Union Pacific Railroad Co.; Maintenance of Records Pertaining to Demurrage, Detention, and Other Related Accessorial Charges by Rail Common Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Union Pacific Railroad Company is granted a three-year exemption from compliance with 49 CFR 1254.03(k) to the extent it requires that carriers retain copies of certain bills and underlying records at one location.

DATES: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Jane Mackall (202) 275–7656.

SUPPLEMENTARY INFORMATION: Union Pacific Railroad Company (UP) requests a permanent waiver of the Commission rule at 49 CFR 1254.03(k).[1] In the alternative, it seeks immediate waiver pending the Commission's formal review of the Ex Parte No. 285 rules.

When the Commission initially adopted these rules (352 I.C.C. 739 (1976)), UP operated a manual billing system at over 200 local stations. As a result, it did not find the rules excessively burdensome. Subsequently, it transferred billing and some recordkeeping functions to seven Division Accounting Offices. This action was taken to provide rate expertise not available at the local freight agencies, maintain efficient internal control of billing and revenue reporting, and assure timely and impartial collection of charges. One result, however, was that all records pertaining to a given matter

[1] This rule reads: (k) *Preparation of bills at central points.* When carriers prepare bills for freight charges, demurrage, detention, storage, switching, refrigeration, weighing inspection, car rentals, stopoffs, reconsigning, diversion, loading or other accessorial services, or where carriers grant special allowances to shippers subject to tariff provisions lawfully in effect at central billing or accounting points, copies of such bills or allowances shall be maintained by the carrier, and shall be available for inspection, at the same location at which are also maintained all other reports and records required to be made and maintained under this part.

were not kept at a single location. Use of multiple record-keeping points further developed with the conversion of all outbound waybilling to a computerized system.

UP seeks the requested waiver in conjunction with its plan to computerize demurrage recordkeeping data. Improvements brought about by these sophisticated accounting and computer developments are not compatible, UP insists, with storing bills and related documents in the same place. Further, it contends that compliance with the rule inappropriately mixes operating and accounting functions and increases costs substantially. If the relief is granted, UP agrees to produce copies of the involved records upon request.

UP has presented sufficient justification to warrant a waiver. We share the concern expressed by UP that the costs of continued compliance may outweigh the benefits and note that we previously granted a three-year exemption to Missouri-Kansas-Texas Railroad Company (MKT). See, 45 FR 81675 (December 11, 1980). Moreover, this waiver is in accord with recent legislation and Commission decisions which have emphasized that federal regulations should be reviewed and eliminated where they are no longer desirable.

However, we believe it more appropriate to specify a time period for the waiver, and will impose the three-year period adopted for the MKT. We fully anticipate that our soon-to-be-published, overall review of these rules will be completed prior to the end of this period. If it is not, a further waiver can be sought.

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

Dated: December 15, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Attorney General

Pollution Control; Consent Judgments; Vulcan Materials Co.

In the matter of proposed consent decree in action for penalties and injunctive relief for violations of National Pollutant Discharge Elimination System Permit No. LA0002933 and the Clean Water Act, 33 U.S.C. 1251, et seq.

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19025, notice is hereby given that a proposed consent decree in *United States* v. *Vulcan Materials Company* (M.D. La., No. 80-155B), was lodged with the United States District Court for the Middle District of Louisiana. The proposed consent decree describes by reference Vulcan's installation of new operation and maintenance procedures to control the discharge of the pollutant suspended solids (TSS). Furthermore, the decree requires Vulcan Materials to pay a civil penalty of seventy-five thousand dollars ($75,000) after entry of this decree by the Court.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty (30) days from the date of this notice. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Vulcan Materials Company* (D.J. Reference No. 90-5-1-1-1348).

The proposed consent decree may be examined at the Clerk's Office, Federal Building and United States Courthouse, 707 Florida Street, Baton Rouge, Louisiana 70801; and at the Environmental Enforcement Section, Land and Natural Resources Division of the United States Department of Justice, Room 1254, 10th and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 81-36525 Filed 12-21-81; 8:45 am]

BILLING CODE 4410-01-M

Proposed Consent Decree in Action To Require Compliance With Provisions of the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on November 11, 1981, a proposed consent decree in *United States of America v. Alside, Incorporated,* Civil Action No. C80-1383A, was lodged with the United States District Court for the Northern District of Ohio. The proposed decree requires Alside to comply with regulations limiting the emissions of organic material at its building siding plant in Northampton Township, Ohio. The proposed decree also requires Alside to pay a civil penalty of $75,000 to the United States Treasury.

The proposed consent decree may be examined at (1) the Office of the United States Attorney, Northern District of Ohio, Room 400, United States Courthouse, Cleveland, Ohio 44114 (2) the Office of the Envirionmental Protection Agency, Enforcement Division, 230 S. Dearborn Street, Chicago, Illinois 00004 (3) and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1254, Ninth and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.40 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Ninth and Pennsylvania Avenue, NW., Washington, D.C. 20530 and should refer to *United States of America v. Alside, Incorporated,* DOJ Reference #90-5-2-1-243.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period December 7-11, 1981.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-12,813; Chrysler Corp., Los Angeles Parts Depot, Fullerton, CA

TA-W-11,536 & 11,545; United Canning Corp., Mahoning Valley Mushroom Farms, Inc., North Lima, OH

TA-W-11,167; Donaldson Co., Inc., Chillicothe, MO

TA-W-10,295; Baldor Electric Co., St. Louis, MO

TA-W-11,416; Wyandotte Industries, Waterville, ME

TA-W-12,097; Hy-Ka Cedar Products, Sedro Woolley, WA

TA-W-12,392; Quality Beachwear, Inc., Brooklyn, NY

In each of the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to worker separations at the firm.

TA-W-12,440; H&P Garment Co., Inc., Hoboken, NJ

TA-W-12,699; General Motors Corp., AC-Delco Div., La Mirada, CA

TA-W-12,450; J&M Fashions, Inc., Union City, NJ

TA-W-11,624; Western Iron Works, Inc., Butte, MT

In each of the following cases the investigation revealed that criterion (3) has not been met for the specified reason(s).

TA-W-12,997; Allied Products Corp., South Bend Stamping Div., South Bend, IN

Aggregate U.S. imports of motor vehicle body stampings are negligible.

TA-W-11,606; BASF Wyandotte Corp., South Kearny, NJ

Aggregate U.S. imports of synthetic dyes did not increase as required for certification. With respect to plasticyers U.S. imports are negligible.

TA-W-11,579; Goodyear Tire & Rubber Co., Gadsden Distribution Center, Gadsden, AL

With respect to passenger car and truck ties, a survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm. With respect to tractor ties, U.S. imports are negligible.

Affirmative Determinations

TA-W-12,579; Underwood Electric Co., Casey, IL

A certification was issued in response to a petition received on March 31, 1981 covering all workers separated on or after March 24, 1980.

I hereby certify that the aforementioned determinations were issued during the period December 7-11, 1981. Copies of these determinations are available for inspection in Room 10,332, U.S. Department of Labor, 601 D Street, NW., Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M Fooks,

Director, Office of Trade Adjustment Assistance.

December 15, 1981.

[FR Doc. 81-36666 Filed 12-21-81; 8:45 am]

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports or articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter or the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 3, 1982.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 3, 1982.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C., this 14th day of December 1981.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

APPENDIX

Petitioner (Union/workers or former workers) of—	Location	Date received	Date of petition	Petition No.	Articles produced

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-81.68-M]

ASARCO, Inc.; Petition for Modification of Application of Mandatory Safety Standard

ASARCO, Inc., Mascot, Tennessee 37806 has filed a petition to modify the application of 30 CFR 57.4–61B (fire doors) to its Immel Mine located in Knox County, Tennessee. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that fire doors be installed in the mine's underground shop.

2. The two shafts at the mine are of fire resistant construction. They both have concrete or rock walls and steel shaft sets without any wood lagging, and both are wet shafts.

3. The mine, for all practical purposes, is a single-level mine due to many large openings between working areas at various elevations; all haulage and mining areas are interconnected for vehicular traffic.

4. Petitioner states that installation of shop entry doors would add little to the existing fire protection system and if the doors are installed, these doors may, under certain conditions, introduce other serious hazards to safety. Among these hazards are temperature buildup due to confinement, with the possibility of explosion or other upredictable event, and increase of carbon monoxide generation due to oxygen depletion in a fuel-rich atmosphere. If a shop explosion were to be caused by overheating a gas bottle or fuel tank within the confined space created by door closure, the doors could be blown out. Then there would be no controls on emissions at all, and the smoke and gas released into the ventilating airstream would likely be more toxic than they would have been otherwise.

5. Petitioner states that the protection afforded by nonflammable mine workings, dilution of smoke or gas by large volumes of ventilating air from normal air flow and air volume in open stopes, mandatory self-rescue units for personnel, evacuation of downstream personnel, reversible main fan, and a centrally located refuge chamber provide more than adequate equivalent protection in alternate compliance.

6. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 2203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Dated: December 11, 1981.

Patricia W. Silvey.

Acting Director, Office of Standards, Regulations and Variances.

[FR Doc. 81-36473 Filed 12-21-81; 8:45 am]
BILLING CODE 4510-43-M

[Docket No. M-81-193-C]

Bent Mountain Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Bent Mountain Coal Company, Inc., Route 1, Box 408, Elkhorn City, Kentucky 41522 has filed a petition to modify the application of 30 CFR 75.1710 (cabs or canopies) to its No. 138 Mine located in Pike County, Kentucky. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electric face equipment.

2. The coal seam ranges from 45 to 50 inches in height with consistent ascending and descending grades creating dips in the coal bed.

3. Petitioner states that installation of cabs or canopies on the mine's electric face equipment would result in a diminution of safety for the miners affected because:

a. The canopies could strike and dislodge the roof supports;

b. The cramped operator compartment causes operator discomfort and fatigue increasing the chances of an accident; and

c. The operator's visibility is hampered by the canopy, increasing the hazards to the operator and nearby miners.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

Dated: December 11, 1981.

[FR Doc. 81-36472 Filed 12-21-81; 8:45 am]
BILLING CODE 4510-43-M

[Docket No. M-81-216-C]

BSB Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

BSB Coal Company Inc., Pathfork, Kentucky 40863 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its No. 1 Mine located in Harlan County, Kentucky. The petition is filed under Section 101(c) of the Federal Mine Safety and health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electric face equipment.

2. The minimum height in the present working section is 46 inches, with rolls and undulations in the coal seam.

3. Petitioner states that installation of cabs or canopies would result in a diminution of safety for the miners affected because:

a. The conopy may strike and dislodge roof support;

b. The canopy causes cramped operator compartments, increasing operator fatigue and the chances for an accident.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Dated: December 11, 1981.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

[FR Doc. 81-36469 Filed 12-21-81; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-81-225-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1405 (automatic couplers) to its Westland Mine located in Washington County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that all haulage equipment be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment.

2. The petitioner uses safety chains as an additional safety and precautionary measure against the failure of coupling devices or accidental uncoupling. A bar is used to remove safety chains making it unnecessary for miners to go between the ends of haulage equipment.

3. Petitioner states that these safety chains provide an additional measure of safety for the miners affected and do not interfere with the designed operation of the automatic couplers and for this reason requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Dated: December 11, 1981.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

[FR Doc. 81-36470 Filed 12-21-81; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-81-226-C]

Cowin and Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Cowin and Company, Inc., 1 South West 18th Street, Birmingham, Alabama 35211 has filed a petition to modify the application of 30 CFR 77.1911 (ventilation of slopes and shafts) to Consolidation Coal Company's Buchanan No. 1 Mine located in Buchanan County, Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a ventilation fan be operated continuously when miners are below the surface.

2. The petitioner is engaged in construction of three shafts at the mine.

3. Petitioner is seeking approval to stop the ventilation fan at these shafts:

a. When miners are being raised and lowered in the shaft;

b. During plumbing operations for establishing center marks in the shaft and assuring concrete forms conform to contractual tolerances.

4. To support this proposed alternative method, petitioner states that:

a. Noise levels created by the fan's operation impair the miners' ability to hear audible warning devices if necessary;

b. An examination for methane will be conducted in the shaft immediately preceeding and after any shutdown and restart of the fan for mantrip, ingress and/or egress;

c. Any electrical installation or equipment which might be in the shaft prior to such fan shutdown will be de-energized;

d. The fan will only be stopped after the miners are in the mantrip and will not be restarted prior to anyone, except the methane examiner, leaving the mantrip.

e. At no time will work begin before fan restart or continue after stoppage.

5. Petitioner further states that the movement of air created by the fan makes it impossible to steady the plumb bob, creating the chance of error which, if allowed, could cause the shaft to be less than vertical. The petitioner proposes the following safeguards during the requested shutdown of the fan for centering operatons:

a. The fan will not be stopped for longer than 15 minutes, and only after a complete methane examination;

b. Only those employees involved in the centering operations will be in the shaft during such stoppage; and

c. additional safeguards specified in number 4 above will be followed.

6. Petitioner states that the proposed alternative method and safeguards will provide the same measure of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Dated: December 11, 1981.

BILLING CODE 4510-43-M

[Docket No. M-81-217-C]

Sewell Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Sewell Coal Company, Route 3, Box 125, Nettie, West Virginia 26681 has filed a petitioin to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its No. 4 Mine located in Nicholas County, West Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return air courses be examined in their entirety on a weekly basis.

2. The 11 West return airway has deteriorated due to bad roof conditions and pressure from the roof, making weekly examinations hazardous for miners.

3. As an alternative method, petitioner proposes to evaluate the 11 West return by air readings as at specified safe point and at the No. 4 fan.

4. The No. 3 fan located out by the junction of 11 West and Southwest mains would continue to ventilate the mine in the event of total loss of the return airway.

5. Petitioner states that the proposed alternative would provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 21, 1982. Copies of the petition are available for inspection at that address.

Dated: December 11, 1981.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-81-211-C]

Zeigler Coal Co.; Petition for Modification of Application of Manadatory Safety Standard

Zeigler Coal Company, 2700 River Road, Des Plaines, Illinois 60018 has filed a petition to modify the application of 30 CFR 75.503 (permissible equipment) to its Murdock and Zeigler No. 5 Mines located in Douglas County, Illinois and its Spartan and Zeigler No. 11 Mines located in Randolph County, Illinois. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the use of a locked padlock to secure screw caps in place on plugs of a battery operated S & S Scoop tractor.

2. Petitioner states that there is an element of danger in having plugs locked together in the event of a short circuit occurring in the Scoop's electrical components.

3. As an alternative method, petitioner proposes that a modified bolt and nut locking device be used, in lieu of a padlock. This modified locking device will serve the same purpose as a padlock; the plug could not be pulled apart without removing the bolt and nut.

4. Petitioner states that the proposed alternative method will provide the same measure of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. Office of the Secretary

[Secretary of Labor's Order 5-81]

Establishment of the Office of the Assistant Secretary of Labor for Veteran's Employment

December 15, 1981.

1. *Purpose.* To implement the provisions of Section 504 of the Veterans' Rehabilitation and Education Amendments of 1980 (Pub. L. 96-466) by establishing an Office of the Assistant Secretary of Labor for Veterans' Employment.

2. *Establishment of the Office of the Assistant Secretary of Labor for Veterans Employment/Resources*

a. There is hereby established in the Department of Labor an Office of the Assistant Secretary of Labor for Veterans' Employment (OASVE) to be headed by an Assistant Secretary who will report to and be directly responsible to the Secretary and Under Secretary.

b. Functions and resources of the immediate Office of the DASVE and the VES, including its field personnel are transferred from the Assistant Secretary of Labor for Employment and Training to the Assistant Secretary of Labor for Veterans' Employment.

This transfer includes personnel, funds, equipment, supplies, and associated records.

The Assistant Secretary for Administration and Management will complete arrangements to effect an orderly and equitable transfer of resources, including assurance of consultation and negotiations as appropriate with the unions representing affected employees.

3. *Authority.* This Order is issued pursuant to the Act of March 4, 1913, (37 Stat. 736), Reorganization Plan No. 6 of 1950, and the Veterans' Rehabilitation and Education Amendments of 1980 (Pub. L. 96-466).

4. *Effective Date.* This Order is effective immediately for planning and reporting purposes, and for implementation no later than sixty days from the date of this Order.

Raymond J. Donovan,

Secretary of Labor.

BILLING CODE 4510-23-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of Meetings.

SUMMARY: Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that the following meetings of the Humanities Panel will be held at 806 15th Street, NW., Washington, DC 20506:

1. Date: January 5, 1982.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications submitted for the Youthgrants Program, Division of Special Programs, for projects beginning after May 1, 1982.
2. Date: January 11-12, 1982.
Time: 9:00 a.m. to 5:30 p.m.
Room: 1134.
Program: This meeting will review applications submitted for General Research Program, Conferences Panel, Division of Research Programs, for projects beginning after April 1, 1982.
3. Date: January 14, 1982.
Time: 9:00 a.m. to 5:30 p.m.
Room: 314.
Program: This meeting will review applications for Summer Stipends in 19th and 20th Century English and Comparative Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.

4. Date: January 15, 1982.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications for Summer Stipends in American Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1982.
5. Date: January 27–29, 1982.
Time: January 27, 7:00 p.m. to 9:30 p.m.; January 28, 8:30 a.m. to 6:00 p.m.; January 29, 8:30 a.m. to 5:00 p.m.
Room: 807.
Program: This meeting will review applications submitted for the Humanities Projects in Media Program, Division of Public Programs, for projects beginning after July 1, 1982.

The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose:

(1) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5 United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Officer, National Endowment for the Humanities, Washington, DC 20506, or call (202) 724–0367.

Stephen J. McCleary,
Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

State of Texas; Staff Assessment of Proposed Amended Agreement

Note.—This document was originally published in the issue of December 8, 1981. It is reprinted at the request of the NRC.

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of proposed amended agreement with State of Texas.

SUMMARY: Notice is hereby given that the Nuclear Regulatory Commission is publishing for public comment a proposed amendment to the existing section 274b. agreement between NRC and the State of Texas which became effective March 1, 1963. The request dated November, 6, 1981 from Governor Clements of the State of Texas, if approved, would permit Texas to regulate byproduct material as defined in section 11e(2) of the Atomic Energy Act, as amended, (uranium mill tailings) in conformance with the requirements of section 274. of the Atomic Energy Act of 1954, as amended.

A staff assessment of the State's proposed radiation control program to implement the amended agreement is set forth below as supplementary information to this notice. A copy of the complete program description submitted by Texas including a narrative describing the State's proposed program for control over byproduct materials as defined in section 11e.(2) of the Act, appropriate State legislation, and Texas regulations is available for public inspection in the Commission's public document room at 1717 H Street, NW, Washington, DC.

DATE: Comments must be received on or before January 7, 1982.

ADDRESS: All interested persons desiring to submit comments and suggestions for the consideration of the Commission in connection with the proposed amended agreement should send them to the Nuclear Regulatory Commission, Office of State Programs, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Craig Z. Gordon, Office of State Programs, Nuclear Regulatory Commission, Washington, DC 20555, Phone: (301) 492–0886.

SUPPLEMENTARY INFORMATION: Assessment of Proposed Texas Program to Regulate Byproduct Material as Defined in section 11e.(2) of the Act, based on Criteria 29–36 of "Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof by States Through Agreements," 44 FR 42818.

I. Introduction

The Uranium Mill Tailings Radiation Control Act of 1978 amended the requirements of section 274 of the Atomic Energy Act, "Cooperation With States" and imposed certain requirements that must be met by Agreement States in order to regulate uranium mill tailings after November 8, 1981. Governor William P. Clements, Jr. of the State of Texas has requested NRC to amend its agreement with NRC to permit continued State regulation of uranium mill tailings. His request was supported by a description of the State's program for control of uranium mills and mill tailings.

The State has 19 active licensees who process ore primarily for its source material content including two conventional uranium mills, 15 in-situ mining operations, and 2 smaller uranium recovery operations. Texas has also received four applications, one for a conventional mill and three for in-situ mining operations. No in-situ mining and recovery facility licensed by the State is authorized to establish a permanent tailings disposal area.

II. Assessment of Proposed State of Texas Radiation Control Program for Uranium Mills and Mill Tailings

1. Statutes

State statutes or duly promulgated regulations should be enacted, if not already in place, to make clear State authority to carry out the requirements of Pub. L. 95–604, Uranium Mill Tailings Radiation Control Act (UMTRCA).

In the enactment of any supporting legislation, the State should take into account the reservations of authority to the United States in UMTRCA as stated in 10 CFR 150.15a.

It is preferable that State statutes contain the provisions of section 6 of the Model Act,[1] but the provisions may be accomplished by adoption of either procedures by regulation or technical criteria. In any case, authority for their implementation should be adequately supported by statute, regulation or case law as determined by the State Attorney General.

In the licensing and regulation of ores processed primarily for their source material content and for the disposal of byproduct material, procedures shall be established which provide a written analysis of the impact on the environment of the licensing activity. This analysis shall be available to the public before commencement of hearings and shall include:

a. An assessment of the radiological and nonradiological public health impacts;

b. An assessment of any impact on any body of water or groundwater;

c. Consideration of alternatives to the licensed activities; and

d. Consideration of long-term impacts of licensed activities.

The Texas Radiation Control Act, as amended by Senate Bills 480 and 735, includes the legislative provisions required by the UMTRCA of 1978 and provide satisfactory statutory authority for the State of Texas to implement the requirements of UMTRCA of 1978.

2. Regulations

State regulations should be reviewed for regulatory requirements, and where necessary, incorporate regulatory language which is equivalent, to the extent practicable, or more stringent than regulations and standards adopted and enforced by the Commission, as required by section 274o. (See 10 CFR Part 40, Appendix A and 10 CFR 150.31(b).)

On September 19, 1981, the Texas Board of Health adopted amendments to Parts 21, 41, and 43 of the *Texas Regulations for Control of Radiation* relating to the licensing and regulation of uranium mill tailings. Part 43 regulations address: bonding requirements, siting requirements, criteria for tailings management, dam stability analyses, inspection procedures, surety arrangements, requirements for site ownership, and criteria for decontamination, decommissioning, and reclamation of facilities following license expiration. The rules became effective on October 3, 1981. In the narrative section of the formal proposal, several statements describe how certain rules are to be implemented. It is the staff's opinion that these rules, in conjunction with the statements made in the narrative, are, to the maximum extent practicable, equivalent to the regulations promulgated and enforced by NRC.

3. Organizational Relationships Within the States

Organizational relationships should be established which will provide for an effective regulatory program for uranium mills and mill tailings.

a. Charts should be developed which show the management organization and lines of authority. This chart should define the specific lines of supervision from program management within the radiation control group and any other department within the State responsible for contributing to the regulation of uranium processing and disposal of tailings. When other State agencies or regional offices are utilized, the lines of communication and administrative control between other agencies and/or regions and the Program Director should be clearly drawn.

Organizational charts outlining the Texas Department of Health, the Bureau of Radiation Control (BRC), and divisions within the Bureau of Radiation Control have been included in the proposal. The BRC is organized into three operational divisions: The Division of Licensing, Registration, and Standards (LRS), the Division of Compliance and Inspection (CI), and the Division of Environmental Programs (EP). Each division is subdivided into Branch Offices. Regional office staff are included in the Division of Compliance and Inspection.

All other functions of the uranium mill regulatory program will be conducted by the Bureau's office located in Austin, Texas.

b. Those States that will utilize personnel from other State Departments or Federal agencies in preparing the environmental assessment should designate a lead agency for supervising and coordinating preparation of this environmental assessment. It is normally expected that the radiation control agency in Agreement States will be the lead agency. The basic premise is that the lead agency is required to prepare the environmental assessment.

The Uranium Program within the Industrial Operations Branch, Division of LRS, is responsible for the evaluation of all applications for uranium recovery facility licenses received by the Bureau. Included are the preparation of the in-plant safety analysis reports and licensing documents.

The Standards Branch is responsible for developing and coordinating adoption of rules, regulatory guides, and license application guides related to uranium recovery facilities. This Branch also works with the Legal Division in coordinating all public notices and public hearings.

It is not anticipated that staff from other State agencies will be directly utilized in the preparation of environmental assessments nor in the licensing and inspection of uranium recovery facilities. However, three State agencies do work closely with the Bureau of Radiation Control by providing reference materials, and supplying review and comments on the applicant's environmental report, and the environmental assessment. These are the Texas Air Control Board (emission of non-radioactive pollutants into air), the Texas Department of Water Resources (emission of non-radioactive pollutants into water, aquifers, and wells used for in situ mining), and the Texas Railroad Commission (regulation of open pit mining and uranium exploration).

c. When a lead agency is designated, that agency should coordinate preparation of the statement. The other agencies involved should provide assistance with respect to their areas of jurisdiction and expertise. Factors relevant in obtaining assistance from other agencies include the applicable statutory authority, the time sequence in which the agencies become involved, the magnitude of their involvement, and relative expertise with respect to the project's environmental effects.

The Texas Department of Health is the agency which will prepare the environmental assessment. The Environmental Assessment Branch is responsible for the evaluation, analysis, coordination, and preparation of environmental assessments issued by the Bureau of Radiation Control. This Branch has persons with expertise in geology, hydrology, soil mechanics, meteorology, zoology, botany, computer science, chemistry, physics, radiation protection and dose assessment. This Environmental Assessment Branch's effort may be augmented with other

[1] The reference is to the Model Uranium Mill Radiation Control Act, a copy of which has been placed in the Commission's Public Document Room. Section 6 of the Model Act requires that, among other things, statutory authority must be enacted to make clear State authority to carry out the requirements of the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978, as amended. UMTRCA specifies that when States license an activity involving mill tailings, that has a significant impact on the human environment, they must prepare a written independent analysis of the impact of such license on the environment, including any activities conducted pursuant thereto.

Bureau personnel on a case-by-case basis, if needed.

In preparing the environmental assessment, the Division of Environmental Programs will conduct site visits, evaluate computer analyses, perform literature reviews, coordinate laboratory analysis of environmental samples, and perform field evaluations. A draft environmental assesment is prepared.

Similarly, the Division of Compliance and Inspection furnishes the Division of Licensing, Registration, and standards with recommendations concerning potential problem areas within the proposed facility. After the LRS considers all recommendations, an independent safety evaluation report is prepared. Following completion of the draft environmental assessment and the draft in-plant analysis, both documents are reviewed internally by Bureau Staff and the Legal Division taking into account comments, information, and data received from other State agencies. Final documents are then prepared. A flowchart has also been included in the proposal which describes coordination with the Department for processing uranium mill license applications.

d. For those areas in the environmental assessment where the State cannot identify a State agency having sufficient expertise to adequately evaluate the proposal or prepare an assessment, the State should have provisions for obtaining outside consulting services.

Due to the establishment of adequate expertise and resources in the Bureau of Radiation Control, it is not anticipated the Bureau will need consultants. However, monies are available for consultants if they are needed for evaluating any particular site or project.

Medical consultants recognized for their expertise in emergency medical matters relating to the intake of uranium and its diagnosis thereof associated with uranium mining and milling, should be identified and available to the State for advice and direct assistance.

Physician members of the Radiation Advisory Board serve as medical consultants to provide advice and direct assistance in emergency medical matters relating to radiation exposure including uranium intake.

4. Personnel

Personnel needed in the processing of the license applications can be identified or grouped according to the following skills: Technical, Administrative, and Support.

In order to met the requirements of UMTRCA, current indications are that 2–2.75 total professional person-years' effort is necessary to process and evaluate a new conventional mill license, in-situ license, or major license renewal. A complete review of in-plant safety, production of the environmental assessment, and consultant use are primary considerations in the total professional effort for each licensing case. With respect to clerical support, one secretary is required to process two conventional milling applications, including the pre-licensing and post-licensing phases. Legal support is also an essential element of the mill program, and the effort is set at a minimum of 1/2 staff-year. In addition, consideration must be given to such post-licenisng activities as issuance of minor amendments, mill inspections, and environmental monitoring. Professional staff effort is estimated at 0.5–1.0 person-years for each year of post-licensing activities.

a. We estimate the total professional and technical staff-years effort within the Bureau of Radiation Control directly responsible for regulation of uranium mills and mill tailings to be equivalent to 27 full-time staff members. A breakdown of professional personnel in each of the three Divisions has been provided along with job descriptions and duties for each position (including vacancies). Resumes describing the education, training, and experience of individual staff members were also submitted.

Details of staffing levels in each of the Bureau's three divisions are as follows:

(1) Division of Licensing, Registration and Standards. The organization of the Division of Licensing, Registration, and Standards, and the personnel assigned to each section within the division have been identified. Seven of eight professional positions having full-time or part-time responsibilities for regulation of uranium mills have been filled. These include two in the Industrial Operations Branch, two in the Uranium Program, one authorized but vacant position in the low-level waste program, and three in the Standards Branch.

(2) Division of Compliance and Inspection. The Division of Compliance and Inspection is organized into three Inspection and Enforcement Branches: Radioactive Materials, X-Ray/non-ionizing radiation, and Emergency Response. The Uranium Inspection Program and the Regional Inspection Programs are the two programs within the Radioactive Materials Inspection and Enforcement Branch responsible for conducting inspections at uranium mills. Currently, there are nine professional full-time staff members assigned to perform uranium mill compliance functions. The three members from the Uranium Inspection Program are responsible for performing on-site inspections. Inspectors from the Regional Inspection Program who are assigned to the regions in which certain uranium recovery facilities are located assist the three members during inspections of tailings areas and the environment. Also included in the uranium mill compliance program are three staff members from the Emergency Response Branch, an Administrator, and a Division Director.

(3) Division of Environmental Programs. Two branches in the Division of Environmental Programs are directly responsible for environmental monitoring and sampling at uranium mills. The Facility Surveillance Branch is responsible for implementation of the environmental surveillance program around milling facilities. There are three qualified staff members in this Branch. The basic functions of the Environmental Assessment Branch is to coordinate and prepare the environmental assessment. Personnel in this Branch have expertise in the areas of geology, hydrology, soil mechanics, meterology, computer science, radiation health, and dose assessments. A breakdown by program and associated personnel directly involved in preparation of an environmental assessment are: the Ecological Evaluations Program (3 members), the Hydrological and Geotechnical Program (2 members), and the Engineering Program (3 members). Directly supporting the Bureau and coordinating with the Division of Environmental Programs is the Bureau of Laboratories which provides five full-time environmental chemists (radiochemists) to process environmental samples.

b. Legal, Clerical, and Secretarial Support. Three full-time attorneys and two legal secretaries in the Environmental Law Branch of the Texas Department of Health's Legal Division are assigned to the Bureau of Radiation Control. They are responsible for providing legal assistance and advice on laws and regulations, issuance of public notices, and conducting public hearings.

c. Administrative Support. Senate Bills 480 and 375 established an 18-member Radiation Advisory Board whose members are appointed by the Governor. The Board acts in an oversight capacity to the Bureau to review and evaluate State policy relating to radiation sources. It also provides technical advice on matters related to regulation of sources of radiation. Within the Bureau, each division is staffed by at least one full-time individual who is responsible for

administrative functions. In addition, programs in the Office of Information, Education, and Administration also provide administrative support to the Radiation Control Bureau in the following areas: public information, coordination of training for Bureau staff, maintaining license registration files, and procurement of equipment and supplies. Assisting the Bureau in maintaining the budget and in collection of surety arrangements for uranium mills (required by regulation) is the Financial Analysis Program.

5. Functions to be Covered

The State should develop procedures for licensing, inspection, and preparation of environmental assessments.

Evaluation of an application for a uranium milling license is performed against appropriate State statutory and regulatory authority, and licensing guides. A list of NRC and State regulatory guides utilized in evaluating license applications has been furnished. The in-plant safety analysis and review of the applicant's enviromental report are performed concurrently.

In regard to the in-plant safety review, the Compliance and Inspection Division conducts a preliminary evaluation of the applicant's proposed facility, equipment, administrative procedures, radiation safety program, environmental monitoring program, and emergency procedures. Findings are then forwarded to the Division of Licensing, Registration and Standards for consideration in the safety analysis report.

A procedural flow diagram for processing the environmental report including interdivision coordination has been furnished. If the findings of the preliminary review are adequate, copies of the report are forwarded to outside State agencies for review and comment. At the same time, the Division of Environmental Programs initiates preparation of the environmental assessment pursuant to the requirements of UMTRCA and State regulation utilizing appropriate licensing guides.

Inspections of all byproduct material licensees are conducted by Texas in accordance with general inspection procedures. These procedures, which are common to all routine inspections, have been supplemented by instructions specific to inspections at mills.

Compliance and Inspection Division policy is to perform unannounced inspections. The functions of all State inspectors are to prepare for inspections, conduct on-site inspections, prepare a written report of the inspection, prepare enforcement letters, and review corrective actions. For uranium mill compliance functions, inspectors assigned to the uranium inspection program, in cooperation with regional inspectors, are required to review and evaluate all aspects of mill operations and tailings control. During these inspections, personnel utilize standard inspection forms supplemented by NRC inspection guides. Copies of forms and guides have been furnished with the proposal. The frequency for conducting on-site uranium mill inspections is on an annual basis.

An environmental sampling program which includes obtaining samples of groundwater, surface water, vegetation, soil, air, and processing of thermoluminescent dosimeters (TLD) is also conducted by the uranium mill inspectors on a quarter basis. Results of inspection findings are submitted to the supervisory staff for appropriate technical consultation and review.

Section 274o.(3)(c) of the Atomic Energy Act requires the State to prepare a written analysis of the impact on the environment with respect to uranium mill tailings from proposed operations. Sections 4 and 11A. of the Texas Radiation Control Act, as amended, indicate that the Texas Radiation Control Agency will act as lead agency to independently prepare the environmental impact statement (EIS). Procedural requirements specific to preparing, coordination, organizing, and completing the EIS and issuance of specific licenses for uranium milling operations are contained either in the Act or recently adopted Part 43 of the Texas regulations.

As a supplement to the reporting requirements required by regulations or license conditions, the State should require the licensee to submit in writing on a semi-annual schedule reports specifying the quantity of each of the principal radionuclides released to unrestricted areas in liquid and gaseous effluents from all pathways during the previous six months of operations. This data shall be reported in a manner that will permit the regulatory agency to confirm annual radiation doses to nearest individuals are within the requirements of 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations."

As previously noted, the Facility Surveillance Branch is responsible for designing and implementing a routine environmental surveillance program around each uranium recovery facility and conducting any special environmental surveillance project that may be needed. This Branch is also responsible for the operation of an environmental TLD monitoring system and verification of the licensee's environmental monitoring data. Dose assessments have been made at both conventional mills through utilization of computer models. The State's confirmation of radiation doses to nearest receptors from the conventional mills are determined to be within the limits of 40 CFR Part 190. Due to the absence of yellowcake dryer circuits, environmental doses may be considered to be negligible from in-situ uranium recovery operations.

6. Instrumentation

The State should have available both field and laboratory instrumentation sufficient to ensure the licensee's control of materials and to validate the licensee's measurements.

The Bureau of Radiation Control has utilized a portion of funds authorized under its UMTRCA grant to purcahse field equipment for monitoring and surveillance purposes. The list submitted in the proposal shows radiation detection instruments and environmental sampling capability of equipment available at the Bureau's headquarters and regional offices. A separate list of instruments each inspector uses in the field to conduct radiation surveys for identification of alpha, beta and gamma emitting isotopes, and equipment for sampling environmental media in and around milling facilities has also been included. Essential equipment has been duplicated and ensures full-time availability of appropriate instrumentation and equipment for inspection purposes. Detection capabilities of equipment include identification and analysis of alpha, beta and gamma emitters in the uranium decay chain (including Pb–210, Rn–222, RA–226, Th–230, and U–238) in solids, liquids, and gases. Commonly analyzed sample media includes smear samples, soil, water, vegetation, milk, and filter media.

All radiation instrumentation is calibrated within the Bureau according to written procedures. Standard radiation sources traceable to the U.S. National Bureau of Standards are used for calibration. In addition to internal quality control/quality assurance procedures, the Bureau of Laboratories also participates in the U.N. Environmental Protection Agency's Inter-Laboratory Quality Assurance Program.

Supplementing the radiochemical analyses, the Bureau of Laboratories can also provide standard chemical analysis for trace elements, inorganics, organics,

etc. As the primary laboratory for water analysis under contract from the Texas Department of Water Resources, the Bureau of Laboratories conducts analyses of all water samples for the State required under U.S. Environmental Protection Agency regulations.

7. Conclusion

Based upon the foregoing, the NRC staff concludes that the State of Texas has met the criteria for an amended agreement.

III. Amendment to Agreement Between the United States Nuclear Regulatory Commission and the State of Texas for Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the State Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended

Whereas, the United States Atomic Energy Commission[1] (herinafter referred to as the Commission) entered into an Agreement (hereinafter referred to as the Agreement of January 10, 1963) with the State of Texas under section 274 of the Atomic Energy Act of 1954, as amended (hereinafter referred to as the Act), which Agreement became effective on March 1, 1963, and provided for discontinuance of the regulatory authority of the Commission within the State under Chapters 6, 7, and 8, and section 161, of the Act with respect to byproduct materials as defined in section 11e.(1) of the Act, source materials, and special nuclear materials in quantities not sufficient to form a critical mass; and

Whereas, it is necessary to enter into this amendment in order to implement new requirements of section 274 of the Act which become fully effective on November 8, 1981; and

Whereas, the Commission found on that the program of the State for the regulation of materials covered by this amendment is in accordance with the requirements of section 274o. of the Act and in all other respects compatible with the Commission's program for the regulation of such materials and is adequate to protect the public health and safety; and

Whereas, this amendment is entered into pursuant to the provisions of the Atomic Energy Act of 1954, as amended;

Now, Therefore, it is hereby agreed between the Commission and the Governor of the State, acting on behalf of the State, as follows:

Section 1. Article I of the Agreement of January 10, 1963, is amended by adding "as defined in section 11e.(1) of the Act;" after the words "byproduct materials" in paragraph A., by redesignating paragraphs B. and C. as paragraphs C. and D., and by inserting the following new paragraph immediately after paragraph A.:

"B. Byproduct materials as defined in section 11e.(2) of the Act;".

Section 2. Article II of the Agreement of January 10, 1963, is amended by inserting "A." before the words "This Agreement," by redesignating paragraphs A. through D. as subparagraphs 1. through 4., and by adding the following at the end thereof:

"B. Notwithstanding this Agreement, the Commission retains the following authorities pertaining to byproduct materials as defined in section 11e.(2) of the Act:

"1. Prior to the termination of a State license for such byproduct material, or for any activity that results in the production of such material, the Commission shall have made a determination that all applicable standards and requirements pertaining to such material have been met.

"2. The Commission reserves the authority to establish minimum standards governing reclamation, long term surveillance or maintenance, and ownership of such byproduct material. Such reserved authority includes:

"a. The authority to establish terms and conditions as the Commission determines necessary to assure that, prior to termination of any license for such byproduct material, or for any activity that results in the production of such material, the licensee shall comply with decontamination, decommissioning, and reclamation standards prescribed by the Commission; and with ownership requirements for such materials and its disposal site;

"b. The authority to require that prior to termination of any license for such byproduct material or for any activity that results in the production of such material, title to such byproduct material and its disposal site be transferred to the United States or the State at the option of the State (provided such option is exercised prior to termination of the license);

"c. The authority to permit use of surface or subsurface estates, or both, of the land transferred to the United States or the State pursuant to subparagraph B.2.b. of this Article;

"d. The authority to require the Secretary of the Department of Energy, other Federal agency, or State, whichever has custody of such byproduct material and its disposal site, to undertake such monitoring, maintenance, and emergency measures as are necessary to protect the public health and safety, and other actions as the Commission deems necessary; and

"e. The authority to enter into arrangements as may be appropriate to assure Federal long term surveillance or maintenance of such byproduct material and its disposal site on land held in trust by the United States for any Indian tribe or land owned by an Indian tribe and subject to a restriction against alienation imposed by the United States.".

Section 3. Article III of the Agreement of January 10, 1963, is amended by inserting "otherwise licensable by the State under Article I of this Agreement" after the words "special nuclear material."

Section 4. Article VII of the Agreement of January 10, 1963, is amended by inserting "all or part of" after the words "terminate or suspend," by inserting "(1)" after the words "finds that," and by adding at the end before the period the following:

", or (2) the State has not complied with one or more of the requirements of section 274 of the Act. The Commission shall periodically review this Agreement and actions taken by the State under this Agreement to ensure compliance with the provisions of section 274 of the Act.".

Section 5. Article VIII of the Agreement of January 10, 1963, is amended by redesignating it Article IX and by inserting a new Article VIII as follows:

"In the licensing and regulation of byproduct material as defined in section 11e.(2) of the Act, or of any activity which results in production of such material, the State shall comply with the provisions of section 274o. of the Act. If, in such licensing and regulation, the State requires financial surety arrangements for the reclamation of long term surveillance or maintenance of such material,

"A. The total amount of funds the State collects for such purposes shall be transferred to the United States if custody of such material and its disposal site is transferred to the United States upon termination of the State license for such material or any activity which results in the production of such material. Such funds include, but are not limited to, sums collected for long term surveillance or maintenance. Such funds do not, however, include monies held as surety where no default has occurred and the reclamation or other bonded activity has been performed; and

"B. Such State surety or other financial requirements must be sufficient to ensure compliance with those standards established by the Commission pertaining to bonds, sureties, and financial arrangements to ensure adequate reclamation and long term management of such byproduct material and its disposal site.".

This amendment shall become effective on .

Done at Austin, State of Texas, in triplicate, this day of 198 .

For the State of Texas.

William P. Clements, Jr.,

Governor.

Done at Washington, District of Columbia, in triplicate, this day of 198 .

For the United States Nuclear Regulatory Commission.

Nunzio J. Palladino,

Chairman.

Dated at Bethesda, Maryland, this 2nd day of December, 1981.

For the United States Nuclear Regulatory Commission.

G. Wayne Kerr,

Director, Office of State Programs.

[FR Doc. 81-38079 Filed 12-7-81; 8:45 am]

BILLING CODE 7590-01-M

[1] Under the provisions of the Energy Reorganization Act of 1974, the regulatory functions formerly carried out by the Atomic Energy Commission are not carried out by the Nuclear Regulatory Commission as of January 19, 1975.

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees

and of the full Committee, the following preliminary schedule reflects the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published November 25, 1981 (46 FR 57792). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. Those Subcommittee meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the January 1982 ACRS full Committee meeting can be obrained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634–3267, ATTN: Barabara Jo White) between 8:15 a.m. and 5:00 p.m., Eastern Time.

ACRS Subcommittee Meetings

**Human Factors,* January 5, 1982, Washington, DC. The Subcommittee will continue its review of documents produced by NRC's Division of Human Factors Safety including NUREG–0700, "Guidelines for Control Room Design Review", NUREG–0801, "Evaluation Criteria for Detailed Control Room Design Review", and NUREG–0835, "Human Factors Acceptance Criteria for the Safety Parameter Display Systems".

**Reliability and Probabilistic Assessment,* January 5, 1982. Washington, DC. The Subcommittee will review portions of the NRC FY 1983 Safety Research Program related to Reliability and Probabilistic Assessment. Notice of this meeting was published November 25.

Nuclear Safety Research Program, January 6, 1982, Washington, DC. The Subcommittee will discuss the FY 1983 NRC Safety Research Program budget and the Draft ACRS Report to Congress on the NRC FY 1983 Safety Research Program. Notice of this meeting was published November 25.

**Advanced Reactors,* January 6, 1982, Washington, DC. The Subcommittee will discuss the FY 1983 NRC Safety Research Programs pertaining to advanced reactors.

**Advanced Reactors,* January 21 and 22, 1982, Argonne, IL. The Subcommittee will continue discussion regarding possible design considerations, issues, and criteria for future commercial advanced reactors and plans to prepare a report to submit to the ACRS.

**Fluid Dynamics,* January 22, 1982, Los Angeles, CA. The Subcommittee will continue to review the Mark III containment modifications and discuss status of Unresolved Safety Issues (USI) on Mark I and II containments.

**Joint Electrical Systems and Emergency Core Cooling Systems,* January 23,1982, Los Angeles, CA. The Subcommittee will continue to review the NRC- and Industry-sponsored research on core water level indicator instruments and the implementation of core water level indicator installation requirements.

**Extreme Esternal Phenomena,* January 28 and 29, 1982, Reston, VA. The Subcommittee will review the status of NRC's research program on geology and seismology and the status of research being performed outside of the NRC programs.

**Clinch River Breeder Reactor,* February 2 and 3, 1982, Washington, DC. The Subcommittee will review the Clinch River Breeder Reactor program status.

**Regulatory Activities,* February 3, 1982, Washington, DC. The Subcommittee will discuss proposed Regulatory Guides and Regulations.

**Qualification Program for Safety Related Equipment,* February 10, 1982, Washington, DC. The Subcommittee will review the NRC Equipment Qualification Program Plan as outlined in SECY–81–504.

**Reactor Radiological Effects,* February 11, 1982, Washington, DC. The Subcommittee will discuss occupational radiation exposure at BWR facilities.

**Metal Components and Waste Management,* February 12, 1982, Washington, DC. The Subcommittees will review the contractor technical capability and objectives of the requests for proposals on long-term performance of materials used for high-level radioactive waste packaging.

**Safety Philosophy Technology and Criteria,* Date to be determined, Washington, DC. The Subcommittee will review the licensee's proposed Systems Interaction Study for the Indian Point Nuclear Power Plant.

**Watts Bar Units 1 and 2,* Date to be determined, Knoxville, TN. The Subcommittee will review the application of the Tennessee Valley Authority for an operating license for Units 1 and 2.

**Waterford Steam Electric Station,* Date to be determined, Washington, DC. The Subcommittee will review the Waterford organization, staffing, and training programs.

**Clinton Power Station Units 1 and 2,* Date to be determined, Decatur, IL (Tentative). The Subcommittee will review the application of the Illinois Power Company for an operating license for Units 1 and 2.

**Zimmer Nuclear Power Station,* Date to be determined, Washington, DC. The Subcommittee will review the safety significance of quality assurance problems associated with plant construction which resulted in a $200,000 fine by NRC/Inspection and Enforcement (I&E).

**Byron Station Units 1 and 2,* Date to be determined, Byron, IL. The Subcommittee will review the application of the Commonwealth Edison Company for an operating license for Units 1 and 2.

**Babcock and Wilcox,* March 3, 1982, Washington, DC. The Subcommittee will explore with B&W changes that have been made to the integrated control system (ICS) since the Three Mile Island Unit 2, Crystal River 3, and Rancho Seco transients. Other improvements to the plants and plant operations will also be explored.

**Clinch River Breeder Reactor and Site Suitability,* Date to be determined, Washington, DC. The Subcommittee will begin site suitability review for the Clinch River Breeder Reactor.

**Reliability and Probabilistic Assessment,* Date to be determined, Washington, DC. The Subcommittee will review the draft Commission Policy Statement on Safety Goals.

ACRS Full Committee Meetings

January 7–9, 1982: Items are *tentatively* scheduled.

A. *NRC Safety Research Programs and Associated Budget for FY 1983*—Report to the U.S. Congress.

*B. *Clinch River Breeder Reactor*—Briefing regarding project status.

*C. *PWR Standard Nuclear Steam Supply Systems*—Briefing regarding changes in the standard Westinghouse NSSS resulting from Three Mile Island Unit 2 lessons learned.

*D. *BWR Standard Nuclear Steam Supply Systems*—Briefing regarding changes in the standard General Electric NSSS resulting from Three Mile Island Unit 2 lessons learned.

*E. *ACRS Subcommittee Reports*—Reports of current subcommittee activity concerning safety related matters,

including consideration of human factors in the design and operation of nuclear facilities, consideration of degraded cores in the design and operation of nuclear power plants, and foreign nuclear regulatory programs.

*F. *Future Committee Activities*—Discuss scope and schedule for anticipated ACRS activities.

February 4–6, 1982: Agenda to be announced.

March 4–6, 1982: Agenda to be announced.

Dated: December 17, 1981.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 81-36481 Filed 12-21-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-275 OL; 50-323 OL]

Pacific Gas & Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2); Hearing

December 16, 1981.

Notice is hereby given of a hearing on the application of Pacific Gas and Electric Company (Applicant) for an operating license for Diablo Canyon Units 1 and 2.

The hearing will begin, as agreed to by the parties, on January 19, 1982 at 9:00 a.m. It will continue on week days to 12:00 noon on Saturday, January 30, 1982, if necessary.

These hearings will be held at the following locations:

January 19 and 20, 1982:
Civic Association Building
191 San Miguel
Avila Beach, California

January 21, 22, 23, 25, 26, 27, 28, 29 and 30, 1982:
Bay View Room
San Luis Bay Inn
Avila Beach, California

The Public is invited to attend.

No oral statements will be permitted. However, written statements relating to the question of licensing the operation of Diablo Canyon Units 1 and 2 will be received by the Clerk and considered by the Board and made part of the record.

It is so ordered.

Issued and entered at Bethesda, Maryland, this 16th day of December 1981.

The Atomic Safety and Licensing Board.

Glenn O. Bright,

Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-311]

Public Service Electric & Gas Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to Facility Operating License No. DPR-75, issued to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company and Atlantic City Electric Company (the licensees), which revised Technical Specifications for operation of the Salem Nuclear Generating Station, Unit No. 2 (the facility) located in Salem County, New Jersey. The amendment is effective as of November 9, 1981.

The amendment was authorized by telephone on November 9, 1981 and was confirmed by letter on the same date. The amendment changes an Action Statement for the Emergency Core Cooling Systems to permit an additional 48 hours to complete repairs to No. 22 Charging Pump and, upon satisfactory verification of pump characteristics, permits the required flow balance testing to be conducted during the next time the unit is in COLD SHUTDOWN. The amendment was authorized on an expedited basis to maintain the plant at a steady-state condition and avoid a shutdown transient shown by our evaluation to be unnecessary but required by Technical Specifications unless amended.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the request for amendment dated November 9, 1981, as confirmed by letters dated November 9, 1981 and November 18, 1981, (2) the Commission's letter dated November 9, 1981, authorizing the Technical Specification change, (3) Amendment No. 3 to License No. DPR-75, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Salem Free Public Library, 112 West Broadway, Salem, New Jersey. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of December, 1981.

For the Nuclear Regulatory Commission.

Steven A Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 10.6, Revision 1, "Guide for the Preparation of Applications for Use of Sealed Sources and Devices for Performing Industrial Radiography," provides general guidance for the preparation of an application for a Nuclear Regulatory Commission license to possess and use sealed sources and devices for performing industrial radiography. The guide has been revised as result of public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C. Copies of active guides may be purchased at the current

Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office. Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

(5 U.S.C. 552(a))

Dated at Silver Spring, Maryland this 16th day of December 1981.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 12112; 812-5007]

American General Corp. and American General Harbor Fund, Inc.; Filing of Application

December 16, 1981.

Notice is hereby given that American General Corporation ("American General") and American General Harbor Fund, Inc. ("Fund"), 2727 Allen Parkway, Houston, Texas 77019, a Maryland corporation which is an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act") (hereinafter the Fund and American General are collectively referred to as the "Applicants"), filed an application on November 12, 1981, and an amendment thereto on December 15, 1981, pursuant to Section 17(b) of the Act for an order of the Commission exempting from the provisions of Section 17(a) of the Act a proposed sale of 50,000 shares of $2.75 Cumulative Convertible Class A Preferred Stock of Credithrift Financial, Inc. ("Credithrift"), by the Fund to American General. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

American General, a Texas corporation, is primarily engaged through subsidiaries in the life insurance and property-casualty insurance business and other financial services activities. American General and those of its subsidiaries for which its investment department makes investment decisions ("AG Group") beneficially owned, as of October 31, 1981, 1,016,900 shares of common stock or approximately 9.7% of the outstanding voting securities of Credithrift. On the same date, the Fund, whose principal investment objective is to provide income, reasonable protection of capital and potential growth of capital by investing principally in senior securities of other corporations, beneficially owned 50,000 shares of $2.75 Cumulative Convertible Class A Preferred Stock of Credithrift ("Credithrift Preferred Stock").

The AG Group does not include the investment companies, including the Fund, advised by American General Capital Management Inc. ("AGCM"), a wholly-owned subsidiary of American General. Applicants represent that all investment decisions on behalf of the Fund are made independently of the decisions made by American General for the AG Group. Additionally, Applicants state that, other than through its power to vote the Credithrift shares beneficially owned by the AG Group, American General does not influence or exercise any control over Credithrift nor are any of its officers, directors, or substantial stockholders officers or directors of Credithrift.

On October 29, 1981, American General and Credithrift entered into a Plan and Agreement of Reorganization ("Plan") and a Stock Option Agreement ("Option"). The Plan provides for a merger of a newly-formed wholly owned subsidiary of American General into Credithrift, whereby Credithrift will become a wholly owned subsidiary of American General. Pursuant to the merger, holders of common stock of Credithrift and holders of Credithrift Preferred Stock would become holders of 11% Convertible Debentures due 2007 of American General. Each share of Credithrift Preferred Stock will be converted into a principal amount of such debentures equal to $32.05 plus accrued dividends on such share to the date of the merger. The consummation of the contemplated transaction is subject to certain conditions, including the approval of Credithrift shareholders. In consideration of American General's entering into the Plan, Credithrift has entered into the Option with American General, pursuant to which Credithrift has granted to American General an option to purchase up to an additional 1,894,294 shares of Credithrift common stock, representing 16% of the shares of such stock issued and outstanding on the date of such agreement at a price per share equal to the greater of $12.50 or the closing price of such stock on the New York Stock Exchange on the day prior to exercise. Under certain circumstances, American General may be required to pay additional consideration under the Option and has granted Credithrift the right of first refusal on certain resales of such shares.

On November 9, 1981, American General and the Fund executed an agreement ("Agreement") for the purchase by American General of Credithrift Preferred Stock held by the Fund ("Shares") at a price per share equal to the average of the closing sale prices for the Shares on the New York Stock Exchange during the five business days preceding the closing date of the purchase. The Agreement also provides that the consideration paid by American General for the Shares is subject to subsequent increase to the highest of (i) the $32.05 per share price which other holders receive under the Plan described above, (ii) the price paid by American General or any entity controlled by it for any shares of Credithrift Preferred Stock, or (iii) the price received by American General or any entity controlled by it, during the period of one year following the purchase of the Shares from the Fund, for any shares of Credithrift Preferred Stock. Under the Agreement, the Fund retains the right to sell the Shares or any portion thereof, in its discretion, to any person, at any time prior to the issuance of the last of certain requisite regulatory approvals.

Section 17(a) of the Act, in pertinent part, provides that it shall be unlawful for any affiliated person of a registered investment company, or any affiliated person of a registered investment company, or any affiliated person of such a person, knowingly to sell to or to purchase from such registered investment company any security or other property subject to certain exceptions not relevant here. Section 17(b) of the Act provides that the Commission, upon application, shall exempt a proposed transaction from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company involved and with the general purposes of the Act. Under Section 2(a)(3) of the Act, an investment adviser to an investment company is an affiliated person of such investment company, and anyone owning more than 5% of the adviser's outstanding voting securities is an affiliated person of the adviser. Accordingly, since American General owns 100% of the common stock of AGCM, investment adviser to the Fund, American General is an affiliated person of an affiliated person of the Fund, and

the proposed sale of Credithrift Stock by the Fund to American General falls within the provisions of Section 17(a) of the Act.

Applicants submit that the proposed transaction is consistent with the standards set forth in Section 17(b) of the Act and with the overall policies and purposes of the Act. The Agreement, accoding to Applicants, is designed to enable the Fund to receive the market price of its shares plus the potential increase in value of those shares to American General for up to one year and it enables the Fund to retain the benefits of any appreciation of the Credithrift Preferred Stock under the circumstances described above without being subject to risk of loss in the event of a decline in the price of the stock. In addition, Applicants represent that if the requisite two-thirds approval by the holders of the outstanding Credithrift Preferred Stock is not achieved at the special meeting of Credithrift stockholders scheduled for January 7, 1982, Credithrift intends to adjourn the special meeting in order to call the Credithrift Preferred Stock for redemption on a redemption date prior to the effective date of the merger. The Credithrift Preferred Stock is redeemable at $27.48 per share plus accrued dividends. Therefore, Applicants state that if the Fund held Credithrift Preferred Stock called for redemption, it would be forced to elect between receiving $27.48 in cash or converting into Credithrift common stock. Applicants assert that it is in the best interests of the Fund to receive the then current market price of the Credithrift Preferred Stock (the closing price on the New York Stock Exchange on December 10, 1981 was $30 per share) plus the subsequent price protection described above, since if the merger is consummated the Fund is guaranteed a minimum cash consideration equal to $32.05 per share of Credithrift Preferred Stock.

Applicants assert that the Agreement was reached between American General and the Fund on an arms-length basis, and was negotiated on behalf of the Fund by its outside counsel under the direction of the Fund's Executive Committee without the participation of directors affiliated with American General. The offer by American General to pay cash for the Fund's holdings of Credithrift stock is, according to Applicants, entirely consistent with the Fund's investment objectives and policies and gives AGCM as the Fund's adviser complete flexibility as to investment of the proceeds of the sale. Additionally, Applicants contend that the American General debentures that the Fund would own if it participated in the merger may be an inappropriate investment for the Fund as they would represent an investment in securities of an affiliated person of the Fund.

Notice is further given that any interested person may, not later than 12:00 noon, January 7, 1982, submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[SBLC No. 02/B-0029]

C.I.T. Funding Corp.; Filing of Application for Eligibility Determination as a Small Business Lending Company

An Application for Eligibility Determination as a Small Business Lending Company has been filed by C.I.T. Funding Corporation, 650 Madison Avenue, New York, New York 10022, with the Small Business Administration pursuant to § 120.4(b) of SBA Regulations (13 CFR 120.4(b)(1981)), promulgated under the Small Business Act.

As a Small Business Lending Company (SBLC), under subsection (b) mentioned above, the Applicant will be engaged solely in the making of loans to small business concerns, in participation with SBA, and in accordance with applicable SBA Regulations; and, it will be subject to supervision and examination by the SBA.

The Applicant is incorporated under the laws of the State of New York, and it will commence operations with an initial capitalization of $500,000. It intends to conduct its operations, initially, in the State of New York, later expanding nationwide.

The Officers and Directors of the Applicant are:

Name and Title

Leon G. Pappas, #5 250 North Forsyth, Clayton, Missouri 63105—President
Fred F. Harrison, 1446 White Hill Road, Yorktown, New York 11566—Vice President
Charles H. Schumacher, 1517 Stevans Avenue, Merrick, New York 11566—Secretary-Treasurer
Robert B. Goeller, 176-56 80 Road, Jamaica, New York 11743—Director
Charles E. Stealey, 209 W. Shore Drive, Massapequa, New York 11758—Director
Gerald S. Kessler, 10 Gloria Lane, Huntington, New York 11743—Director

C.I.T. Financial Corporation, 650 Madison Avenue, New York, New York 10022, is the parent and owns 100 percent of Applicant's outstanding common stock. The parent, in turn, is wholly owned by R.C.A. Corporation, 30 Rockefeller Plaza, New York, New York.

Matters involved in SBA's consideration of the Application include the general business reputation and character of management, and the probability of successful operation of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Act and the Regulations promulgated thereunder.

Notice is hereby given that all interested parties may, not later than January 6, 1982 submit to SBA written comments on the proposed Applicant and/or its management. Any such communication should be addressed to: Wayne S. Foren, Director, Office of Lender Relations and Certification, Small Business Administration, 1441 L Street NW., Room 720, Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in New York City, New York, as well as in the Eastern Regional Edition of *The Wall Street Journal.*

BILLING CODE 8025-01-M

[Proposed License No. 10/10-0176]

Clifton Capital Corp.; Proposed License No. 10/10-0176; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1981)), under the name of the Clifton Capital Corporation, 1408 Washington Building, Tacoma, Washington 98402, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 et seq.) and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders of the Applicant are as follows:

James H. Wiborg, 6608 North 46th Street, Tacoma, Washington 98407—President, Treasurer, Director, 50 percent preferred
Ann R. Wiborg, 6608 North 46th Street, Tacoma, Washington 98407—Director, 50 percent preferred
Katherine W. Addleman, 2918 North Alder, Tacoma, Washington 98407—Director, 25 percent common
David R. Addleman, 2918 North Alder, Tacoma, Washington 98407—Director
Mary Wiborg Green, 6701 North 49th, Tacoma, Washington 98407—Director, 25 percent common
Lawrence J. Green, 6701 North 49th, Tacoma, Washington 98407—Director
Caroline Wiborg Haydu, 51 Krabs Road, Plainsboro, New Jersey 08536—Director, 25 percent common
Joseph A. Haydu, Jr., 51 Krabs Road, Plainsboro, New Jersey 08536—Director
John S. Wiborg, 1901 North Alder, Tacoma, Washington 98406—Vice President, Director, 25 percent common
Kristy Munson Wiborg, 1901 North Alder, Tacoma, Washington 98406—Director
James H. Morton, 8402 Cabrini Lane NW., Gig Harbor, Washington 98335—Secretary, Director
Gary B. Bland, P.O. Box 3707, M/S 10-15, Seattle, Washington 98124—Director.

There will be two classes of stock authorized, four thousand shares of common stock and six thousand shares of preferred stock. Initially all of the common stock will be issued and 5,000 shares of the preferred stock will be issued. The initial private capital will be $500,004. Applicant proposes to conduct its operations principally in the State of Washington.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Acting Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in a newspaper of general circulation in Tacoma, Washington.

BILLING CODE 8025-01-M

[Proposed License No. 09/09-5298]

Dime Investment Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102), under the name of Dime Investment Corporation, 422 South Western Avenue, Los Angeles, California 90004, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders of the applicant are as follows:

Chun Y. Lee, 424 Westmoreland Avenue, Los Angeles, California 90004—President, Business Manager, Director and 50% Stockholder
Shee Y. Khyur, 422 South Western Avenue, Los Angeles, California 90004—Chief Financial Officer, Director and 40% Stockholder
Hyo Shick Pai, 1914 North Hobart Blvd., Los Angeles, California 90027—Secretary, Director and 10% Stockholder

The Applicant, a California Corporation, will begin operations with $500,000 paid-in capital and paid-in surplus. The applicant will conduct its activities principally in the State of California.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose particiaption in the free enterprise system is hampered because of social or economical disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operations of the new company in accordance with the Act and Regulations.

Notice is hereby given that any person may not later than January 6, 1982, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Acting Associate Administrator for Finance & Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Los Angeles, California.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: To be published.

STATUS: Closed/open meetings.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Rescheduling/additional items.

A closed meeting scheduled for Tuesday, December 22, 1981, at 10 a.m. has been rescheduled for 9:00 a.m.

An open meeting scheduled for Wednesday, December 23, 1981, at 10 a.m. has been rescheduled for 9:00 a.m. and includes the following items:

1. Consideration of whether to grant the appeal of Edward L. Machulak from the determination of the Freedom of Information Act Officer denying him access to certain documents concerning Commerce Group Corp. pursuant to Exemptions 4, 5 and 7(C) of the Freedom of Information Act. For further information, please contact Giles S. Attia at (202) 272–2448.

2. Consideration of what response to make to the request of the Senate Governmental Affairs Committee for the Commission's comments on S. 1601, the "Regulatory Mediation Act of 1981." For further information, please contact Ann C. Stansbury at (202) 272–2427.

Chairman Shad and Commissioners Loomis, Evans, Thomas, and Lonstreth determined by vote that Commission business required consideration of these matters and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Arthur C. Delibert at (202) 272–2467.

Office of Leasing Policy Development

Diligence Requirements for Federal Coal Leases; Proposed Rulemaking

DEPARTMENT OF ENERGY

Office of Leasing Policy Development

10 CFR Part 378

[Docket No. LPD 81-2]

Diligence Requirements for Federal Coal Leases

AGENCY: Department of Energy.

ACTION: Proposed rule.

SUMMARY: This proposed regulation establishes coal diligence requirements that would be applicable to all Federal coal leases and logical mining units (LMU), including existing leases and LMU's. The regulation would supersede the existing Department of Interior (DOI) diligence requirements governing production from Federal coal leases.

Leases issued prior to August 4, 1976, the date of passage of the Federal Coal Leasing Amendments Act of 1976, would be treated differently under this regulation than leases issued on or after August 4, 1976. As under current DOI regulations leases issued on or after August 4, 1976, would be required to produce coal in "commercial quantities" within ten years from the effective date of the lease to meet the requirement for diligent development. However, the proposal would generally relax the current June 1, 1986 deadline by which leases issued prior to August 4, 1976, must be brought into commercial production or be terminated. Those pre-August 4, 1976 leases need not produce coal in commercial quantities until ten years after the effective date of the first lease readjustment occurring after August 4, 1976. The holders of pre-August 4, 1976 leases would also be given the option to elect to be governed by the minimum production clause of the lease until the first lease readjustment, instead of by the provisions for diligent development and continued operation proposed by this regulation. The definition of "commercial quantities" would be changed to mean the production of only one percent of the coal reserves or LMU coal reserves for pre-August 4, 1976 leases, instead of two and one-half percent, and remain one percent for leases issued on or after August 4, 1976. Once a lease or LMU has achieved diligent development, it would have to be maintained in continued operation each year thereafter. The proposed requirement for continued operation carries forward the existing DOI regulatory provision.

Under this proposed regulation, individual leases would no longer be designated automatically as LMU's but would be considered for inclusion in an approved LMU on a lease-by-lease basis by DOI under the applicable criteria and procedures adopted by DOI. The time in which an approved LMU must produce coal in commercial quantities depends upon the issuance dates of the leases that comprise the LMU.

This proposal also specifies (1) certain requirements for the filing of a resource recovery and protection plan; (2) circumstances under which coal operations may be suspended and the impact of that suspension on the diligence requirements; (3) the conditions under which leases would be terminated or may be cancelled for failure to comply with certain diligence requirements; (4) the conditions under which advance royalties may be accepted in lieu of meeting the requirement for continued operation and the method for calculating those advance royalties; and (5) the method for crediting production from a lease or LMU toward the requirement for diligent development.

This regulation is being issued pursuant to the Department of Energy's rulemaking authority in section 302(b) of the Department of Energy Organization Act.

DATES: Written comments are due not later than February 22, 1982, at 4:00 p.m. A public hearing will be held in Denver, Colorado on February 17, 1982 and will begin at 9:30 a.m. Request to speak at the public hearing must be received by February 10, 1982.

ADDRESSES: All written comments and requests to speak at the Denver, Colorado hearing should be sent to: Office of Public Hearings Management, Economic Regulatory Administration, Box YB (Docket No. LPD 81-2), 2000 M Street, NW., Washington, D.C. 20461. The hearing will be held in the Post Office Auditorium, Room 269, 1823 Stout Street, Denver, Colorado. 80202.

I. Introduction

Sections 302 and 303 of the Department of Energy Organization Act (DOE Act, Pub. L. 95-91, 91 Stat. 578-580 (42 U.S.C. 7152, 7153)) transferred to the Secretary of Energy certain authorities previously held by the Secretary of the Interior under the Outer Continental Shelf Lands Act, the Mineral Lands Leasing Act, the Mineral Leasing Act for Acquired Lands, the Geothermal Steam Act of 1970, and the Energy Policy and Conservation Act. Specifically, with respect to Federal leases issued under these statutes, section 302(b) of the DOE Act authorizes the Secretary of Energy to promulgate regulations which relate to the: (1) Fostering of competition for Federal leases (including, but not limited to, prohibition on bidding for development rights by certain types of joint ventures); (2) implementation of alternative bidding systems authorized for the award of Federal leases; (3) establishment of diligence requirements for operations conducted on Federal leases (including, but not limited to, procedures relating to the granting or ordering by the Secretary of the Interior of suspension of operations or production as they relate to such requirements); (4) setting rates of production for Federal leases; and (5)

specifying the procedures, terms and conditions for the acquisition and disposition of Federal royalty interests taken in kind.

In addition, section 302(c) of the DOE Act authorizes the Secretary of Energy to establish rates of production for Federal leases, and section 303(c)(1) permits the Secretary to disapprove any term or condition of a Federal lease that relates to DOE's authority to promulgate regulations under section 302(b).

The Secretary of the Interior was consulted during the preparation of these proposed regulations and afforded an opportunity to comment formally, as required by section 303(b) of the DOE Act. The Secretary of the Interior has provided comments which were considered in drafting these regulations.

In separate rulemaking projects, DOI is proposing amendments to the Coal Management rules presently found at 43 CFR Part 3400 and the Coal Exploration and Mining Operations rules presently found at 30 CFR Part 211. The changes being proposed by DOI reflect the amendments to the coal diligence regulations proposed here.

II. Federal Coal Leasing—General

The current Federal coal leasing program is administered under the statutory authority of the Mineral Lands Leasing Act (MLLA, Act of February 25, 1920, ch. 85, 41 Stat. 450 (30 U.S.C. 181 *et. seq.*)) and the Mineral Leasing Act for Acquired Lands (MLAAL, Act of August 7, 1947, ch. 513, 61 Stat. 913 (30 U.S.C. 351 *et seq.*)). The program has been managed and enforced by DOI pursuant to both the coal management regulations of the Bureau of Land Management (43 CFR Part 3400) and the United States Geological Survey (USGS) regulations governing coal exploration and mining operations (30 CFR Part 211). Pursuant to its transferred authority in section 302(b) of the DOE Act, DOE has promulgated regulations establishing bidding systems to be used by DOI in the leasing of Federal coal (10 CFR Part 378, Subpart B).

Both section 7 of the MLLA and the terms of each coal lease issued by DOI require that each lease be diligently developed. The provisions of the original MLLA, however, allowed prolonged holding of the land at low cost to the lessee. Leases were issued under the MLLA for an indefinite period of time and provided for a readjustment of the lease terms and conditions at the end of the first twenty years of the lease. Because of economic conditions governing the production of coal from Federal coal leases, there are a large number of Federal coal leases outstanding which have never been brought into production. In consideration of this, on August 4, 1976, Congress enacted the Federal Coal Leasing Amendments Act of 1976 (FCLAA, Pub. L. 94–377, 90 Stat. 1083), which amended the MLLA and established, among other things, more specific diligence requirements for coal leases and LMU's. The FCLAA governed the issuance of future coal leases and approval of LMU's (those issued or approved on or after August 4, 1976) but did not affect existing leases (those issued prior to August 4, 1976) until their first lease readjustment after enactment of the FCLAA. Generally, the FCLAA provided that leases would be for a primary term of twenty years and for so long thereafter as coal is produced in commercial quantities, but that coal must be produced from a lease in commercial quantities within the first ten years or the lease would be terminated. It also provided that, under certain conditions Federal coal leases and non-Federal lands may be combined into LMU's.

In May, 1976, prior to enactment of the FCLAA, DOI issued regulations now contained in 43 CFR Part 3400 to define "diligence" more specifically. After later modification to conform to the FCLAA, the regulations require all leases issued prior to August 4, 1976, to have produced coal in commercial quantities by June 1, 1986, although an opportunity for a five-year extension is provided if certain conditions are met. All post-August 4, 1976 leases are required to produce coal in commercial quantities within ten years of the effective date of the lease. The amount of production necessary to qualify as "commercial quantities" is set at one percent of the coal reserves for leases issued after August 4, 1976, and one fortieth of the reserves (two and one-half percent) for leases issued prior to August 4, 1976. For purposes of the DOI diligence requirements, all leases are automatically deemed to constitute an LMU on the effective date of the lease or June 1, 1976, whichever is later. The existing DOI definition of LMU provides that all LMU reserves must be mined out within forty years from the date of first approval of a mining plan for that LMU.

DOI diligence regulations in 30 CFR 211.10 require that prior to conducting any operation on Federal lands other than casual use, the operator (which includes a lessee or licensee or other person conducting operations under the authority of a lessee or licensee) shall submit a mining plan or exploration plan to the DOI District Mining Supervisor and obtain approval. The existing regulations provide that a mining plan has to be submitted within three years after the effective date of the lease or lease readjustment, for any lease issued or readjusted after August 4, 1976.

This proposal would supersede these existing DOI diligence requirements by changing the substance of some and carrying forward the requirements of others. Applicable diligence definitions in 43 CFR 3400.0–5, such as "commercial quantities," "diligent development," "LMU," etc., would be superseded to the extent that they are re-defined or inconsistent with these proposed definitions. The existing requirements for diligent development and continued operation in 43 CFR 3475.4, for LMU's in 43 CFR 3475.5, and for mining plan filing in 30 CFR 211.10 would be superseded by this regulation.

III. Proposed Regulation

A. Authority

The Secretary of Energy was transferred the authority by section 302(b)(3) of the DOE Act to promulgate regulations under the MLLA and the MLAAL to establish diligence requirements for coal operations conducted on Federal coal leases (including but not limited to, procedures relating to the granting or ordering by the Secretary of the Interior of suspension of operations or production as they relate to such requirements) and by section 303(c) of the DOE act to disapprove any term or condition of a Federal coal lease which relates to DOE's authority to promulgate regulations under section 302(b).

B. General

The principal thrust of this proposed regulation is to promulgate diligence requirements for all Federal coal leases and LMU's, including existing leases and LMU's, that closely reflect the intent of Congress in passage of the FCLAA and allow timely and efficient development of Federal coal resources in response to the demands of the marketplace. The proposal reflects a need for the establishment of requirements to govern the development of Federal coal reserves that are responsive to those market conditions that dictate the timing of coal production and simultaneously ensure that the reserves are produced without undue delay as demand arises.

Generally, this proposed regulation would relax the existing DOI diligence requirements for leases issued prior to the passage of the FCLAA on August 4, 1976, in order to prevent the unnecessary and premature relinquishment of Federal coal leases for failure to meet the existing June 1, 1986,

regulatory deadline for the achievement of diligent development. This proposal would give those existing, pre-August 4, 1976 leases the opportunity to take more time, within Congressionally mandated limitations, to meet the initial production requirement and, thus, allow more freedom for the market place mechanism to govern the development of coal.

It should be noted that section 2(a) of the MLLA, as amended by section 3 of the FCLAA, generally prohibits the Secretary of the Interior from issuing a lease to any entity which holds a Federal coal lease and has held such lease for a period of ten years when such entity is not producing coal from the lease deposits in commercial quantities. Periods of time prior to the enactment of the FCLAA on August 4, 1976, are not counted in determining the ten-year period. Therefore, even though the diligence requirements may be relaxed for pre-August 4, 1976 leases, a lessee would have to achieve production in commercial quantities by August 4, 1986, or be prohibited by statute from obtaining an additional lease. It is conceivable, therefore, that a lessee could be in compliance with these proposed coal diligence regulations, and still be subject to the leasing prohibition of section 2(a).

Specifically, the proposed regulation would extend the time period beyond June 1, 1986, by which a lease issued prior to August 4, 1976, must achieve production in commercial quantities, and would reduce the percentage amount of reserves needed to qualify as commercial quantities. Under current DOI regulations, all those pre-August 4, 1976 leases must produce one fortieth (two and one-half percent) of their coal reserves by June 1, 1986, but the lessee has the right to request a five-year extension if certain conditions are met. This proposed regulation would require that those leases achieve production in commercial quantities of one percent of the coal reserves and would extend the period for the achievement of this production until ten years from the effective date of the first lease readjustment occurring after August 4, 1976. No provision for a five-year extension is being provided, but the time in which diligent development must be achieved may be extended when operations are interrupted by strikes, the elements, or casualties not attributable to the lessee or when DOI, in the interest of conservation, directs the suspension of operations and production. The bulk of those leases are scheduled for readjustment in the mid-80's, but some are scheduled as late as 1995. Thus, this proposal would spread the initial production requirement over a longer time horizon. This modification is intended to promote more timely, orderly, and efficient development and production of leased reserves and allow development to coincide more closely with increases in coal market demand.

The existing diligence requirements promulgated by DOI in 1976 superseded the clauses of individual leases which provided the minimum production obligations, to the extent that the two requirements were inconsistent. This proposal continues that supersession, but permits the holder of a pre-August 4, 1976 lease that has not yet been readjusted after August 4, 1976, to elect to be governed by the lease clause which describes the minimum production requirements (in most cases, the "minimum production" clause), instead of by these regulations, for the period of time between the promulgation of these regulations and the effective date of the first lease readjustment after August 4, 1976 (§ 378.301(b)). This election must be made in writing to DOI within one year of the promulgation of this regulation. (See section IV B.4. of this preamble for a discussion of the impact of this election on the crediting of production after August 4, 1976, toward the requirement for diligent development).

The following is an example of the type of minimum production clause applicable to pre-August 4, 1976 leases (section 2(d) of the February, 1965 form):

(d) *Minimum production.* Beginning with the sixth year of the lease, except when operations are interrupted by strikes, the elements, or casualties not attributable to the lessee, or unless on application and showing made, operations shall be suspended when market conditions are such that the lessee cannot operate except at a loss or suspended for the other reasons specified in Section 39 of the Act, to mine coal each year and pay a royalty thereon to a value of $1 per acre or fraction thereof. Operations under this lease shall be continuous except in circumstances described or unless the lessee shall pay a royalty, less rent, on such minimum amount of the leased deposits, for one year, in advance, in which case operations may be suspended for that year.

As noted above, the existing DOI diligence regulations provide that all Federal Coal leases will automatically be considered to constitute an LMU on the effective date of the lease of June 1, 1976, whichever is later (43 CFR § 3475.5). This proposed regulation treats LMU's and leases separately for purposes of the diligence requirements. The determination of whether an individual Federal coal lease may be included in an LMU will be made by DOI on a lease-by-lease basis pursuant to applicable criteria and procedures adopted by DOI. This proposal carries foward the DOI diligence requirement that the approved "mining plan" ("resource recovery and protection plan" under the proposed revision of the DOI coal operating regulations) for an LMU must provide for the mining of all LMU coal reserves within forty years. This implements the statutory requirement of section 5(b)(2) of the FCLAA. This proposed regulation, however, establishes the period as forty years after the date of first production from the LMU after LMU approval, rather than after the date of first approval of a "mining plan" for that LMU as under the existing DOI regulations. Another of the changes from existing DOI diligence requirements, due to the fact that this proposal does not automatically deem individual leases to constitute LMU's, is that the propose regulation does not require the resource recovery and protection plan for an individual lease to provide for a forty year mine-out. Although the DOE diligence requirements being proposed do not require forty year mine-out for individual leases, acceptance of a resource recovery and protection plan is still subject to approval by DOI pursuant to applicable DOI procedures and requirements.

IV. Specific Features of the Proposed Regulation

A. Definitions

1. *General.* Proposed Subpart D will contain all of DOE's regulations that relate specifically to the diligence requirements for Federal coal leasing. The relevant definitions for the coal diligence regulations are divided between Subparts A and D of Part 378. Subpart A contains those definitions that have general applicability to all of the aspects of Federal coal leasing contained in Part 378. The definitions in § 378.302 of Subpart D are applicable only to the diligence requirments in Subpart D. Specific definitions are discussed below.

2. *Logical Mining Unit.* The proposed regulation amends Subparts A and B of Part 378 by amending the definition of "Logical Mining Unit" (LMU) in Subpart B, which pertains to coal bidding systems. The definition was modified to conform more closely with the description of an LMU contained in the FCLAA and moved to Subpart A to make it applicable to all aspects of coal leasing contained in Part 378. The criteria and procedures for establishing an LMU are within the jurisdiction of

DOI and are contained in the applicable DOI regulations.

3. *Coal Reserves and LMU Coal Reserves.* This proposal makes a distinction between "coal reserves," the commercially mineable coal contained in a single Federal lease, and "LMU coal reserves," the total of commerically mineable coal contained in all lands included in the LMU, whether under private or Federal ownership. Understanding this distinction is necessary when calculating the amount of production necessary for achievement of diligent development and continued operation for LMU's, and for calculating the amount of any advance royalty that may be owed. Achievement of diligent development and meeting the annual continued operation requirement for an LMU each require production of one percent of LMU coal reserves. That is 1 percent of all the commercially mineable coal contained in the LMU, regardless of ownership. Similarly, payment of advance royalties in lieu of the continued operation requirement for an LMU is calculated on the basis of 1 percent of all commercially mineable coal in the LMU. Production royalties owed on an LMU, however, are calculated on only the coal produced from coal reserves contained in the Federal leases included in the LMU, exclusive of the privately owned coal.

Coal reserves and LMU coal reserves will be estimated by DOI at the time of resource recovery and protection plan approval. In order to have a plan which is complete enough for approval, the extent of the resource will be fairly well established, and the value in having a fixed amount upon which a lessee may rely outweighs the reasonably small risk of significant inaccuracies. Specific comment is requested, however, on whether or not the regulation should provide for periodic revisions of the reserve estimates. Reference in the proposed definition of "coal reserves" is made to both mining plans and resource recovery and protection plans in order to make it clear that estimates made at the time existing mining plans were approved reflect the tonnage of coal to be used in determining compliance with the proposed diligence requirements. The proposed definition of "LMU coal reserves" does not contain a reference to mining plans, because there have been no mining plans filed for an "LMU" as contemplated by this proposal, under which individual leases are no longer automatically considered to be LMU's.

There is no intention in this proposal to require the calculation of coal reserves in a manner other than that normally performed by DOI; nor does this regulation preclude DOI from making reserve estimates for purposes other than diligence. The proposed definitions only establish which DOI estimate of coal reserves or LMU coal reserves is to be used in calculating commerical quantities for the purpose of determining compliance with the diligence requirements.

The definitions of coal reserves and LMU coal reserves are drawn from the definitions of those terms contained in the proposed USGS coal mining operating regulations. The internal references and the more technical aspects of the DOI proposal are excluded here merely for simplicity to the reader and to avoid confusion in the event that DOI amends its coal reseve estimation criteria in the future. There is no intent here to imply a different method of estimating reserves than that which would normally be followed by DOI.

The proposal provides that if an approved LMU is enlarged or diminished by DOI, the coal reserves and LMU coal reserves will be adjusted by DOI accordingly (§ 378.309(b)). The dates for submission of a resource recovery and protection plan and achievement of diligent development will not be changed by any such enlargement or diminution of the LMU.

B. Requirments for Diligent Development and Continued Operation (§ 378.304)

1. *General.* The proposed regulations requires each Federal coal lease and LMU to achieve diligent development and , once achieved, to maintain the lease in continued operation. The term "diligent development" as used in this proposal refers to a requirement that a lessee produce a specified amount of coal (commerical quantities) from his lease or LMU within a Given time period (diligent development period). Once the lessee has produced commerical quantities of coal from his lease or LMU, he must maintain the lease or LMU in continued operation by production of commerical quantities every year thereafter, as described below in section IV B.5., until reserve exhaustion or lease surrender.

2. *Commercial quantities.* As noted above, the existing DOI regulations (43 CFR 3400.0–5) define "commercial quantities" as an amount of production equal to one percent of the reserves for leases issued after August 4, 1976, and one fortieth of the reserves or two and one-half percent for any lease issued before August 4, 1976. DOE finds that there is no substantive reason for imposing differing production requirements on leases based on their date of issuance. Therefore, this proposal would define commercial quantities as one percent of the coal reserves or LMU coal reserves, regardless of the date of lease issuance.

Lessees LMU's must file a resource recovery and protection plan which provides for LMU coal reserves to be mined out within forty years. DOE recognizes that its definition of commercial quantities for LMU's is an amount less than the average annual amount that would have to be mined to meet the 40 year mine-out requirement, that is, one fortieth of the LMU coal reserves. We have done this for the following reasons.

The amount "one percent" was chosen to ensure that the lessee is diligently developing his lease while permitting the lessee, within the normal constraints of the industry and the marketplace, to determine how best to accomplish the mine-out requirement. The production of one percent of the reserves clearly indicates a significant undertaking on the part of the lessee and is accomplished only after expenditures of large amounts of capital for exploration, transportation facilities, on-site construction, coal preparation facilities, and overburden removal, in addition to lease acquisition costs. Mining operations require considerable lead time before any coal is produced and there is normally a period of time between the initial production of coal and the point at which the sustained design production rate, which is generally a rate greater than one fortieth of the coal reserves, is attained. Similarly, there are occasionally periods in the life of a mine when production falls off due to slack demand or contract cancellations and, at the end of a mine's life, production may be reduced as the coal resource is depleted. Since "commercial quantities" is used in this regulation as a minimum production requirement to demonstrate good faith in mine development and ongoing productivity, it was decided that one percent more accurately reflects actual needs and practice of industry than a higher figure. DOE particularly invites comments on the selection of one percent as the amount necessary to satisfy the commercial quantities obligation for both the diligent development and continued operation requirements. Any recommendation for a different amount should be supported with as much information as practicable.

3. *Diligent development period.* This proposal would require that all Federal coal leases issued on or after August 4, 1976, achieve diligent development by

producing coal in commercial quantities prior to the end of ten years after the effective date of the lease. All Federal coal leases issued prior to August 4, 1976, would be required to achieve diligent development by producing coal in commercial quantities prior to the end of ten years after the effective date of the first lease readjustment occurring after August 4, 1976. All LMU's would be required to produce coal in commercial quantities prior to the end of ten years from the most recent effective date of any Federal lease or leases included in the LMU issued on or after August 4, 1976, or of the first lease readjustment after August 4, 1976, for those Federal leases included in the LMU issued prior to August 4, 1976. However, if the LMU contains a Federal lease issued prior to August 4, 1976, that has not been readjusted since August 4, 1976, coal from that LMU must be produced in commercial quantities prior to the end of ten years after the date of LMU approval.

Once coal is produced from a lease or LMU in commercial quantities, the diligent development period ends and the lease or LMU becomes subject to the requirement to remain in continued operation. If production of commercial quantities of coal is not achieved prior to the end of the diligent development period, the lease or LMU is terminated, as discussed below in section IV D.

It should be noted that, under this proposal, diligent development could have been achieved prior to the effective date of this regulation and, therefore, the lease would become subject to the requirement to be in continued operation on the date the regulation becomes effective. A post-August 4, 1976 lease would achieve diligent development under this proposed regulation at the same time as under existing DOI regulations, and would be subject to the same continued operation requirement under both these proposed and existing regulations. However, this may not be true for all pre-August 4, 1976 leases. A pre-August 4, 1976 lease may have produced less than the two and one-half percent of the coal lease reserves necessary to achieve diligent development under the existing DOI requirement, but more than the one percent being proposed by this regulation to meet diligent development. In such a case, the lease would not have been subject to the requirement of continued operation under the DOI regulations, but would be subject to that requirement under this proposed regulation. Therefore, as discussed further below, in order to avoid automatically subjecting that lessee to the requirement of continued operation upon the effective date of this regulation, when the lessee may not be prepared to begin producing at an annual rate of one percent, a pre-August 4, 1976 lessee is given the option to elect not to credit toward diligent development coal produced prior to the effective date of this regulation. If the lease was readjusted between August 4, 1976, and the effective date of this regulation, this election is only applicable to production prior to the readjustment. Any production after the readjustment must be applied toward diligent development. Pre-August 4, 1976 lessees are also given the option to elect to be governed by the minimum production clause of the lease until the first lease readjustment after August 4, 1976, if that readjustment occurs after the effective date of this regulation. If a lessee were to make this election, the lease would not be subject to any diligent development or continued operation obligation under this proposed regulation until after that lease readjustment.

4. *Crediting of production toward diligent development.* This proposal has a uniform requirement for the achievement of diligent development, production of one percent of the reserves, for all Federal coal leases and LMU's, regardless of the date of lease issuance. Because this represents a change from the existing diligent development requirements for pre-August 4, 1976 leases, different treatment was needed for past production from pre and post-August 4, 1976 leases, in order not to penalize a producing pre-August 4, 1976 lease by the relaxation of the diligence requirements in this proposal.

Leases issued or readjusted on or after August 4, 1976, would credit toward diligent development any production after the effective date of the lease or lease readjustment. This proposal, therefore, does not change the existing status of a post-August 4, 1976 lease, because the proposed requirements for diligent development and continued operation for these leases are identical to those requirements under existing DOI regulations.

Since the provisions of the FCLAA do not appear to apply to pre-August 4, 1976 leases until the first lease readjustment after August 4, 1976, lessees with leases that have not been readjusted between August 4, 1976, and the effective date of this regulation are given the option to elect to be governed by the minimum production requirements of their leases until the first lease readjustment, instead of by the diligent development and continued operation requirements of this regulation. Should they make this election, no production prior to the first lease readjustment after August 4, 1976, would be applied toward the proposed diligent development requirement. The lessee, by this election, would not become subject to the diligent development and continued operation requirements until the first lease readjustment. It should be noted that even with this election, these Pre-August 4, 1976 leases would be subject to the other diligence requirements of this regulation, as applicable. Should the pre-August 4, 1976 lessee not make this election and, thus, remain subject to these proposed requirements for diligent development and continued operation, the lessee is given a second election of whether or not to apply toward diligent development any production from the lease between August 4, 1976, and the earlier of either the first lease readjustment after August 4, 1976, or the effective date of this regulation. The lessee of a pre-August 4, 1976 lease may make this positive election not to have prior production applied toward the diligent development requirement and, therefore, be in the same posture, upon the effective date of this regulation, as a non-producing pre-August 4, 1976 lessee who had not elected to be governed by the lease clause until readjustment. If the lessee does not make this election regarding prior production, any production after August 4, 1976, would be applied toward the one percent diligent development requirement and, once achieved, the lease would be required to remain in continued operation.

In the case of LMU's, any production credited under this regulation to a Federal lease prior to its inclusion in an LMU would be applied toward diligent development of the LMU. Once an LMU has been approved, all production from non-Federal lands and each Federal lease included in the LMU, regardless of the date of lease issuance, is included in calculating the amount of coal mined toward meeting the diligent development requirement. No distinction is made for pre-August 4, 1976 leases which, by the lessee's election, are to be governed by the minimum production clause of their lease until lease readjustment. This is not an onerous requirement in view of the fact that these pre-August 4, 1976 lessees must request and consent to being included in an LMU. Therefore, the lessee is given flexibility in timing his operation. If the lessee does not want production from a lease prior to

lease readjustment to invoke the continued operation requirement for the LMU, the lessee may wait, within the constraints of the lease's own diligent development period, and request LMU formation when the lessee is ready to continue producing.

5. *Continued operation.* This proposal carries forward the existing DOI diligence requirement for continued operation by providing that once a lease or LMU has achieved diligent development, the lessee must produce commercial quantities of coal in each of the next two continued operation years. After that, the lessee need not produce coal in commercial quantities in every continued operation year thereafter. However, the lessee must produce an average amount of not less than commercial quantities of coal per continued operation year across each three-year period. This average annual amount will be calculated on the basis of the present year and the two preceding continued operation years. For example, if a lease happens to have a continued operation year that runs from January 1 to December 31, and DOI wants to determine if a lessee met his continued operation requirement in 1981, the amount requirement has not been met, regardless of production projected for 1982 or later.

C. Resource Recovery and Protection Plans (§ 378.303)

Proposed section 378.303 addresses the required submission of a "resouce recovery and protection plan." The resource recovery and protection plan referred to is described in the operating regulations for coal mining being proposed by USGS to amend 30 CFR Part 211, and is comparable to the mining plan currently required by 30 CFR 211.10.

Unless a mining plan or resource recovery and protection plan has previously been approved, a resource recovery and protection plan must be filed for every lease no later than (1) three years after the effective date of the lease for leases issued on or after August 4, 1976, or (2) three years after the effective date of the first lease readjustment after August 4, 1976, for leases issued prior to August 4, 1976. A resource recovery and protection plan must be submitted for each LMU no later than three years after the effective date of the LMU approval.

As noted above, proposed section 378.303(d) requires that each resource recovery and protection plan approved for an LMU provide for the mining of all LMU coal reserves not later than 40 years after the date of the first production of coal from the LMU after LMU approval, rather than from the date of LMU approval as currently required. Coal produced from a lease prior to its inclusion in an LMU would not trigger the beginning of the 40-year mine-out period. This approach was chosen because it would be unreasonable to assume that a lessee could anticipate the formation of an LMU and have developed the individual lease accordingly.

D. Termination or Cancellation for Failure To Meet Diligent Development (§ 378.305)

This proposal would require the termination of leases or LMU's that do not achieve diligent development. In the case of an approved LMU that does not achieve diligent development, the LMU agreement would be terminated and the individual leases in the LMU would be considered independently for their past and future compliance with the proposed diligence requirements. The leases would then be subject to the same diligence requirements that would have been imposed on each lease if it had not been part of an LMU. The diligent development period would be computed by including the time during which the lease was included in the LMU. Any production from the LMU would be attributed to the lease from which it came and only production from an individual lease would be applied toward meeting that lease's diligent development requirement. DOE particularly invites comments on this aspect of the rulemaking and specifically on whether, upon termination of the LMU, production should be credited differently than as proposed. One other option would be to provide that all coal production (or just all Federal production) from the LMU, regardless of which lease or leases produced the coal, be pro-rated and applied to the satisfaction of the diligent development requirements of the resulting individual Federal leases in proportion to their coal reserves.

Termination of a lease or LMU is mandatory for failure to achieve diligent development. This proposed regulation also provides DOI with the discretion to cancel any lease or LMU for failure to meet the other diligence requirements for submission of a resource recovery and protection plan or for maintaining continued operation.

E. Extension or Suspension of Diligence Requirements (§ 378.306)

The proposed diligence requirements may be extended or suspended under certain conditions. If DOI determines, upon timely notification by the lessee, that operations under a Federal coal lease or LMU have been interrupted by strikes, the elements, or casualties not attributable to the lessee, the diligent development period or the requirement to maintain continued operation will be extended or suspended, as applicable, for the period of such interruption. Under the same conditions, DOI may, in its discretion, extend the time by which the lessee must submit a resource recovery and protection plan, if DOI determines that the interruption affected the ability of the lessee to make a timely submittal. In all these instances the lessee must notify DOI in a timely manner of the event causing the interruption. This regulation leaves DOI the discretion, under applicable DOI procedures, to determine a reasonable application of the phrase "timely notification."

The lessee may also request DOI to suspend the requirement for continued operation upon payment of advance royalties for any continued operation year in which the lessee does not expect to meet the requirement for continued operation. Such suspension may be granted if DOI determines it to be in the public interest. DOI may cease to accept advance royalties in lieu of the requirement for continued operation at any time within the continued operation year by notifying the lessee six months in advance.

In the interest of conservation, DOI, with or without any request by the lessee, may direct the suspension of operations and production under any Federal coal lease. If operations and production are so suspended, the diligent development period or the requirement to maintain continued operation, as applicable, will be stayed for the period of such suspension. DOI may extend the date by which the lessee must submit a resource recovery and protection plan, if DOI determines that the suspension affected the ability of the lessee to make a timely submittal. If operations and production are suspended in the interest of conservation and the lessee has already become subject to the requirement for continued operation, but is unable to meet it, the lessee is still obligated to pay advance royalties in lieu of the condition of continued operation during such suspension. The law, 30 U.S.C. 209, as amended by section 14 of the FCLAA, provides that permitting DOI to direct suspension of operations and production in the interest of conservation may not be construed as giving DOI the right to waive, suspend, or reduce the advance royalties payable upon suspension of the normal requirement of continued operation.

F. Advance Royalties (§ 378.307)

Advance royalties are payments made in advance of actual production and are based on an estimate of the production royalties that would have been owed if the lessee had actually produced the amount of coal necessary to meet the requirement of continued operation. As coal is actually produced from the lease or LMU, the production royalties owed on that coal would be reduced by the dollar amount of any advance royalty paid under that lease or LMU to the extent that such advance royalties have not been used to reduce production royalties for a prior year. Advance royalties on an LMU may be credited at the lessee's election against production royalties owed for any Federal lease in the LMU.

No advance royalty paid during the initial twenty-year term of a Federal lease or LMU may be used, however, to reduce a production royalty after the twentieth year of the lease or LMU. This initial twenty-year term commences on the effective date of the lease for all leases issued on or after August 4, 1976; on the effective date of the first lease readjustment after August 4, 1976, for all leases issued prior to August 4, 1976; and on the effective date of LMU approval for all LMU's. Any advance royalty paid on a Federal lease prior to its inclusion in an LMU will be credited to the LMU and considered to have been paid on the date of LMU approval: *Provided,* That the lease has been included in an LMU within the initial twenty-year term of the lease as described above and to the extent that the advance royalties have not been used to reduce production royalties on the lease.

Advance royalties may only be accepted in lieu of continued operation upon application of the lessee and if DOI determines it to be in the public interest. Any request for suspension of the continued operation requirement upon payment of advance royalties for any continued operation year must be made no later than thirty days after the beginning of the continued operation year to avoid the possible imposition of interest. Acceptance of advance royalties based on a later request may be conditioned by DOI on the payment of interest on the amount of advance royalties due, with the interest to be calculated from the beginning of the continued operation year.

Because advance royalties are payments made on coal which has not been produced, they can only approximate the actual amount of payment that will be due at the time of production. Advance royalties due for an individual lease are calculated by multiplying the number of tons of coal which equals one percent of the coal reserves times an approximate value per ton of coal multiplied by the production royalty rate specified in the lease terms. The approximate value per ton of coal (unit value) is determined by DOI in accordance with proposed § 378.307(c). When the unit value is based on previous production from the lease, it is anticipated that DOI will calculate the value of the coal produced in accordance with their procedures set forth at 30 CFR 211.63.

Advance royalties due for an LMU are calculated by multiplying the number of tons of coal which equal one percent of the LMU coal reserves (the sum of Federal and non-Federal coal in the LMU) times an approximate value per ton of coal multiplied by either 8 percent (in the case of LMU's that would be developed only by underground mining operations) or by 12½ percent (in the case of LMU's that would have some coal produced by other than underground mining operations).

Establishment of a system for determining advance royalty payments for LMU's is complicated by the fact that LMU's may include non-Federal coal reserves, or two or more Federal coal leases with different production royalty rates. In any year for which a lessee may request to pay advance royalties in lieu of continued operation, the production foregone for that year may not have been scheduled to come from a Federal lease. Therefore, it could be argued that no Federal production royalties would have been owed, there should be no advance royalty payment required. However, delay in production anywhere in the LMU would ultimately result in a delay of production from the Federal lease. Advance royalties should be collected to encourage early development, to ensure timely receipt of royalties by the Government, and to prevent circumvention of the diligence requirements by the inclusion of non-Federal lands in an LMU. Because the FCLAA requires that advance royalties be no less than the production royalty which would otherwise be paid, all of the production required to meet the requirement of continued operation (one percent of the LMU coal reserves) must be assumed to have been from the Federal leases. For the same reason, although each of the included Federal leases may have a different production royalty rate, for the purpose of calculating advance royalties from an LMU, a standard royalty rate of 12½ percent is being proposed, unless all of the coal would have been produced by underground mining, in which case an 8 percent rate would be used. These fixed rates were based on the production royalty rates used by DOI under current regulations (43 CFR 3473.3–2). Because advance royalties may be used to offset production royalties due later, any advance royalty paid does not represent a significant penalty to the lessee who fully develops the LMU coal reserves, but is rather an incentive to timely development. DOE invites comments on this proposed fixed-rate method for calculating advance royalties for an LMU.

DOI may not accept advance royalties in lieu of continued operation for a total of more than ten years during the life of the lease or LMU. For leases issued prior to August 4, 1976, the ten-year restriction does not begin until the first lease readjustment after August 4, 1976. Any continued operation year in which any advance royalty is accepted will be deemed to be one of the ten years. However, if the lessee meets the requirement for continued operation in any continued operation year for which the lessee has paid advance royalties, such year will not be considered when calculating the maximum number of years for which advance royalties may be accepted for the lease or LMU. The number of years for which advance royalties are paid under any Federal coal lease prior to its inclusion in an LMU shall not be considered when calculating the maximum number of years for which advance royalties may be accepted for the LMU.

G. Enforcement and Appeals (§ 378.310)

This proposed regulation incorporates existing DOI enforcement and appeals procedures. Section 378.310 proposes that enforcement of the diligence requirements be made by the Mining Supervisor of USGS. It makes reference to the procedures in 30 CFR 211.72 currently utilized by USGS to enforce its Coal Mining Operating Regulations (30 CFR Part 211). Operators who do not comply with these proposed DOE coal diligence regulations would be issued a notice of noncompliance by DOI and given an opportunity to correct the noncompliance. For example, if an operator failed to comply with the requirement of § 378.303 that a resource recovery and protection plan be submitted within three years of the date of lease issuance or the effective date of lease readjustment, as applicable, the Mining Supervisor would issue the operator a notice of noncompliance.

Section 378.310 further indicates that the appeal of any order, determination, decision, or notice issued under the

proposed regulation would be in accordance with DOI's procedures, as described in 30 CFR Part 290. This regulation does not provide DOE with any authority over enforcement of this regulation or to hear appeals of DOI orders or otherwise to become involved with DOI adjudicatory or other administrative procedures. DOE does have the authority, pursuant to 10 CFR Part 375, Subpart B, to act on requests for interpretation or petitions for the issuance, amendment, or repeal of a DOE mineral leasing regulation.

V. Public Comment and Hearing Procedures

DOE requests comments on any aspect of this regulation as proposed. Comments submitted in response to this rulemaking should be accompanied by as much supporting data as possible. Should problems with specific regulatory language be contained in the comments, we would be particularly interested in receiving specific recommendations as to substitute language. Data submitted in response to this proposal that is deemed proprietary should be so labeled.

A. Written Comments

You are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposal set forth in today's rulemaking. Written comments should be submitted by February 22, 1982, to the address indicated in the "ADDRESSES" section of this preamble. Comments should be identified on the outside envelope and on the document with the designation: "Box *YB* (Docket No. LPD 81–2), DOE Proposed Coal Diligence Regulations." Ten copies should be submitted. All comments received by the above date and all other relevant information will be considered by DOE before final action is taken on this proposed regulation. Any information or data which you consider to be confidential must be so identified and submitted in writing, one copy only. DOE reserves the right to determine the confidential status of the information or data and to treat it according to our determination.

B. Public Hearing

1. Procedure for Request To Make Oral Presentation. The time and place of the hearing is indicated in the "DATES" and "HEARING LOCATION" sections at the beginning of the preamble. The hearing will be continued, if necessary, on the next business day.

If you have an interest in today's proposal, or represent a group or class of persons that has an interest, you may make a written request for an opportunity to make an oral presentation. This request should be made by February 10, 1982, and should be sent to the appropriate address indicated in the "ADDRESS" section of the preamble. Please describe your interest and, if appropriate, state why you are a proper representative of a group and class of persons that has such an interest. Please give a concise summary of the proposed oral presentation. Your request should also provide a phone number where you may be contacted through the day before the hearing. Fifty copies of your statement labeled "Coal Diligence" are due at 9:00 a.m. on the day before the Denver hearing and should be delivered to the address indicated in the "ADDRESSES" section at the beginning of this preamble. In the event any person wishing to testify cannot meet the 50-copy requirement, alternative arrangements can be made with the Office of Hearing Management at 202–[illegible].

2. Conduct of the Hearings. DOE reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

A DOE official will preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Prior to the hearing, you may submit questions to be asked to any person making a statement at the hearing to the address indicated in the above "ADDRESSES" section before 9:00 a.m. the day prior to the hearing. At the hearing, you may submit the question, in writing, to the DOE presiding officer. In either case, the presiding officer will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer. Either the presiding official or another member of the panel will ask the question.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer. In the event that it becomes necessary for us to cancel the hearing, we will make every effort to publish advance notice in the **Federal Register** of such cancellation. Moreover, we will give actual notice to all persons scheduled to testify at the hearing. However, it is not possible to give actual notices of cancellations or changes to persons not identified to us as participants. Accordingly, persons desiring to attend the hearing are advised to contact DOE on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by DOE and made available for inspection at the DOE Freedom of Information Office, Room 1E–090, Forrestal Building, 1000 Independence Avenue, SW, Washington, D.C. 20585, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript from the reporter.

VI. Environmental Review

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality implementing regulations (40 CFR Parts 1500–1508), and the Department of Energy guidelines (45 FR 20694, March 28, 1980), the Department has performed environmental analyses of the draft regulations, in order to determine whether an environmental impact statement is required to support the proposed action. On the basis of those analyses, a determination has been made that promulgation of the proposed regulations would not be a major Federal action significantly affecting the quality of the human environment, within the meaning of NEPA. The regulations may cause minimal changes in amounts of coal mined; the market for coal will continue to be the overriding influence on production. Therefore, an environmental impact statement would not be required to accompany the regulations.

On the basis of public comments received in response to the rulemaking, and revisions (if any) in the regulations made subsequent to the comment period, further NEPA review may be required. NEPA compliance activities will be completed before the final regulations are promulgated in the **Federal Register**.

VII. Executive Order 12291

Executive Order 12291, issued February 17, 1981 (46 FR 13193, February 19, 1981); requires each agency promulgating a rulemaking action to

determine whether the rule is a major rule within the meaning of that Executive Order. If it is determined that the action constitutes a major rule, the agency is further required to prepare a Regulatory Impact Analysis describing the principal benefits and costs of the rule, net benefits, and alternative approaches that could substantially achieve the same regulatory goal. For the purpose of the Order, "major rule" means any regulation that is likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States—based industries to compete with foreign-based enterprises in domestic or export markets.

After conducting a review of the expected effects of today's proposed rule, DOE finds that due to the nature of the coal market, competition in the coal industry, and the mineability of Federal tracts, the annual effect of the proposed rule is expected to be less than $100 million and the net effect of the proposed rule is expected to be positive. Therefore, DOE has determined that this proposed rule does not constitute a major rule and no Regulatory Impact Analysis will be prepared.

VIII. Compliance With the Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.*) requires Federal agencies to consider the impact of proposed regulations on small businesses, small governmental units, and other small entities; to consider the ability of small entities to comply with the proposed regulation; and to consider less stringent alternative compliance standards for small entities. An agency is required to prepare a regulatory flexibility analysis to document its consideration of these factors except in the situation where the agency determines that a regulation will not have a significant economic impact on a substantial number of small entities. DOE certifies that, for the reasons discussed below, the promulgation of this regulation will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis will not be prepared.

Few, if any, small entities will be affected by this rule change, and the impacts that could occur will be minor and beneficial to small entities. A current study of Federal coal leases by the Office of Technology Assessment (OTA) supports the following conclusions.

During the past ten years, there has been a drastic drop in the number of Federal leases held by small companies and unincorporated individuals resulting in a potentially adverse effect on competition. Generally, this has been the result of the high cost of developing coal mines. Since many small companies cannot make the necessary investment, they either sell or drop the lease, acquire partners to develop the lease, or are acquired by a larger corporation. The remaining leases held by small companies should follow the same pattern under both the current and proposed diligence rules. Many of these leases have been mined out or have small coal reserves that are expensive to develop. These leases will be relinquished. The economical leases will be sold and/or developed in time to meet diligence requirements.

The proposed diligence rule lengthens the time period certain lessees have to develop a lease. The economic effect of this change is expected to be beneficial because these leases would be developed according to a schedule which is more likely to maximize the net present value of the lease and hence government revenue from royalties. Both small and large lessees would benefit by this change. The only other small entities that may be affected are the municipalities in the areas of these leases. Since development of the few leases affected could be delayed several years, this could enable the associated jurisdictions better to plan for this development. Because the development plan for these leases should not change except for the timing, costs to these jurisdictions should not be altered significantly.

The following results are expected to occur:

(1) Few, if any, small entities will be affected by the proposed diligence rules;

(2) Any effects that do occur will be insiginficant; and

(3) Any effects that occur will be beneficial.

Therefore, DOE has determined that there is no need for a Regulatory Flexibility Analysis of this proposed coal diligence rule.

(Mineral Lands Leasing Act, Act of February 25, 1920, ch. 85, 41 Stat. 437 (30 U.S.C. 181 *et seq.*), amended by Federal Coal Leasing Amendments Act of 1975, Pub. L. 94–377, 90 Stat. 1083; Mineral Leasing Act for Acquired Lands, Act of August 7, 1947, ch. 513, 613 Stat. 913-(30 U.S.C. 351 *et seq.*); Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 585 (42 U.S.C. 7101 *et seq.*), E.O. 12009, 42 FR 46267)

In consideration of the foregoing, it is proposed to amend Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., December 15, 1981.

Jan W. Mares,

Assistant Secretary for Fossil Energy.

PART 378—COAL LEASING

§ 378.102 [Amended]

1. Part 378 of Chapter II of Title 10, Code of Federal Regulations, is amended by deleting the definition of "Logical Mining Unit" in § 378.102 and adding a new definition of "Logical Mining Unit" to § 378.002 in alphabetical order to read as follows:

§ 378.002 Definitions.

* * * * *

"Logical Mining Unit" or "LMU" means an area of land designated by DOI in which the coal resources can be developed in an efficient, economical, and orderly manner as a unit with due regard to conservation of coal reserves and other resources. A logical mining unit may consist of one or more Federal leases, and may include intervening or adjacent lands in which the United States does not own the coal resources, but all the lands in a logical mining unit must be under the effective control of a single operator, be able to be developed and operated as a single operation and be contiguous.

* * * * *

2. Chapter II of Title 10, Code of Federal Regulations, is amended by adding and reserving a new Subpart C and adding a new Subpart D to Part 378 to read as follows:

Subpart C [Reserved]

Subpart D—Diligence Requirements

Sec.

378.301 Purpose and scope.
378.302 Definitions.
378.303 Resource recovery and protection plans.
378.304 Requirement for diligent development and continued operation.
378.305 Termination or cancellation for failure to meet diligence requirements.
378.306 Extension or suspension of diligence requirements.
378.307 Payment of advance royalties in lieu of continued operation.
378.308 Crediting of production toward diligent development.
378.309 Special LMU rules.
378.310 Enforcement and appeals.

Authority: Act of February 25, 1920, ch. 85, secs. 2, 7, and 32, 41 Stat. 438, 439, and 450 (30

U.S.C. 201, 207, and 189) and sec. 39 as added by Act of February 9, 1933, ch. 45, 47 Stat.798, as amended by secs. 5, 6, and, 14, Pub. L. 94–377; Act of August 7, 1947, ch. 513, secs. 3 and 10, 61 Stat. 914 and 915 (30 U.S.C 352 and 359); secs. 302, 303, and 644, Pub. L. 95–91, 91 Stat. 578–579, 579–580, 599 (42 U.S.C. 7152, 7153, and 7254); E.O. 12009, 42 FR 46267.

Subpart C [Reserved]

Subpart D—Diligence Requirements

§ 378.301 Purpose and scope.

(a) The purpose of the regulations in this Subpart D is to establish the diligence requirements which are applicable to all Federal coal leases and LMU's, including existing leases or LMU's. The regulations in this Subpart D do not apply to coal leases on Indian lands.

(b) The provisions in this Subpart D for diligent development and continued operation apply to all coal leases issued before August 4, 1976, that have not been readjusted between August 4, 1976, and the effective date of this Subpart D, during the period of time between the effective date of this Subpart D and the effective date of the next lease readjustment, unless the lessee elects to be governed by the clause in the lease which describes the minimum production requirement until such lease readjustment. Any lessee who elects to be subject to those lease terms until readjustment, as provided in this paragraph, shall notify DOI in writing within one year of the effective date of this Subpart D.

(c) Any Federal coal lease included in an LMU, including a lease for which the lessee has elected to be governed by the minimum production clause of the lease as provided by paragraph (b) of this section, shall be subject to the diligence requirements imposed on the LMU by this Subpart D in lieu of those diligence requirements of this Subpart D which would apply to the lease individually.

§ 378.302 Definitions.

For the purposes of this Subpart D:

"Advance Royalties" means a payment under a lease or LMU in advance of actual production and authorized by DOI to be made in lieu of continued operation. Payments made under the minimum production clause of a lease in lieu of actual production are not advance royalties for the purpose of § 378.307.

"Coal Reserves" means the tons of coal that can be mined commercially under existing technology and economics. Except as provided in § 378.309(b), coal reserves shall be those estimated by DOI as of the date of the initial mining plan or resource recovery and protection plan approval.

"Commercial Quantities" means one percent of the coal reserves or LMU coal reserves.

"Continued Operation" means the production of not less than commercial quantities of coal in each of the first two continued operation years following the achievement of diligent development and an average amount of not less than commercial quantities of coal per continued operation year thereafter, computed on a three-year basis consisting of the continued operation year in question and the two preceding continued operation years.

"Continued Operation Year" means the 12-month period beginning with the commencement of the first royalty reporting period following the achievement of diligent development, and each 12-month perod thereafter.

"Diligent Development" means the production of coal in commercial quantities prior to the end of the diligent development period.

"Diligent Development Period" means a period which shall begin on either:

(1) The effective date of the lease for all leases issued on or after August 4, 1976;

(2) The effective date of the first lease readjustment after August 4, 1976, for all leases issued prior to August 4, 1976, and readjusted after that date; or

(3) For all LMU's, the most recent of the dates established under paragraph (1) or (2) of this definition for each Federal lease included in the LMU and occurring prior to the time of LMU approval, unles the LMU contains a lease issued prior to August 4, 1976, that has not been readjusted between August 4, 1976, and the date of LMU approval, in which case the diligent development period for the LMU shall begin on the date of approval of the LMU; and

which shall terminate upon the production of coal in commercial quantities or at the end of ten years, whichever occurs first, unless the period is extended as provided in § 378.306.

"Lessee" means a person authorized by a Federal coal lease or an approved LMU or an approved assignment thereof, to develop and produce coal, including all parties holding such authority by or through the lessee and the person designated to conduct operations.

"LMU Coal Reserves" means the sum of estimated Federal and non-Federal coal reserves in the LMU. Except as provided for in § 378.309(b), the LMU coal reserves are those estimated by DOI as of the date of the initial resource recovery and protection plan approval.

"Royalty Reporting Period" means the period of time established by DOI for calculation of production royalties due.

§ 378.303 Resource recovery and protection plans.

(a) A resource recovery and protection plan shall be submitted for every lease no later than three years after the effective date of the lease for leases issued on or after August 4, 1976, or the effective date of the first lease readjustment after August 4, 1976, for leases issued prior to August 4, 1976, unless a current mining plan or resource recovery and protection plan has previously been submitted and contains the information required by 30 CFR Part 211.

(b) A resource recovery and protection plan shall be submitted for each LMU no later than three years after the effective date of LMU approval, and it shall cover all Federal and non-Federal lands within the LMU and contain the information required by 30 CFR Part 211.

(c) Each resource recovery and protection plan approved for an LMU shall provide for the mining of all LMU coal reserves not later than 40 years after the date of first production from the LMU after LMU approval. Any revised or amended resource recovery and protection plan shall provide for the mining of all LMU coal reserves not later than the end of the original 40-year period.

§ 378.304 Requirement for diligent development and continued operation.

(a) Each Federal coal lease and LMU is required to achieve diligent development.

(b) Once a Federal lease or LMU has achieved diligent development, the lease or LMU shall be maintained in continued operation every continued operation year thereafter, except as provided in § 378.306 (b) or (d).

§ 378.305 Termination or cancellation for failure to meet diligence requirements.

(a) Any Federal coal lease or LMU which has not achieved diligent development shall be terminated by DOI.

(b) Any Federal coal lease included in an LMU which has been terminated under the provisions of paragraph (a) of this section shall then be subject to the diligence requirements that would have been imposed on that lease by this Subpart D if the lease had not been included in the LMU.

(c) DOI may cancel any Federal coal lease or LMU which fails to meet either the requirement for submission of a resource recovery and protection plan

contained in § 378.303, or the requirement for continued operation contained in § 378.304.

§ 378.306 Extension or suspension of diligence requirements.

(a) Upon timely notification by the lessee to DOI, the diligent development period shall be extended by the period of time in which DOI determines that operations under the Federal coal lease or LMU are interrupted by strikes, the elements, or casualties not attributable to the lessee.

(b) Upon timely notification by the lessee to DOI, the requirement for continued operation contained in § 378.304(b) shall be suspended by the period of time in which DOI determines that operations under the Federal coal lease or LMU are interrupted by strikes, the elements, or casualties not attributable to the lessee.

(c) Upon timely notification by the lessee to DOI, the date by which a lessee is required by § 378.303 to submit a resource recovery and protection plan may be extended if DOI determines that operations under the Federal coal lease or LMU are interrupted by strikes, the elements, or casualties not attributable to the lessee.

(d) Upon request of the lessee, DOI may suspend the requirement for continued operation upon payment of advance royalties in accordance with § 378.307 for any continued operation year in which the lessee does not expect to meet the requirement for continued operation, if DOI determines it to be in the public interest. DOI may, upon six months notification to the lessee, cease to accept advance royalties in lieu of the requirement for continued operation.

(e) DOI, in the interest of conservation, may direct the suspension of operations and production under any Federal coal lease or LMU. If operations are so suspended, then DOI may extend the date by which the lessee is required by § 378.303 to submit a resource recovery and protection plan. The diligent development period shall be extended or the requirement for continued operation suspended, as applicable, for the period of such suspension. Nothing in this paragraph shall be construed as granting to DOI the authority to waive, suspend, or reduce advance royalties.

§ 378.307 Payment of advance royalties in lieu of continued operation.

(a) Advance royalties may only be accepted in lieu of continued operation as provided for in § 378.306(d) and only upon application to and approval by DOI.

(b) Any request by a lessee for suspension of the contined operation requirement under § 378.306(d) shall be made no later than 30 days after the beginning of the continued operation year. If a lessee requests authorization to pay advance royalties in lieu of continued operation later than 30 days after the beginning of any continued operation year, DOI may condition acceptance of advance royalties on the payment of interest on the amount of the advance royalties due. The interest will be calculated from the beginning of the continued operation year until the date of the request.

(c) When advance royalties are accepted in lieu of continued operation under this section, they shall be paid in an amount equivalent to the production royalty that would be owed on the production of one percent of the coal reserves or LMU coal reserves. For purposes of this paragraph, the production royalty rate for an LMU shall be deemed to be 8 percent for LMU coal reserves that would be recovered by underground mining operations, and 12½ percent for LMU coal reserves that would be recovered by other mining operations. In the event that an LMU contains both underground and other mining operations, a 12½ percent royalty rate shall be used when calculating any advance royalty owed. The unit value of the coal for determining the advance royalty payment for a lease or LMU shall be either: (1) The unit value for production royalty purposes of coal produced and sold under the Federal coal lease or LMU during the immediately preceding production royalty payment period; or (2) if no coal was produced and sold under the Federal coal lease or LMU during the immediately preceding royalty payment period, or if DOI finds that there is an insufficient number of such sales to determine such value equitably, computed at the average unit price at which coal from other Federal leases in the same region was sold during such period; or (3) if there were no sales of Federal coal from such region during such period or if DOI finds that there is an insufficient number of such sales to determine such value equitably, determined by DOI.

(d) The aggregate number of years during the period of any Federal coal lease or LMU for which advance royalties may be accepted in lieu of the requirement of continued operation shall not exceed ten. For leases issued prior to August 4, 1976, advance royalties shall not be accepted in lieu of continued operation for more than a total of 10 years following the first lease readjustment after August 4, 1976. Any continued operation year in which any advance royalty is accepted shall be deemed a year in which advance royalties are accepted in lieu of continued operation for purposes of this paragraph. However, if a lessee meets the requirement for continued operation in any continued operation year in which the lessee has paid advance royalties, such year shall not be considered when calculating the maximum number of years for which advance royalties may be accepted for the lease or LMU. The number of years for which advance royalties are paid under any Federal coal lease prior to its inclusion in an LMU shall not be considered when calculating the maximum number of years for which advance royalties may be accepted for the LMU.

(e) The dollar amount of any production royalty for a Federal coal lease or LMU owed for any year during or subsequent to the year in which advance royalties are paid, shall be reduced (but not below zero) by the dollar amount of any advance royalty paid under that lease or LMU to the extent that such advance royalties have not been used to reduce production royalties for a prior year. Advance royalties paid on an LMU may be credited at the lessee's election against production royalties owed for any Federal lease or leases in the LMU.

(f) No advance royalty paid during the initial twenty-year term of a Federal coal lease or LMU shall be used to reduce a production royalty under paragraph (e) of this section after the twentieth year of a lease or LMU. For purposes of this paragraph, the initial twenty-year term of a lease shall commence on the effective date of the lease for all leases issued on or after August 4, 1976; on the effective date of the first lease readjustment after August 4, 1976, for all leases issued prior to August 4, 1976; and on the effective date of LMU approval for all LMU's. Any advance royalty paid on a lease prior to its inclusion in an LMU shall be credited to the LMU and shall be considered to have been paid on the date of LMU approval for the purposes of this paragraph, provided that the lease has been included in an LMU within the initial twenty-year term of the lease as determined in this paragraph and to the extent that the advance royalties have not been used to reduce production royalties on the lease.

§ 378.308 Crediting of production toward diligent development.

(a) For Federal coal leases issued or readjusted on or after August 4, 1976, all

production after the effective date of the lease or lease readjustment shall be credited toward diligent development.

(b) For Federal coal leases issued before August 4, 1976, that are governed by the diligent development and continued operation requirements of this Subpart D because the lessee did not make the election provided for in § 378.301(b), all production after August 4, 1976, and prior to the effective date of this Subpart D shall be applied toward diligent development, unless the lessee elects not to have this production credited. Any lessee who elects not to have this production applied toward diligent development must notify DOI within one year of the effective date of this Subpart D. If the pre-August 4, 1976 lease was readjusted after August 4, 1976, but before the effective date of this Subpart D, the lessee may only elect not to credit production prior to the readjustment. Any production after the readjustment shall be applied toward diligent development pursuant to paragraph (a) of this section.

(c) For Federal coal leases issued before August 4, 1976, that have not been readjusted between August 4, 1976 and the effective date of this Subpart D, and that are governed by the diligent development and continued operation requirements of this Subpart D because the lessee did not make the election provided for in § 378.301(b), all production after the effective date of this Subpart D shall be applied toward diligent development.

(d) For Federal coal leases issued before August 4, 1976, that are, by the lessee's election under § 378.301(b), governed by their lease clause which describes the minimum production requirements until the first lease readjustment after August 4, 1976, no production prior to the effective date of that first lease readjustment shall be applied toward diligent development.

(e) For LMU's, any production credited under this Subpart D to a Federal lease prior to its inclusion in the LMU shall be applied toward diligent development for the LMU.

§ 378.309 Special LMU rules.

(a) Production anywhere within the LMU after the date of LMU approval, of either Federal or non-Federal coal or a combination thereof, shall be applied toward satisfaction of the requirements of this Subpart D for achievement of diligent development and continued operation for the LMU.

(b) If an approved LMU is enlarged or diminished by DOI, the coal reserves and LMU coal reserves shall be adjusted by DOI accordingly. The dates for submission of a resource recovery and protection plan and achievement of diligent development shall not be changed by any such enlargement or diminution of the LMU.

§ 378.310 Enforcement and appeals.

The provisions of this Subpart D, including the enforcement of these provisions and appeals from determinations made in accordance with these provisions, shall be administered by DOI as prescribed in 30 CFR Part 211 and Part 290, and 43 CFR Part 4, as appropriate.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

List of Public Laws

Last listing December 18, 1981

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202–275–3030).

H.R. 4591 / Pub. L. 97–94 To amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes (Dec. 17, 1981; 95 Stat. 1205) Price: $1.50.

S.J. Res. 136 / Pub. L. 97–95 To validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona (Dec. 17, 1981; 95 Stat. 1206) Price: $1.50.

Vol. 46 No. 246
Pages 62239-62390

federal register

Wednesday
December 23, 1981

Highlights

62239 **The Task Force on Legal Equity for Women** Executive order.

62241 **Financial assistance to Chad** Presidential determination.

62296 **Loan Programs—Veterans** VA proposes to change procedures used to collect debts from program beneficiaries.

62256 **Education—DOD Dependents** DOD establishes procedures for free public education to handicapped children.

62351 **Small Business** SBA announces interest rates on direct business loans and SBA share of immediate participation loans.

62304 **Income Tax** USDA issues determination on exclusion of Agricultural Conservation Program payments from income taxes.

62281 **Nuclear Safety** NRC proposes to require improved hydrogen control capability in light-water reactor facilities.

62353 **Grant Programs—Energy** Synthetic Fuels Corporation announces solicitation and solicitation supplement for synthetic fuels projects. (2 documents)

CONTINUED INSIDE

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

62366 **Motor Vehicle Pollution** EPA proposes non-methane hydrocarbon standards for light-duty vehicles, motorcyles, light-duty trucks and heavy-duty engines. (Part II of this issue)

62301 **Airports** GSA proposes to clarify proper statute under which federally owned real property may be disposed of for airport purposes.

62285 **Air Transportation—Consumer Protection** CAB proposes to review oversales and denied boarding compensation rules.

62305 **Air Rates and Fares** CAB establishes interim standard industry fare level.

62267 **Copyright** Copyright Royalty Tribunal amends regulations on phonorecord royalty rates.

62353 **Treasury Notes** Treasury announces interest rates on Series Y–1983.

62246, 62291 **Securities—Reporting Requirements** SEC adopts amendments to quarterly reporting form and withdraws proposed amendments to annual reporting requirements for management investment companies. (2 documents)

Imports ITC issues notices on the following:

62338 Certain airtight wood stoves
62342 Certain hot air pop corn poppers and components
62343 Certain vacuum cleaner brush rollers
62338 Clothespins
62342 Doxycycline
62344 Hard-smoked herring filets from Canada
62348 Printed Circuit Boards and Base Material Laminates
62347 Salmon Gill Fish Netting of Manmade Fibers from Japan

62308 **Antidumping** Commerce/ITA announces preliminary results of administrative review of finding on racing plates (aluminum horseshoes).

62244 **Meat, Poultry and Poultry Products** USDA/AMS adopts final regulations increasing fees and charges for egg products inspection and egg, poultry, and rabbit grading.

62309 **Privacy Act Document** DOD

62245 **Freedom of Information** Commerce centralizes handling of appeals of initial denials of requests for records.

62354 **Sunshine Act Meetings**

Title 3—

The President

Executive Order 12336 of December 21, 1981

The Task Force on Legal Equity for Women

By the authority vested in me as President by the Constitution of the United States of America, and in order to provide for the systematic elimination of regulatory and procedural barriers which have unfairly precluded women from receiving equal treatment from Federal activities, it is hereby ordered as follows:

Section 1. *Establishment.* (a) There is established the Task Force on Legal Equity for Women.

(b) The Task Force members shall be appointed by the President from among nominees by the heads of the following Executive agencies, each of which shall have one representative on the Task Force.

(1) Department of State.

(2) Department of The Treasury.

(3) Department of Defense.

(4) Department of Justice.

(5) Department of The Interior.

(6) Department of Agriculture.

(7) Department of Commerce.

(8) Department of Labor.

(9) Department of Health and Human Services.

(10) Department of Housing and Urban Development.

(11) Department of Transportation.

(12) Department of Energy.

(13) Department of Education.

(14) Agency for International Development.

(15) Veterans Administration.

(16) Office of Management and Budget.

(17) International Communication Agency.

(18) Office of Personnel Management.

(19) Environmental Protection Agency.

(20) ACTION.

(21) Small Business Administration.

(c) The President shall designate one of the members to chair the Task Force. Other agencies may be invited to participate in the functions of the Task Force.

Sec. 2. *Functions.* (a) The members of the Task Force shall be responsible for coordinating and facilitating in their respective agencies, under the direction of the head of their agency, the implementation of changes ordered by the President in sex-discriminatory Federal regulations, policies, and practices.

(b) The Task Force shall periodically report to the President on the progress made throughout the Government in implementing the President's directives.

(c) The Attorney General shall complete the review of Federal laws, regulations, policies, and practices which contain language that unjustifiably differentiates, or which effectively discriminates, on the basis of sex. The Attorney General or his designee shall, on a quarterly basis, report his findings to the President through the Cabinet Council on Human Resources.

Sec. 3. *Administration.* (a) The head of each Executive agency shall, to the extent permitted by law, provide the Task Force with such information and advice as the Task Force may identify as being useful to fulfill its functions.

(b) The agency with its representative chairing the Task Force shall, to the extent permitted by law, provide the Task Force with such administrative support as may be necessary for the effective performance of its functions.

(c) The head of each agency represented on the Task Force shall, to the extent permitted by law, furnish its representative such administrative support as is necessary and appropriate.

Sec. 4. *General Provisions.* (a) Section 1–101(h) of Executive Order No. 12258, as amended, is revoked.

(b) Executive Order No. 12135 is revoked.

(c) Section 6 of Executive Order No. 12050, as amended, is revoked.

Ronald Reagan

THE WHITE HOUSE,

Presidential Determination No. 82–3 of December 5, 1981

Assistance for the Organization of African Unity Peacekeeping Operation in Chad

Memorandum for the Secretary of State

By virtue of the authority vested in me under sections 610(a) and 614(a)(1) of the Foreign Assistance Act of 1961, as amended (the Act), I hereby:

(1) determine that it is necessary for the purposes of the Act that up to $12,000,000 appropriated under the authority of Chapter 4 of part II of the Act be transferred to, and consolidated with, appropriations made under Chapter 6 of part II of the Act, to support the Peacekeeping Force in Chad of the Organization of African Unity;

(2) determine that it is important to the security interests of the United States that up to $2,000,000 of such funds be obligated immediately without regard to the provisions of Section 634A of the Act and of applicable appropriations legislation,

(3) authorize the furnishing of up to $12,000,000 of assistance for the Peacekeeping Force of the Organization of African Unity.

You are requested to report this determination to the Congress immediately, and none of the assistance provided for herein shall be furnished until after such report has been made.

This determination shall be published in the **Federal Register**.

Ronald Reagan

Vol. 46, No. 246
Wednesday, December 23, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 982

Filberts/Hazelnuts Grown in Oregon and Washington; Final Free and Restricted Percentages for the 1981–82 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes marketing percentages for inshell filberts for the marketing year which began May 1, 1981. The action is taken to promote orderly marketing conditions for the 1981 crop. It was recommended by the Filbert/Hazelnut Marketing Board which works with the USDA in administering the program.

EFFECTIVE DATES: May 1, 1981 through April 30, 1982.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D. C. 20250 (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it would result in only minimal costs being incurred by the regulated nine handlers.

Information collection (reporting and recordkeeping) under this part are subject to clearance by the Office of Management and Budget and are in the process of review. These information requirements shall not become effective until such time as clearance by OMB has been obtained.

It is found that an emergency situation exists which makes it impractical, unnecessary, and contrary to the public interest to: (a) Allow an opportunity for written public comment on this final rule; and (b) postpone the effective time of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because: (1) The percentages established herein for the 1981–82 marketing year apply to all merchantable filberts handled during that year; (2) currently handlers are shipping 1981 crop filberts in volume and this action must be taken promptly to achieve its purpose of releasing the full inshell trade demand quantity established October 19, 1981 (46 FR 52087); (3) handlers are aware of this action as recommended by the Board at an open meeting held November 13, 1981, and require no additional time to comply; and (4) this action relieves restrictions on handlers in that the final free percentage is greater than the final free computed percentage currently in effect.

This rule establishes final free and restricted percentages of 29 percent and 71 percent, respectively, for the 1981–82 marketing year. The establishment is pursuant to § 982.40 of the marketing agreement and Order No. 982, both as amended (7 CFR Part 982; 46 FR 26037), regulating the handling of filberts/hazelnuts grown in Oregon and Washington. The marketing agreement and order are collectively referred to as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Section 982.40(b) of the order prescribes that prior to August 1 of a marketing year, the Filbert/Hazelnut Marketing Board shall recommend establishment of an inshell trade demand for that year to the Secretary. If the Secretary finds, on the basis of the Board's recommendation or other information, that volume regulation for that marketing year would tend to effectuate the declared policy of the act, the Secretary shall establish the trade demand computed in accordance with § 982.40(b). On October 19, 1981, a trade demand of 5,043 tons was established because anticipated inshell supplies were expected to be far in excess of inshell needs, and volume regulation appeared appropriate for the 1981–82 marketing year.

Section 982.40(c)(1) of the order requires the Board to compute and announce prior to September 20 preliminary computed free and restricted percentages to release 70 percent of the established trade demand for a marketing year. The difference between 100 percent and the preliminary computed free percentage shall be the preliminary computed restricted percentage. Upon determining that a firm field price has been established between growers and handlers, § 982.40(c)(2) requires the Board to compute and announce final computed free and restricted percentages to release 80 percent of the established trade demand. The difference between 100 percent and the final computed free percentage shall be the final computed restricted percentage.

In accordance with these provisions, the Board computed and announced preliminary computed free and restricted percentages of 19 percent and 81 percent on September 16, 1981, and, after it determined that a firm field price was established, final computed free and restricted percentages of 22 percent and 78 percent on October 9, 1981.

Under § 982.40(c)(3) of the order, the Board, on or before November 15, shall meet to recommend to the Secretary the final free and restricted percentages to release 100 percent, or up to 110 percent if market conditions justify, of the inshell trade demand previously established by the Secretary for the marketing year. On November 13, 1981, the Board met and recommended final free and restricted percentages of 29 percent and 71 percent to release 100 percent of the previously established inshell trade demand of 5,043 tons.

In calculating the percentages, the Board considered the following supply and demand information for the 1981–82 marketing year:

	Tons
Inshell supply:	
(1) Total production	15,000
(2) Less substandard, farm use, etc.	1,500
(3) Merchantable production	13,500
(4) Plus carryover May 1, 1981, subject to regulation	920
(5) Supply subject to regulation (Item 3 plus Item 4)	14,420

	Tons
Inshell requirements:	
(6) Computed trade demand previously established	5,043
(7) Less carryover May 1, 1981, not subject to regulation	839
(8) Adjusted trade demand	4,204
Percentages:	
(9) Free percentage (item 8 divided by item 5)	29%
(10) Restricted percentage (100 percent minus 29 percent)	71%

The free percentage prescribes that portion of the total merchantable supply subject to regulation which may be handled as inshell filberts. The restricted percentage prescribes that portion which must be withheld from such handling. Restricted filberts may be shelled (for domestic or foreign consumption), exported, or disposed of in outlets determined by the Board to be non-competitive with normal market outlets for inshell filberts.

After consideration of all relevant matter presented, the information and recommendation submitted by the Board, and other available information, it is further found that the establishment, under § 982.40, of final free and restricted percentages for the 1981–82 marketing year will tend to effectuate the declared policy of the act.

PART 982—FILBERTS/HAZELNUTS GROWN IN OREGON AND WASHINGTON

Therefore, a new paragraph (b) is added to § 982.231 (46 FR 52067) to read as follows: (The following section will not be published in the Code of Federal Regulations).

§ 982.231 Trade demand and final free and restricted percentages—1981–82 marketing year.

* * * * *

(b) The final free and restricted percentages for merchantable filberts/hazelnuts for the 1981–82 marketing year shall be 29 percent and 71 percent, respectively.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Dated: December 18, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

---

7 CFR Parts 2855, 2856, 2859, and 2870

Increase in Fees and Charges

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The interim rule with request for comments published October 7, 1981 (46 FR 49569) which increased fees and charges for poultry, rabbit, and egg grading and egg products inspection is made final. These changes are necessary to cover increased costs associated with the programs. This document finalizes charges for the Federal voluntary egg products inspection; egg, poultry, and rabbit grading; and laboratory services and the overtime and appeal rates for Federal mandatory egg products inspection as revised in the interim rule.

EFFECTIVE DATE: December 23, 1981.

FOR FURTHER INFORMATION CONTACT: D. M. Holbrook, (202) 447–3506.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291, and has been classified "nonmajor" as it does not meet the criteria contained therein for major regulatory actions. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because the fees and charges merely reflect, on a cost-per-unit-graded/inspected basis, a minimal increase in the costs currently borne by those entities utilizing the services, and because competitive effects are offset under the major voluntary programs (resident shell egg and poultry) through administrative charges based on the volume of product handled; i.e., the cost to users increases in proportion to increased volume.

The Agricultural Marketing Act of 1946, as amended, provides for the collection of fees approximately equal to the cost of providing Federal voluntary egg products inspection; egg, poultry, and rabbit grading; and laboratory services. The Egg Products Inspection Act requires that the cost for overtime inspection be borne by the user of the service. Because fees and charges for these services—as determined by the grader's or inspector's salary and fringe, cost of supervision, travel, and other overhead and administrative costs—have increased since the last adjustment, it was necessary to make the revised charges effective November 1, 1981, to cover the costs of services.

Since the last nonresident program fee increase, which was based primarily on the pay increase effective in October 1980, Federal employees have received a 4.8-percent pay increase, and grader training and other fringe costs have increased 3 to 4 percent. In addition to these added costs, the grade level or pay scale of the graders performing service on a nonresident or lot basis has shifted to a higher level. Therefore, overall, the fee for nonresident service on an hourly basis was increased about 15 percent.

Costs have increased also for the resident shell egg and poultry grading programs. The hourly rate charged for graders under the resident grading programs does not cover costs of supervision, travel, and other overhead and administrative expenses. These costs are covered by an administrative service charge which is based on the number of cases of shell eggs and the number of pounds of poultry handled in plants using the service. Since these rates were last increased in 1976, supervisory salaries have increased 38 percent; per diem, 50 percent; mileage, 50 percent; rent, 23 percent; and telephone, 65 percent. To compensate for these significant cost increases, the administrative service charge per case of shell eggs and per pound of poultry and the minimum and maximum payment per billing period for each official plant were increased on an average about 39 percent. Similar cost increases have also occurred elsewhere in these programs, as is more fully detailed in the interim rulemaking document.

Because increased revenues were urgently needed to cover costs of services, an interim rule published October 7, 1981, with an effective date of November 1, 1981, was necessary. The interim rule invited comments for 60 days ending December 7, 1981. One comment was received from a State department of agriculture addressing objection to the short time frame between publication of the interim rule and the effective date and the size of the increases. However, no data were presented demonstrating an error in the Agency's data or determination of the level of charges necessary to cover costs. These increases are mandated under the Agricultural Marketing Act of 1946, as amended, and the Egg Products Inspection Act, and it was necessary to implement the revised charges effective November 1, 1981, to cover the costs of services. Since the document does not alter the regulations which have been in effect since November 1, 1981, there is no reason to postpone its effective date for 30 days. Thus, good cause is found to make this document effective December 23, 1981.

Accordingly, for the reasons and purposes stated above and in the interim rule published October 7, 1981 (46 FR 49569), the amendments made to §§ 2855.510, 2855.550, and 2855.560 of Part 2855; §§ 2856.46, 2856.47, 2856.52,

and 2856.54 of Part 2856; §§ 2859.126 and 2859.370 of Part 2859; and §§ 2870.71, 2870.72, 2870.76, and 2870.77 of Part 2870; Title 7, Code of Federal Regulations, by the said interim rule are hereby made final, without any change.

(Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*); Egg Products Inspection Act (21 U.S.C. 1031–1056))

Done at Washington, D.C. on December 18, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

DEPARTMENT OF COMMERCE

Office of the Secretary

15 CFR Part 4

Public Information; Centralization of Handling; Final Rule

AGENCY: Office of the Secretary, Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce is amending certain provisions of Part 4 of Title 15 of the Code of Federal Regulations to centralize the handling of Freedom of Information Act (FOIA) appeals. Centralization is expected to increase the efficiency and timeliness of handling FOIA appeals.

EFFECTIVE DATE: December 23, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Levine (202) 377–5384.

SUPPLEMENTARY INFORMATION: These amendments pertain solely to matters of agency organization and procedure. Therefore, the provisions of the Administrative Procedure Act on rulemaking, 5 U.S.C. 553, requiring notice of proposed rulemaking and opportunity for public participation are inapplicable. The requirement for preparation of an initial or final regulatory flexibility analysis under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, is also inapplicable. Further, these amendments are exempt from the requirements of Executive Order 12291. Since these amendments do not contain an information collection requirement, the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, does not apply.

The purpose of the proposed amendments is to centralize the handling of all appeals from initial denials of FOIA requests for records. This will be accomplished by making the General Counsel the sole official responsible for all final determinations regarding such appeals. This process is expected to result in: (1) More timely and efficient handling of appeals; (2) elimination of the possibility of inconsistencies in the interpretations of the applicable law; and (3) facilitation of the development of greater in-depth expertise in matters relating to the FOIA.

PART 4—PUBLIC INFORMATION

For the reasons set out in the preamble, Part 4, Subtitle A of Title 15, Code of Federal Regulations, is amended as set forth below.

Authority: 5 U.S.C. 552; 5 U.S.C. 553; 5 U.S.C. 301; Reorganization Plan No. 5 of 1950.

2. Section 4.6 is amended by revising paragraphs (b)(5)(iv) and (b)(6) to read as follows:

§ 4.6 Initial determinations of availability of records.

* * * * *

(b) * * *

(5) * * *

(iv) A brief statement of the right of the requester to appeal the determination to the General Counsel and the address to which the appeal should be sent, in accordance with § 4.8 (a) and (b).

(6) A copy of each initial denial and its incoming request for records shall be provided to the Assistant General Counsel for Administration.

3. Section 4.8 is amended by revising paragraphs (b), (c), (e), and (g) to read as follows:

§ 4.8 Appeals from initial denials or untimely delays.

* * * * *

(b) An appeal shall be addressed to the General Counsel, Department of Commerce, Room 5879, 14th and Constitution Avenue NW., Washington, D.C. 20230. Both the appeals envelope and the letter shall be clearly marked "Freedom of Information Appeal" or "Appeal for Records" or the equivalent. An appeal not addressed and marked as provided herein will be so marked by Department personnel when it is so identified, and will be forwarded immediately to the General Counsel. An appeal incorrectly addressed will not be deemed to have been "received" for purposes of the time period for appeal set forth in 5 U.S.C. 552(a)(6), until the earlier of the time that (1) forwarding to the General Counsel has been effected, or (2) such forwarding would have been effected with the exercise of due diligence by Department personnel. In each instance when an appeal is so forwarded, the Office of Gneral Counsel shall notify the requester that the appeal was improperly addressed and of the date the appeal was received by the office.

(c) The General Counsel shall act upon an appeal within twenty days (excluding Saturdays, Sundays and legal public holidays) of its receipt, unless an extension of time is made in unusual circumstances, when the time for action may be extended up to ten days (excluding Saturdays, Sundays and legal public holidays) minus any days of extension granted at the initial request level. A notice of such extension shall be sent to the requester, setting forth the reasons and the date on which a determination of the appeal is expected to be sent. As used in this paragraph, "unusual circumstances" are defined in § 4.6(b)(2).

* * * * *

(e) If no determination of an appeal has been sent to the requester within the twenty day period or the last extension thereof, the requester is deemed to have exhausted his administrative remedies with respect to such request, giving rise to a right of judicial review as specified in 5 U.S.C. 552(e)(4). When no determination can be sent to the requester within the time limit, the General Counsel shall nonetheless exercise due diligence in continuing to process the appeal. When the time limit expires, the requester shall be informed of the reason for the delay, of the date when a determination may be expected to be made, and of his right to seek judicial review. The requester may be asked to forego judicial review until the appeal is determined.

* * * * *

(g) The General Counsel shall send a copy of each determination on appeal to the central public reference facility referred to in § 4.4(c) where it will be indexed and kept available for public inspection and copying.

Appendix A [Amended]

4. Sections 4 and 5 of Appendix A to 15 CFR Part 4 have been amended by revising paragraphs .01–.05 in Section 4. and by revising paragraph .03b.5., .03c. introductory text, and paragraph .04 in Sec. 5 to read as follows:

Sec. 4. Delegation of authority.

.01 The Secretary of Commerce is responsible for the effective administration of the Act and other laws applicable to the dissemination of records and other information of the Department. Aside from the Secretary's retaining authority for his immediate office, or as he otherwise may act, authority is hereby delegated to the following officials of the Department to decide initially whether or not to make publicly available

records and other information subject to the Act which are in the possession of their organizations, in accord with the provisions of the Act, this order and rules supplementing it, other applicable law, and as may be otherwise provided by the Secretary.

a. Secretarial Officers, for their respective offices and for the Department staff units reporting to them (as defined in Department Organization Order 1-1, "Mission and Organization of the Department of Commerce" (35 FR 19704, December 27, 1970)), as amended.

b. Heads of operating units of the Department (as defined in Department Organization Order 1-1).

.02 Although the officials having authority under subsection 4.01 of this section may permit employees within their organizations to make records and information publicly available under the Act, they shall redelegate authority initially to *deny* such records and information only to a limited number of officers or employees under them without power of further redelegation.

.03 The authority to make final decisions on appeal of initially denied requests for records is hereby delegated to the General Counsel of the Department without power of further redelegation.

.04 The General Counsel of the Department, and his designees, shall provide legal services to enable the officials designated in subsections 4.01 and 4.02 of this section to discharge their respective duties and responsibilities under and pursuant to this order, and shall make legal interpretations of questions arising thereunder. The General Counsel shall also act as the focal point within the Department for consultation or other communication with the Department of Justice with respect to any actions to be taken in connection with the Act, this order, and rules implementing it.

.05a. Program officials shall provide all support and assistance necessary to enable the General Counsel to perform the functions delegated in this order. This shall include (i) keeping the Office of the General Counsel informed of Freedom of Information Act requests received by the unit; (ii) providing prompt responses to Office of the General Counsel instructions, or requests for assistance; (iii) as requested, allowing the Office of the General Counsel access to relevant records; and (iv) promptly consulting with the Office of the General Counsel regarding any legal issues which arise during the processing of a request.

b. The Office of the Inspector General shall comply with the provisions of this order, except that Office of the Inspector General need not allow the Office of the General Counsel access to records to the extent that (i) information contained therein might reveal the identity of a confidential source, or (ii) the Inspector General determines that disclosure to Office of the General Counsel would interfere with an audit, investigation, or prosecution.

Sec. 5. Functions and responsibilities.

* * * * *

.03 * * *

b. * * *

5. A procedure for administrative appeal of a request for a record initially denied in whole or in part. The appeal procedure shall include provisions which insure that: (i) the requester may file an appeal, in writing, within thirty days of receipt of an initial denial; (ii) an appeal shall be considered received when properly addressed to the General Counsel; (iii) appeals shall be decided without right of the requester for a personal appearance, oral argument, or hearing; (iv) timely decisions on appeals or other notices concerning them shall be made in writing, and communicated to the requester; (v) if the decision is wholly or partly in favor of the requester, the General Counsel shall make the particular records or information available to the requester or order that such be done; and to the extent that the decision is adverse to the requester, it shall briefly state the reason for the decision and the identity of the official responsible for making it, (vi) whenever applicable, requesters shall be effectively notified of their right to seek judicial review.

* * * * *

c. The officials designated in subsections 4.01 and 4.02 of this order who are responsible for initially determing whether any records properly requested under the Act may be made available, shall include in their consideration

* * * * *

.04 *Special review requirements.*—a. The General Counsel or one of his designees shall be consulted before any initial denial is issued.

b. The Director of the Office of Public Affairs or his designee shall be informed before any decision on an appeal from an initial denial is issued.

c. As provided in Part B, Chapter IV, subsection 5.06f. of the Department's Handbook of Security Regulations and Procedures, appeals of initial denials based, even in part, on the ground that the matter is exempted from disclosure under 5 U.S.C. 552(b)(1) (classified information) shall be referred to the Departmental Information Security Program Committee. That Committee shall conduct a declassification review and determine if the record(s) involved may be made available to the public.

d. Whenever, on appeal from an initially denied request, the General Counsel and the concerned Secretarial Officer or operating unit head cannot agree on whether applicable exemptions should be waived, as provided in subsection .03c.4. of this section, the matter shall be promptly referred to the Secretary for resoultion.

Arlene Triplett,

Assistant Secretary for Administration.

BILLING CODE 3510-BW-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 249 and 274

[Release Nos. 33-6366, 34-18237, IC-12107; File No. S7-864]

Revisions of Investment Company Current Report Forms

AGENCY: Securities and Exchange Commission.

ACTION: Final rules and amendments to forms.

SUMMARY: The Commission is adopting today three revisions to the form used by most management investment companies to report the occurrence during the preceding calendar quarter of any one or more of twelve specified events. The Commission is eliminating the requirement that investment companies filing the form list on a calendar quarterly basis certain information about their securities portfolios. In addition, the Commission is excepting certain routine actions relating to investment advisory contracts from the form's requirement that reporting companies furnish information concerning matters submitted to security holders for approval. Finally, the Commission is adopting a revision of the form to require that reports pursuant to the form be filed on a fiscal quarter rather than calendar quarter basis. The Commission is adopting these amendments in order to reduce the number of times management investment companies must file reports and to make reporting on that form less burdensome for those companies.

EFFECTIVE DATE: December 16, 1981.

FOR FURTHER INFORMATION CONTACT: Anthony A. Vertuno, Esq. (202) 272-2107, or Jane A. Kanter, Esq. (202) 272-2033, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission announced today the adoption of amendments to its Form N-1Q (17 CFR 274.106), which form was adopted by the Commission pursuant to section 30 of the Investment Company Act of 1940 ("1940 Act") [15 U.S.C. 80a-29] and sections 13 and 15(d) of the Securities Exchange Act of 1934 ("1934 Act") (15 U.S.C. 78m, 78o(d)), and is used by management investment companies to report the occurrence during the preceding calendar quarter of any one of the twelve events specified in the form.

A report on Form N–1Q must be filed within 30 days after the calendar quarter during which any of the twelve specified events has occured. Among the events which an investment company required to file Form N–1Q must report on that form are changes in the company's securities portfolio and matters submitted to a vote of its security holders.[1]

The effect of requiring investment companies to report portfolio transaction is that management investment companies generally must submit Form N–1Q to the Commission four times a year. Further, the requirement to report on matters submitted to shareholders requires the reporting of the continuation of an existing advisory contract as well as the approval of a new one. As discussed in detail below, the Commission is adopting proposed revisions of Form N–1Q, which eliminate the requirement to report portfolio changes and shareholder voting on the continuation of an advisory contract and revise from a calendar year basis to a fiscal year basis the requirement to file the report.

Background

1. Reporting of Changes in Securities Portfolios

Item 1 of Form N–1Q requires all management investment companies, except small business investment companies and certain venture capital companies, to report any acquisition or disposition of portfolio securities made during a calendar quarter. The first report filed by an investment company pursuant to Item 1 and the first report filed pursuant to that item after the end of a year must include information as to the reporting company's entire securities portfolio.

When the Commission adopted Form N–1Q in Securities Exchange Act Release No. 8201, it stated that Item 1 of the form was being adopted for three reasons: To aid the Commission in carrying out its regulatory responsibilities under the 1940 Act; to aid the Commission in conducting studies of investment company portfolio transactions and their effects on the market place; and to provide the public with information about the securities transactions of Management investment companies.

The Commission's proposal to amend Form N–1Q, published on November 17, 1980, in Securities Act Release No. 6263 (45 FR 76158 (November 25, 1980)), reflected its belief that, although investment company portfolio transaction data is important for a number of purposes, it no longer needed to receive that information on a quarterly basis. Pursuant to its authority under section 31(b) [15 U.S.C. 80a–30(b)] of the 1940 Act to inspect investment company books and records, the Commission can obtain current information about portfolio transactions in individual cases where necessary. In light of its ability to inspect books and records, it appeared to the Commission that an annual reporting of investment company portfolio transactions would be sufficient to allow it to conduct whatever studies of those transactions might be necessary and to carry out its regulatory responsibilities under the 1940 Act effectively and efficiently.

In addition, the proposed amendment reflected the Commission's belief that any adverse effects on the public that could result from the elimination of quarterly reporting of portfolio transactions by investment companies would be minimal. It appeared to the Commission that, to the extent members of the public needed information on a calendar quarterly basis concerning the portfolios of investment companies, those individuals could rely on information contained in Form 13F [17 CFR 249.325] reports by institutional investment managers filed pursuant to section 13(f) (15 U.S.C. 78m(f)(1)) of the 1934 Act. Although the information contained in Forms 13F and N–1Q is not identical, and is not reported in the same manner on the two forms, the Commission believed in light of all the circumstances that Form 13F reports provide a reasonable source of public information concerning investment company securities portfolios.[2]

Finally, since virtually all investment companies engage in portfolio transactions during every calendar quarter, they are required to file Form N–1Q reports four times a year, and the Commission found that Form N–1Q was often filed for the sole purpose of reporting the occurrence of portfolio transactions. In light of the reporting burden for investment companies in filing Form N–1Q, and in consideration of the purposes for which the requirement was imposed, the Commission, on November 17, 1980, proposed to amend Form N–1Q by, among other things, eliminating the requirement that investment companies filing Form N–1Q include portfolio information. In addition, at that time the Commission proposed to amend Form N–1 (17 CFR 239.15, 17 CFR 274.11), which is used by open-end management investment companies to update their 1940 Act registration statements, and Form N–2 (17 CFR 239.14, 17 CFR 274.11a–1), which is used by closed-end management investment companies for the same purpose, to require the reporting of certain portfolio information.[3] Under the amendments as proposed, reporting companies would include in Part II of their annual updating amendments to their registration statements a table of portfolio information virtually identical to the table that is now required by Item 1 of Form N–1Q. Reporting companies would be required to show in a tabular format: (a) The number of shares (or other units) of equity securities or principal amount of debt securities acquired or disposed of for their portfolios during the preceding fiscal year; (b) their holdings of such securities and cash at the end of the fiscal year; and (c) their holdings of all other securities as the end of the fiscal year.

The Commission did not include in its proposal for annual reporting of investment company portfolio transactions a confidential treatment provision similar to the one now contained in Item 1 of Form N–1Q. Instruction 8 to Item 1 provides generally for confidential treatment of information filed in a Form N–1Q report relating to a program of purchasing securities of a particular issuer or issuers engaged in by the reporting company both at the end of the calendar quarter and on the date the report is filed. Instruction 8 was originally made part of Form N–1Q in response to public comments maintaining that, if a reporting company's current portfolio purchase program were disclosed, the company might have to pay higher prices for the securities being

[1] The other reportable events are as follows: (a) Changes in the reporting company's policies with respect to security investments; (b) legal proceedings involving the reporting company; (c) changes in the assets securing any class of debt of the reporting company; (d) defaults and arrears on the reporting company's senior securities; (e) changes in control of the reporting company; (f) changes in the constituent instruments defining the rights of the holders of any class of the reporting company's securities; (g) reevaluation of the reporting company's assets or restatement of its capital share accounts; (h) changes in the reporting company's certifying accountant; (i) changes in the accounting principles and practices followed by the reporting company; and (j) any merger or consolidation of the reporting company with one or more other registered investment companies. Adopted by the Commission in Securities Exchange Act Release No. 8201, December 8, 1967 [32 FR 17563 (December 8, 1967)].

[2] For a more detailed discussion and comparison of these two forms see Securities Act Release No. 6101.

[3] Rule 8b–16 under the 1940 Act [17 CFR 270.8b–16] requires management investment companies, other than small business investment companies, to update their 1940 Act registration statements annually.

purchased.[4] It appeared to the Commission that, since annual updates filed on either Form N–1 or Form N–2 would cover longer time periods than Form N–1Q currently does, and since the time allowed for the filing of those annual updates is significantly longer than the time allowed for the filing of Form N–1Q,[5] the danger that a registrant would be required to disclose sensitive information relating to an ongoing purchase program would be remote. Thus, the Commission believed that a provision resembling Instruction 8 to Item 1 of Form N–1Q did not need to be incorporated as part of the annual reporting requirement being proposed.

2. Reporting of Matters Submitted to Shareholders

Item 2 of Form N–1Q requires a reporting investment company to furnish certain information about any matter submitted to a vote of the company's security holders during the preceding quarter year. Instruction 2 to that item provides that Item 2 need not be answered as to procedural matters, the selection or approval of auditors, and the uncontested election of directors. Instruction 2 reflected the Commission's belief that certain routine matters voted upon at shareholder meetings need not be reported on Form N–1Q. In Securities Act Release No. 6263 the Commission proposed to amend Instruction 2 to add voting on the continuation of the reporting company's current advisory contract to the list of routine matters that need not be reported under Item 2 of Form N–1Q.[6] The Commission expected that this amendment, together with the elimination of Item 1, would have the effect of appreciably reducing the number of Form N–1Q reports management investment companies must file.

3. Changing Filing Date of Form N–1Q

At the present time, Form N–1Q is required to be filed within 30 days after the close of each calendar quarter during which any of the twelve events specified in the form has occurred. Calendar quarterly filing of Form N–1Q was adopted by the Commission to obtain information about portfolio transactions on a comparable time basis.[7] In light of the Commission's proposal to eliminate the requirement to include portfolio transaction information on Form N–1Q, the Commission also proposed to revise the form to require that reports be filed 30 days after the end of an investment company's fiscal quarter during which any of the events specified in the form occurred. The Commission believed that this additional change would also reduce unnecessary burdens on investment companies in filing the report.

The Commission today adopts the proposed amendments to Form N–1Q, and withdraws its proposal to amend Forms N–1 and N–2. The amendments to Form N–1Q are being adopted in the same form as they were proposed, and the major issues raised by the commentators are discussed in detail in this release. Readers are referred to Securities Act Release No. 6263 for a more extensive discussion of the proposed amendments.

Public Comments

The Commission received one hundred sixty-nine comments on Securities Act Release No. 6263. Eleven of the commentators endorsed the Commission's proposal to amend Form N–1Q by eliminating the requirement that investment companies report portfolio transaction changes on Form N–1Q. Most commentators, however, had specific objections to several of the proposed amendments to Forms N–1Q, N–1 and N–2. In addition, many of the commentators addressed issues that were not specifically raised in Securities Act Release No. 6263. Many of the comments opposing adoption of the proposal were substantially similar. The Commission has considered the matters discussed in the comments and has determined to adopt the amendments to Form N–1Q as previously published and to withdraw its proposal to amend Forms N–1 and N–2.

Comments on Elimination of Item 1 from Form N–1Q

Of the comments received by the Commission, one hundred fifty-three objected to the Commission's proposal to eliminate Item 1 from Form N–1Q. As stated earlier, that item requires that management investment companies list on a calender quarterly basis all changes in the company's securities portfolio. The arguments made by the commentators opposing this proposal can be considered in three general categories.

1. Utility of Item 1 in Identifying Corporate Shareholders

One hundred and four of the commentators expressed the view that, due to the use of "street" and "nominee" names,[8] and the additional layering resulting from the use of depositories holding registered securities in nominee names, issuers of securities frequently have difficulty in ascertaining exactly who their shareholders are.[9] These commentators asserted that Item 1 of Form N–1Q provides operating companies with an important source of information in determining the identity of their major stockholders.

A majority of these commentators did not explain their particular need for detailed information concerning shareholder identity. Of those who did, some indicated that Item 1 of Form N–1Q is used by issuers of securities to understand and analyze transactions involving their stock, to ascertain investment patterns or trends within the investment community pertaining to their stock, and to keep generally informed of institutional investment activity. In addition, some commentators stated that shareholder identification is essential to the investor relations programs of operating companies. Many of these commentators argued that corporate management has a responsibility to communicate with its beneficial owners and to provide them with current information about their corporation through the use of updated financial reports, shareholder meetings and proxy solicitations. Further, these

---

[4] Securities Act Release No. 6263.

[5] Rule 8b–16 under the 1940 Act requires annual updates on either Form N–1 or Form N–2 to be filed within 120 days after the end of the reporting company's fiscal year; whereas, Form N–1Q must be filed within 30 days after the end of a quarter in which a reportable event occurs.

[6] The Commission's view that the determination to approve or disapprove a management investment company's current advisory contract as a routine matters was reflected in an earlier release authorized by the Commission setting forth its Division of Investment Management's review procedure applicable to preliminary proxy material. Securities Act Release No. 5988, October 19, 1978 [43 FR 49866 (October 25, 1978)]. In that release, the Division of Investment Management indicated that the staff will ordinarily make no substantive review of proxy statements that have no proposals other than those relating to the uncontested election of directors, the ratification of the selection of accountants, and the continuation of a current advisory contract.

[7] Securities Exchange Act Release No. 8201.

[8] A nominee is a partnership formed to act as record holder of securities held by institutional investors and financial intermediaries for their own account or the account of their customers who are the beneficial owners of the stock. Street name refers to the form of nominee name registration brokers use to register securities they hold for customers or for their own account. *Staff Report On Corporate Accountability*, Division of Corporation Finance, Securities and Exchange Commission, printed for the use of the Senate Committee on Banking, Housing and Urban Affairs, 96th Cong. 2d Sess. (September 4, 1980).

[9] Many commentators indicated that a large percentage of their shares were held by "institutional investors," although none indicated what percentage of their shares were held in nominee or street name, or what percentage were held by investment companies.

commentators asserted that, without detailed knowledge of specific stockholders and their needs, the operating companies would be unable to contact their shareholders or formulate financial policies to meet their investment objectives. They further suggested that Item 1 of Form N–1Q enables them not only to maintain an up-to-date profile of the owners of their securities, but also to identify prospective shareholders by ascertaining which institutions own stock in their direct competitors. In addition, several of the commentators stated that the information obtained from Item 1 enables issuers of securities to establish personal contact with the representatives of major investors and fund "portfolio decision makers," so that they can provide current information to these individuals and schedule meetings with these larger investors. Along the same lines, some of the commentators suggested that it was important to know which specific entity has "voting control" of a security, and to know the actual entity responsible for acquisition or disposition decisions.

A few of the commentators indicated that information obtained from Item 1 of Form N–1Q is reported in the financial press and therefore provides the public in general with data concerning the extent of institutional interest in specific companies. One of the commentators also stated that it was important for a corporation to have knowledge of all large investor groups who were accumulating its stock, even when these investors did not own sufficient stock to require the filing of a beneficial ownership report on Schedule 13D [17 CFR 240.13d–101] pursuant to the 1934 Act.[10]

Nine of the commentators stated that many operating companies, at present, have difficulty in identifying their shareholders because of the increasing use of street and nominee names by institutional investors, in concert with the prevalence of registered clearing agencies, such as the Depository Trust Company. In addition, these commentators stated that, as a consequence, operating companies were experiencing an increasing inability to establish quorums for their annual meetings, which problem they felt would be exacerbated if Item 1 of Form N–1Q was eliminated. These commentators asserted that Item 1 is vital for proxy solicitation purposes, since the information which can be obtained from Form N–1Q specifically identifies the entity that has beneficial ownership of their securities.

Many of the commentators who were concerned about shareholder identification for the reasons previously specified, expressed the view that other sources of information concerning management investment company portfolio holdings are not sufficient. Specifically, sixty-eight commentators asserted that Form 13F of the 1934 Act was not an adequate source of information concerning investment company portfolio holdings for several reasons. These commentators stated that, whereas one Form N–1Q is filed for each reporting investment company and provides information about only that reporting company, an investment adviser filing Form 13F reports the aggregate portfolio information with respect to all investment companies it advises.[11] The commentators asserted that, in view of the aggregate nature of the Form 13F reports, they are unable to use the information contained in Form 13F to identify a particular investment company's ownership interest in their securities, or to ascertain whether the holdings of a particular investment company are included in an investment adviser's Form 13F report. In addition, these commentators indicated that, because of the reporting thresholds applicable to Form 13F,[12] it was their understanding that the securities holdings of approximately thirty to forty percent of all investment companies were also not included on Form 13F reports.[13]

2. Use of Item 1 Data by Investors and Securities Professionals

In addition to the preceding comments regarding shareholder identification, which generally reflect the concerns of operating companies about identifying their shareholders, the Commission received twenty-four comments from persons representing brokerage firms, market analysts and securities traders. Many of these commentators suggested that the information from Item 1 of Form N–1Q is used on a daily basis by market analysts, investors and fund boards of directors as part of their selection process in evaluating the investment decisions and policies of current or prospective investment advisers.[14] These commentators indicated that their evaluation of an adviser is accomplished by performing periodic examinations of the adviser's investment decisions as reflected in the portfolio transactions of the funds managed by that particular adviser. Further, these commentators stated that although shareholder reports are available on a fiscal basis, it is necessary for them to receive information for all investment companies as of a specifically determinable date for comparability purposes, and that, consequently, reports prepared on a fiscal basis would not be as easily comparable since many investment companies would be reporting at different times.

Similarly, some of these commentators suggested that Item 1 information is used by investors in monitoring financial and investment positions of funds in which the investor has an interest or might be prospectively interested. Several of these commentators suggested that investors select funds on the basis of specific investment criteria, and rely on Item 1 for information concerning a particular fund's performance. A few of these commentators stated that the information available from Form 13F would not be appropriate for their purposes since, in view of the aggregated nature of Form 13F information, advice provided by a particular adviser to different funds which have dissimilar strategies would not be revealed. Moreover, one of the commentators suggested that one of the attractions of investment companies for sophisticated investors is the "high degree of disclosure" presently required for investment companies.

In addition, several of these commentators stated that smaller brokerage firms need the transactional information available from Item 1 since they believe that they cannot absorb the overhead costs for more sophisticated portfolio updating services. These commentators asserted that for a

[10] This report is required to be filed pursuant to section 13(d) of the 1934 Act [15 U.S.C. 78m(d)], when beneficial ownership of any equity security is above a specified level.

[11] The Commission previously noted these differences between Form 13F and Form N–1Q in Securities Act Release No. 6283.

[12] Under rule 13F–1, an institutional investment manager is required to file a Form 13F only if it exercises investment discretion over accounts having $100,000,000 or more in certain equity securities as of a specified date. Thus, the holdings of investment companies receiving advice from an adviser not meeting the $100,000,000 threshold would not be disclosed in a Form 13F report. In addition, Form 13F requires holdings of only certain equity securities to be reported. A Form 13F reporting investment adviser is also not required to include in its report holdings of fewer than 10,000 shares having an aggregate fair market value of less than $500,000.

[13] As indicated in the comments, this thirty to forty percent figure appears to be based on the assumption that 250 investment companies are not included in the Form 13F reports filed by investment advisers.

[14] One commentator suggested that such analysis is essential for boards of directors of investment companies to review in acquitting their responsibilities to review and approve annually investment advisory contracts.

brokerage firm to compete and provide accurate, efficient and timely executions at cost effective rates, it is necessary for the firm to be fully informed of each institutional account's holdings and transactions. Further, these commentators suggested that their ability to transact block business efficiently, with minimal disruptions of the market place, is dependent upon their brokers' ability to locate potential buyers and sellers quickly. These commentators stated that the information which they obtain from Item 1 of Form N–1Q is utilized for the above purposes. Additionally, several of these commentators suggested that the information from Form N–1Q helps to contribute to greater market liquidity and depth.

Although these commentators indicated that they are interested in the transactional information contained in Item 1, a majority of the commentators who objected to the elimination of Item 1 specifically stated that their primary concern in retaining Item 1 was so that they could ascertain the net portfolio equity securities positions of investment companies. In addition, certain private firms which tabulate the information contained in Form N–1Q reports suggested in their comments that the transactional information in Item 1 is costly and unnecessary, and that, both to alleviate the compliance burden on investment companies and to provide the financial community with the information it really needs, Form N–1Q should be modified to report only end of quarter equity securities holdings, as Form 13F currently does.

In addition to the comments received from securities professionals, the Commission received several comments from individual investors who mistakenly believed that the proposed revisions of Form N–1Q would result in the elimination of all reporting by management investment companies of their portfolio holdings. These commentators appeared to be unaware that, notwithstanding the proposed revision of Form N–1Q, investment companies would still have to continue to make other required reports, including periodic reports to shareholders showing a schedule of investments.

3. Reporting Burden

Forty-one commentators addressed the issue of whether Item 1 of Form N–1Q was burdensome for investment companies to prepare. Of these, thirty-five, none of whom represented investment companies, asserted that the costs to investment companies of preparing Item 1 of Form N–1Q are minimal. Specifically, several of these commentators, pointing to the fact that an investment company is required on a daily basis to make calculations of the sales and redemption price of its shares, argued that an investment company should be able to generate on a calendar quarterly basis information concerning all acquisitions and dispositions of portfolio securities made during a calendar quarter by that investment company. Several commentators were under the mistaken impression that the information required by Item 1 consists of quarter-end portfolio positions, and argued that such information is not burdensome for investment companies to compile. Similarly, several commentators argued that the reporting burden for investment companies should not be onerous in view of the fact that most of these companies generate quarterly reports to their shareholders which contain information concerning their portfolio securities holdings. In addition, a few other commentators stated that it was their understanding that most investment companies record all information on computers in a manner which is easily accessible for purposes of Form N–1Q. Finally, some of these commentators argued that the reporting burden for investment companies is far outweighed by the benefit to users of Item 1 of the Form N–1Q reports.

On the other hand, six commentators representing various investment companies claimed that the reporting burden for these companies is significant. In particular, one commentator argued that the requirement that all transactions and holdings must be adjusted for splits and stock dividends imposes "a great burden" on the filers of Form N–1Q, since in order to comply with the requirements of the form it is necessary for the investment company to review every security that was held by the company at any time during the reporting period and to ascertain whether any shares were split or otherwise adjusted. If so, an adjustment is required in each such case.

All of these commentators stated that information virtually identical to what is reported in Item 1 is available from other sources, of which Form 13F reports are only one. They asserted that the elimination of such duplicative information, therefore, in the interests of the investment company's shareholder directly, if the company pays the expense of preparing Form N–1Q, or indirectly, if such expense is paid by the investment adviser. One commentator asserted, in this connection, that the elimination of duplicative reporting requirements is mandated by section 30(c) [15 U.S.C. 80a–29(c)] of the 1940 Act, arguing that section 30(c) requires the Commission to issue rules to eliminate the duplication of filings which result from the overlapping reporting requirements of sections 13 and 15(d) of the 1934 Act and section 30 of the 1940 Act.[15]

Discussion of Comments on Elimination of Item 1 From Form N–1Q

The Commission has carefully considered the foregoing comments but has determined to adopt the position set forth in Securities Act Release No. 6263 that continuation of the requirement that investment company portfolio transactions be reported each quarter is not justified. As discussed above, the Commission adopted Item 1 for three reasons: to aid it in its regulatory responsibilities, to collect information for studies, and to make the information available to the public. We have concluded that the information is no longer required for the first two purposes and that, in the absence of those two reasons, it is not necessary to continue this reporting requirement solely for the purpose of institutional disclosure. Under the institutional disclosure program, which was implemented by the Commission pursuant to section 13(f) of the 1934 Act, certain institutional investment managers, including investment companies and investment advisers, began in February of 1979 to file quarterly reports on Form 13F of their holdings of equity securities.[16] The Commission adopted this program after extensive consideration of the appropriate balance between the public interest in institutional disclosure and the costs and other burdens reporting would impose on institutions. After reviewing the comments on the present proposal, the Commission believes that most of the information the commentators want is available in a somewhat different but suitable form on the Forms 13F of investment companies and their investment advisers and, accordingly, that the limited benefit to the public of quarterly transaction reporting by investment companies is

[15] Section 30(c) provides: "The Commission shall issue rules and regulations permitting the filing with the Commission, and with any national securities exchange concerned, of copies of periodic reports, or of extracts therefrom, filed by any registered investment company pursuant to subsections (a) and (b), in lieu of any reports and documents required of such company under sections 13 and 15(d) of the Securities Exchange Act of 1934."

[16] The requirements of the institutional disclosure program are discussed in more detail in note 12, *supra*.

outweighed by the costs of such reporting. In this regard, nothing in the comments provides a basis for concluding that investment companies should be subject to more burdensome portfolio reporting requirements than are other institutional investors. Finally, even in the absence of quarterly reporting, investment companies will continue to be subject to portfolio disclosure requirements in addition to those imposed by Form 13F. The Commission's analysis of the comments is set forth with more particularity below.

1. Utility of Item 1 in Identifying Corporate Shareholders

As stated in the proposing release, the Commission recognizes that the information contained in Form 13F is not identical to that contained in Form N–1Q reports. Nonetheless, the Commission believes that the differences between these two forms do not prevent Form 13F from being an adequate alternative to Item 1 of Form N–1Q as a source of information to corporations about investment company ownership of their shares.

First, although there may appear to be a significant number of investment companies that are too small individually to meet the threshold reporting requirements for Form 13F,[17] such companies account for only about twenty percent of the total assets held by all management investment companies other than money market funds.[18] Moreover, the holdings of investment companies that are not themselves subject to the reporting requirements for Form 13F are, nevertheless, reported in aggregate form by their investment advisers if they are managed by investment advisers who are required to report. The fact that such holdings are reported in the aggregate should not diminish the value of the Form 13F report to issuers that are interested in communicating with their shareholders, since such issuers could achieve their objective by contacting or addressing communications to the reporting investment adviser. Second, the total stockholdings of open-end investment companies comprise only about eight percent of total institutional stockholdings[19] and about three percent of total stock outstanding.[20]

Accordingly, even if some investment companies that are required to report on Form N–1Q are not directly or indirectly subject to Form 13F reporting, it does not appear that the proposed amendment to Form N–1Q would have a materially adverse effect on the ability of issuers to identify their shareholders.[21] Certainly any decrease in the availability of information about stockholdings that would result from adopting the proposal would be slight in comparison to the large increase in the availability of such information occasioned by the implementation of the institutional disclosure program. Therefore, the Commission believes that the elimination of Item 1 of Form N–1Q would not significantly reduce an issuer's ability to identify and communicate with its shareholders for all purposes.

It should be emphasized, however, that the Commission is sensitive to the concerns expressed by commentators regarding impediments to effective corporate-shareholder communications that may arise when securities are registered in street or other nominee name. In recent years, the Commission had adopted, in addition to the implementation of the institutional disclosure program, new or revised rules intended to improve the ability of issuers to communicate with the beneficial owners of nominee held securities.[22] In addition, in April 1981 the Commission established the SEC Advisory Committee on Shareholder Communications (the Committee) for the purpose of exploring all the possibilities for developing a better means for issuers to communicate with their beneficial owners.[23] The Committee, through the facilities of the Commission, recently issued a release soliciting public comment on a number of specific suggestions which have been made to improve the communications process.[24] By June 1982, it is anticipated that the Committee will submit to the Division of Corporation Finance a final report containing its recommendations. The Commission has concluded that it is preferable to approach existing problems generally through the Committee, which is particularly well situated to formulate the appropriate mix of policies—voluntary, self-regulatory or regulatory—needed to minimize or eliminate the existing problems.

In addition, as several of the commentators noted, investment companies are and will continue to be subject to portfolio disclosure requirements in addition to Form N–1Q and Form 13F. Section 30(d) [15 U.S.C. 80a–29(d)] of the 1940 Act requires that every registered investment company transmit reports to its stockholders at least semi-annually containing, among other things, a listing of the Company's portfolio showing the amounts and values of securities owned. Several of the commentators pointed out that most investment companies, in fact, advise their shareholders on a quarterly basis of the company's portfolio positions in their quarterly reports to shareholders. This information is also required to be filed with the Commission and is, therefore, as readily available to the public as is Form N–1Q.

Finally, several reporting requirements under the 1934 Act, besides those imposed pursuant to section 13(f), may apply to investment companies and their investment advisers: (1) The rules under sections 13(d) and 13(g) [15 U.S.C. 78m(g)] which require persons who have acquired directly or indirectly beneficial ownership of more than 5 percent of any equity security, as specified therein, to file a Schedule 13D or Schedule 13G [17 CFR 240.13d–102] report; (2) the provisions of section 16(a) [15 U.S.C. 78p(a)] and the rules thereunder which

---

[17] Some of the commentators stated that 250 investment companies are not included on the Form 13F reports filed.

[19] Securities and Exchange Commission Annual Report for 1980, 46th Annual Report, Table 15 at page 117.

[20] *Id.*

[21] Adopting the proposal would appear to have little effect on the problems issuers have as a result of shares being held in street or nominee name. As stated, there would continue to be extensive disclosure of investment company stockholdings. Moreover, all investment companies do not necessarily have their securities held in street or nominee name. In any event, since approximately 30 percent of all equity securities are registered in street or nominee names, even if all securities held by investment companies were held in nominee or street name, this amount would still represent only a small percentage of all outstanding stock so held. New York Stock Exchange, 1975 *Shareownership* 20 (1975).

[22] In January 1981, the Commission authorized the Division of Corporation Finance to issue an interpretive release reminding issuers and broker-dealers of their obligations with respect to the distribution of proxy material to beneficial shareowners. Securities Exchange Act Release No. 17424 (January 8, 1981) [46 FR 3204 (January 14, 1981)]. The Commission also adopted Rule 17Ad–8 [17 CFR 240.17Ad–8] to enable issuers to distribute more easily proxy statements and other corporate communications to the beneficial owners of securities held by participants in a registered clearing agency. Securities Exchange Act Release No. 16443 (December 20, 1979) [44 FR 76774 (December 28, 1979)]. In 1977, the Commission amended Rule 14a–3(d) [17 CFR 240.14a–3(d)] to provide that issuers must make the required inquiry of nominees "at least 10 days prior to" the record date for the security holders' meeting and adopted Rule 14b–1 [17 CFR 240.14b–1] requiring broker-dealers to respond "promptly" to such inquiries by indicating the number of customers who beneficially own the issuer's securities and, upon receipt of proxy materials, to forward them promptly to such beneficial owners. Securities Exchange Act Release No. 13919 (July 5, 1977) [42 FR 35953 (July 13, 1977)].

[23] Securities Exchange Act Release No. 17707 (April 10, 1981) [46 FR 22508 (April 17, 1981)].

require any person who is directly or indirectly the beneficial owner of more than 10 percent of any class of an equity security, that is registered pursuant to section 12 (15 U.S.C. 781) of the 1934 Act, to file on Form 3 [17 CFR 249.103] an initial statement of beneficial ownership and on Form 4 [17 CFR 249.104] any changes required by section 16(a); (3) the rules under section 14(d) [15 U.S.C. 78n(d)] which require persons who intend to make a tender offer and who are the beneficial owners of more than 5 percent of a class of the subject company's securities to file a Schedule 14D–1 [17 CFR 240.14d–100] with the Commission. All of the information indicated above, which is required to be reported under the 1934 Act, is also available for public inspection and dissemination and, of course, can be used by any person concerned with shareholder identification.

2. Use of Item 1 Data by Investors and Securities Professionals

Based on a review of the comments of securities professionals concerning the utility of Form N–1Q portfolio transaction data, it appears, as mentioned earlier, that, although some securities professionals have expressed an interest in learning about investment company acquisitions and dispositions, users of Item 1 information are generally more interested in investment company equity holdings than in the reporting of transactions. In addition, the interest in this information seems to relate mainly to equity holdings, rather than holdings of debt securities. Consequently, the Commission is of the opinion that the value of information available on Form 13F as a substitute for the information currently reported on Form N–1Q is not diminished by the fact that Form 13F does not include either transactional reporting or debt securities. Moreover, to the extent that there is interest in information concerning transactions as distinct from holdings, the Commission believes that the reporting of the net position changes in securities from one quarter to the next would provide an adequate approximation of the acquisitions and dispositions of institutions.[25] Furthermore, as discussed above, securities professionals also have available other portfolio reports.

3. Reporting Burden

The Commission has considered all the relevant comments, and still believes that the current requirements of Item 1 of Form N–1Q are unnecessarily burdensome for investment companies in light of the degree to which they are duplicative of other reporting requirements. The Commission assumes that, as asserted by commentators favoring retention of this reporting requirement, most of the required information is readily available to the reporting companies. Nevertheless, the preparation and submission to the Commission of that information in report format necessarily involves added expense.

In addition, it should be noted that pursuant to section 13(f)(4) of the 1934 Act (15 U.S.C. 78m(f)(4)) the Commission is required as part of its responsibility under section 13(f) "to take such steps as are within its power to achieve uniform, centralized reporting of information concerning holdings and transactions of institutional investment managers, to eliminate duplicative reporting by, and to minimize the compliance burdens on, institutional investment managers. . . ." The legislative history of this section reflects a strong concern with coordinating reporting requirements and minimizing the burdens of compliance. The 1934 Act establishes the Commission as the central collection and dissemination point for detailed information with respect to both holdings and transactions of institutional investment managers, and vests in the Commission authority and responsibility for the institutional disclosure program in order to eliminate duplicative reporting and reduce the compliance burden. In light of this responsibility, at the time of the proposal of rule 13f–1[26] and subsequently when final rules and forms relating to section 13(f) were adopted,[27] the Commission stated that it intended to consider the content and format of Form N–1Q with a view toward coordinating that report with Form 13F to the extent possible. The Commission has now determined that the elimination of Item 1 of Form N–1Q is in keeping with its responsibility to eliminate duplicative reporting and minimize the compliance burdens on institutional investors.

Annual Reporting of Portfolio Transactions

In conjunction with its proposal to eliminate Item 1 from Form N–1Q, the Commission has proposed to amend Forms N–1 and N–2 so that reporting companies would be required to include in Part II of their annual updating amendments to their registration statements a table of portfolio information virtually identical to the table that is presently required by Item 1 of Form N–1Q. A large number of commentators who were opposed to the elimination of Item 1 from Form N–1Q stated that the related amendment to Forms N–1 and N–2 would be an inadequate alternative to the existing reporting system. They argued that the required information would become available to the public at a time when the data was no longer current, and thus not useful in understanding the present portfolio of an investment company.

A few of the commentators, representing investment companies, suggested that Item 1 information should not be reported even on an annual basis, in view of the fact that such information is duplicative of data already available, and is burdensome to compile and report on an annual basis.

The Commission has concluded that annual reporting of transaction information is not necessary for its enforcement and regulatory responsibilities. In view thereof, and in view of the fact that there appears to be no significant public interest in maintaining an annual transaction reporting requirement, the Commission has determined to withdraw its proposal to amend Forms N–1 and N–2. The Commission's release withdrawing these proposals, Release No. 33–6367 (December 16, 1981), is published under Proposed Rules in this issue.

The Commission received several comments concerning the fact that the Commission did not include in its proposal for annual reporting of investment company portfolio transactions a confidential treatment provision similar to the one contained in Item 1 of Form N–1Q. Because of the Commission's decision to withdraw the proposed amendments to Forms N–1 and N–2, the objections of the commentators on this point are moot and need not be considered further.

Reporting of Matters Submitted to Shareholders

In response to the Commission's request for comments on its proposal to amend Instruction 2 to add voting on the continuation of the reporting company's current advisory contract to the list of routine matters that need not be reported under Item 2 of Form N–1Q, the Commission received a small number of

[25] The principal vendor of 13F information makes this calculation with respect to each reported holding and includes the results in its commercially available tabulation of 13F information.

[26] Securities Exchange Act Release No. 13380, March 22, 1977 (42 FR 16631 (March 30, 1977)).

[27] Securities Exchange Act Release No. 14852, June 15, 1978 (42 FR 26700 (June 22, 1978)).

comments, all of which favored the proposal. For the reasons discussed in detail in the proposing release, the Commission is adopting the amendment to Instruction 2 as proposed.

Changing Filing Date of Form N–1Q

In connection with the Commission's proposal to eliminate the requirement to include portfolio transaction information on Form N–1Q, the Commission proposed to revise the form to require that Form N–1Q reports be filed 30 days after the end of an investment company's fiscal quarter (rather than calendar quarter) during which any of the events specified in the form occurred. The Commission received no comments concerning this specific change in filing requirements, although the issue of comparability of calendar quarterly reports was discussed by the commentators objecting to the proposed elimination of portfolio transaction reporting. Since the Commission believes that reporting on a calendar quarterly basis would be unnecessary in the absence of portfolio transaction reporting, and would be more burdensome than reporting on a fiscal quarterly basis, it has determined to adopt this revision of the Form N–1Q as proposed.

Certain Attachments to Form N–1Q Unaffected

Certain applicants who have received Commission orders granting exemptions from the provisions of section 2(a)(41) of the Act [15 U.S.C. 80a–2(a)(41)] and Rules 2a-4 [17 CFR 270.2a–4) and 22c–1 [17 CFR 270.22c–1) thereunder to the extent necessary to permit them to value their portfolio securities by means of the amortized cost method of valuation or to use the "pennyrounding" method of pricing are required by a condition in the orders granted to attach certain information to their quarterly filing of Form N–1Q. Although the Commission is adopting certain revisions to Form N–1Q that will, as previously described, have the effect of reducing the number of occasions on which the form is required to be filed, any company that is relying on an order subject to the above described condition is expected to file Form N–1Q and to attach the applicable information, even though the company would not otherwise be required to file Form N–1Q.

Text of the Amendments

Chapter II of Title 17 of the Code of Federal Regulations is hereby amended as follows:

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

1. By amending the general instructions to Form N–1Q as follows:

§ 249.331 Form N–1Q, quarterly report of management investment companies registered under the Investment Company Act of 1940.

§ 274.106 Form N–1Q, for quarterly report of registered management investment company.

A. *Rule as to use of Form N–1Q.* General instruction A. is amended by deleting the word "calendar" in paragraphs (a) and (b) and inserting the word "fiscal" in its place.

B. *Application of General Rules and Regulations.* General instruction E. is eliminated.

C. *Preparation of Report.* General instruction F. is redesignated general instruction E.

2. By amending Form N–1Q as follows:

§ 249.331 Form N–1Q, quarterly report of management investment companies registered under the Investment Company Act of 1940.

§ 274.106 Form N–1Q, for quarterly report of registered management investment company.

A. Item 1 is eliminated.

B. Instruction 2. to Item 2. is amended to read as follows:

Item 2. Submission of Matters to a Vote of Security Holders.

* * * * *

Instructions.

* * * * *

2. This item need not be answered as to (i) procedural matters, (ii) the selection or approval of auditors, (iii) the continuation of the current advisory contract, or (iv) the election of directors or officers in cases where there was no solicitation in opposition to the management's nominee, as listed in a proxy statement pursuant to rule 20a–1 under the Act [17 CFR 270.20a–1] and Regulation 14A under the Securities Exchange Act of 1934 [17 CFR 240.14a–1—240.14b–1], and all of such nominees were elected. This item may be omitted if action at the meeting was limited to the foregoing. In cases where the registrant does not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect will suffice.

C. Items 2 through 13 are renumbered 1 through 12.

(Secs. 13, 15(d), and 23(a), Securities Exchange Act of 1934 (15 U.S.C. 78m, 78o(d), and 78w(a)) and Secs. 8, 30, and 38, Investment Company Act of 1940 (15 U.S.C. 80a–8, 80a–29, and 80a–37))

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

Approval of Abandoned Mine Land Reclamation Plan for State of North Dakota

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: On July 28, 1981, the State of North Dakota submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The purpose of this submission is to demonstrate the State's intent and capability to assume responsibility for administering and conducting the Abandoned Mine Land Reclamation Program established by Title IV of SMCRA and regulations adopted by OSM (30 CFR Chapter VII, Subchapter R., 43 FR 49932–49952, October 25, 1978). After opportunity for public comment and review of the plan submission, the Assistant Secretary for Energy and Minerals, of the Department of the Interior has determined that the North Dakota Abandoned Mine Land Reclamation Plan meets the requirements of SMCRA and the Secretary's regulations. Accordingly, the Assistant Secretary has approved the North Dakota Plan.

EFFECTIVE DATE: This rule is effective December 23, 1981.

ADDRESSES: Copies of the full text of the North Dakota Plan are available for review during regular business hours at the following locations:

Division of Reclamation, Public Service Commission of North Dakota, Capitol Building, Bismarck, North Dakota 58505

The Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, N.W., Room 153, Washington, D.C. 20240

FOR FURTHER INFORMATION CONTACT: Don Willen, Chief, Division of Abandoned Mine Land Reclamation, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue,

N.W., Washington, D.C. 20240
Telephone (202) 343–7951.

SUPPLEMENTARY INFORMATION:

General Background of the Abandoned Mine Land Reclamation Program

Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA) (Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*) establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation under the program are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing responsibility under State or Federal law. Each State, having within its borders coal mined lands eligible for reclamation under Title IV of SMCRA, may submit to the Department a State reclamation plan demonstrating its capability for administering an abandoned mine land reclamation program. Title IV provides that the Department may approve the plan once the State has an approved Regulatory program under Title V of SMCRA. If the Department determines that a State has developed and submitted a program for reclamation and has the necessary State legislation to implement the provisions of Title IV, the Department shall grant the State exclusive responsibility and authority to implement the provisions of the approved plan. Section 405 of SMCRA (30 U.S.C. 1235) contains the requirements for State reclamation plans.

The Secretary has adopted regulations that specify the content requirements of a State reclamation plan and the criteria for plan approval (30 CFR Part 884, 43 FR 49932, 48847, October 25, 1978). Under those regulations, the Director of the Office of Surface Mining is required to review the plan and solicit and consider comments of other Federal agencies and the public. If the State plan is disapproved, the State may resubmit a revised reclamation plan at any time.

Upon approval of the State reclamation plan, the State may submit to the Director on an annual basis an application for funds to be expended in such State on specific reclamation projects which are necessary to implement the State reclamation plan as approved. Such annual requests are reviewed and approved by OSM in compliance with the requirements of 30 CFR Part 886.

To codify information applicable to individual States under SMCRA, including decisions on State reclamation plans, OSM has established a new Subchapter T to 30 CFR Chapter VII. Subchapter T consists of Parts 900 through 950. Provisions relating to North Dakota are found in 30 CFR Part 934.

Background on the North Dakota Abandoned Mine Land Reclamation Plan Submission

On May 27, 1980, a cooperative agreement between the North Dakota Public Service Commission and the Office of Surface Mining was approved. The purpose of this agreement was to assure that information required for the preparation of the North Dakota Abandoned Mine Land Reclamation Plan would be assembled.

On May 18, 19, 20, 21 and 22, 1981, the Public Service Commission held public hearings in Williston, Dickinson, Bowman, Beulah, and Bismarck, North Dakota to get comments on the Plan.

On July 28, 1981, the State of North Dakota submitted its proposed Abandoned Mine Land Reclamation Plan to the Office of Surface Mining.

Notice of receipt of the submission initiating the Plan review was published October 6, 1981 (46 FR 49141–49143). The announcement requested public comments. On December 2, 1981, OSM's State Director and on December 11, 1981, the Assistant Director for Program Operations and Inspection recommended to the Director that the Assistant Secretary approve the North Dakota Plan.

The administrative record on the North Dakota Plan is available for review during regular business hours at the Office of Surface Mining Reclamation and Enforcement at the address listed above in "Addresses."

EFFECTIVE DATE: This rule is effective December 23, 1981. The good cause for making this rule effective upon date of publication is: (1) The Office of Surface Mining wants to minimize the time between the approval of Title V regulatory programs and the Title IV State reclamation program plans; and (2) grants are pending approval of the Title IV plan and OSM wishes to expedite grant assistance to States to initiate needed reclamation work as required by the Act.

Assistant Secretary's Findings

1. In accordance with section 405 of SMCRA the Assistant Secretary finds that North Dakota has submitted a Plan for reclamation of abandoned mines and has the ability and necessary State legislation to implement the provisions of Title IV of SMCRA.

2. The Assistant Secretary has determined, pursuant to 30 CFR 884.14, that:

(a) The North Dakota Public Service Commission, Reclamation Division, has the legal authority, policies and administrative structure necessary to carry out the Plan;

(b) The Plan meets all the requirements of 30 CFR Chapter VII, Subchapter R;

(c) The State has an approved regulatory program; and

(d) The Plan is in compliance with all applicable State and Federal laws and regulations.

3. The Assistant Secretary has solicited and considered the views of the Federal agencies having an interest in the Plan as required by 30 CFR 884.13(a)(2). These agencies include: The United States Geological Survey (USGS), The United States Fish and Wildlife Service (FWS), Soil Conservation Service (SCS), The U.S. Forest Service (USFS), and the Advisory Council of Historic Preservation (ACHP).

Disposition of Comments

The following comments received on the North Dakota Plan during the public comment period were considered in the Assistant Secretary's evaluation of the North Dakota Plan as indicated.

1. The FWS commented that the North Dakota Plan does not adequately address threatened and endangered species. North Dakota has added a new paragraph in Volume II, page 60, § 884.13(f)(5) of its Plan which acknowledges the threatened and endangered wildlife whose range includes North Dakota. In addition, the OSM and the FWS signed a memorandum of understanding (June 10, 1980) that provides for formal consultation on those projects which may affect threatened or endangered species. OSM is satisfied that provisions for addressing threatened and endangered species in the North Dakota Plan are adequate.

2. The FWS commented that lands currently supporting productive wildlife habitat should not be reclaimed to a different land use if no threat to health, safety, general welfare and property exists. OSM's response is that the values of an unreclaimed abandoned mine land site including wildlife habitat, are considered in the ranking factors under the project selection procedures established by North Dakota in its Plan. OSM is satisfied that adequate consideration will be given to wildlife

habitat and other values on abandoned mine land sites by the North Dakota Program.

3. The FWS suggested that the first paragraph on page 46, Volume II, be changed to read as follows: "There were 257 Waterfowl Production Areas as of January 1, 1981, accounting for approximately 49,000 acres (Table 23). Burleigh, Divide, Mountrail, and Ward Counties have the largest acreages." North Dakota has revised its Plan by adopting the above language.

4. The FWS suggested that the last paragraph on page 46, Volume II, be changed to read as follows: "Table 25 lists the fee owned and easements in the National Wildlife Refuges in the 23 county area. Of the 189,603 acres, 15 areas, accounting for 169,152 acres, are federally owned and 18 areas, accounting for 20,451 acres, are under easement to the United States. The FWS has primary jurisdiction over all of the areas except Audubon National Wildlife Refuge which was acquired by the U.S. Corps of Engineers." North Dakota has revised its Plan by adopting the FWS's suggestion.

5. The FWS proposed an undated Table 23 on page 47, Volume II, which more accurately reflects the FWS Waterfowl Production Areas located in the 23 county area. North Dakota agreed to revise Table 23 to reflect the updated information available from the FWS.

6. The FWS proposed an updated Table 25 on page 49, Volume II, which more accurately reflects the FWS National Wildlife Refuges located in the 23 county arens. North Dakota agreed to revise Table 25 to reflect the updated information available from the FWS.

7. The FWS proposed that on page 60, Volume II, second paragraph, the last sentence be amended to indicate that grassland habitat has decreased by approximately 10 percent since the 1980 North Dakota Conservation Needs Inventory figures were published. North Dakota adopted this suggestion.

8. The SCS commented that there was a discrepancy between the number of abandoned mine land sites reported by Phase I of the National Inventory on page 9, Volume I, and the inventory results reported on page 4, Volume II. OSM's position is that no such discrepancy exists. The number, 616, given on page 9, Volume I, is the number of sites actually visited. The number, 1,101, indicated on page 4, Volume II, is the number of abandoned sites arrived at by a literature search. Of these 1,101 sites, the State was unable to locate 371 sites. The State also eliminated 114 sites because they are small surface mines at relatively great distances from occupied dwellings and public use areas.

9. The USGS commented that many of the 1,101 initially listed abandoned mine land sites were eliminated from further consideration based on smallness and relative distance from occupied dwellings and public use areas. The USGS is concerned that some of these deleted sites could pose a serious safety hazard to persons using these sites for hunting and fishing. OSM's response is that North Dakota has limited resources for abandoned mine land reclamation and has properly chosen to concentrate its resources on those sites presenting the most serious problems. Lesser priority sites, like those which are small and far from public use areas, can be addressed as future resources become available.

10. The USGS commented that the Plan does not provide information on the number of surface ponds or impoundments that are present on abandoned mine lands. OSM's response is that under 30 CFR 884 a State plan need only be based on available data. North Dakota and other States will be updating the information in their Plans as new information becomes available.

11. The USGS questioned whether North Dakota considered unauthorized swimming in ponds or impoundments located on abandoned mine lands a significant problem with respect to water quality or a significant safety hazard based on submerged obstacles or unsupervised swimming. The USGS suggested that future detail be provided in the State Plan concerning this parameter. OSM's position is that the State Plan adequately addresses this issue and that no further elaboration is needed. If the swimming poses a health or safety risk to the public, this factor will immediately affect the project's priority ranking.

12. The ACHP commented that the Plan fails to specify the procedure that will be followed to ensure appropriate measures are taken to protect significant historic properties affected by reclamation activities. OSM's response is that North Dakota indicates on p. 15 of its Plan that it will consult with the State Historical Society with respect to potential abandoned mine land reclamation projects. As for the process of consultation, OSM finds that the Plan's section on coordination of reclamation work with agencies (pp 15–16) to be sufficient to accomplish consultation to ensure protection of historic properties.

Additional Findings

The Office of Surface Mining has examined this rulemaking under section 1(b) of Executive Order No. 12291 (February 17, 1981), and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and the Office of Surface Mining has determined that the rule will not have a significant economic effect on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

The Assistant Secretary has determined that the North Dakota Abandoned Mine Land Reclamation Plan will not have a significant effect on the quality of the human environment because the decision relates only to policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of Interior Manual DM 516.2.3d(A)(1), the Assistant Secretary's decision on the North Dakota Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment or environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Also, an environmental analysis or an EIS will be prepared for the approval of grants for the abandoned mine land reclamation projects under 30 CFR Part 886.

Dated: December 16, 1981.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 57

[DoD Directive 1342.12] [1]

Education of Handicapped Children in the DoD Dependents Schools

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: This final rule is being issued to implement the Education for All Handicapped Children Act of 1975 and the Defense Dependents' Education Act of 1978. The final rule establishes policy and procedures for providing a free appropriate public education to handicapped children receiving or entitled to receive educational instruction from the Department of Defense Dependents Schools (DoDDS). It also creates the Overseas Dependents Schools National Advisory Panel on the Education of Handicapped Dependents (National Advisory Panel) and the Department of Defense Coordinating Committee on Special Education and Related Services.

EFFECTIVE DATE: December 17, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. Diane L. Goltz, Department of Defense Dependents Schools, 2461 Eisenhower Avenue, Alexandria, VA 22331, 202-325-7610.

SUPPLEMENTARY INFORMATION: In FR Doc. 81-26583, appearing in the **Federal Register** on September 11, 1981 (46 FR 45368), the Office of the Secretary of Defense proposed a rule that would implement the Education for All Handicapped Children Act of 1975 and the Defense Dependents' Education Act of 1978. Written comments on the proposed rule were invited and were due on October 13, 1981. In response to this invitation, 19 individuals and organizations submitted comments. In addition, pursuant to a notice appearing in the **Federal Register** on September 24, 1981 (46 FR 47090, FR Doc. 81-27733), the Office of the Secretary of Defense conducted public hearings concerning the proposed rule on October 15, 1981. All written comments and the transcript of public hearings are available for public inspection in the offices of DoDDS at the above address.

The Office of the Secretary of Defense has carefully considered the views of the public as reflected in the written comments and testimony at the public hearings. A description of these views and a discussion of the Department's response to them follows.

General. During the coordination within the Department of Defense, DoD Components recommended numerous changes to improve the clarity of the rule and to make it consistent with the format established for DoD issuances. As a result, several editorial changes were incorporated into the final rule. Section 57.2, entitled "Applicability" in the proposed rule, is now entitled "Applicability and Scope." In addition, the terms defined in Section 57.3 have been placed in alphabetical order.

One commenter suggested a series of amendments to the proposed rule concerning children whose native language is not English. This commenter was concerned that such children might be incorrectly found to need special education and related services because of their limited English language ability. Because the proposed rule provides sufficient assurances against that possibility, most of the changes offered by this commenter have not been accepted. At his suggestion, however, language has been added to subsection F.1 of Appendix 1 explicitly requiring that specified notices to a parent be in his or her native language, unless it is clearly not feasible to do so.

The Chief Counsel for Advocacy of the Small Business Administration noted that the preamble to the proposed rule did not contain a statement concerning compliance with the Regulatory Flexibility Act, Pub. L. No. 96-354, 5 U.S.C.A. 601 *et seq.* (1981 Supp.). The General Counsel, Department of Defense, has determined that the Act does not apply to this rule. The Act encompasses only rulemakings for which 5 U.S.C. 553 or another law requires the publication of a "general notice of proposed rulemaking." 5 U.S.C.A. 603(a). Since this rulemaking is not subject to such a requirement, discussion of the Regulatory Flexibility Act in the preamble to the proposed rule was not necessary.

One organization commented that the term "speech-language pathology" instead of "speech therapy" should be used throughout the rule in order to emphasize that the service is rendered by independent professionals, not by technicians implementing a physician's prescription. Since speech therapists within the DoDDS system are professionally independent, changing their title would confuse rather than clarify their role. Accordingly, this comment has not been adopted.

Finally, references to "parents and guardians" throughout the rule have been changed to "parents." Since the definition of "parent" in § 57.5 expressly encompasses the guardian of a handicapped child, the use of the term "guardian" in the rest of the rule is unnecessary. Under this definition, a child's guardian has the same rights as would his or her parents.

Section 57.1. One commenter suggested that this provision state that children who are three to 21 years old are covered by the rule. The Department of Defense has rejected this comment because ages of eligibility for DoDDS services are prescribed by DoD Instruction 1342.10, "Eligibility Criteria for Education of Minor Dependents in Overseas Areas," May 4, 1970. Another commenter observed that the proposed rule did not specifically deal with the distinction between "space available" and "space required" students. DoD Instruction 1342.10 prescribes guidance in that area.

Section 57.2. Several commenters questioned limiting the applicability of the proposed rule to DoD overseas schools. As stated above and in the notice of proposed rulemaking, this rule is intended to implement Pub. L. No. 95-561, which extends the coverage of Pub. L. No. 94-142 only to the Department's overseas schools.

Section 57.3. One commenter noted that, in § 57.3(a), the phrase "enrolled and entitled to be enrolled in a school administered by DoDDS" appeared to be used interchangeably with the phrase "receiving or entitled to receive educational instruction from DoDDS." The commenter recommended that only one of these phrases be used in order to prevent confusion. The first phrase has been deleted, with the second phrase placed in its stead.

Several commenters suggested that § 57.3(e) be modified to make clear that, in cases requiring medical evaluations

---

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120, Attention: Code 301.

of possibly handicapped children, DoDDS personnel as well as medical authorities will jointly participate in such evaluations. The language of this section has been changed accordingly.

Section 57.4. One commenter recommended modification of the order in which responsibilities assigned by this section are listed. Because the Department believes that the proposed rule accurately reflects the relationship of the various components performing those responsibilities, this suggestion has not been adopted.

One commenter recommended that the responsibilities of the Director of DoDDS specifically include the obligation to provide a free appropriate public education to handicapped children. The Department has accepted this suggestion and has revised § 57.4(a)(1) accordingly.

Several commenters asserted that § 57.4(a)(4) could be interpreted to permit the Director of DoDDS to provide special education and related services only if funds were authorized and appropriated. The intention of this section is just the opposite: the Director must appropriately serve all handicapped children within the requirements of Pub. L. No. 94–142 and this rule. This section is designed merely to ensure that, to the extent that the Director and his staff rely upon other federal agencies or private entities to meet this responsibility, funds are legally available. In order to dispel any confusion on this point, §§ 57.4(a)(4) and 57.4(b) have been revised.

Several commenters suggested that the treatment of the comprehensive system of personnel development be expanded in § 57.4(a)(5). This comment has not been adopted. DoDDS has issued DS Reg. 2020.1, which establishes guidance for personnel development. As the need arises, DoDDS will promulgate further regulations.

In § 57.4(a)(8), a commenter urged that an agency other than DoDDS evaluate compliance with Pub. L. No. 94–142 and this rule. This comment has not been adopted, since the Department believes that its customary management and oversight mechanisms are sufficient.

One commenter suggested that the boundary between medical and non-medical related services be specified in § 57.4(b). The Department of Defense does not believe this is necessary. Under Pub. L. No. 94–142 and this rule, the Department is responsible for providing all related services necessary for a handicapped DoDDS student to benefit from special education. If there are disputes within the Department over which component should furnish or pay for a particular related service, they can be resolved by senior officials in the Department of Defense.

With respect to § 57.4(d), another commenter urged that the specific responsibilities and membership of the DoD Coordinating Committee on Special Education and Related Services be delineated. In order to preserve the Department's flexibility to use this committee to best advantage, this recommendation has been rejected.

With respect to § 57.4(e), several commenters urged that teachers of special and regular education be expressly included in the composition of the National Advisory Panel. Another commenter recommended that providers of related services also sit on the National Advisory Panel. The Department has accommodated these suggestions. A third commenter has requested representation for the Overseas Education Association, Inc., on the National Advisory Panel. Teachers serving on the National Advisory Panel may be members of the Overseas Education Association or another professional or labor organization. The Department, however, does not believe that either Pub. L. No. 94–142 or applicable federal labor-management statutes entitle the Overseas Education Association to membership on the National Advisory Panel. In addition, the Department believes that the National Advisory Panel is not a suitable forum for discussing matters relating to the terms and conditions of the employment of DoDDS teachers. Accordingly, this suggestion has been rejected.

Section 57.5. As noted above, the definitions contained in this section have been placed in alphabetical order in the final rule, thereby necessitating the renumbering of subsections within the section. Citations in the following discussion are to sections in the proposed rule ("old Section ————") and to the final rule ("new Section ————").

In old § 57.5(b)(5), new § 57.5(e)(5), the Department has declined to accept the suggestion that the definition of "multihandicapped" be deleted. This definition is helpful in describing a category of handicapped children who must be served under Pub. L. No. 94–142.

One commenter queried whether old § 57.5(b)(8), new § 57.5(e)(8), would permit DoDDS school psychologists who are certified or licensed clinical psychologists to evaluate and diagnose children for serious emotional disturbances. Under this section, school psychologists who are certified clinical psychologists, as well as other clinical psychologists and physicians, may perform such evaluations and diagnoses. Another commenter questioned the use of the phrase "where appropriate" in Section 57.5(b)(8). This phrase has been deleted. The Case Study Committee for a child will determine appropriateness. This commenter also recommended that the term "socially maladjusted" be deleted. This comment has been rejected. Although the term does not lend itself to precise definition, it is useful because it usually encompasses juvenile delinquency, chronic disruptive behavior, and other socially inappropriate conduct that is not indicative of emotional disturbance.

In the definition of "specific learning disability" (old § 57.5(b)(9), new § 57.5(e)(9)), the words "emotional disturbance," have been added and the word "differences" substituted for "disadvantage." Both of these changes were made in the interest of clarity.

One commenter urged that the definition of "speech impaired" in old § 57.5(b)(10), new § 57.5(e)(10), be revised in order to emphasize the communicative nature of speech impairments. The Department believes that the definition as proposed comports fully with Pub. L. No. 94–142 and has declined to revise this section.

One commenter urged that language in old Section 57.5(c)(1), new § 57.5(q)(1), permitting variegated rates of tuition for handicapped and non-handicapped children be deleted. This commenter believes that such a provision is "probably discriminatory." The Department has declined to accept this suggestion because Section 1404 of Pub. L. No. 95–561, 20 U.S.C. 923(b)(1), authorizes variable tuition rates. This section makes clear that DoDDS may not impose fees for special education and related services that are provided to a child who is entitled to receive educational instruction from DoDDS, although assessing incidental fees that are normally charged to nonhandicapped students or their parents is permissible.

With respect to the definitions of types of related services in old § 57.5(d), new § 57.5(o), one commenter contended that some related services were themselves described, while in other cases the providers of the services were listed. The Department believes that this is not objectionable.

In old § 57.5(d)(1)(iii), new § 57.5(o)(1)(iii), one commenter suggested that the range of services provided by audiologists include the recommendation of appropriate amplification devices and other rehabilitation services. This suggestion has been accepted.

In response to several commenters, old § 57.5(d)(4), new § 57.5(o)(4), has

been clarified to state that DoDDS personnel as well as a licensed physician must participate in the determination of whether a child has a medically-related handicapping condition that results in the need for special education and related services.

Old §§ 57.5(d)(5) and 57.5(d)(7), new §§ 57.5(o)(5) and 57.5(o)(7), have been revised to state explicitly that occupational therapy and physical therapy consist of services not only provided but also supervised by occupational and physical therapists.

One commenter recommended that old § 57.5(d)(6), new § 57.5(o)(6), be expanded to require the Department to provide generalized information about child development. Although this rule will not bar the dissemination of such data, neither Pub. L. No. 94–142, Pub. L. No. 95–561, nor considerations of public policy require it.

One commenter suggested that old § 57.5(d)(8)(iii), new § 57.5(o)(8)(iii), be expanded to encompass generalized information about child behavior and learning theory. The Department has retained this provision as set forth in the proposed rule, since related services, including those of a psychological nature, are for the benefit of specific children.

With respect to old § 57.5(d)(10), new § 57.5(o)(10), several commenters questioned the exclusion of specified functions from the category of "school health services." As proposed, this Section permits DoDDS employees to perform those functions only when authorized or directed by a DoDDS regional director. If DoDDS employees are not empowered to provide these services and they are required by a child's Individualized Education Program (IEP), they will be supplied by personnel in the Military Departments or by other organizations or individuals.

One commenter recommended the deletion of old § 57.5(f). Since this section adds to the clarity of the entire rule, it will be retained. This section has the same number in the final rule.

In old § 57.5(m), new § 57.5(g), one commenter contended that, in order for an evaluation to be independent, it must be administered by an examiner who is not employed by DoDDS. The Department believes that an examiner who is not employed by the DoDDS school responsible for the child's education would be sufficiently objective, detached, and professionally unfettered to satisfy the mandate of Pub. L. No. 94–142 for an independent evaluation.

At the suggestion of a commenter, § 57.5(q), new § 57.5(a), has been clarified by listing examples of child-find activities. Another commenter questioned whether child-find efforts should extend to children from birth to 21 years of age. Under Pub. L. No. 94–142 and this rule, all children who may need special education and related services in that age range should be identified, located, and evaluated through child-find activities. This Section has been modified to clarify those responsibilities.

Appendix 1. In paragraph A.2.a, one commenter suggested adding the words "written and oral communication." Since the paragraph as proposed complied fully with Pub. L. No. 94–142 and did not prohibit screening for written and oral communication skills, this suggestion has not been adopted. Another commenter suggested that the clause "who may be in need of special education and related services" be substituted for the words "to determine whether a child has an undetected handicap." In the interest of clarity, this recommendation has been adopted.

One commenter recommended that the words "speech, language" be added to subparagraph A.2.b.1 after the word "hearing." This comment has been accepted. This commenter also suggested the inclusion of the phrase "and education" following the word "health." Since the rule as a whole accommodates this concern, this phrase is unnecessary.

In paragraph A.2.d, a commenter urged the Department to make clear that the provision of direction and guidelines for child-find activities includes public information and screening and referral procedures. The definition of child-find in § 57.5 has been expanded so as to incorporate this suggestion.

One commenter suggested that subsection A.5 through paragraph A.7.e be placed under section B. Paragraphs A.7.b through A.7.f have been moved to section B. In the Department's view, the other provisions belong in section A.

In subsection A.5., one commenter urged that it be mandatory for the school principal or designee to serve on the Case Study Committee (CSC). This suggestion has been adopted.

With respect to paragraph A.5.a, one commenter questioned whether the term "DoDDS resources educators" is limited to related services personnel. The term is intended to include not only those personnel but also special educators, such as reading improvement specialists. Additional examples of resource personnel have been added to this paragraph in order to clarify this issue. Additional examples have also been included in subsection A.6. In addition, paragraph A.5.a has been revised to authorize expressly the assignment of members of a regional CSC to a school CSC.

One commenter recommended the deletion of paragraph A.7.a, on the theory that a CSC evaluates but does not identify handicapped children. In order to accommodate this concern, this paragraph has been modified to provide that a CSC shall assist in identifying handicapped children.

Paragraph A.7.b in the proposed rule (paragraph B.2.a in the final rule) has been revised to refer explicitly to the responsibility of the CSC to determine whether a child has a handicapping condition that necessitates that he or she receives special education and related services.

With respect to paragraph A.7.f in the proposed rule (paragraph B.2.e in the final rule), one commenter urged that local and regional administrators determine whether a child's needs can be met by local resources. The Department has adopted this suggestion, and this paragraph has been amended to provide that the appropriate regional director will decide when local resources are inadequate.

One commenter suggested that section B. be revised to require explicitly that tests be selected and administered so as to reflect accurately a child's aptitude or achievement level, instead of his or her impaired sensory, manual or speaking skills, except when those skills are being measured by the test. The Department believes that the rule, taken as a whole, adequately ensures against these problems. Accordingly, it has rejected this recommendation.

In subsection B.1, one commenter recommended that the phrase "development of an Individualized Education Plan and" be inserted after the word "regarding" in the second sentence. This change has been made to increase the clarity of this provision. Another commenter urged the insertion of a reference to the development of an IEP after the words "regarding." This suggestion has been adopted.

With respect to paragraph B.2.d in the proposed rule (paragraph B.3.d in the final rule), one commenter requested clarification as to the meaning of "qualified personnel." In response to this concern, the Department has provided examples of such personnel in the final rule.

With respect to subsection B.4 in the proposed rule (subsection B.5 in the final rule), one commenter observed that all handicapped children may not require evaluations in each of the areas listed in this paragraph. The Department shares this view, and this paragraph has been revised to make clear that as the

described components of an evaluation need be performed "only when necessary."

This commenter also suggested that paragraph B.5.d in the proposed rule (paragraph B.6.d in the final rule) be revised, since in the commenter's view not all speech-impaired children require a written evaluation report describing their current academic progress. This observation applies to children with other handicapping conditions as well, and the phrase "when necessary" has been added.

With respect to subsection B.7 in the proposed rule (subsection B.8 in the final rule), a commenter has recommended that a parent or teacher be able to obtain the reevaluation of a child. Since there is no statutory requirement for this change, the Department has decided not to modify this paragraph. Moreover, this paragraph provides for a reevaluation "if conditions warrant." The Department believes that this language affords sufficient flexibility to ensure that the needs of the child will be met.

In subsection C.2, one commenter suggested that the inclusion of the language requiring that the frequency and intensity of related services be stated in an IEP. This suggestion has been accepted. In paragraph C.2.c, another commenter urged that the word "special" be added after the word "specific." The Department has agreed to this change.

With respect to subsection C.6, one commenter asked the Department to make clear that parents have the right to bring whomever they desire to IEP meetings. Pub. L. No. 94–142 provides that such a meeting must be attended by specified educators, the child's parents, and, when appropriate, the child. 20 U.S.C. 1401(19). Accordingly, this suggestion has not been accepted. Several commenters urged that this section expressly require the attendance of the child's regular or special education teacher or the persons providing related services to the child. This objection has been partially accommodated by modifying the paragraph to require that a teacher of special education attend the meeting. Another commenter recommended that the IEP be reviewed annually. The rule already contains this requirement.

With respect to subsection C.9, one commenter stated that both parents should understand the proceedings at an IEP meeting. It may be impractical to ensure that in all instances both parents understand those proceedings. The rule does require that at least one parent understand what transpires at an IEP meeting. Since Pub. L. No. 94–142 does not require more, the Department has decided to leave this provision of the rule undisturbed.

In section C.12, a commenter suggested the insertion of express references to "good faith" efforts by DoD personnel and to "the right of parents to redress and due process." Since the rule as proposed already accommodates these concerns, this suggestion has been rejected.

Another commenter suggested requiring a full continuum of placements for handicapped children in section D. This rule and Pub. L. No. 94–142 both require that a handicapped child not only receive a free appropriate public education but also be placed in the least restrictive environment suitable for the child. It is, therefore, unnecessary to accept this suggestion. This commenter also suggested that section D. be revised to provide that handicapped children participate with non-handicapped children in school activities to the maximum extent appropriate. This suggestion has been accepted.

A new provision, paragraph D.5.f, has been added to make, explicit that a handicapped child's educational placement must, to the maximum extent appropriate, be designed such that the child participates in school activities with nonhandicapped children.

With respect to section E., one commenter requested the inclusion of language making DoDDS responsible for the implementation of the IEP of a child in a non-DoDDS school or facility. This is unnecessary, because paragraph C.13 already imposes that obligation. Another commenter cautioned that the availability of appropriate schools or facilities does not relieve DoDDS from its responsibility to serve handicapped children itself, if possible. In the Department's view, this obligation is plain and is reflected in the rule.

One commenter recommended that subsection F.1 be expanded to include the requirement that the prescribed notice contain all relevant information and be in the native language or mode of communication of the parent. The latter suggestion has been adopted. The former suggestion has been rejected, since the paragraph already requires that the notice "fully inform" the parent.

In the interest of clarity and to reiterate the applicable provisions of Pub. L. No. 94–142 and Appendix 2 of this rule, the phrase "or DoDDS" was added to subsection F.6.

One commenter questioned the possibility of imposing additional fees for special education and related services under subsection F.8. The rule and Pub. L. No. 94–142 prohibit DoDDS from charging additional tuition for special education and related services provided to a child who is entitled to receive educational instruction from DoDDS. Moreover, Pub. L. No. 95–561 provides that dependents, as defined by that Act, may receive a free education from DoDDS. However, nothing in this rule, Pub. L. No. 94–142 or Pub. L. No. 95–561 prevents the imposition of additional fees for special education and related services provided to children who are not dependents under Pub. L. No. 95–561 and thus who are not entitled to receive educational instruction from DoDDS.

Several commenters objected to subsection F.9, which would have authorized the General Counsel of the Department of Defense to modify Appendix 2. This paragraph has been clarified to provide that the General Counsel shall coordinate on modifications to Appendix 2.

In subsection F.10, one commenter urged that the Department prescribe time lines for investigating complaints. The Department has not accepted this suggestion, since the need for a rigid schedule for resolving complaints has not been demonstrated. Several commenters suggested that specific DoDDS officials be designated to investigate complaints. The Department prefers to leave such assignments to the Director of the Department of Defense Dependents Schools and his subordinate administrators.

One commenter observed that subsection H.2 does not require that parents receive written notification before their handicapped child's educational placement is changed by suspension or expulsion. Since subsection F.1 of Appendix 1 demands prior written notification to the parents of any change in placement, it is unnecessary to modify subsection H.2.

The Department received some comments dealing generally with Appendix 1. Several commenters recommended the establishment of time lines for the identification, evaluation, and placement of handicapped children. The Department has decided not to prescribe such time lines in this rule, because variations among DoDDS regions may be necessary. The Department and its overseas schools are committed to identifying, evaluating, and placing handicapped children in a timely manner.

Appendix 2. In subsection B.3, one commenter recommended that hearing officers be drawn from professions other than the law. Because hearings conducted under this rule must conform with a comprehensive set of procedural requirements, the Department believes

that attorneys are best suited to serve as hearing officers.

In subsection B.4, one commenter urged the deletion of the word "qualified." This suggestion has been accepted. Another commenter contended that the Department must inform parents of "any free and low-cost legal and other relevant services available in the area." Such advice is not required by Pub. L. 94–142, and the Department has decided against including it in the rule.

With respect to paragraph D.1.i, one commenter noted that, under the proposed rule, a child is not explicitly entitled to attend an impartial due process hearing concerning his or her special education and related services. The Department has decided not to modify this paragraph: Pub. L. No. 94–142 does not guarantee the child's attendance at a hearing. In addition, the Department believes that the paragraph provides sufficient protection to parents and children, since it permits the hearing officer to allow the child and others to attend the hearing, consistent with the privacy interests of the parents and the child, and affords the parents the right to an open hearing.

In paragraph D.3.e, one commenter questioned the jurisdiction of a court to compel compliance with a discovery order issued by a hearing officer. Pub. L. No. 94–142 confers such jurisdiction by entitling a party to a hearing "to compel the attendance of witnesses." 20 U.S.C. 1415(d)(2). That right would be meaningless if it could not be vindicated by the courts. The authority to compel the production of evidence is ancillary to the power to compel the attendance of witnesses.

With respect to section F., one commenter objected to designating the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) to decide appeals from hearing officers' findings of fact and decisions. The Department has decided not to adopt this comment. The Assistant Secretary would not be improperly influenced by DoDDS personnel, since they report to him and are subject to his direction, authority, and control. Rather, the Assistant Secretary is sufficiently detached from DoDDS to review impartially the determinations of hearing officers concerning the education of handicapped DoDDS students. Finally, if this suggestion were accepted it would be necessary to increase the amount of time allowed for deciding appeals in order to permit the Department to assemble an appellate panel when an appeal is filed. Because of these legal and policy considerations, the Department believes implementation of this suggestion would be unwise.

Several commenters raised general matters about Appendix 2. One commenter suggested that the language of Appendix 2 be simplified or, in the alternative, that legal terms be defined. The Department believes that, to the extent legal terminology is used, it is necessary to assure precision and uniformity in the administration of impartial due process hearings. The Department also is persuaded that the language of this appendix is understandable without the inclusion of definitions. Accordingly, this suggestion has not been adopted. Several commenters urged the Department to reduce the time allowed for impartial due process hearings. In response to these recommendations, the Department has shortened the time lines prescribed in Appendix 2.

Accordingly, 32 CFR Chapter I is amended by adding a new Part 57, reading as follows:

PART 57—EDUCATION OF HANDICAPPED CHILDREN IN THE DOD DEPENDENTS SCHOOLS

Sec.

57.1 Purpose.
57.2 Applicability and Scope.
57.3 Policy.
57.4 Responsibilities.
57.5 Definitions.
Appendix 1—Procedures for Educational Programs and Services for Handicapped Children
Appendix 2—Hearing Procedures.

Authority: Pub. L. 94–142, as amended; Pub. L. 95–561, as amended.

§ 57.1 Purpose.

This Part establishes policies and procedures for providing a free appropriate public education to handicapped children receiving or entitled to receive educational instruction from the DoD Dependents Schools (DoDDS) pursuant to Pub. L. 94–142 and Pub. L. 95–561 and in accordance with Part 69 of this Title; establishes an Overseas Dependents Schools National Advisory Panel on the Education of Handicapped Dependents (National Advisory Panel) consistent with the provisions of DoD Directive 5105.18,[1] "Department of Defense Committee Management Program," April 25, 1975, and a DoD Coordinating Committee on Special Education and Related Services.

§ 57.2 Applicability and scope.

(a) The provisions of the Part apply to the Office of the Secretary of Defense and its field activity, DoDDS and DoDDS constituent elements; the Military Departments; the Organization of the Joint Chiefs of Staff; the Unified and Specified Commands; and the Defense Agencies (collectively DoD Components).

(b) The provisions encompass children receiving or entitled to receive educational instruction from DoDDS, and the parents of those children.

(c) The provisions do not apply to schools operated by the Department of Defense within the United States.

§ 57.3 Policy.

(a) All handicapped children receiving or entitled to receive educational instruction from DoDDS shall be provided a free appropriate public education under the provisions of this Part.

(b) DoDDS shall have the responsibility of providing a free appropriate public education to all handicapped children enrolled in its schools.

(c) Handicapped children receiving or entitled to receive educational instruction from DoDDS shall have a free appropriate public education, the same educational opportunities and services offered by DoDDS to nonhandicapped children, and an equal opportunity to participate in school activities.

(d) Physical education services, modified or specially designed if necessary, shall be available to every handicapped child receiving a free appropriate public education from DoDDS.

(e) When appropriate, a qualified military medical authority shall conduct or verify a medical evaluation and participate with DoDDS personnel in determining whether a child has a handicapping condition requiring special education and related services.

§ 57.4 Responsibilities.

(a) The *Director, Department of Defense Dependents Schools, and his subordinate organizational structure,* shall:

(1) Ensure that handicapped children receiving educational instruction from DoDDS are provided a free appropriate public education and that the educational needs of handicapped and nonhandicapped children are met comparably, using the procedures established by this Part.

(2) Ensure that educational facilities and services operated by DoDDS for handicapped children are comparable to DoDDS educational facilities and services for nonhandicapped children.

[1] See footnote on page 1.

(3) Maintain records on special education and related services provided to handicapped children.

(4) Provide any or all special education and related services required by a handicapped child, other than those furnished by the Secretaries of the Military Departments. In fulfilling this responsibility, the Director and his subordinate organizational structure may use interagency, intra-agency, and interservice arrangements, or act through contracts with private parties, when funds are authorized and appropriated.

(5) Develop and implement a comprehensive system of personnel development.

(6) Monitor compliance with this Instruction.

(7) Provide technical assistance.

(8) Undertake evaluation activities to ensure compliance with this Part.

(b) The *Secretaries of the Military Departments* shall provide those related services that are supplied by a physician or that require professional medical supervision. In general, those services, which are diagnostic and therapeutic in nature, shall be provided to DoDDS by the appropriate military command having responsibility for medical care in the geographical region. The services provided by the Secretaries of the Military Departments include medical services for diagnostic and evaluation purposes, occupational therapy, physical therapy, and audiology as may be required to assist a handicapped child to benefit from special education.

(c) The *Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) (ASD(MRA&L))*, in consultation with the Assistant Secretary of Defense (Health Affairs) and the Secretaries of the Military Departments, shall assign specific functions and geographical areas of responsibility for all related services.

(d) The *Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics)*, or designee, shall:

(1) Chair the DoD Coordinating Committee on Special Education and Related Services, which shall be composed of representatives of the Secretaries of the Military Departments, the ASD(MRA&L), the Assistant Secretary of Defense (Health Affairs), the General Counsel of the Department of Defense, and DoDDS.

(2) Through the Committee, monitor the provision of related services furnished under this Instruction, and ensure that related services and DoDDS special education programs are properly coordinated.

(3) Ensure that impartial due process hearings concerning disputes arising under this Part are provided in conformity with this Part.

(e) The *National Advisory Panel* shall:

(1) Consist of members appointed by the Secretary of Defense, or designee. Membership shall include at least one representative from each of the following groups:

(i) Handicapped persons.

(ii) DoDDS special education teachers.

(iii) DoDDS regular education teachers.

(iv) Parents of handicapped children.

(v) DoDDS headquarters.

(vi) DoDDS regional offices.

(vii) DoDDS special educational program administrators.

(viii) Military Departments and overseas commands, including providers of related services.

(ix) Other appropriate persons.

(2) Meet as often as necessary.

(3) Perform the following duties:

(i) Review information regarding improvements in services provided to handicapped students in DoDDS.

(ii) Receive and consider the views of various parent, student, and professional groups, and handicapped individuals.

(iii) When necessary, establish committees for short-term purposes composed of representatives from parent, student, and professional groups, and handicapped individuals.

(iv) Review the findings of fact and decision of each impartial due process hearing conducted pursuant to this Part.

(v) Assist in developing and reporting such information and evaluations as may aid DoDDS in the performance of its duties under this Part.

(vi) Make recommendations, based on program and operational information, for changes in the budget, organization, and general management of the special education program, and in policy and procedure.

(vii) Comment publicly on rules or standards regarding the education of handicapped children.

(viii) Perform such other tasks as may be requested by the Director.

(4) Submit an annual report of its activities and suggestions to the Director, DoDDS, by July 31, of each year. This report is exempt from formal review and licensing pursuant to subsection VII.C. of enclosure 3 to DoD Directive 5000.19,[1] "Policies for the Management and Control of Information Requirements," March 12, 1976.

§ 57.5 Definitions.

(a) *Child-Find.* The ongoing process used by DoDDS and the Military Departments to seek and identify children (from birth to 21 years of age) who show indications that they might be in need of special education and related services Child-find activities include the dissemination of information to the public and identification, screening, and referral procedures.

(b) *Consent.* This term means that:

(1) The parent of a handicapped child has been fully informed, in his or her native language or in another mode of communication, of all information relevant to the activity for which permission is sought.

(2) The parent understands and agrees in writing to the implementation of the activity for which his or her permission is sought. The writing must describe that activity, list the child's records that will be released and to whom, and acknowledge that the parent understands consent is voluntary and may be prospectively revoked at any time.

(c) *Evaluation.* Procedures used to determine whether a child is handicapped and the nature and extent of the special education and related services that the child needs. To qualify as an evaluation, these procedures must be used selectively with an individual child and may not include basic tests administered to, or used with, all children in a school, grade, or class.

(d) *Free Appropriate Public Education.* Special education and related services that:

(1) Are provided at no cost to parents or handicapped children and are under the general supervision and direction of DoDDS.

(2) Provide appropriate preschool, elementary, or secondary school education.

(3) Are provided in conformity with an Individualized Education Program.

(4) Meet the requirements of this Part.

(e) *Handicapped Children.* Those children, evaluated in accordance with this Part who are mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically impaired, other health impaired, deaf-blind, or multihandicapped, or have specific learning disabilities, and who because of such impairments need special education and related services.

(1) *Deaf.* A hearing loss or deficit so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, to the extent that his or her educational performance is adversely affected.

(2) *Deaf-blind.* Concomitant hearing and visual impairments, the combination of which causes such

[1] See footnote on page 1.

severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for deaf or blind children.

(3) *Hard of Hearing.* A hearing impairment, whether permanent or fluctuating, that adversely affects a child's educational performance but that does not consitute deafness.

(4) *Mentally Retarded.* Significantly subaverage general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period, that adversely affects a child's educational performance.

(5) *Multihandicapped.* Concomitant impairments (such as mentally retarded-blind or mentally retarded-orthopedically impaired), the combination of which causes such severe educational problems that they cannot be accommodated in special educational programs solely for one of the impairments.

(6) *Orthopedically Impaired.* A severe orthopedic impairment that adversely affects a child's educational performance. The term includes congenital impairments (such as clubfoot and absence of some member), impairments caused by disease (such as poliomyelitis and bone tuberculosis), and impairments from other causes (such as cerebral palsy, amputations, and fractures or burns causing contractures).

(7) *Other Health Impaired.* Limited strength, vitality, or alertness due to chronic or acute health problems that adversely affect a child's educational performance, including heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle-cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, diabetes, or autism.

(8) *Seriously Emotionally Disturbed.* A condition that has been confirmed by clinical evaluation and diagnosis and that, over a long period of time and to a marked degree, adversely affects educational performance, and that exhibits one or more of the following characteristics:

(i) An inability to learn that cannot be explained by intellectual, sensory, or health factors.

(ii) an inability to build or maintain satisfactory interpersonal relationships with peers and teachers.

(iii) inappropriate types of behavior under normal circumstances.

(iv) a tendency to develop physical symptoms or fears associated with personal or school problems.

(v) a general pervasive mood of unhappiness or depression.

The term includes children who are schizophrenic, but does not include children who are socially maladjusted, unless it is determined that they are seriously emotionally disturbed.

(9) *Specific Learning Disability.* A disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language that may manifest itself as an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems that are primarily the result of visual, hearing, or motor handicaps, mental retardation, emotional disturbance, or environmental, cultural, or economic differences.

(10) *Speech Impaired.* A communication disorder, such as stuttering, impaired articulation, language impairment, or a voice impairment, that adversely affects a child's educational performance.

(11) *Visually Handicapped.* A visual impairment that, even with correction, adversely affects a child's educational performance. The term includes both partially seeing and blind children.

(f) *Include; Such As.* Not all the possible items are covered, whether like or unlike the ones named.

(g) *Independent Evaluation.* An evaluation conducted by a qualified examiner who is not employed by the DoDDS school with responsibility for educating the child being evaluated.

(h) *Individualized Education Program (IEP).* A written statement for a handicapped child that is developed and implemented in accordance with this Part.

(i) *Native Language.* When used with reference to an individual of limited English proficiency, the language normally used by such individual, or in the case of a child, the language normally used by the parent of the child.

(j) *Non-DoDDS Placement.* An assignment by DoDDS of a handicapped child to a non-DoDDS school or facility.

(k) *Non-DoDDS School or Facility.* A public or private school or other institution not operated by DoDDS.

(l) *Parent.* A parent or guardian of a child who is receiving or is entitled to receive educational instruction from DoDDS.

(m) *Qualified.* A person who has met DoDDS requirements and educational standards in the area in which he or she is providing special education or related services to handicapped children.

(n) *Regional Director.* The Regional Director of a DoDDS region, or designee.

(o) *Related Services.* Transportation and such developmental, corrective, and other supportive services as are required to assist a handicapped child to benefit from special education pursuant to that child's IEP. The term includes speech therapy and audiology, psychological services, physical and occupational therapy, recreation, early identification and assessment of disabilities in children, counseling services, and medical services for diagnostic or evaluative purposes. The term also includes school health services, social work counseling services in schools, and voluntary parent counseling.

(1) *Audiology.* This term includes:

(i) Identification of children with hearing loss.

(ii) Determination of the range, nature, and degree of hearing loss, including referral for medical or other professional attention designed to ameliorate or correct that loss.

(iii) Provision of ameliorative and corrective activities, including language and auditory training, speech-reading (lip-reading), hearing evaluation, speech conservation, the recommendation of amplification devices, and other aural rehabilitation services.

(2) *Counseling Services.* Services provided by qualified social workers, psychologists, guidance counselors, or other qualified personnel.

(3) *Early Identification.* The implementation of a format plan for identifying a disability as early as possible in the child's life.

(4) *Medical Services.* Services provided by a licensed physician to determine and diagnose, in conjunction with the Case Study Committee (CSC), whether a child has a medically related handicapping condition that results in the child's need for special education and related services.

(5) *Occupational Therapy.* Services provided or supervised by a qualified occupational therapist.

(6) *Parent Counseling and Training.* Assisting parents in understanding the special needs of their child's development and special education.

(7) *Physical Therapy.* Services provided or supervised by a qualified physical therapist.

(8) *Psychological Services.* This term includes:

(i) Administering psychological and educational tests and other assessment procedures.

(ii) interpreting test and assessment results.

(iii) obtaining, integrating, and interpreting information about a child's

behavior and conditions relating to his or her learning.

(iv) consulting with other staff members in planning school programs to meet the special needs of children, as indicated by psychological tests, interviews, and behavioral evaluations.

(v) planning and managing a program of psychological services, including psychological counseling for children.

(9) *Recreation.* This term includes:

(i) Therapeutic recreational activities.

(ii) recreational programs in schools and community agencies.

(10) *School Health Services.* Services provided by a qualified school nurse or other qualified health professional. The term does not include catheterization, injections, transfusions, or administration of any drug or substance, whether or not prescribed, recommended, or authorized by any physician, nurse, another health professional, or other person. The term also does not include any medical or nonmedical procedure, treatment, or course of treatment necessary to sustain or maintain a child's life, life function, or life support function. Nothing herein shall be construed to preclude a duly trained, certified, or licensed DoDDS employee from performing any of the foregoing activities when authorized or directed by a DoDDS regional director.

(11) *Social Work Counseling Services in Schools.* This term includes:

(i) Preparing a social or developmental history on a handicapped child.

(ii) counseling the child and his or her family on a group or individual basis.

(iii) working with those problems in a child's home, school, and community that adversely affect the child's adjustment in school.

(iv) using school and community resources to enable the child to receive maximum benefit from his or her educational program.

(12) *Speech Therapy.* This term includes the:

(i) Identification of children with speech or language disorders.

(ii) diagnosis and appraisal of specific speech or language disorders.

(iii) referral for medical or other professional attention to correct or ameliorate speech or language disorders.

(iv) provision of speech and language services for the correction, amelioration, and prevention of communicative disorders.

(v) counseling and guidance of children, parents, and teachers for speech and language disorders.

(13) *Transportation.* This term includes the following services rendered pursuant to the IEP of a handicapped child:

(i) Travel to and from school and between schools, including travel necessary to permit participation in educational and recreational activities and related services.

(ii) travel in and around school buildings.

(iii) specialized equipment (including special of adapted buses, lifts, and ramps), if required to provide special transportation from a handicapped child.

(p) *Separate Facility.* A school or a portion of a school, regardless of whether it is operated by DoDDS, that is only attended by handicapped children.

(q) *Special Education.* Specially designed instruction, at no cost to the child or parent, to meet the unique educational needs of a handicapped child, including education provided in a school, at home, in a hospital or in an institution, physical education programs, and vocational education programs.

(1) *At No Cost.* With respect to a child attending a DoDDS school on a nontuition basis, specially designed instruction and related services are provided without charge, but incidental fees that are normally charged to nonhandicapped students or their parents as a part of the regular educational program may be imposed. With respect to a child attending a DoDDS school on a tuition basis, the term does not preclude the imposition of additional charges to reflect the cost of special education and related services.

(2) *Physical Education.* The development of:

(i) Physical and motor fitness.

(ii) fundamental motor skills and patterns.

(iii) skills in aquatics, dance, and individual and group games and sports (including intramural and lifetime sports).

(3) *Vocational Education.* Organized educational programs directly related to the preparation for paid or unpaid employment or for additional training in a career requiring other than a baccalaureate or advanced degree.

Appendix 1.—Procedures for Educational Programs and Services for Handicapped Children

A. Identification and Screening

1. DoDDS shall locate, identify, and, with the consent of the child's parent, evaluate all children who are receiving or are entitled to receive an education from DoDDS and who need special education and related services because they are handicapped, as defined in this Part.

2. DoDDS shall:

a. Provide screening, by using basic skills tests in reading language arts, and mathematics, and by reviewing records of all children entering DoDDS schools for the first time, to determine whether a child may be in need of special education and related services.

b. Analyze school health data for those children who demonstrate possible handicapping conditions. Such data shall include:

(1) Results of formal hearing, vision, speech, and language tests.

(2) Reports from physicians and public health service personnel.

(3) Reports from other appropriate professional health personnel as may be necessary to aid in identifying possible handicapping conditions.

c. Analyze other pertinent information, including suspensions, exclusions, withdrawals, and disciplinary actions, compiled and maintained by schools that may aid in identifying possible handicapping conditions.

d. Provide direction and guidelines for child-find activities.

3. Each DoDDS regional office, in cooperation with the Military Departments, shall conduct ongoing child-find activities that are designed to identify all children with possible handicapping conditions who are or will be entitled to receive an education from DoDDS.

4. If an element of DoDDS, a qualified professional authorized to provide related services, or another source determines that a child has a possible handicapping condition, the child shall be referred to the appropriate CSC.

5. A school CSC consists of the participants in the child's IEP meeting as prescribed in paragraph C.6 of appendix, below. In addition, a school CSC shall contain the DoDDS school principal, or designee, and one or more persons selected by the principal from any or all of the following groups:

a. DoDDS or Military Department resource educators, including psychologists, guidance counselors, social workers, reading improvement specialists, school health personnel, occupational therapists, physical therapists, and speech therapists.

b. DoDDS regular classroom teachers.

c. DoDDS special education personnel.

6. Members of a regional CSC shall be appointed by the DoDDS Regional Director and shall include one or more persons belonging to either or both of the following groups: DoDDS or Military Department resource educators, such as psychologists, guidance counselors, social workers, reading improvement specialists, school health personnel, occupational therapists, physical therapists, and speech therapists; and DoDDS special education personnel. The regional CSC shall act in the absence of a school CSC, and members of a regional CSC may be assigned to a school CSC.

7. A school or regional CSC shall assist in identifying handicapped children.

B. Evaluation Procedures

1. Any child who is receiving or entitled to receive educational instruction from DoDDS and who is referred to a CSC for a possible handicapping condition shall receive a full

and comprehensive diagnostic evaluation of his or her educational needs. An evaluation in accordance with this Instruction shall be administered before any action is taken regarding development of the IEP or placement in a special education program.

2. A CSC shall:

a. Assess the nature and extent of the handicapping condition and determine if special education and related services are required.

b. Ensure appropriate involvement of parents.

c. Develop, review, and revise IEPs, and monitor their implementation.

d. Determine whether a handicapped child's conduct that either violates school rules and regulations or disrupts classroom activities results in whole or in part from a handicapping condition.

e. Use all locally available community, medical, and school resources to facilitate the implementation of a child's IEP before the Regional Director with educational responsibility for the child determines that the child's need for special education and related services exceeds local capabilities.

3. Assessment materials, evaluation procedures, and tests shall be:

a. Racially and culturally nondiscriminatory.

b. Administered in the native language or mode of communication of the child, unless it clearly is not feasible to do so.

c. Validated for the specific purpose for which they are used or intended to be used.

d. Administered by qualified personnel, such as a special educator, school psychologist, speech therapist, or a reading improvement specialist, in conformity with the instructions provided by the producers of the testing device.

e. Administered in a manner so that no single procedure is the sole criterion for determining an appropriate educational program for a handicapped child.

f. Selected to assess specific areas of educational need, not merely to provide a single general intelligence quotient.

4. The evaluation shall be conducted by a multidisciplinary team or group of persons, and shall include a teacher or other specialist with knowledge in the area of the suspected disability.

5. The child shall be evaluated in all areas related to the suspected disability. When necessary, the evaluation shall include:

a. The current level of functioning academically, socially, and within the family.

b. Visual and auditory acuity.

c. Observation in an educational environment.

d. Current physical status, including perceptual and motor abilities.

e. Vocational educational assessment.

6. The regional or school CSC shall issue a written report that contains, when necessary:

a. A description of the nature and severity of the child's handicapping condition.

b. A review of the formal and informal diagnostic evaluation findings of the multidisciplinary team.

c. A summary of information from the parents, the child, or other persons having significant previous contact with the child.

d. A description of the child's current academic progress, including a statement of the child's learning style.

7. The appropriate CSC shall meet as soon as practicable after the child's formal evaluation to determine whether he or she is in need of special education and related services. The child's parents shall be afforded the opportunity to participate in such a meeting.

8. A handicapped child shall receive an individual comprehensive diagnostic evaluation every 3 years, or more frequently if conditions warrant. The scope and nature of the reevaluation shall be determined individually, based upon the child's performance, behavior, and needs when the reevaluation is conducted.

C. Individualized Education Program

1. DoDDS shall ensure that an IEP is developed and implemented for each handicapped child enrolled in a DoDDS school or placed in another institution by DoDDS pursuant to this Instruction.

2. Each IEP shall include:

a. A statement of the present levels of educational performance of the child.

b. A statement of annual goals, including short-term instructional objectives.

c. A statement of specific special educational and recreational activities and related services to be provided to the child, and the extent to which the child may be able to participate in regular educational programs.

d. The projected date for the initiation and the anticipated length of such activities and services.

e. Appropriate objective criteria and evaluation procedures and schedules for determining, on an annual basis, whether educational objectives are being achieved.

f. A statement indicating the frequency (number of times per month) and intensity (amount of time each day) of related services.

3. The IEP of each handicapped child shall provide for the opportunity to participate, with adaptations when appropriate, in the regular physical education program available to nonhandicapped children unless:

a. The handicapped child is enrolled full-time in a separate facility; or

b. The handicapped child needs specially designed physical education, as prescribed in the child's IEP.

4. If specially designed physical education services are prescribed in a handicapped child's IEP, DoDDS shall provide such education directly, or shall make arrangements for the services to be provided through non-DoDDS schools or facilities.

5. DoDDS shall ensure that a handicapped child enrolled in a separate facility receives appropriate physical education services in compliance with this Part.

6. The IEP for each handicapped child shall be developed, later reviewed, and, if appropriate, revised at least annually in meetings that include the following participants:

a. The child's regular teacher.

b. A teacher of special education.

c. The principal or a representative of the DoDDS school, other than the child's teacher, who is qualified to provide, or supervise the provision of, special education.

d. One or both of the child's parents.

e. The child, if appropriate.

f. A member of the evaluation team, the child's teacher, or another person knowledgeable about the evaluation procedures used with the child and familiar with the results of the evaluation.

g. Other individuals, at the reasonable discretion of the parents or DoDDS.

7. Each DoDDS school shall:

a. Ensure that an IEP is in effect before a child receives special education and related services. If a child with a current IEP transfers to or from a school within DoDDS, the CSC of the receiving school or region may implement, at its discretion, the current IEP, initiate a meeting to revise the current IEP, or initiate an evaluation of the child.

b. Ensure that an IEP meeting is held following a determination by the school or regional CSC that the child needs special education and related services.

c. Afford the child's parents the opportunity to participate in every IEP meeting concerning their child by:

(1) Providing the parents adequate notice of the time and place of the meeting.

(2) Attempting to schedule the meeting at a mutually agreeable time and place.

8. A meeting may be conducted without a parent in attendance if the school is unable to convince a parent to attend. In this case, the school must have a written record of its attempts to arrange a mutually acceptable time and place.

9. If the parents attend the IEP meeting, the school shall take necessary action to ensure that at least one of the parents understands the proceedings at the meeting, including providing an interpreter for a parent who is deaf or whose native language is other than English.

10. If neither parent can attend the meeting, other methods to promote participation by a parent, such as telephone conversations and letters, shall be used.

11. The school shall give a parent a copy of the child's IEP.

12. Each DoDDS school shall provide special education and related services, in accordance with an IEP, provided that DoDDS, its constituent elements, or its personnel are not accountable if a child does not achieve the growth projected in the IEP.

13. DoDDS shall ensure that an IEP is developed and implemented for each handicapped child whom DoDDS places in a non-DoDDS school or other facility.

D. Placement Procedures and Least Restrictive Environment

1. The placement of a child in any special education program by DoDDS shall be effected only pursuant to an IEP after a determination, under this Instruction, has been made that a child is handicapped and needs special education and related services.

2. The appropriate CSC shall meet as soon as is practicable following the development of a handicapped child's IEP to identify the personnel who will provide the child with special education and related services pursuant to the IEP.

3. A placement decision may not be implemented without the consent of a parent

of the child, except as otherwise provided herein.

4. The placement decision must be designed to educate a handicapped child in the least restrictive environment so that the child is educated to the maximum extent appropriate with children who are not handicapped. Special classes, separate schooling, or other removal of handicapped children from the regular educational environment shall occur only when the nature or severity of the handicap is such that the child cannot be educated satisfactorily in regular classes with the use of supplementary aids and services.

5. Each handicapped child's educational placement shall be:

a. Determined at least annually by the appropriate CSD.

b. Based on the child's IEP.

c. Located as close as possible to the residence of the parent who is sponsoring the child for attendance in a DoDDS school.

d. Designed to assign the child to the school the child would attend if he or she were not handicapped, unless the IEP requires some other arrangement.

e. Predicated on the consideration of all factors affecting the child's well-being, including the effects of separation from parents.

f. To the maximum extent appropriate, designed such that the child participates in school activities, including meals and recess periods, with children who are not handicapped.

E. Handicapped Children in Non-DoDDS Schools

1. Handicapped children eligible to receive instruction in DoDDS who are referred to a non-DoDDS school or facility by DoDDS have all the rights of handicapped children who are enrolled in DoDDS schools.

a. If DoDDS places a handicapped child in a non-DoDDS school or facility as a means of providing special education and related services, the program of that institution, including nonmedical care, room, and board, as set forth in the child's IEP, must be at no cost to the child or the child's parents.

b. DoDDS may place a handicapped child in a non-DoDDS school or facility only if required by an IEP. An IEP for a student placed in a non-DoDDS school is not valid until signed by an authorized DoDDS official. The IEP shall include determinations that:

(1) DoDDS does not currently have an educational program appropriate to meet the needs of the handicapped child.

(2) The non-DoDDS school or facility and its educational program conform to this Part.

2. DoDDS is not responsible for the cost of a non-DoDDS placement, unless it is authorized by the appropriate DoDDS regional office in coordination with DoDDS Headquarters pursuant to a valid IEP or is directed by an impartial hearing officer or court of competent jurisdiction.

3. Non-DoDDS placements by DoDDS shall be:

a. In accordance with host nation requirements.

b. Subject to all treaties, executive agreements, and status of forces agreements between the United States and host nations, and all DoD and DoDDS regulations.

c. As close as possible to the DoDDS school that the handicapped child attends or would otherwise attend.

4. Before DoDDS places a handicapped child in a non-DoDDS school or facility, DoDDS shall conduct a meeting in accordance with this Part to develop an IEP for the child.

F. Procedural Safeguards

1. Parents shall be given written notice before DoDDS proposes to initiate or change, or refuses to initiate or change, either the identification, evaluation, or educational placement of a child receiving or entitled to receive special education and related services from DoDDS, or the provision of a free appropriate public education by DoDDS to the child. The notice shall fully inform a parent of the procedural rights conferred by this Part and shall be given in the parent's native language, unless it clearly is not feasible to do so.

2. The consent of a parent of a child who is handicapped or is suspected of having a handicapping condition shall be obtained before any:

a. Initiation of formal evaluation procedures.

b. Initial educational placement.

c. Change in educational placement.

3. If the parent refuses consent to any formal evaluation or initial placement in a special education program, DoDDS may initiate an impartial due process hearing under this Part to show cause why an evaluation or placement in a special education program should occur without such consent. If the hearing officer sustains the DoDDS position in the impartial due process hearing, the appropriate DoDDS school may evaluate or provide special education and related services to the child without the consent of a parent, subject to the parent's due process rights.

4. A parent is entitled to an independent evaluation of his or her child at DoDDS expense if the parent disagrees with the findings of an evaluation of the child conducted by the school and the parent successfully challenges the evaluation in an impartial due process hearing.

a. If an independent evaluation is provided at the expense of DoDDS, it must meet the following criteria:

(1) Conform to the requirements of this Part.

(2) Be conducted, when possible, within the area where the child resides.

(3) Follow all DoD regulations regarding the host nation.

(4) Meet DoDDS standards governing persons qualified to conduct an educational evaluation.

b. If the final decision rendered in an impartial due process hearing sustains the evaluation of the CSC, the parent has the right to an independent evaluation, but not at DoDDs expense.

5. The parents of a handicapped child shall be afforded an opportunity to inspect and review all educational records concerning not only the identification, evaluation, and educational placement of the child, but also the provision of a free appropriate public education to the child.

6. Upon complaint presented in a written petition, the parent of a handicapped child or DoDDs shall have the opportunity for an impartial due process hearing provided by DoDDS, in accordance with this Part.

7. During the pendency of any impartial due process hearing or judicial proceeding regarding the identification, evaluation, or educational placement of a handicapped child receiving an education from DoDDS or the provision of a free appropriate public education to such a child, unless DoDDS and a parent of the child agree otherwise, the child shall remain in his or her present educational placement, subject to the disciplinary procedures prescribed by this Part.

8. If a handicapped child who is entitled to receive educational instruction from DoDDS is applying for initial admission to a DoDDS school, the child shall enter the DoDDS system on the same basis as a nonhandicapped child. However, a handicapped child, with the consent of a parent and DoDDS, may receive an initial placement in a special education program comparable to the child's program prior to entering DoDDS, until all due process and judicial proceedings have been completed.

9. The General Counsel of the Department of Defense shall coordinate on modifications to Appendix 2 of this Part.

10. The parent of a handicapped child or a DoD employee may file a written complaint with the appropriate DoDDs regional office concerning a possible violation of this Instruction or Pub. L. 94–142.

G. Confidentiality of Records

DoDDS shall maintain all student records under this Part in conformity with 32 CFR 286a.

H. Disciplinary Procedures

1. All regular disciplinary rules and procedures applicable to children receiving educational instruction in DoDDS shall apply to handicapped children who violate school rules and regulations or disrupt regular classroom activities, subject to the provisions of this section.

2. Prior to the suspension or expulsion of a handicapped child, the appropriate CSC or, in the case of a handicapped child in a non-DoDDS school, authorized DoDDS officials shall determine whether the child's conduct is the result of the child's handicapping condition.

3. If the CSC or authorized DoDDS officials determine that the child's conduct results in whole or part from his or her handicapping condition, the child may not be subject to any regular disciplinary rules and procedures, and:

a. The child's parents shall be notified in accordance with this Part of the right to have an IEP meeting before any change in the child's educational placement.

b. The CSC or authorized DoDDS officials shall ensure that a meeting is held to determine the appropriate educational placement for the child in consideration of his or her conduct.

4. A handicapped child shall neither be suspended nor expelled, and his or her educational placement shall not otherwise be

changed for disciplinary reasons, unless in accordance with this section, except that:

a. This section shall be applicable only to children determined to be handicapped under this Part.

b. Nothing contained herein shall preclude the emergency suspension of any handicapped child who endangers or reasonably appears to endanger the health, welfare, or safety of himself or herself, or any other child, teacher, or school personnel, provided that:

(1) The appropriate CSC or authorized DoDDS officials shall immediately meet to determine whether the child's conduct results from his or her handicapping condition and what change in educational placement is appropriate for the child.

(2) The child's parents shall be notified immediately of the child's suspension, and of the time and location of, and their right to attend the meeting.

(3) The suspension of the child is only effective for the duration of the emergency.

Appendix 2.—Hearing Procedures

A. Purpose

This Appendix establishes adjudicative requirements whereby the parents of handicapped children and DoDDS are afforded impartial due process hearings with respect to the identification, evaluation, and educational placement of, and the free appropriate public education provided to, such children by the Department of Defense, in accordance with Pub. L. 94-142 and Pub. L. 95-561.

B. Administration

1. The DoDDS Regional Director with responsibility for the handicapped child whose education is at issue shall be responsible for the hearings conducted under this Part.

2. This Part shall be administered to ensure that the findings, judgments, and determinations made are prompt, fair, and impartial.

3. Impartial hearing officers shall be appointed by the ASD(MRA&L), or designee, and shall be attorneys who are independent of DoDDS and members in good standing of the bar of any state, the District of Columbia, or a territory or possession of the United States.

4. Counsel normally shall appear and represent DoDDS in proceedings conducted under this Part. A parent shall have the right to be represented in such proceedings at no cost to the government by counsel or a personal representative.

C. Mediation

1. Mediation can be initiated by either a parent or DoDDS in order to resolve informally a disagreement with respect to the identification, evaluation, or educational placement of, or the free appropriate public education provided to, a child. Mediation shall consist of but not be limited to an informal discussion of the differences between the parties in an effort to resolve those differences. The parents and the appropriate school officials may attend mediation sessions.

2. Mediation must be conducted, attempted, or refused in writing by a parent of the handicapped child whose education is at issue before a request for, or initiation of, a hearing authorized by this Part. Any request by DoDDS for a hearing under this Part shall state how this requirement has been satisfied. No stigma may be attached to the refusal of a parent to mediate or to an unsuccessful attempt to mediate.

D. Practice and Procedure

1. *Hearing.* a. Should mediation be refused or otherwise fail to resolve the issues concerning the provision of a free appropriate public education to a handicapped child or the identification, evaluation, or educational placement of the child, the child's parent or the school principal having jurisdiction over the child may request and shall receive a hearing before a hearing officer to resolve the matter. The parents of a handicapped child whose education is at issue and DoDDS shall be the only parties to a hearing conducted under this Part.

b. The party seeking the hearing shall submit a written request, in the form of a petition, setting forth the facts, issues, and proposed relief, to the DoDDS Regional Director who has responsibility for the handicapped child. The petitioner shall deliver a copy of the petition to the opposing party (that is, the parent or, on behalf of DoDDS, the school principal), either in person or by first-class mail, postage prepaid. Delivery is complete upon mailing. When DoDDS petitions for a hearing, it shall inform the other parties of the deadline for filing an answer under paragraph D.1.c., below, and shall provide the other parties with a copy of this Part.

c. An opposing party shall submit an answer to the petition to the appropriate Regional Director, with a copy to the petitioner, within 15 calendar days of receipt of the petition. The answer shall be as full and complete as possible, addressing the issues, facts, and proposed relief.

d. Within 10 calender days after receiving the petition, the Regional Director shall obtain the assignment of a hearing officer, who then shall have jurisdiction over the resulting proceeding. The Regional Director promptly shall forward all pleadings to the hearing officer.

e. The questions for adjudication shall be based on the petition and the answer, provided that a party may amend a pleading if the amendment is filed with the hearing officer and is received by the other parties at least 5 calendar days before the hearing.

f. The Regional Director shall arrange for the time and place of the hearing, and shall provide administrative support. Such arrangements shall be reasonably convenient to the parties.

g. The purpose of a hearing is to establish the relevant facts necessary for the hearing officer to reach a fair and impartial determination of the case. Oral and documentary evidence that is relevant and material may be received. The technical rules of evidence shall be relaxed to permit the development of a full evidentiary record, with the Federal Rules of Evidence, Title 28, U.S.C. serving as a guide.

h. The hearing officer shall be the presiding officer, with judicial powers to manage the proceeding and conduct the hearing. Those powers shall include the authority to order an independent evaluation of the child at the expense of DoDDS and to call and question witnesses.

i. Those normally authorized to attend a hearing shall be the parents of the child, the counsel and personal representative of the parents, the counsel and professional employees of DoDDS, the hearing officer, and an individual qualified to transcribe or record the proceedings. The hearing officer may permit other persons to attend the hearing, consistent with the privacy interests of the parents and the child, provided the parents have the right to an open hearing upon waiving in writing their privacy rights and those of the child.

j. A verbatim transcription of the hearing shall be made in written or electronic form and shall become a permanent part of the record. A copy of the written transcript or electronic recording shall be made available to a parent upon request and without cost. The hearing officer may allow corrections to the written transcript or electronic recording for the purpose of conforming it to actual testimony after adequate notice of such changes is given to all parties.

k. The hearing officer's decision of the case shall be based on the record, which shall include the petition; the answer; the written transcript or the electronic recording of the hearing; exhibits admitted into evidence; pleadings or correspondence properly filed and served on all parties; and such other matter as the hearing officer may include in the record, provided that such matter is made available to all parties before the record is closed under paragraph D.1.m., below.

l. The hearing officer shall make a full and complete record of a case presented for adjudication.

m. The hearing officer shall decide when the record in a case is closed.

n. The hearing officer shall issue findings of fact and render a decision in a case not later than 50 calendar days after being assigned to the case, unless a discovery request under subsection D.2., below, is pending.

2. *Discovery.* a. Full and complete discovery shall be available to parties to the proceeding, with the Federal Rules of Civil Procedure, Title 28, U.S.C. serving as a guide.

b. If voluntary discovery cannot be accomplished, a party seeking discovery may file a motion to accomplish discovery, provided such motion is founded on the relevance and materiality of the proposed discovery to the issues. An order granting discovery shall be enforceable as is an order compelling testimony or the production of evidence.

c. A copy of the written or electronic transcription of a deposition taken by DoDDS shall be made available free of charge to a parent.

3. *Witnesses; Production of Evidence.* a. All witnesses testifying at the hearing shall be advised that it is a criminal offense knowingly and willfully to make a false statement or representation to a department or agency of the United States Government as to any matter within the jurisdiction of that department or agency. All witnesses

shall be subject to cross-examination by the parties.

b. A party calling a witness shall bear the witness' travel and incidental expenses associated with testifying at the hearing. DoDDS shall pay such expenses when a witness is called by the hearing officer.

c. The hearing officer may issue an order compelling the attendance of witnesses or the production of evidence upon his own motion or, if good cause be shown, upon motion of a party.

d. When the hearing officer determines that a person has failed to obey an order to testify or to produce evidence, and such failure is in knowing and willful disregard of the order, the hearing officer shall so certify.

e. The party or the hearing officer seeking to compel testimony or the production of evidence may, upon the certification provided for in paragraph D.3.d., above, file an appropriate action in a court of competent jurisdiction to compel compliance with the hearing officer's order.

4. *Hearing Officer's Findings of Fact and Decision.* a. The hearing officer shall make written findings of fact and shall issue a decision setting forth the questions presented, the resolution of those questions, and the rationale for the resolution. The hearing officer shall file the findings of fact and decision with the appropriate Regional Director, with a copy to the parents, the school principal, and the Director of DoDDS.

b. The Regional Director shall forward a copy of the hearing officer's findings of fact and decision, with all personally indentifiable information deleted, to the National Advisory Panel.

c. The hearing officer shall have the authority to impose financial responsibility for educational placements, evaluation, and related services under his or her findings of fact and decision.

d. The findings of fact and decision of the hearing officer shall become final unless a notice of appeal is filed under subsection F.1., below. DoDDS shall implement a decision as soon as practicable after it becomes final.

E. Determination Without Hearing

1. At the request of a parent of the handicapped child whose education is at issue, the requirement for a hearing may be waived, and the case may be submitted to the hearing officer on written documents filed by the parties. The hearing officer shall make findings of fact and issue a decision within the period fixed by paragraph D.1.n., above.

2. DoDDS may oppose a request to waive the hearing. In that event, the hearing officer shall rule on the request.

3. Documents submitted to the hearing officer in a case determined without a hearing shall comply with paragraph D.1.g., above. A party submitting such documents shall provide copies to all other parties.

F. Appeal

1. A party may appeal the hearing officer's findings of fact and decision by filing a written notice of appeal with the ASD (MRA&L), or designee, within 5 calendar days of receipt of the findings of fact and decision. The notice of appeal must contain the appellant's certification that a copy of the notice of appeal has been provided to all other parties. Filing is complete upon mailing.

2. Within 10 calendar days of filing the notice of appeal, the appellant shall submit a written statement of issues and arguments to the ASD(MRA&L), or designee, with a copy to the other parties. The other parties shall submit a reply or replies to the ASD(MRA&L), or designee, within 15 calendar days of receiving the statement, and shall deliver a copy of each reply to the appellant. Submission is complete upon mailing.

3. The ASD(MRA&L), or designee, shall determine the matter on appeal, including the making of interlocutory rulings, within 20 calendar days of receiving timely submitted replies under subsection F.2., above. The ASD(MRA&L), or designee, may request oral argument at a time and place reasonably convenient to the parties.

4. The determination of the ASD(MRA&L), or designee, shall be a final administrative decision and shall be in written form. It shall address the issues presented and set forth a rationale for the decision reached. A determination denying the appeal of a parent in whole or in part shall state that the parent has the right under P.L. 94-142 to bring a civil action with respect to the matters in dispute in any state court of competent jurisdiction or in a district court of the United States without regard to the amount in controversy.

5. No provision of this Instruction or other DoD guidance may be construed as conferring a further right of administrative review. A party must exhaust all administrative remedies afforded by this Instruction before seeking judicial review of a determination made under this Instruction.

G. Publication and Indexing of Final Decisions

Final decisions in cases arising under this Part shall be published and indexed in accordance with 32 CFR 286 to protect the privacy rights of the parents and children who are parties in those cases.

COPYRIGHT ROYALTY TRIBUNAL

37 CFR Part 307

[Requisition No: 100-82-42]

Adjustment of Royalty Payable Under Compulsory License for Making and Distributing Phonorecords

AGENCY: Copyright Royalty Tribunal.

ACTION: Final rule.

SUMMARY: This rule provides for three automatic stepped increases in the mechanical royalty rate based on data in the record of the 1980 mechanical royalty proceeding concerning recent trends in record prices, and deletes the existing regulations of the Tribunal providing for interim adjustments of the mechanical royalty.

EFFECTIVE DATE: January 31, 1982.

FOR FURTHER INFORMATION CONTACT: Frances Garcia, Chairman, Copyright Royalty Tribunal, 202-653-5175.

SUPPLEMENTARY INFORMATION: The Copyright Royalty Tribunal (Tribunal) published in the **Federal Register** of November 9, 1981 (46 FR 55278-7) a proposed rule to amend the regulations of the Tribunal providing for interim adjustments of the mechanical royalty. Information covering the background and purpose of the proposed rule is

contained in the November 9, 1981 notice.

The Tribunal received comments on the proposed rule from the Amusement and Music Operators Association (AMOA) and Shetland Sound.

AMOA restated its legal position that the Tribunal "is not authorized to prescribe interim rate adjustments, whether they are limited to automatic adjustments or not." The Tribunal concurs in the view of the United States Court of Appeals for the District of Columbia Circuit as found in *Recording Industry Association of America* v. *Copyright Royalty Tribunal* (No. 80–2545) that "we see nothing in the statute precluding the Tribunal from adopting a reasonable mechanism for automatic rate changes in interim years."

Shetland Sound maintained that the rate of the incremental increases provided in the rule are "distinctly inadequate and continues to reflect the injustices of the past 67 years." The Tribunal concludes that the rates provided in the rule are reasonable and promote the statutory objectives.

The Tribunal adopts as its findings in this proceeding the Statement in Support of Proposed Regulations contained in the November 9, 1981 publication.

The Tribunal at a public meeting on December 15, 1981 adopted the rule as published on November 9, 1981.

PART 307—ADJUSTMENT OF ROYALTY PAYABLE UNDER COMPULSORY LICENSE FOR MAKING AND DISTRIBUTING PHONORECORDS

Pursuant to 17 U.S.C. 801(b)(1) and 804, 37 CFR Part 307 is amended as follows:

§ 307.2 [Amended]

§ 307.4 [Removed]

By removing the words "§§ 307.3 and 307.4" from §307.2, and by adding in their place the words "§ 307.3"; by removing § 307.4; and by revising § 307.3 to read as follows:

§ 307.3 Adjustment of royalty rate

(a) For every phonorecord made and distributed on or after January 1, 1983, the royalty payable with respect to each work embodied in the phonorecord shall be either 4.25 cents, or .8 cent per minute of playing time or fraction thereof, whichever amount is larger, subject to further adjustment pursuant to paragraphs (b) and (c) of this section.

(b) For every phonorecord made and distributed on or after July 1, 1984, the royalty payable with respect to each work embodied in the phonorecord shall be either 4.5 cents, or .85 cent per minute of playing time or fraction thereof, whichever amount is larger, subject to further adjustment pursuant to paragraph (c) of this section.

(c) For every phonorecord made and distributed on or after January 1, 1986, the royalty payable with respect to each work embodied in the phonorecord shall be either 5 cents, or .95 cent per minute of playing time or fraction thereof, whichever amount is larger.

Frances Garcia,

Chairman.

BILLING CODE 1410-01-M

POSTAL SERVICE

39 CFR Part 111

E–COM Service

AGENCY: Postal Service.

ACTION: Interim rule with request for comments.

SUMMARY: E–COM (Electronic Computer Originated Mail) service is a new method of entering First-Class Mail that will begin on January 4, 1982. In E–COM service, mailers will be able to submit mail in electronic form to designated serving post offices and receive delivery of their mail within two business days. Interim implementing regulations have been developed and are set forth below for comment and suggested revision prior to adoption in final form.

DATE: The interim regulations will take effect on January 4, 1982. Comments must be received on or before January 31, 1982.

ADDRESS: Written comments should be directed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments will be available for public inspection and copying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8430, U.S. Postal Service Headquarters, 475 L'Enfant Plaza West, Washington, DC 20260–5360.

FOR FURTHER INFORMATION CONTACT: Don Mumma, Office of Mail Classification, (202) 245–4353.

SUPPLEMENTARY INFORMATION: On September 8, 1978, the Postal Service requested from the Postal Rate Commission a recommended decision on changing the Domestic Mail Classification Schedule to establish E–COM service. On April 8, 1980, following extensive hearings on the record and the rejection by the Governors of the Postal Service of a previous recommended decision, the Postal Rate Commission issued its recommended decision upon reconsideration, recommending that the Domestic Mail Classification Schedule be changed to establish E–COM service. On August 15, 1980, the Governors of the Postal Service issued a decision allowing the recommended decision upon reconsideration to take effect under protest. By resolution adopted on August 15, 1980, the Board of Governors of the Postal Service ordered the changes in the Domestic Mail Classification Schedule to become effective on January 4, 1982. The Postal Service hereby publishes interim regulations to implement the decision of the Governors pending receipt of public comments and issuance of final rules.

On June 19, 1981, the Postal Service published for comment in the **Federal Register** (46 FR 32111–32114) a description of E–COM service, a description of E–COM facilities, and proposed arrangements for telecommunications connection with E–COM serving post offices (SPOs). On October 15, 1981, after receiving and acting upon the comments received in response to the June 19, 1981, notice, the Postal Service published in the **Federal Register** (46 FR 50875–50882) a final description of E–COM service and final arrangements for telecommunications connection. The October 15, 1981, notice also invited interested carriers to meet with the Postal Service to discuss the details of connection. These interim regulations are published now to inform the public about E–COM service and to establish the procedures necessary for the Postal Service to administer the service when it starts on a permanent basis on January 4, 1982. The regulations were not published earlier because technical information about the E–COM system, which is still being deployed, was not available and because telecommunications connection arrangements with carriers based on the earlier notices had not been completed. The substance of the interim rule largely reflects the previously established mail classification and the details announced in the June and October notices.

These proposed regulations reflect the telecommunications connection arrangements previously published. They also provide additional information on the rates and classification structure for E–COM service and detailed operating procedures and rules for: (a) telecommunications common carriers to apply for dedicated access, (b) mailers to apply for an E–COM permit, (c) mailers and carriers to receive certification that their telecommunications connection

arrangements and/or data submission procedures are compatible with the E–COM technical interconnection standards, and (d) payment of postage by carriers or mailers. These interim regulations will be set forth in Chapter 5 of the Domestic Mail Manual.

In addition, section 325 has been added to Chapter 3 of the Domestic Mail Manual to identify E–COM as a subclass of First-Class Mail.

Following is a summary of the interim regulations.

E–COM service is a subclass of First-Class Mail. It consists of mail entered into the postal system at designated serving post offices (SPOs) by electronic means. These messages must be entered via communications common carriers whose facilities are connected to the SPOs. (The telecommunications common carriers' connection arrangements were previously detailed in the October 15, 1981 **Federal Register** notice and are reflected in section 560, "Preparation Requirements.") Mailers must enter at least 200 separately addressed messages for each transmission to a SPO, which is defined as the continuous input of electronic messages.

E–COM postage charges are based on the number of transmitted messages received, processed, and printed at a SPO. For one-page messages, the charge is $0.26 per message; for two-page messages, the charge is $0.31 per message. The minimum charge for each transmission is the rate per message for 200 messages less the charges for rejected messages.

There are two types of E–COM users. The first type has a direct relationship with the Postal Service under which the mailer must establish an advance deposit account with the Postal Service, receive certification that its interface equipment and procedures conform with the E–COM technical interconnection standards, pay a $50 annual fee, and prepay postage for transmitted messages received, processed and printed for each transmission. Each direct-relationship mailer must complete and submit a Form 5320, *E–COM Permit and Certification Application* to the local postmaster or E–COM sales and service representative. Once Form 5320 is processed by the Postal Service, an advance deposit account is automatically established at the management operations center (MOC). The mailer will be assigned a test E–COM access code and notified when its E–COM equipment and procedures will be tested. Once the mailer's equipment and procedures are certified, the mailer will be assigned a permanent E–COM access code. The E–COM annual permit fee will be automatically deducted from the mailer's advance deposit account as the first financial transaction after certification. Although E–COM mailers will have only one advance deposit account established at the MOC, postage deposits may be made to any of the SPOs or to other E–COM financial accounting post offices designated by the Director, Office of E–COM Operations. Mailers are responsible for ensuring that sufficient funds are on deposit in their advance deposit account at the MOC before transmitting messages to a SPO.

The second type of E–COM user has an indirect relationship with the Postal Service. These mailers deal only with authorized carriers acting as the mailers' agents for E–COM service. The carriers deal in a direct relationship with the Postal Service on behalf of their clients. A mailer who has an indirect relationship with the Postal Service does not have to establish an advance deposit account at the MOC and does not have to pay the annual permit fee. Each carrier serving as a mailer's agent for E–COM service, however, must establish an advance deposit account, be certified, and pay one annual permit fee which covers all of its clients. These carriers must complete a Form 5320.

The Postal Service expects that two separate administrative control forms will be used to certify that carriers wanting dedicated access to E–COM facilities meet the telecommunications connection arrangements as defined in the October 15, 1981 **Federal Register** notice. These are Form 5321, *E–COM Application for Dedicated Access Facilities* and Form 5322, *Standard Agreement for Dedicated Access to E–COM Serving Post Offices.*

These interim regulations include one provision concerning the arrangements for carriers' telecommunications connection to SPOs, which was not included in the October 15, 1981 **Federal Register** notice. This provision, which is included in section 525.3, Domestic Mail Manual, states that the Postal Service may require that each carrier having facilities and authority to render nationwide service connect its facilities to each SPO.

The interim regulations also provide that mailers may transmit messages 24 hours a day, seven days a week after February 1, 1982. After 8:00 a.m., January 4, 1982 and until February 1, 1982, mailers may transmit messages beginning at 8:00 a.m. each Monday 24 hours a day through Friday of each week. Messages which are received and successfully processed before 11:59 p.m. will be entered into the First-Class mailstream and will be subject to the following service objectives: Messages for 5-digit ZIP Code delivery areas near the SPOs will generally receive next business day service. Messages for other ZIP Code areas within the SPO service area will generally receive second business day service. Messages for ZIP Code areas not served by the SPO are subject to the service objectives for regular First-Class Mail entered at that post office. Undeliverable-as-addressed E–COM messages will receive the same forwarding and return service accorded to all First-Class Mail. No other ancillary services are available for E–COM messages.

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rule making by 39 U.S.C. 410(a), the Postal Service invites comment on the following interim addition to the Domestic Mail Manual which is incorporated by reference in the **Federal Register**. See 39 CFR 111.1.

CHAPTER 3—FIRST-CLASS MAIL

320 *CLASSIFICATION*

Part 325—*E-COM Service*

1. Add new section 325 to read as follows:

325 *E-COM Service*

E-COM (Electronic Computer Originated Mail) is First-Class Mail entered into the postal system at designated serving post offices (SPOs) by electronic means via communications common carriers whose facilities are connected to the SPOs. Mailers must enter at least 200 separately addressed messages. The messages are checked for errors while in electronic form, printed, inserted and sealed in specially marked envelopes provided by the Postal Service, and entered into the First-Class mailstream. E-COM messages may be one or two pages in length and may be in any of the three following formats:

a. "Single Address Messages" (SAMs) are messages in which a unique text accompanies each address.

b. "Common Text Messages" (COTs) are messages in which a common text is accompanied by a list of addresses.

c. "Text Insertion Messages" (TIMs) are messages in which a common text is accompanied by both a list of addresses and unique text to be inserted in each printed message.

Each E-COM message will identify, in a form intelligible to the recipient, the communications common carrier over whose facilities the message was entered into the SPO. For reasons of

convenience, postage rates and fees and regulations governing the transmission of messages to SPOs are set forth in Chapter 5.

2. Add new Chapter 5 to read as follows:

CHAPTER 5—E-COM SERVICE

510 *RATES & FEES*

511 *RATES*

511.1 *General.* E-COM postage charges are based on the number of transmitted messages received, processed and printed at serving post offices (SPOs) and the number of pages in each message.

511.2 *Rate Per Message.* The postage rate per message received, processed, and printed is:

For 1 page messages—26 cents
For 2 page messages—31 cents

511.3 *Minimun Rate for Each Transmission.* The minimum postage charge for each transmission is the rate per message for 200 messages—$52.00 plus $0.05 for each two-page message included, less the charge for rejected messages.

512 *Fees.* The annual E-COM permit fee is $50.

520 *CLASSIFICATION*

521 *General*

E-COM (Electronic Computer Originated Mail) service is a subclass of First-Class Mail (see 325). It consists of mail entered into the postal system at designated serving post offices (SPOs) by electronic means via communications common carriers (hereinafter "carriers," see 525.1) whose facilities are connected to the SPOs. The messages are checked for errors while in electronic form, printed, inserted and sealed in specially marked envelopes provided by the Postal Service, and entered into the First-Class mailstream. E-COM messages may be one or two pages in length and may be in any of the three following formats:

a. "Single Address Messages" (SAMs) are messages in which a unique text accompanies each address.

b. "Common Text Messages" (COTs) are messages in which a common text is accompanied by a list of addresses.

c. "Text Insertion Messages" (TIMs) are messages in which a common text is accompanied by both a list of addresses and unique text to be inserted in each printed message. Each E-COM message must identify, in a form intelligible to the recipient, the communications common carrier over whose facilities the message was entered into the SPO.

522 *Eligibility*

522.1 *Electronic Transmission.* E-COM messages may only be entered by electronic means using a carrier. An E-COM transmission is the continuous input of electronic information (as defined in 563.3) to a single SPO. The currently available SPOs are listed in Exhibit 570.

522.2 *Minimum Volume.* Mailers must enter at least 200 separately addressed messages for each transmission. Exception: If fewer than 200 messages are entered, or if fewer than 200 messages are acceptable for processing, the Postal Service will process the messages, but the mailer will be assessed charges at the minimum rate for each transmission as defined in 511.3.

523 *Types of E-COM Mailers*

523.1 *General.* Mailers who use E-COM service enter messages through either a direct or indirect relationship with the Postal Service, depending on the role of the carrier used by the mailer.

523.2 *Direct Relationship.* In the direct relationship, mailers must establish an advance deposit account with the Postal Service, pay the annual fee described in 512, and prepay the Postal Service for the E-COM messages delivered by the Postal Service. Mailers may use the telecommunications transmission services of any carrier which offers such service to transmit messages to one or more SPOs. The mailer will deal directly with the carrier for these transmission services and pay the carrier for them. The carrier may also perform services such as protocol conversion for the mailer.

523.3 *Indirect Relationship.* In the indirect relationship, mailers deal only with a carrier, which acts as the mailers' agent for E-COM service in dealing with the Postal Service. The mailer may not have an account with the Postal Service and may not separately pay the Postal Service for E-COM messages delivered. The carrier transmits the mailer's messages to SPOs and may also provide services such as protocol or format conversion for the mailer. These carriers may also accept messages from many small mailers and aggregate them to meet the 200 message minimum. Each carrier acting for indirect-relationship mailers must establish an advance deposit account with the Postal Service, pay the annual fee described in 512, and prepay the Postal Service for the E-COM messages delivered by the Postal Service.

524 *Mailer Access to E-COM Facilities*

524.1 *Dial-up Access Facilities.* Dial-up access facilities are available to mailers through the public switched telephone network using whichever carrier or combination of carriers the customer chooses. The Postal Service makes available all of the telecommunications equipment and services required at each SPO to permit dial-up access. Mailers who establish E-COM accounts will be provided with the telephone numbers and transmission characteristics for each dial-up telecommunications port at each SPO.

524.2 *Dedicated Access Facilities.* Mailers may gain access to E-COM SPOs through carriers which have been granted dedicated access by the Postal Service. Only carriers can obtain dedicated access to E-COM facilities from the Postal Service. E-COM mailers must arrange for the use of dedicated facilities through an authorized dedicated carrier.

524.3 *Mailer Certification.* Mailers who intend to gain access to facilities at one or more SPOs under 523.2 must obtain certification from the Postal Service that their transmission arrangements, data submission and formats, and transmission protocols conform with E-COM technical interconnection standards. Certification procedures are set forth in 542.2.

525 *Communications Common Carriers*

525.1 *General.* A communications common carrier, with respect to E-COM service, is any entity which is in the business of transmitting electronic messages to SPOs for others, without regard to whether it also offers computer services or whether it is regulated by the Federal Communications Commission.

525.2 *Carrier Access to E-COM Facilities*

525.21 *Dial-up Access.* Dial-up access facilities are available through the public switched telephone network. The Postal Service provides all of the telecommunications equipment and services required at each SPO, including protocol boards, hardware, software, modems and network connections.

525.22 *Dedicated Access.* Dedicated access facilities are only available to authorized dedicated carriers who enter into a specific agreement with the Postal Service setting forth the terms and conditions of dedicated access. Form 5322, *Standard Agreement for Dedicated Access to E–COM Serving Post Offices* is this agreement. The Postal Service will provide and maintain the required interface circuit boards and lease this equipment to the dedicated carriers for a minimum of one year, after which the lease arrangement can be discontinued with 30 days written notice. A monthly charge will be assessed for this interface equipment based on relevant costs. Dedicated carriers must provide their own telecommunications circuits and connection equipment including modems and data service units. This

equipment must meet compatibility and performance requirements outlined in 560. Dedicated carriers authorized and certified by the Postal Service to use dedicated access facilities have exclusive access at all times to a port at those SPOs where they are authorized access. Their authorization allows them control over resale or shared use of their dedicated access facilities.

525.3 *Authorization and Certification of Carriers.* Carriers requesting dedicated access to SPO facilities must obtain Postal Service authorization and certification. The Postal Service provides certification if all electronic communications equipment required and supplied by dedicated carriers conforms to the technical interconnection standards defined in 560. The Postal Service may require that each carrier employ only one access port at each SPO to which the carrier is connected. Also, the Postal Service may require that each carrier having facilities and authority to render nationwide service connect its facilities to each SPO (see 542.1).

530 *Service Objectives*

Messages for 5-digit ZIP Code delivery areas near the SPOs generally receive next business day service. All other ZIP Code areas within the SPO service area in Exhibit 570 generally receive second business day service. Messages for ZIP Code areas not served by the SPO are subject to the service objectives for First-Class Mail set forth in 330.

540 *Authorizations (Certifications) and Permits*

541 *Permits.* The E–COM permit fee in 512 must be paid once each calendar year by any mailer or carrier which has a direct E–COM relationship with the Postal Service. Carriers authorized dedicated access may act as a mailing agent for their clients. In such cases, the carrier pays one E–COM fee which is applicable to all of its clients (see 523.3).

542 *Authorizations (Certifications)*

542.1 *Authorization and Certification of Carriers.* Any carrier desiring dedicated access at one or more SPOs must receive certification from the Postal Service that its telecommunications equipment and procedures conform with the E–COM technical interconnection standards in 560. Carriers must complete and return Form 5321, *E–COM Application For Dedicated Access Facilities,* to the Director, Office of E–COM Operations, USPS Headquarters, 475 L'Enfant Plaza, Washington, DC 20260–7140. Before dedicated access is granted, the carrier must sign Form 5322, *Standard Agreement For Dedicated Access to E–COM Serving Post Offices.* Carriers which also serve as the mailers' agent for E–COM service (i.e., agent for mailers with indirect relationships with the Postal Service as defined in 523.3) must complete and submit a Form 5320, *E–COM Permit and Certification Application.*

542.2 *Certification of E–COM Mailers.* Any mailer wishing to maintain a direct relationship with the Postal Service (as defined in 523.2) must: open an E–COM account; be certified by the Postal Service that its transmission arrangements, data submission and formats, and transmission protocols conform with the E–COM technical interconnection standards in 560; and pay the fee in 512. These mailers must complete and return Form 5320 to their local postmaster or E–COM sales and service representative. The mailer first will be assigned a test E–COM access code. After the mailer is certified, a permanent operating access code will be assigned and the E–COM permit fee (512) will be automatically deducted from the mailer's advance deposit account. (NOTE: Mailers who gain access to E–COM facilities through a carrier in an indirect relationship (see 523.3) are not required to submit a Form 5320, establish an advance deposit account, or pay the annual E–COM permit fee. In these cases, the carrier serving as the mailers' agent for E–COM service must submit a Form 5320 and pay the annual fee.)

550 *PHYSICAL LIMITATIONS*

E–COM service is limited to E–COM messages which are one or two pages in length and are in any of the three following formats:

a. "Single Address Messages" (SAMs) are messages in which a unique text accompanies each address.

b. "Common Text Messages" (COTs) are messages in which a common text is accompanied by a list of addresses.

c. "Text Insertion Messages" (TIMs) are messages in which a common text is accompanied by both a list of addresses and unique text to be inserted in each printed message.

Note.—The messages are printed on 8½ inch x 11 inch paper and enveloped and sealed in special envelopes provided by the Postal Service.

560 *PREPARATION REQUIREMENTS*

561 *General*

E–COM messages may be entered into the postal system only at a designated SPO through an authorized carrier.

562 *Telecommunications Connection Arrangements*

562.1 *Dial-up Facilities*

.11 *Equipment.* The Postal Service makes available all of the telecommunications equipment and services needed at each SPO to permit dial-up access via the public switched telephone network, including communications interface protocol hardware and software, modems, and network connections. Mailers with E–COM accounts are provided the telephone numbers and transmission characteristics for each dial-up telecommunications port at each SPO.

.12 *Transmission Protocols.* The following transmission protocols are available for dial-up access at each SPO:

a. *Binary synchronous,* compatible with the IBM 2780 and 3780 protocols using EBCDIC character code sets, operating in half-duplex mode at 2400 bits per second with Bell System 201C compatible modems, and at 4800 bits per second with Bell System 208B compatible modems; and

b. *Asynchronous,* using the Texas Instruments 700 series convention for data block transmission and the 96 character ASCII subset as defined by ANSI Standard X3.4–1977, operating at 300 or 1200 bits per second full-duplex with Bell System 212A compatible modems.

562.2 *Dedicated Facilities*

562.21 *Equipment.* Carriers authorized dedicated access after entering into an agreement with the Postal Service (see 525.2) must provide and maintain their own private telecommunications circuits and related equipment including modems or data service units for each SPO. The Postal Service provides and maintains the telecommunications interface circuit boards by lease to the dedicated carriers for a minimum lease period of one year, after which the lease arrangement can be discontinued by giving 30 days' written notice. A monthly charge is assessed for this interface equipment based on relevant costs. The terms of the leasing arrangement are defined in Form 5322, *Standard Agreement for Dedicated Access to E–COM Serving Post Offices.* Exception: Users may request authorization from the Director, Office of E–COM Operations, USPS Headquarters, 475 L'Enfant Plaza, Washington, DC 20260–7140 to use their own telecommunications circuit boards, provided they meet Postal Service compatibility and performance requirements.

.22 *Maintenance.* The Postal Service conducts routine performance and fault isolation checks on all equipment provided by the dedicated carrier which is located at the SPOs. The carrier is responsible for making repairs to or replacing malfunctioning equipment and

ensuring that the equipment meets the necessary compatibility and performance requirements.

.23 *Transmission Protocols.* The following transmission protocols are available for dedicated access at each SPO. (The Postal Service considers requests for additional arrangements. Written requests should be directed to the Director, Office of E–COM Operations, USPS Headquarters, 475 L'Enfant Plaza, Washington, DC 20260–7140.) These arrangements are:

a. *Binary synchronous,* compatible with the IBM 2780 and 3780 protocols using EBCDIC character code sets, operating in half-duplex mode at 2400 bits per second with Bell System 201C compatible modems; at 4800 bits per second with Bell System 208B compatible modems; and at 9600 bits per second and full duplex with Bell System 209A compatible modems;

b. *Asynchronous,* using the Texas Instruments 700 series convention for data block transmission and the 98 character ASCII subset as defined by ANSI Standard X3.4–1977, operating at 300 or 1200 bits per second full-duplex with Bell system 212A compatible modems;

c. *Packet switched X.25,* with LAP data link protocol, binary synchronous framing, ASCII character sets, and full duplex operations at 2400, 4800, or 9600 bits per second; and

d. *DEC (Digital Equipment Corporation)* DDCMP serial synchronous byte-oriented line protocol, using the ASCII character set, with full-duplex operation at 2400, 4800, 9,600 and 56,000 bits per second.

563 *Data Submission Requirements*

563.1 *General.* Each transmission must be transmitted entirely in The American Standard Code For Information Interchange (ASCII), or entirely in The Extended Binary-Code-Decimal Interchange Code (EBCDIC).

563.2 *User Data Formats*

.21 *General.* E–COM messages are submitted in group submissions consisting of three separate blocks, which must be submitted in the following order: a. E–COM GROUP LABEL; b. MESSAGE BLOCKS; and c. E–COM END BLOCK.

.22 *E–COM Group Label.* The E–COM Group Label provides and identifies the type of character code, customer identification number (ID), transmission group ID, postage estimate, common carrier ID, and return address.

.23 *Message Blocks.* The Message Blocks provide the data necessary to print the complete letters.

.24 *E–COM End Block.* The E–COM End Block consists of four bytes of data (&END) to establish the end point of the submission.

.25 *E–COM Users Technical Guide.* Handbook DM–501, E–COM Users Technical Guide, provides a detailed byte level description of these formats. DM–501 is available to interested potential users through E–COM sales and service representatives or by writing to: Director, E–COM Operations, 475 L'Enfant Plaza, Washington, DC 20260–7140.

563.3 *Continuous Transmission Required*

To insure the most efficient use of communication facilities, mailers must transmit data continuously while they are connected to access facilities. Mailers may be automatically disconnected from access facilities if, while connected, they do not transmit data for a period of 30 seconds.

564 *Multiple Mailer Submissions*

Messages from several mailers can be merged into a single transmission by a carrier provided that the combined group:

a. Has a single group header,

b. Uses a single character code,

c. Is billed to a single user,

d. Has a single End of Group Block, and

e. Has message identification numbers for the merged transmission arranged in increasing order without duplication.

565 *USPS E–COM Termination Equipment*

E–COM line termination equipment consists of one or more protocol device units (PDU) unique to each supported protocol. Compatibility requirements and a complete description of user's E–COM termination equipment is set forth in DM–501 Handbook.

566 *Mailer Certification*

Prior to initial entry to the E–COM system, all direct-relationship E–COM mailers must receive certification from the Postal Service that the customer interface equipment and procedures conform with the technical interconnection standards in this section. E–COM mailers' transmissions are certified by the USPS Test and Development facility. E–COM mailers are assigned a test E–COM access code and scheduled for testing upon completing and submitting Form 5320, E–COM Permit and Certification Application, to their postmaster or E–COM sales and service representative.

570 *MAILING*

Mailers may transmit messages 24 hours a day, seven days a week, to each SPO listed in Exhibit 570. Exception: During the period January 4, 1982 through January 31, 1982, mailers may only transmit messages beginning at 8:00 p.m. each Monday for 24 hours a day through Friday of each week. Acceptable transmissions received at a SPO prior to 11:59 p.m. are processed and delivered according to the E–COM service objectives in 530.

EXHIBIT 570

SPO Location	Service area (States and ZIP Codes)
Northeast Region (2)	
1. Boston, MA	Massachusetts (010–027), Rhode Island (028–029), New Hampshire (030–039), Maine (040–049), Vermont (050–059), Connecticut (060–067).
2. New York, NY	Puerto Rico and Virgin Islands (068–069), Connecticut (068–069), New Jersey (070–079, 088–089), New York (004–005, 090–098, 100–1129).
Eastern Region (4)	
3. Philadelphia, PA	New Jersey (080–087), Pennsylvania (169–196), Delaware (197–199).
4. Washington, DC	Washington, DC (200, 202–205), Maryland (206–212, 214–219), Virginia (220–223, 226–227), West Virginia (254–267).
5. Pittsburgh, PA	New York (130–149), Ohio (439), Pennsylvania (150–168), West Virginia (250–253, 255–266, [illegible]).
6. Richmond, VA	Virginia (224–225, 228–245), West Virginia (246–249).
Southern Region (7)	
7. Charlotte, NC	North Carolina (270–289), South Carolina (290–297).
8. Atlanta, GA	South Carolina (298–299), Georgia (300–306), (308–319), Alabama (350–352, 354–355, 359–364, 367–368).
9. Nashville, TN	Georgia (307), Alabama (356–358), Tennessee (370–386), Mississippi (386), Kentucky (420–422), Arkansas (723).
10. Orlando, FL	Florida (320, 322–331, 333–340).
11. Dallas, TX	Arkansas (716–722, 724–729), Oklahoma (730–731, 734–738, 740–741, 743–749), Texas (750–767, 790–794).
12. San Antonio, TX	Texas (733, 768–789, 795–799).
13. New Orleans, LA	Alabama (365–366, 369), Mississippi (387, 389–397), Louisiana (700–701, 703–708, 710–714).
Central Region (7)	
14. Cincinnati, OH	Kentucky (400–418, 423–427), Ohio (430–433, 437–438, 440–459), Indiana (470–471).
15. Chicago, IL	Indiana (460–469, 472–479), Illinois (600–606, 609–611, 613–619).
16. Detroit, MI	Ohio (434–436), Michigan (480–482, 484–497).
17. Milwaukee, WI	Michigan (498–499), Wisconsin (530–532, 534–535, 537–539, 541–545, 549).
18. Minneapolis, MN	Wisconsin (540, 546–548), Minnesota (550–551, 553–554, 556–567), South Dakota (570–577), North Dakota (580–588).
19. Kansas City, MO	Iowa (500–508, 510–516, 520–528), Illinois (612), Missouri (640–641, 644–649, 653, 656–658), Kansas (660–662, 664–679), Nebraska (680–681, 683–693), Oklahoma (739).
20. St. Louis, MO	Illinois (620, 622–629), Missouri (630–631, 633–639, 650–652, 654–655).

EXHIBIT 570—Continued

SPO Location	Service area (States and ZIP Codes)
[illegible]	
21. Denver, CO	Colorado (800–816), Wyoming (820, 822–831), Utah (840–847), New Mexico (870–875, 877–884), Nevada (893, 898).
22. Phoenix, AZ	Arizona (850, 852–853, 855–857, 859–860, 863–865), Nevada (889–891).
23. Seattle, WA	Montana (590–599), Wyoming (821), Idaho (832–838), Oregon (970–979), Washington (980–994), Alaska (995–999).
24. San Francisco, CA	Nevada (894, 895, 897), California (936–941, 943–966), Hawaii (967–968).
25. Los Angeles, CA	California (900, 902–908, 910–916, 918–935, 937–942, 944–959).

580 *PAYMENT OF POSTAGE*

581.1 *Method of Postage Payment*

581.1 *General.* Direct-relationship E–COM mailers (see 523.2) must have an advance deposit account at the management operations center (MOC) where all financial accounting for E–COM is done.

581.2 *Direct-Relationship Mailers.* An advance deposit account is automatically established when a mailer submits Form 5320, *E–COM Permit and Certification Application.* The advance deposit account is activated when the mailer is certified according to procedures in 566. The mailer will be notified of the account number and E–COM access code after certification.

581.3 *Dedicated Carriers.* Carriers which have authorized dedicated access at one or more SPOs and are also E–COM mailers or serve as the mailers' agent for E–COM service must establish an advance deposit account at the MOC. Postage is deducted from this account for all transmissions entered by the dedicated carrier on behalf of its clients (see 584). An advance deposit account is automatically established when the carrier submits Form 5320.

582 *Prepayment of postage*

Postage must be prepaid for all transmitted messages which are received, processed, and printed at SPOs. The mailer must ensure that sufficient funds are on deposit in the mailer's advance deposit account when messages are transmitted to SPOs. Mailers may make deposits directly to any SPO listed in Exhibit 570 and such other postal facilities designated by the Director, Office of E–COM Operations.

583 *Applicable Postage*

The postage payment is based on: a. the number of messages per transmission (minimum of 200) submitted, processed, and printed at each SPO; and b. the number of pages (maximum of two) for each message transmitted and processed at each SPO.

584 *Aggregation of Messages*

When messages from one or more clients are included in a carrier's transmission to a SPO, the total applicable postage for the transmission is deducted from the carrier's advance deposit account for all messages accepted and processed for that transmission.

585 *Unacceptable Messages*

When a transmission entered at a SPO includes messages which cannot be processed at the SPO for technical or other reasons, postage is not charged for the messages which cannot be processed. The mailer or dedicated carrier is notified of the problem by telephone and mailed a listing of those messages which cannot be processed for each transmission.

590 *ANCILLARY SERVICES*

591 *FORWARDING*

E–COM messages are forwarded in accordance with 391.

592 *RETURN*

E–COM messages that are undeliverable as addressed are returned in accordance with 392.11.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of these changes will be published in the **Federal Register** as provided in 39 CFR 111.3. (39 U.S.C. 401(2), 403, 404(a)(2), 3621, 3625(d))

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

[FR Doc. 81-36818 Filed 12-22-81; 8:45 am]

BILLING CODE 7715-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 1902-8]

Ohio: Approval and Promulgation of Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On June 24, 1980, EPA promulgated two sets of sulfur dioxide (SO_2) emission limitations for Cleveland Electric Illuminating Company's Avon Lake and Eastlake power plants in Ohio. 45 FR 42279. The first set was immediately effective, and established limitations of 4.10 or 4.65 lbs. SO_2/MBTU for Avon Lake, depending on the sulfur content of the fuel burned, and of 5.64 lbs. SO_2/MBTU for Eastlake. The second set, based on a revised stack height policy, was to become effective one year later on June 24, 1981, and established limits of 3.43/3.93 lbs. at Avon Lake and 3.04 lbs. for Eastlake. EPA subsequently withdrew its revised stack height policy and stayed the second set of emission limitations. 46 FR 28650 (May 28, 1981). On August 4, 1981 (46 FR 39614) EPA proposed to withdraw the emission limits entirely. EPA is today taking final action to withdraw the second set of emission limits for the two plants.

EFFECTIVE DATE: December 23, 1981.

ADDRESSES: Docket No. 5A–79–1, containing information pertinent to EPA's June 24, 1980 promulgation, is available for inspection and copying during normal business hours at EPA's Public Information Reference Unit, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, and Room 2922, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Debra Marcantonio, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. 312/886-6088.

SUPPLEMENTARY INFORMATION: On June 24, 1980, the Administrator promulgated sulfur dioxide (SO_2) emission limitations for the Avon Lake and Eastlake Power Plants owned by the Cleveland Electric Illuminating Company (CEI). 45 FR 42279. EPA established limitations of 4.10 or 4.65 lbs. SO_2 per MBTU for Avon Lake, depending on the sulfur content of the oil burned, and 5.64 lbs. SO_2 per MBTU for Eastlake. In the same notice EPA announced a revision of its stack height policy. The revised policy required sources seeking to raise existing stacks to demonstrate through fluid modeling or field studies that any increased height was necessary to avoid excessive concentrations due to downwash, wakes or eddies.[1] Since CEI was replacing existing stacks at each of the two plants with taller stacks, EPA determined it was appropriate to apply the revised policy to the CEI plants. However, to allow CEI time to satisfy the new fluid modeling requirement, EPA promulgated two sets of emission limitations. The first set, 4.10/4.65 lbs. SO_2 MBTU for Avon Lake and 5.64 lbs. SO_2 MBTU for Eastlake, assumed credit for the plants' new taller stacks in accordance with EPA's proposed formula for determining good engineering practice (GEP) height. (See

[1] In contrast EPA's proposed stack height regulations generally allowed sources automatic credit for stack height up to a good engineering practice height, as determined by an EPA formula. *See* 44 FR 2606 (January 12, 1979).

44 FR 2608, January 12, 1979). This set was immediately effective. The second set, 3.43/3.93 lbs. for Avon Lake and 3.04 lbs. for Eastlake, assumed no credit for the new tall stacks. This set was made effective one year from the date of promulgation in order to provide CEI with an opportunity to demonstrate through fluid modeling that the stack height increases were necessary.

At the time EPA promulgated the limitations, the Agency expected to complete work within a few months on its proposed stack height regulations (44 FR 2608, January 12, 1979), and to resolve any issues related to the revised stack height policy in the context of that rulemaking. However, the need for further analyses has resulted in a postponement of final action on the stack height regulations. Consequently, EPA withdrew the stack height policy revision. 46 FR 28650 (May 28, 1981). EPA has since reproposed its stack height regulations. 46 FR 49814 (October 7, 1981). This reproposal does not include a requirement for fluid modeling demonstrations at existing sources.

In view of the withdrawal of the policy on which the second set of emission limitations was based, EPA determined it was also appropriate to stay the effectiveness of the second set of emission limitations. 46 FR 28650. For the same reason, EPA is now withdrawing the second set of emission limits altogether. The effect of this withdrawal is to lift the stay of these emission limits issued on May 28, 1981. Should the final stack height regulations incorporate a requirement for fluid modeling or field studies for plants such as CEI, CEI and any other affected sources will be given ample time to perform the modeling or studies. Based on the results of such modeling or studies, the emission limits for these two plants would be revised if necessary.

Response to Comments

EPA received three comments supporting the withdrawal of the second set of emission limits, on the grounds that the limits were more restrictive than necessary to maintain the NAAQS and that their withdrawal will prevent a loss of coal mining jobs in Ohio. Three northeastern states submitted a single set of comments objecting to their withdrawal. The states asserted that the currently effective emission limits are not based on a proper analysis of GEP height, and consequently CEI should be given no credit for its taller stacks. Since the second set of emission limits reflect no credit for the taller stacks, the commenters concluded that the Agency must allow them to come into effect. They argued that without analyzing fluid modeling studies submitted by CEI to demonstrate the necessity for taller stacks, EPA could not withdraw these emission limits.

However, as noted above EPA did in fact determine GEP height for the CEI stacks according to a formula contained in the stack height regulations proposed in January 1979. The currently effective emission limits are based on that GEP height formula. The fluid modeling studies submitted by CEI are no longer needed to support the GEP height determination since the stack height policy requiring the studies has been withdrawn. Therefore EPA had no reason to analyze those studies.

As noted, EPA has recently reproposed stack height regulations which include the GEP formula used to calculate the CEI emission limits. The Agency's technical support for the GEP formula has been presented for public comment in that rulemaking.

The commenters also submitted a recent report by the National Academy of Sciences (NAS) on the ecological consequences of fossil fuel combustion. According to the commenters, the NAS data suggest that EPA should control the long-range transport of air pollutants to the maximum degree possible under the Clean Air Act. First, EPA notes that the report submitted only provided general data on global and regional patterns of SO_2 emissions and on long-range transport. The authors stated that it is impossible at this time to pinpoint particular source contributions to long-range transport of emissions. The Agency is still reviewing the NAS report's conclusions carefully. Consequently it is not possible to use the report as a basis for regulatory decisions. Second, as stated above EPA has proposed stack height regulations to control the dispersion of emissions from tall stacks, pursuant to Section 123. Therefore, the Agency is presently fulfilling its statutory duty under that section.

The states additionally objected to the use of the CRSTER model without further information on pollutant concentrations caused by lakeshore fumigation at the CEI plants. This issue was addressed in EPA's reconsideration and reaffirmation of the CEI emission limits, 46 FR 37642 (July 22, 1981), and the discussion of lakeshore fumigation contained in that notice is incorporated herein. The Agency's position on the issue of lakeshore fumigation remains unchanged. However, EPA has not committed itself to a further fumigation analysis as the commenters suggest. Furthermore, the second set of emission limits that the states urge EPA to retain was also based upon CRSTER modeling.

This revision is effective upon publication. The Administrator finds good cause for making this revision effective immediately because it lifts a potential regulatory restriction and imposes no new burden on the rights or interests of any party.

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a regulatory impact analysis. Today's action does not constitute a major rule because it withdraws regulatory requirements and thereby relieves potential economic burdens.

Pursuant to the provisions of 5 U.S.C. 605(B), I hereby certify that the attached rule will not have a significant economic impact on a substantial number of small entities. This action only applies to two facilities.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings. (Section 110 of the Clean Air Act, as amended 42 U.S.C. 7410)

Dated: December 14, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart KK—Ohio

§ 52.1881 [Amended]

1. Section 52.1881 is amended by removing paragraphs (b)(35)(B)(vii) and (b)(38)(iv).

[FR Doc. 81-36529 Filed 12-22-81; 8:45 am]
BILLING CODE 6560-26-M

40 CFR Part 180

[PP 8F1672/R370; PH-FRL-2013-3]

Carbofuran; Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or On Raw Agricultural Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the insecticide carbofuran and its metabolites in or on the raw agricultural commodity fresh corn. This regulation to establish the maximum permissible level for the combined residues of carbofuran and its metabolites in or on fresh corn was requested by FMC Corp.

EFFECTIVE DATE: Effective on December 23, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, Product Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 202, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–7238).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of March 12, 1976 (41 FR 10709 which announced that FMC Corp., 2000 Market St., Philadelphia, PA 19103, submitted a pesticide petition (PP 6F1672) proposing that 40 CFR 180.254 be amended by the establishment of a tolerance for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate), its carbamate metabolite 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N*-methylcarbamate, and the phenolic metabolites 2,3-dihydro-2,2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol in or on the raw agricultural commodity fresh corn, including sweet corn (kernel plus cobs with husk removed (K+CWHR)), at 1.0 part per million (ppm) of which not more than 0.2 ppm is carbamates.

There were no comments received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a 2-year chronic feeding/oncogenicity study in the rat and the mouse with a no-observable-effect level (NOEL) of 20 ppm for cholinesterase-inhibition and a systemic NOEL of 20 ppm and 125 ppm, respectively; a 3-generation rat reproduction study with a NOEL of 20 ppm; two rat teratology studies which were negative at up to 160 ppm and 1.2 milligrams (mg)/kilogram (kg) of body weight (bw)/day and had a NOEL for fetotoxicity of 20 ppm and a 1.2 mg/kg bw/day respectively; a rabbit teratology study which was negative for terata and fetotoxicity at 2.0 mg/kg bw/day; and mutagenicity testing which showed carbofuran not to be mutagenic. Based on the 2-year chronic rat feeding/oncogenicity study with a systemic effects and cholinesterase-inhibition NOEL of 20 ppm and using a 200-fold safety factor, the acceptable daily intake (ADI) for man is 0.005 mg/kg bw/day.

Desirable data that are lacking from the petition is a 6-month (or longer) dog feeding study. In a letter of August 7, 1981, the petitioner agreed to conduct the study and to voluntarily remove fresh corn, including sweet corn, from the label should the results of the study be found to exceed the risk criteria for adverse effects. The study is expected to be submitted to the Agency by December 1982. The metabolism of carbofuran is adequately understood, and an adequate analytical method (gas chromatography using a nitrogen specific microcoulometric detector) is available for enforcement purposes. No actions are currently pending against the continued registration of carbofuran, nor are there any other relevant considerations involved in establishing the tolerance. The existing meat and milk tolerances are adequate to cover any residues resulting from the proposed use. There is no reasonable expectation of residues in poultry and eggs.

The pesticide is considered useful for the purpose for which the tolerance is sought, and it is concluded that the tolerance for the combined residues of carbofuran and the metabolites in or on fresh corn, including fresh corn (K+CWHR), will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, on or before January 22, 1982, file written objections with the Hearing Clerk at the address given above. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

As required by Executive Order 12291, EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this rule from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Effective on: December 23, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, 40 CFR 180.254 is amended by adding and alphabetically inserting the commodity fresh corn to read as follows:

§ 180.254 Carbofuran; tolerances for residues.

* * * * *

Commodity	Parts per million (ppm)
* * * * *	
Fresh corn including sweet corn (K+CWHR) (of which not more than 0.2 ppm is carbamates)	1.0
* * * * *

40 CFR Part 180

[PP 6F1789/R371; PH–FRL 2012–8]

Carbofuran; Tolerances and Exemptions From Tolerances for Pesticide Chemicals In or On Raw Agricultural Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the insecticide carbofuran and its metabolites in or on certain raw agricultural commodities. This regulation to establish the maximum permissible level for the combined residues of carbofuran and its metabolites in or on certain raw

agricultural commodities was requested by FMC Corp.

EFFECTIVE DATE: Effective on December 23, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, Product Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 202 CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of June 4, 1976 (41 FR 23988) which announced that FMC Corp., 2000 Market St., Philadelphia, PA 19103, submitted a pesticide petition (PP 6F1789) proposing that 40 CFR 180.254 be amended by the establishment of tolerances for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate), its carbamate metabolite 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N*-methylcarbamate, and the phenolic metabolites 2,3-dihydro-2,2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol in or on the raw agricultural commodities squash at 0.8 part per million (ppm) of which not more than 0.6 ppm is carbamates; melons at 0.6 ppm of which not more than 0.4 ppm is carbamates; and cucumber at 0.4 ppm of which not more than 0.2 ppm is carbamates.

The petition was subsequently amended by including the raw agricultural pumpkins at 0.8 ppm of which not more than 0.6 ppm is carbamates and decreasing the proposed tolerance for melons to 0.4 ppm of which not more than 0.2 ppm is carbamates.

There were no comments received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerances included a 2-year chronic feeding/oncogenicity study in the rat and the mouse with a no-observable-effect level (NOEL) of 20 ppm for cholinesterase-inhibition and a systemic NOEL of 20 ppm and 125 ppm, respectively; a 3-generation rat reproduction study with a NOEL of 20 ppm; two rat teratology studies which were negative up to 160 ppm and 1.2 milligrams (mg)kilogram(kg) of body weight (bw)/day and had a NOEL for fetotoxicity of 20 ppm and 1.2 mg/kg bw/day, respectively; a rabbit teratology study which was negative for terata and fetotoxicity at 2.0 mg/kg bw/day; and mutagenicity testing which showed carbofuran not to be mutagenic. Based on the 2-year chronic rat feeding/oncogenicity study with a systemic effects and cholinesterase-inhibition NOEL of 20 ppm and using a 200-fold safety factor, the acceptable daily intake (ADI) for man is 0.005 mg/kg bw/day.

Desirable data that is lacking from the petition is a 6-month (or longer) dog feeding study. In a letter of August 7, 1981, the petitioner agreed to conduct the study and to voluntarily remove squash, melons, pumpkins, and cucumbers from the label should the results of the 6-month (or longer) dog feeding study be found to exceed the risk criteria for unreasonable adverse effects. The study is expected to be submitted to the Agency by December 1982. The metabolism of carbofuran is adequately understood, and an adequate analytical method (gas chromatography using a nitrogen specific microcoulometric detector) is available for enforcement purposes. No actions are currently pending against the continued registration of carbofuran, nor are there any other relevant considerations involved in establishing the proposed tolerances. There is no reasonable expectation of residues in eggs, milk, or meat of livestock from the proposed uses.

The pesticide is considered useful for the purpose for which the tolerances are sought, and it is concluded that the tolerances for the combined residues of carbofuran and the metabolites in or on the raw agricultural commodities will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, on or before January 22, 1982, file written objections with the Hearing Clerk at the address given above. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

As required by Executive Order 12291 EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this rule from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Effective on: December 23, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, 40 CFR 180.254 is amended by adding and alphabetically inserting the commodities cucumbers, melons, pumpkins, and squash to read as follows:

§ 180.254 Carbofuran; tolerances for residues.

* * * * *

Commodity	Parts per million (ppm)
* * * * *	
Cucumbers (of which not more than 0.2 ppm is carbamates)	0.4
* * * * *	
Melons (of which not more than 0.2 ppm is carbamates)	0.4
* * * * *	
Pumpkins (of which not more than 0.6 ppm is carbamates)	0.8
* * * * *	
Squash (of which not more than 0.6 ppm is carbamates)	0.8
* * * * *

BILLING CODE 6560–32–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 1–12

[FPR Amdt. 219]

Labor; Addition of Price Adjustment Clause for Service Contracts

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment provides for the use of a price adjustment clause in contracts which are subject to the Service Contract Act of 1965 and include either option or multiyear provisions. It is based primarily on a need to address the issue of labor cost increases in option years as a result of the adoption of option provisions in the FPR. The intended effect is (1) to eliminate the need for offerors to include contingency allowances in fixed price service contracts as a defense against possible increases in wage determinations under the Service Contract Act of 1965 or minimum wages under the Fair Labor Standards Act of 1938 and (2) to protect the Government from windfall payments to Government contractors by reason of decreases in wage determinations and minimum wages.

EFFECTIVE DATE: January 25, 1982.

FOR FURTHER INFORMATION CONTACT:
Mr. Philip G. Read, Director, Federal Procurement Regulations Directorate, Office of Acquisition Policy (703–557–8947).

1. The table of contents for Part 1–12 is amended by adding the following new entry under Subpart 1–12.9:

PART 1–12—LABOR

* * * * *

Subpart 1–12.9—Service Contract Act of 1965

1–12.904–3 Price adjustment clause for fixed-price multiyear service contracts and fixed-price service contracts with renewal options.

Subpart 1–12.9—Service Contract Act of 1965

2. Section 1–12.904–3 is added to read as follows:

§ 1–12.904–3 Price adjustment clause for fixed-price multiyear service contracts and fixed-price service contracts with renewal options.

(a) The clause set forth in paragraph (d) of this section provides procedures applicable to situations in which revised minimum wage rates are applied to contracts by operation of law (see Subpart 1–12.7), or by revision of a wage determination prior either to exercise of a contract option, or to extension of a multiyear contract into a new program year. Its purpose is to permit adjustment of service contract prices for option years or for the out-years of multiyear contracts so as to eliminate the need for contractors to include contingency allowances in the prices for these periods. It also gains for the Government, the benefit of reduced wages. As used herein, the term out-years refers to the years following the first year in a multiyear contract.

(b) When there are elements of cost, other than those discussed in paragraph (a) of this section, that are subject to wide fluctuations, the Contracting Officer may include a provision for economic price adjustment authorized by § 1–3.404–3. If such a provision is used, care should be taken to ensure that it does not conflict with, or overlap, the clauses discussed in paragraph (c) of this section.

(c) Contracting Officers shall include the clause set forth in paragraph (d) of this section, or another clause which accomplishes essentially the same purpose, in fixed-price type multiyear service contracts and fixed-price type service contracts with options to renew that contain the clause in § 1–12.904–1. However, the FPR clause must be used when contract prices are negotiated on the basis of certified cost or pricing data (see § 1–3.807–3). This flexibility is provided because the size and nature of certain service contracts may not warrant requirements for the type of cost breakdowns anticipated under the clause in paragraph (d) of this section. On low dollar value contracts and contracts where adequate cost data is likely to be difficult to obtain, other techniques for adjusting out-year prices to reflect changes in wage determinations or statutory minimum wages may be more appropriate.

(d) The following clause shall be used in accordance with the instructions set forth in paragraph (c) of this section. It is to be noted that the adjustments under paragraph (c) of the clause are applicable only to periods after the base period of multiyear contracts or the option years of contracts with renewal options.

Fair Labor Standards Act and Service Contract Act—Price Adjustment (Multiyear and Option Contracts)

(a) The Contractor warrants that the prices set forth in this contract do not include any allowance for any contingency to cover increased costs for which adjustment is provided under this clause.

(b) The minimum prevailing wage determination, including fringe benefits, issued pursuant to the Service Contract Act of 1965, as amended (41 U.S.C. 351 et seq.), by the Administrator, Wage and Hour Division, U.S. Department of Labor, current at the beginning of each renewal option period, shall apply to any renewal of this contract. When no such determination has been made as applied to this contract, the Federal minimum wage, as established by section 6(a)(1), of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201 et seq.), current at the beginning of each renewal option period, shall apply to any renewal of this contract.

(c) The contract price of contract unit price labor rates for the option or renewal periods of this contract will be adjusted to reflect the Contractor's actual increase or decrease in applicable wages and fringe benefits to the extent that these increases or decreases are made to comply with:

(i) The Department of Labor determination of minimum prevailing wages and fringe benefits applicable at the beginning of the option or renewal period, or

(ii) An amendment to the Fair Labor Standards Act enacted after the award of this contract, affecting the minimum wage, that becomes applicable to this contract under law prior to an option or renewal period.

Any adjustment will be limited to increases or decreases in wages or fringe benefits as described above, and the accompanying increases or decreases in social security and unemployment taxes and workmen's compensation insurance, but shall not otherwise include any amount for general and administrative costs, overhead, or profits.

(d) The Contractor shall notify the Contracting Officer of any increases claimed under this clause within 30 days after receiving a new wage determination for an option or renewal period, unless this notification period is extended in writing by the Contracting Officer. In the case of any decrease under this clause, the Contractor shall promptly notify the Contracting Officer of such decrease, but nothing herein shall prevent the Government from asserting a claim within the period permitted by law. The notice shall state the amount claimed and any other relevant data in support thereof, which may reasonably be required by the Contracting Officer. Upon agreement of the parties, the contract price or contract unit price labor rates shall be modified in writing. Pending agreement on or determination of any such adjustment and its effective date, the Contractor shall continue performance.

(e) The Contracting Officer or his authorized representative shall have access to and the right to examine any directly pertinent books, documents, papers and records of the Contractor until the expiration of 3 years after final payment under the contract or such lesser time specified in Part 1–20 of the Federal Procurement Regulations (41 CFR Part 1–20) and for such longer period if any, as is required by applicable statute, or by other clauses of this contract.

(End of clause)

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: December 14, 1981.

Ray Kline,

Acting Administrator of General Services.

[FR Doc. 81–36540 Filed 12–22–81; 8:45 am]

BILLING CODE 6820–61–M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

41 CFR Ch. 7

[AIDPR Notice 82-2]

Miscellaneous Revisions to the AID Procurement Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The Agency for International Development is amending its procurement regulations with respect to the review and approval authority of AID's Noncompetitive Review Board. The amendments raise the threshold for review of and approval of noncompetitive procurements, exempts contracts from unsolicited proposals, as authorized in 41 CFR 1–4.9 and 7–4.9 from review and approval by the Board, and raises the exception permitting noncompetitive negotiations by AID missions overseas to $100,000 for both services and commodities.

This rule also allows AID missions more flexibility regarding logistic support.

These amendments implement recommendations of a special AID task force established to review the project implementation process.

EFFECTIVE DATE: This AIDPR Notice is effective on December 8, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. J. M. Kelly, CM/SD/POL, Agency for International Development, Washington, D.C. 20523. Telephone: (703) 235–9107.

SUPPLEMENTARY INFORMATION: This AIDPR Notice implements recommendations of a special AID task force established to review the AID project implementation process. The recommendations were reviewed by AID senior staff, and were approved by the Administrator on September 30, 1981.

This AIDPR Notice is a procurement regulation, and has been exempted from the requirements of Executive Order 12291 of February 17, 1981, pursuant to section 8(b) of the order, by the Director, OMB, in a letter dated April 8, 1981.

The determination required by paragraph 4a of OFPP Policy Letter 80–5, and the certification required by the Regulatory Flexibility Act have been made and are included in the body of this AIDPR Notice.

PART 7–3—PROCUREMENT BY NEGOTIATION

Subpart 7–3.1—Use of Negotiation

1. Section 7–3.101–50, Justification for noncompetitive negotiation, is amended by revising paragraphs (b)(2), (c), and (d)(6) as follows:

§ 7–3.101–50 Justification for noncompetitive negotiation.

* * * * *

(b) * * *

(2) Contracts for goods or services by overseas procuring activities (AID Missions), where the estimated cost of the contract does not exceed $100,000.

* * * * *

(c) Use of the circumstances permitting noncompetitive negotiation specified in paragraph (b) of this section requires documentation, justification, and approval. Basic documentation and justification requirements are set forth in paragraph (d) of this section. Approval authority for the various circumstances in paragraph (b) are specified in paragraphs (c)(2), (3), (4) and (5) of this section.

(1) The authority to approve noncompetitive negotiation is separate from, *and in addition to,* any delegation of contracting authority. While a contracting official may have been delegated unlimited contracting authority, his/her authority to approve noncompetitive negotiation is limited by paragraphs (c)(3) and (c)(4) of this section.

(2) Authority to approve noncompetitive negotiation for procurements under paragraphs (b)(6) and (7) of this section rests with the Assistant Administrator having the program responsibility.

(3) Authority to approve noncompetitive negotiation, for procurements under paragraphs (b) (1), (3), (4) or (5) of this section executed by AID/Washington is based on the estimated cost of the procurement and is assigned as follows:

Dollar amount	Approving authority
(i) 0 to $25,000	The contracting officer.
(ii) $25,001 to $100,000	Cognizant SER/CM Division Chief.
(iii) $100,001 to $250,000	Director or Deputy Director, SER/CM.
(iv) over $250,000	The Noncompetitive Review Board.

(4) Authority to approve noncompetitive negotiation under paragraphs (b) (1), (2), (3), (4), or (5) of this section for procurements executed by an AID/Mission is also based on the estimated cost of the procurement, and is assigned as follows:

Dollar amount	Approving authority
(i) 0 to $25,000	The Mission contracting officer, if other than the Mission Director.
(ii) 0 to $100,000	The Mission Director.
(iii) over $100,000	The Mission Noncompetitive Review Board.

(5) The Mission Noncompetitive Review Board is appointed by the Mission Director, who serves as Chairman of the Review Board. As a minimum, Review Board membership must include in addition to the Chairman, the Mission or Regional Legal Advisor (or the Deputy Director if no Legal Advisor is available at the Mission), and a senior project officer not concerned with the procurement under consideration by the Review Board. The Mission Noncompetitive Review Board has jurisdiction over Mission procurements being awarded by the Area Contracting Officer (ACO) serving the Mission up to the limit of the ACO's contracting authority, or over any Mission procurement that exceeds the Mission Director's contracting authority; *provided,* that in the latter case, the Mission Director first obtains an ad hoc. redelegation of contracting authority for the procurement from SER/CM.

(d) * * *

(6) For procurements under paragraph (b)(6) of this section, a copy of the cognizant Assistant Administrator's approval and project officer's certification required by § 7–4.910, together with a certification by the contracting officer that the procurement meets the criteria in paragraph (b)(6) of this section. No further documentation or approval related to noncompetitive procurement is required.

* * * * *

Appendices

Appendix E—Logistic Support Overseas to AID-Direct Contractors

2. AIDPR Appendix E to chapter 7 is amended by revising paragraph 2(b) to read as follows:

* * * * *

2. * * *

(a) * * *

(b) *Arrangements for Logistics Support.* Each mission should assess the local logistical support situation and determine which method is best suited for its program or individual projects. While the following three options are listed in descending order of preference, the Mission is encouraged to use the option which is in the best interest of the project:

(1) Arrangements by the contractor itself where feasible and reasonably economical. (It is assumed that this test will be met in the case of virtually all construction contracts and in most of the larger engineering and technical assistance contracts.)

(2) Arrangements by the cooperating country where these would be timely, adequate, and feasible in terms of the country's economic and administrative resources.

(3) Arrangements by the mission alone or jointly with either or both of the other parties, in those cases where the Mission Director determines that adequate and timely logistic support at reasonable cost cannot be assured through the other options. In such cases, and when direct hire resources are inadequate, the mission is encouraged wherever feasible, to contract for assistance in providing logistic support. Guidance on logistic support contracts should be obtained from SER/CM and GC.

* * * * *

Determination: As required by paragraph 4a of OFPP Policy Letter 80–5, I hereby determine that this AIDPR Notice has been reviewed against the policies set forth in paragraphs (1) through (8) of section 2 of the Office of Federal Procurement Policy Act (Pub. L. 93–400 as amended by Pub. L. 96–83, hereinafter referred to as the Act), and policy directives issued by OFPP under section 6(h) of the Act. Based on this review, I hereby determine that this AIDPR Notice is not inconsistent with the policies set forth in paragraphs (1) through (8) of section 2 of the Act, and policy directives issued by OFPP under section 6(h) of the Act.

Certification: Pursuant to the Regulatory Flexibility Act, I hereby certify as head of the Agency, under AIDPR 7–1.204, that this regulation will not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

(41 CFR 7–1.104.4)

Dated: December 8, 1981.

John F. Owens,

Acting Assistant Administrator, Bureau for Program and Management Services.

Proposed Rules

Federal Register
Vol. 46, No. 246
Wednesday, December 23, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 987

Domestic Dates Produced or Packed in Riverside County, California; Proposed Amendment of Administrative Rules

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal invites written comments on a revision of the container regulations prescribed for DAC dates of any variety handled in the United States and Canada under the Federal marketing order for California dates. This action would allow handlers to ship dates to Canadian markets free of the container regulations and give handlers more shipping flexibility.

DATE: Comments must be received by January 7, 1982.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250, where they will be available for public inspection during business hours.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202)447–5697.

SUPPLEMENTARY INFORMATION: This proposal has been reviewed under USDA guidelines implementing Executive Order No. 12291 and Secretary's Memorandum 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities because it would result in only minimal costs being incurred by the regulated handlers.

J. S. Miller has determined that an emergency situation exists which warrants less than a 60-day comment period. The proposed revision would allow handlers to ship whole and pitted DAC dates to Canadian outlets free of container requirements and allow them to compete more effectively with other foreign suppliers. Therefore, the less restrictive regulations should be made available to handlers as soon as possible.

Information collection (reporting and recordkeeping) under this part are subject to clearance by the Office of Management and Budget and are in the process of review. These information requirements shall not become effective until such time as clearance by the OMB has been obtained.

This proposal would revise § 987.112a(b)(3) of Subpart — Administrative Rules (7 CFR 987.101–987.173). This section is issued under §§ 987.12, 987.43, and 987.48 of the marketing agreement and Order No. 987 (7 CFR 987), both as amended, regulating the handling of domestic dates produced or packed in Riverside County, California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposal was recommended unanimously by the California Date Administrative Committee, hereinafter referred to as the Committee, which works with USDA in administering the order.

Section 987.112a(b)(3) prescribes consumer sizes of plastic containers, in terms of net weight content, that handlers must use when they package whole or pitted DAC dates in such containers for handling in domestic and Canadian markets. Some foreign competitors have been selling dates in consumer-sized plastic containers in Canada with a few less ounces than the sizes that domestic handlers are required to ship under the current regulation and this places domestic handlers at a competitive disadvantage.

Section 987.12 of the order defines DAC dates to be marketable whole or pitted dates that are inspected and certified as meeting the grade, size, container, and identification requirements established by the Committee, with the approval of the Secretary, for a specific variety for handling in the United States and Canada.

Section 987.43 of the order authorizes the Committee, with the approval of the Secretary, to modify the designations specified in § 987.12 to reflect new regulatory requirements needed because of changes in marketing conditions. To permit domestic handlers to compete more effectively in Canadian markets, it is proposed that the container regulation in § 987.112a(b)(3) not apply to whole or pitted DAC dates of any variety shipped to Canada.

PART 987—DOMESTIC DATES PRODUCED OR PACKED IN RIVERSIDE COUNTY, CALIFORNIA

Therefore, the proposal is to revise § 987.112a(b)(3) of Subpart — Administrative Rules (7 CFR 987.101–987.172) to read as follows:

§ 987.112a Grade, size, and container requirements for each outlet category.

* * * * *

(b) * * *

(3) DAC dates of any variety, when packed in plastic containers, other than bags and master shipping containers, shall contain a net weight (i) for whole dates, of either eight ounces, twelve ounces, 1 pound 8 ounces, or more than two pounds, and (ii) for pitted dates, of either ten ounces, one pound, one pound eight ounces, or more than two pounds. DAC dates packed in other than plastic containers may be handled without regard to the net weight content. For the purpose of this subparagraph, "plastic container" means any containers of any shape made from plastic and in which dates are packed without the use of cardboard boats, trays, or other like stiffening material: *Provided,* That DAC dates shipped for sale in Canada in plastic containers are exempt from the net weight requirements of this sub-paragraph.

* * * * *

Dated: December 18, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division.

[Docket No. AO-380-A1]

Milk in the Southwestern Idaho-Eastern Oregon Marketing Area; Decision on Proposed Amendments to Marketing Agreement and Order

Correction

In FR Doc. 81-36068, appearing at page 61480 in the issue of Thursday, December 17, 1981, the citation in parentheses in lines 12 and 13 of the second paragraph of column two on page 61480 should have read, "(46 FR 32873)".

BILLING CODE 1505-05-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Interim Requirements Related to Hydrogen Control

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is considering amending its regulations to improve hydrogen control capability during and following an accident in light-water reactor facilities.

The amendments would require improved hydrogen control systems for boiling water reactors with Mark III type containments and for pressurized water reactors with ice condenser type containments. All light-water nuclear power reactors not relying upon an inerted atmosphere for hydrogen control would be required to show that certain important safety systems must be able to function during and following hydrogen burning.

DATES: Comment period expires February 22, 1982. Comments received after that date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before that date.

FOR FURTHER INFORMATION CONTACT: Morton R. Fleishman, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-443-5981.

ADDRESS: Written comments or suggestions for considertion in connection with the proposed amendments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

SUPPLEMENTARY INFORMATION: The accident at Three Mile Island, Unit 2 (TMI-2) resulted in a severely damaged or degraded reactor core, a concomitant release of radioactive material to the primary coolant system, and a fuel cladding-water reaction which resulted in the generation of a large amount of hydrogen. The Nuclear Regulatory Commission has taken numerous actions to correct the design and operational limitations revealed by the accident. Included in these actions are several rulemaking proceedings intended to improve the hydrogen control capability of light-water nuclear power reactors. On October 2, 1980, the Nuclear Regulatory Commission published in the **Federal Register** (45 FR 65466) a notice of proposed rulemaking on "Interim Requirements Related to Hydrogen Control And Certain Degraded Core Considerations" (Interim Rule). The notice concerned proposed amendments to 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," to improve hydrogen management in light-water reactor facilities and to provide specific design and other requirements to mitigate the consequences of accidents resulting in a degraded reactor core.

On March 23, 1981, the Commission published in the **Federal Register** (46 FR 18045) a notice of proposed rulemaking on "Licensing Requirements for Pending Construction Permit and Manufacturing License Applications." The notice proposed a set of licensing requirements applicable to construction permit applications that stemmed from lessons learned from the TMI-2 accident. On May 13, 1981, the Commission published in the **Federal Register** (46 FR 26491) a notice of proposed rulemaking on "Licensing Requirements for Pending Operating License Applications" (OL Rule).

As a result of the various activities and considerations relative to the October 2, 1980 notice, the Commission decided to split the Interim Rule into two parts. One part was to be included in the OL Rule. The other part, limited only to hydrogen control, was to be issued separately. The details of this split are described in the companion **Federal Register** notice published on December 2, 1981 (46 FR 58484) concerning hydrogen control related to inerting, hydrogen recombiner capability and high point vents.

The Commission has also been considering the ability of all light-water reactors, particularly pressurized light-water reactor facilities with ice condenser type containments and boiling light-water reactor facilities with Mark III type containment, to withstand an accident with the concomitant generation of large amounts of hydrogen, such as the type which occurred at Three Mile Island, Unit 2 (TMI-2). As a result, three new amendments to the regulations are being proposed for public comment.

Hydrogen Control for Mark III BWRs and Ice Condenser PWRs [§ 50.44(c)(3)(iv)]

It is proposed that boiling water reactor (BWR) facilities with Mark III type containments and pressurized water reactor (PWR) facilities with ice condenser type containments, for which construction permits were issued prior to March 28, 1979, be required to install hydrogen control systems capable of accommodating an amount of hydrogen equivalent to that generated from the reaction of 75% of the fuel cladding (surrounding the active fuel region) with water, without loss of containment integrity. This new requirement is being contemplated as a result of safety issues raised during licensing reviews of new ice condenser and Mark III plants. In these reviews, it has become clear that additional protection is required to provide assurance that large amounts of hydrogen can be safety accommodated by these plants. The particular type of hydrogen control system to be selected is left to the discretion of the applicant or licensee; however, it must be found acceptable by the NRC based upon suitable programs of experiment and analysis. The selection should be supported by comparative analyses of alternative systems to show their relative advantages and disadvantages. These comparisons are to be submitted as part of the analyses required under § 50.44(c)(3)(vi). At present, a distributed igniter system has been found acceptable for the Sequoyah plant with an ice condenser containment, but only as an interim solution while the hydrogen control matter is studied further. A post-accident inerting system has also been discussed for the ice condenser and Mark III containments. Whatever systems are finally proposed and approved for the long term, large amounts of hydrogen must be safely accommodated, and operation of the system, either intentionally or inadvertently, must not further aggravate the course of an accident or endanger the plant during normal operations. The amount of hydrogen to be assumed in the design of the

hydrogen control system is that amount generated by assuming that 75% of the fuel cladding surrounding the active fuel region reacts with water. The 75% is judged to be representative of the maximum amount of hydrogen likely to be generated in an accident in which the threat to the containment is limited to the threat posed by the combustion of hydrogen. Events with metal-water reactions in excess of 75% are judged to be associated with core-melt accidents which could pose a threat to containment greater than the combustion of hydrogen. This 75% value also appears to be reasonable because it is sufficiently greater than the fuel cladding-water reaction analyzed to have occurred at TMI–2 to provide a conservative estimate for the cladding reaction that may occur during a TMI type degraded core accident. It is expected that the 75% value will permit plants that are either completed or are well along in the construction stage to have a hydrogen control system added without the need for major modifications to their containment structures. Research now in place will, over the next several years, yield data on the likelihood of termination of sequences with large amounts of cladding interaction.

The Commission would particularly welcome comments on whether the percent of fuel cladding that reacts with water should be less than, equal to, or greater than the 75 percent value being proposed for use in the rules covered by this notice. Supporting analyses, as available, would also be welcome.

Owners of Mark III BWR's now under construction have been surveyed by the NRC staff to determine the effect on their plant designs of the requirement that they do not exceed ASME Service Level A Limits or the Service Load Category during inadvertent full inerting of a post-accident inerting system. This survey was conducted because a post-accident inerting system (rather than a distributed ignition system) was thought to be the preferred approach for the Mark III containments. Based on their responses, the Commission has concluded that there would be no significant impact in specifying these requirements for inadvertent full inerting. Modest deviations from these ASME criteria will be permitted if good cause is shown. A comparable survey was not conducted for ice condenser plants because the distributed ignition system apparently is the approach preferred by the owners of these plants.

There are ongoing programs of research in a number of areas of hydrogen generation, release, burning, and control. These include the analysis of accident sequences, the chronology of hydrogen and steam injection (from the primary system into containment), the analysis of operations to recover coolability, and an assessment of equipment survivability. These studies are expected to reveal the advantages and disadvantages of various hydrogen control systems, including those that involve deliberate burning of the hydrogen within containment. Based on the state of technology as of August 1981, the Commission believes that control methods that do not involve burning provide protection for a wider spectrum of accidents than do those that involve burning.

As a result of the review of the deliberate ignition systems installed at Sequoyah and McGuire, the staff has identified issues which need to be investigated further. A spectrum of degraded core accident scenarios, including those which may lead to inadvertent suppression of combustion in the lower compartment due to a steam rich atmosphere, and several hydrogen combustion phenomena are continuing to be reviewed. In addition, there is incomplete verification of analytical models and equipment survivability. These issues are being addressed in ongoing research by NRC and the nuclear industry. The Commission concludes, based on available information, that the issues are sufficiently resolved to warrant interim approval of deliberate ignition systems for ice condenser plants. However, the Commission has required in individual licensing proceedings and in the section of this rule on analyses (§ 50.44(c)(3)(vi)) that studies of alternative hydrogen management systems be performed prior to the long-term approval of any particular method.

Standards for Safety Systems and Components That Must Function During or After Hydrogen Burn [Sec. 50.44(c)(3)(v)]

The Commission is considering a two-step approach to address qualification of essential equipment during and after a hydrogen burn. As a first step, essential equipment must be demonstrated to "survive" the hydrogen burn and continue to be able to perform its safety function. In this context, the equipment would not have to meet the more rigorous standards of the NRC's equipment qualification program but a different standard as defined below. As a second step, the Commission would require "qualification" of essential equipment.

The Commission feels a two-step approach is justified in light of our lack of knowledge of the probabilities of hydrogen-producing accident scenarios, the environmental conditions during a hydrogen burn, and the effect this environment has on different equipment. The Commission will develop "survivability" criteria which are intended as an interim step to assure the quality of essential equipment until enough information is accumulated from ongoing research to suitably define what equipment performance standards are appropriate. After sufficient information is developed, the Commission may propose long-term standards that are more stringent than the short-term or "survivability" standard being proposed.

The differences in concept between equipment demonstrated to meet the "survivability" standard and equipment that meets the "qualification" standard are described below. The Commission specifically seeks comment on the use of the two step approach for defining equipment standards, the "survivability" and "qualification" standards themselves, and proposals for implementation schedules developed on a well informed basis. Equipment required to be qualified (Eq) and equipment for which survivability must be demonstrated (Es) can be compared as follows:

(a) *Environmental Conditions*—The environmental conditions under which Eq must operate would be calculated using a model that has been demonstrated to be conservative by comparison with numerous experiments and by a long history of usage. For Es, the calculational model contains some conservatisms, but the level of assurance is generally not comparable to that for the Eq model due to a lack of available experimental data for verification.

b. *Testing Conditions*—For Eq, the test conditions would be more severe than the environmental conditions due to extra margins added to account for uncertainties in the test environment, inaccuracies of the measuring devices, variability of the test specimens, etc. For Es, the test conditions need not provide margin beyond the conservatively calculated environmental conditions.

c. *Operability*—Eq and Es would both be required to perform their functions during and after being exposed to their respective test conditions.

d. *Performance*—During and following a test, Eq would be required to perform to specifications determined by accident analyses performed prior to the test; however, for Es, a relaxation of these specifications would be permitted, as defined on a case-by-case (e.g., more instrument drift would be tolerated

during a hydrogen burn than during normal operations).

Another possible difference is the criteria used to select test specimens, e.g., individual type testing for Eq versus generic testing for Es. It should also be noted that if the test condition for Eq for a LOCA can be shown to envelope the predicted test condition for a hydrogen burn then the LOCA qualification test would be sufficient to demonstrate survivability.

This requirement would apply to all BWRs and PWRs, for which construction permits were issued prior to March 28, 1979, that do not have an inerted containment atmosphere for hydrogen control. That is, plants for which there exists the possibility that substantial amounts of hydrogen can be burned in the containment will be covered by the proposed new requirement. Safety systems provided on these plants that are needed (a) to shut down the reactor and bring it to and maintain it in a safe cold shutdown condition, and (b) to prevent loss of containment integrity, must meet the "survivability" criteria in the near term and may be required to meet "qualification" criteria in the long term. Thus, for example, if a distributed igniter system is selected for controlling large amounts of hydrogen, the applicants or licensees must assure in the near term that the specified safety systems can survive and continue to perform their needed safety functions during and following hydrogen burning. In the long term the equipment may be required to meet a more stringent equipment qualification standard, considering the environmental effects of hydrogen burning. If no new hydrogen control system is required, as is likely to be the case for PWRs with large dry containments, these applicants and licensees would still have to perform analyses to: (1) Show containment structural integrity, as defined in § 50.44(c)(3)(iv) can be maintained; and (2) assure that the specified safety systems can continue to perform their needed safety functions during and following hydrogen burning and local detonations. The new criteria for certain identified essential systems are needed because the environmental pressures and temperatures associated with hydrogen burning and local detonations can be more severe than the conditions for which the equipment has been previously qualified.

Analyses [§ 50.44(c)(3)(vi)]

The proposed Interim Rule required that for all PWR and BWR plants, except the Mark I and II BWRs, design analyses must be performed for new hydrogen control measures. Many commenters indicated that the description of the design analyses was not precise enough to elicit the desired response. Furthermore, several commenters have suggested that it is inappropriate to have a regulation requiring hydrogen control design studies in view of the fact that unambigious event descriptions and acceptance criteria are not supplied. The Commission agrees with these comments in part. As a result, the Commission intends to provide supplementary guidance concerning acceptable procedures that should be used, both for design of the hydrogen control systems per § 50.44(c)(3)(iv), for the demonstration of equipment survivability per § 50.44(c)(3)(v), and for the analysis of containment structural integrity.

The Commission is considering three different approaches concerning the supplementary guidance to be provided for performing the analyses. In all of these approaches, licensees are not restricted to the specified scenarios. If because of unique plant design features, other scenarios are known to present a greater risk than those identified by the Commission, the analyses should be based on the scenarios known to present the greatest risk. For example, if for a particular plant an intermediate break LOCA results in a greater risk than the scenarios in Table I, the licensee should base his calculations on the intermediate break LOCA scenario.

In the first approach, the Commission would identify accident sequences or scenarios which are found by probabilistic risk assessment techniques to be significant contributors to the likelihood of core degradation and thus pose a significant hydrogen threat. The licensee would then perform analyses, using these sequences, to determine the time variation of the hydrogen and steam release rates to the containment building. The analyses, which would include the failure assumptions of the different scenarios as well as the accident recovery phase and allowances for uncertainties, would provide the pressure and temperature histories to which the containment would be exposed. A list of possible accident sequences being considered under this approach is given in Table I. The scenarios include the production of substantial amounts of hydrogen as part of core-melt sequences; they were selected, based on experience and engineering judgment, because they are the more probable severe accident sequences which could be terminated short of primary vessel melt-through with available recovery techniques.

In the second approach, a base sequence would be chosen by the Commission based on its significance and characteristics from the standpoint of hydrogen threat. Key aspects of this scenario would then be parametrically varied, by the licensee, in determining the acceptability of the hydrogen control system or the containment response. This would provide a wider range than that of the selected base sequence alone. The acceptability of the analyses used in this approach would depend on the selection and range of the parameters being varied. The range must be chosen to include the effects of physically realistic degraded core accident scenarios with recovery. If licensees have determined that because of their own plant design another scenario presents a greater risk than the small break LOCA, the scenario presenting the greater risk should be chosen for parametric study. The variables and values studied should be determined on a case-by-case basis depending on the particular scenario. Table II represents a preliminary list of parameter variations that appear to provide reasonable extensions of a PWR small-break scenario (Item 1 of Table I). A corresponding BWR list has not yet been prepared.

In the third approach, the Commission would use a set of accident sequences as in Table I, and perform analyses which would define a reasonable envelope of time histories of hydrogen and steam release rates into the containment building. This envelope definition could be based on variations in the progression of different sequences and/or variations due to uncertainties within a particular sequence. The envelope of hydrogen and steam source terms to the containment would then be provided to all licensees for use in subsequent analyses. This approach would avoid the need for case-by-case sequence analyses using codes like MARCH and involving extensive iterative review of the MARCH analyses with the Commission. The intent would be for the Commission to provide hydrogen and steam source terms generic to each reactor type (BWR or PWR) and let the licensees' and NRC's ensuing attention be on the containment analysis. (The staff intends to publish for comment these generic source term analyses during the comment period for this proposed rule.)

TABLE I.—ACCIDENT SEQUENCES LEADING TO A SIGNIFICANT HYDROGEN THREAT

PWR	1. Small LOCA with temporary loss of emergency core cooling (ECC) injection.
	2. Transient with temporary loss of all feedwater and the high pressure ECC system.
	3. Interruption of all AC electric power with failure of the auxiliary feedwater system.
BWR	4. Transient with reactor isolation and temporary failure of all coolant make-up systems.
	5. Small LOCA with temporary failure of ECC injection.
	6. Transient with failure of reactor shutdown systems and interruption of ECC systems.

TABLE II.—PARAMETRIC VARIATIONS OF A PWR SMALL-BREAK SCENARIO

Rate of H_2 release[1] (lb/min)	Timing of H_2 release	Rate of steam/ enthalpy release (lb/min (millions of Btu/min))	Concurrent failures and recoveries
2	Starting at time.		
10	of Uncovering of Top.	[illegible](1)	Fans.
30	of core	[illegible](1)	Containment.
100	Prior to major steam release.	[illegible] 10,000(16)	Sprays.
1,000	Concurrent with major steam release.		All AC power.
	Following major steam release.		Recirculation.

[1] This high rate of steam release may occur for about 10 min. during ECC recovery.
[2] These rates should be assumed to be constant during the period of release and represent release from the primary system to the containment building.

The Commission particularly welcomes comments concerning which of the above approaches is preferred as well as suggestions regarding improvements or other alternatives.

The proposed rule has also been modified to clarify the types of analyses required. They can be grouped into four classes, depending upon containment design, as follows:

1. BWRs with Mark I and II type containments are required to be inerted by the companion rule on inerted containments appearing elsewhere in this issue. (See Table of Contents under NRC Rules and Regulations.) There are no further analyses required of these plants.

2. Effective [one year after the effective date of the rule], or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later, analyses would be required for BWRs with Mark III type containments and PWRs with ice condenser type containments to demonstrate that the installed hydrogen control system is adequate and will perform its intended function in a manner that provides adequate safety margins. Analyses should also be performed to assess the effectiveness of alternative systems.

3. Effective [one year after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later, additional analyses, described under item 4, would be required for BWRs with Mark III type containments and PWRs with ice condenser type containments, to show that safe shutdown will be assured and containment structural integrity maintained during degraded core accidents.

4. Owners of all other containments would be required to perform and submit by [two years after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later: (i) Analyses to assure that during degraded core accidents containment structural integrity will be maintained; and (ii) equipment survivability analyses to assure continued containment integrity and safe shutdown capability. These degraded core accidents will be assumed to produce hydrogen releases to the containment resulting from the containment reaction of up to and including 75% of the fuel cladding surrounding the active fuel region with water for a range of time periods consistent with the accident scenarios analyzed.

The analyses required by this section serve two purposes. First, they support continued reliance on the interim requirements of this rule. Second, the results will be considered in a longer term rulemaking on degraded cores.

Paperwork Reduction Act

The proposed rule will be submitted to the Office of Management and Budget for clearance of the application requirements that may be appropriate under the Paperwork Reduction Act (Pub. L. 96-511). The SF-83 "Request for Clearance," Supporting Statement, and related documentation submitted to OMB will be placed in the NRC Public Document Room at 1717 H Street NW., Washington, D.C. 20555. The material will be available for inspection and copying for a fee.

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. This proposed rule affects only the licensing and operation of nuclear power plants. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121. Since these companies are dominant in their service areas, this proposed rule does not fall within the purview of the Act.

Accordingly, notice is hereby given that, pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, adoption of the following amendments to 10 CFR Part 50 is contemplated.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 reads as follows:

Authority: Secs. 103, 104, 161, 182, 183, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2239); secs. 201, 202, 206, 88 Stat. 1243, 1244, 1246 (42 U.S.C. 5841, 5842, 5846), unless otherwise noted. Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended; (42 U.S.C. 2234). Sections 50.100–50.102 issued under sec. 186, 68 Stat. 955; (42 U.S.C. 2236). For the purposes of sec. 223, 68 Stat. 958, as amended; (42 U.S.C. 2273), § 50.54(i) issued under sec. 161i, 68 Stat. 949; (42 U.S.C. 2201(i)), §§ 50.70, 50.71 and 50.78 issued under sec. 161o, 68 Stat. 950, as amended; (42 U.S.C. 2201(o)) and the Laws referred to in Appendices.

2. In § 50.44, paragraph (c) is amended by adding new subparagraphs (3) (iv), (v) and (vi) to read as follows:

§ 50.44 Standards for combustible gas control system in light water cooled power reactors.

* * * * *

(c) * * *
(3) * * *

(iv) Effective [one year after effective date of the rule], or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later, each boiling light-water nuclear power reactor with a Mark III type containment and each pressurized light-water nuclear power reactor with an ice condenser type containment, for which a construction permit was issued prior to March 28, 1979, shall be provided with an acceptable hydrogen control system justified by suitable programs of experiment and analysis. The hydrogen control system must be capable of handling an amount of hydrogen equivalent to that generated from the

reaction of 75% of the fuel cladding surrounding the active fuel region (excluding the cladding surrounding the plenum volume) with water, without loss of containment structural integrity (i.e., steel containments must meet the requirements of the ASME Boiler and Pressure Vessel Code, Section III, Division 1, Subsubarticle NE–3220, Service Level C Limits, except that evaluation of instability is not required, considering pressure and dead load alone. Concrete containments must meet the requirements of the ASME Boiler and Pressure Vessel Code, Section III, Division 2, Subsubarticle CC–3720, Factored Load Category, considering pressure and dead load alone. These subsubarticles have been approved for incorporation by reference by the Director of the **Federal Register**. A notice of any changes made to the material incorporated by reference will be published in the **Federal Register**. Copies of the ASME Boiler and Pressure Vessel Code may be purchased from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, N.Y. 10017. It is also available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C.) If the hydrogen control system relies on post-accident inerting, the containment structure must be capable of withstanding the increased pressure (A) during the accident, where it must not exceed Service Level C Limits or the Factored Load Category (as previously specified in this paragraph) and (B) following inadvertent full inerting that may occur during normal plant operations, where it must not exceed either Service Level A Limits (for a steel containment) or the Service Load Category (for a concrete containment). Equipment required to establish and maintain safe cold shutdown and containment integrity must be designed and qualified for the environment caused by post-accident inerting. Furthermore, inadvertent full inerting during normal plant operations must not adversely effect systems and components needed for safe operation of the plant. Modest deviations from these criteria will be considered by the Commission if good cause is shown.

(v) Each light-water nuclear power reactor, for which a construction permit was issued prior to March 28, 1979, that does not rely upon an inerted atmosphere to control hydrogen inside the containment, shall be provided with systems necessary to establish and maintain safe cold shutdown and maintain containment integrity that are capable of performing their functions during and after being exposed to the environmental conditions created by the burning (or local detonation) of hydrogen. The amount of hydrogen to be considered is equivalent to that generated from the reaction of 75% of the fuel cladding surrounding the active fuel region (excluding the cladding surrounding the plenum volume) with water. This requirement shall be effective as follows: for each boiling light-water nuclear power reactor with a Mark III type containment and each pressurized light-water nuclear power reactor with an ice condenser type containment, on [one year after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later; for every other light-water nuclear power reactor that must meet this requirement, on [two years after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later.

(vi) Analyses shall be performed and submitted to the Director of Nuclear Reactor Regulation for each light-water nuclear power reactor, for which a construction permit was issued prior to March 28, 1979, to evaluate the consequences of large amounts of hydrogen generated after the start of an accident (hydrogen resulting from the reaction of up to and including 75 percent of the fuel cladding surrounding the active fuel region with water) including consideration of hydrogen control measures as appropriate. Each analysis must include the period of recovery from the degraded condition. The accident scenarios to be used in the analyses must be acceptable to the NRC staff. The scope and implementation requirements for the analyses for the various types of light-water nuclear power reactors are as follows:

(A) For each boiling light-water nuclear power reactor with a Mark III type containment and each pressurized light-water nuclear power reactor with an ice condenser type containment, analyses shall be performed that justify the selection of the hydrogen control system required by § 50.44(c)(3)(iv). These analyses shall be completed and submitted by [one year after the effective date of the rule], or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later.

(B) For each light-water nuclear power reactor that does not rely upon an inerted atmosphere to control hydrogen inside the containment, analyses shall be performed to show that containment structural integrity as defined in § 50.44(c)(3)(iv) will be maintained, and systems and components necessary to establish and maintain safe cold shutdown and maintain containment integrity will be capable of performing their functions during and after being exposed to the environmental conditions created by the burning of hydrogen, including the effect of local detonations. These analyses shall be completed and submitted as follows: for each boiling light-water nuclear power reactor with a Mark III type containment and each pressurized light-water nuclear power reactor with an ice condenser type containment, by [one year after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later; for every other light-water nuclear power reactor for which these analyses are required, by [two years after the effective date of the rule] or the date of issuance of a license authorizing operation above 5 percent of full power, whichever is later.

Dated at Washington, D.C., this 16th day of December 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590–01–M

CIVIL AERONAUTICS BOARD

14 CFR Part 250

[EDR–436; Economic Regulations Docket No. 39932]

Denied Boarding Compensation Rules; Comprehensive Review

December 9, 1981.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The CAB is initiating a comprehensive review of its oversales and denied boarding compensation rules as part of its examination of consumer protection regulations prior to sunset. The Board is seeking comment on, first, eliminating all governmental oversight in this area and, second, retaining the present rules with modifications. This rulemaking is at the Board's initiative.

DATES: Comments by: February 22, 1982; Reply comments by: March 9, 1982.

Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on the Service List: January 7, 1982.

The Docket Section prepares the Service List and sends it to each person listed on it, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 39932, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Patricia Kennedy, Assistant to the Director for Programs, Bureau of Compliance and Consumer Protection, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202–673–5934, or Joanne Petrie, Office of the General Counsel, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202–673–5442.

SUPPLEMENTARY INFORMATION: Part 250 establishes minimum standards for the treatment of airline passengers holding confirmed reservations who are not accommodated because their flight has been oversold. In this notice of proposed rulemaking the Board is initiating a comprehensive review of part 250 as part of a general review of all consumer protection rules prior to sunset. Two distinct options are proposed. The first would eliminate all government regulation of oversales and denied boarding compensation as part of the transition to deregulation. Several suboptions as to timing are proposed. Alternatively, the Board proposes to retain the current rule with some modification to remove unnecessary burdens. In addition to inviting interested parties to submit written comments, the Board will entertain requests for an oral argument on the issues raised in this notice.

The Current Oversales Rule

The purpose of the Board's oversales rule is to balance the rights of ticket-holding passengers to transportation with the needs of air carriers to minimize the adverse economic effects of "no-shows" by passengers holding reservations. The focus of the rule is a carrier's failure to honor a confirmed reservation because of its overbooking practices. The rule sets up a two-part system. The first encourages passengers to voluntarily relinquish their confirmed reservations in exchange for some agreed-upon compensation. The second gives passengers who are involuntarily denied boarding some compensation. In addition, the Board requires carriers to state their practices in their tariffs, give passengers notice of those practices through signs and ticket inserts, and report the number of passengers denied boarding to the Board on a regular basis.

The Board first required payments to oversold passengers 20 years ago. In Order No. E–17914, dated January 8, 1962, the Board conditioned its approval of "no-show penalties" for confirmed passengers on the requirement that oversold passengers on those flights be compensated. An oversales rule was adopted in 1967 as 14 CFR Part 250, ER–503, 32 FR 11939, August 18, 1967, and revised substantially in 1978 after a comprehensive rulemaking proceeding, ER–1050, 43 FR 24277, June 5, 1978. The key features of the current requirements are as follows:

(a) In the event of an oversold flight, the airline must first seek volunteers who are willing to relinquish their seats in return for compensation offered by the airline;

(b) If there are not enough volunteers, the airline must deny boarding on the basis of non-discriminatory boarding priority procedures filed with the Board;

(c) Most passengers who are involuntarily bumped are eligible for denied boarding compensation, with the amount depending on the price of the ticket and the length of the delay. If the airline can arrange satisfactory alternate transportation scheduled to arrive at the passenger's destination within 2 hours of the oversold flight (4 hours on international flights), the compensation is the fare to the destination, with a $37.50 minimum and $200 maximum. If the airline cannot meet the 2-or 4-hour deadline, the amount of compensation doubles. This compensation is in addition to the value of the passenger's ticket, which the passenger keeps.

(d) There are a number of exceptions to the rule. If a passenger is denied boarding on an oversold flight because the government has requisitioned space or because equipment has been substituted for operational or safety reasons, the carrier has no duty to pay compensation. Passengers without confirmed reservations, and those who do not meet the airline's ticket purchase or check-in deadlines, are also ineligible.

(e) A passenger who is denied boarding involuntarily may refuse to accept the denied boarding compensation specified in the rule and seek additional compensation through negotiations with the carrier or by private legal action.

(f) Airlines must post counter signs and include notices with tickets to alert travelers of their overbooking practices. In addition, they must provide written notices explaining their oversales practices and boarding priority rules to each passenger involuntarily denied boarding, and to any person requesting a copy.

(g) Each U.S. airline must file with the Board a monthly report on the number of oversold passengers and the amount of compensation paid to them.

(h) Airlines must file tariffs with the Board describing their boarding priority rules and other practices relating to oversales.

In adopting the current rules, the Board wanted to reduce the number of passengers involuntarily denied boarding to the smallest practicable number without prohibiting deliberate overbooking or interfering unnecessarily with the airlines' reservations practices. Air travelers receive some benefit from controlled overbooking, in that it allows flexibility in making and cancelling reservations, as well as buying or refunding tickets. Overbooking makes possible a system of confirmed reservations that can almost always be honored, without the need for widespread use of advance purchase requirements or ticket refund penalties. It allows airlines to fill more seats, reducing the pressure for higher fares, and makes it easier for people to obtain reservations on the flights of their first choice. On the other hand, overbooking is the major cause of oversales, and the people who are inconvenienced are not those who do not show up for their flights, but passengers who have conformed to all carrier rules. The current rule allocates the risk of being denied boarding among travelers by requiring airlines to solicit volunteers and use a nondiscriminatory boarding priority procedure. The costs of overbooking are spread among all passengers.

In regulating oversales, the Board has been concerned about the potentially deceptive aspects of deliberate overbooking. The terms "confirmed" and "reservation" imply that the airline will provide air transportation on a specific flight. Part 250 attempts to limit the possibility that passengers will be deceived by requiring airlines to use counter signs and ticket notices informing passengers that reservations may not be honored due to overbooking. In addition, the Board and a number of airlines have undertaken passenger education programs to explain the rules, encourage volunteers, and explain the purpose of overbooking. We believe these efforts have increased public awareness that reservations are confirmed subject to occasional oversales.

The requirement that carriers file their boarding priority rules with the Board has discouraged airlines from selecting those to be bumped on an arbitrary or discriminatory basis. Most carriers deny boarding on a last come, last served basis, which allows some passengers to minimize the risks of being bumped by arriving at the boarding gate earlier than most others.

There are a number of other practices that airlines use to minimize their losses from confirmed passengers who do not show up for the flights. Air Florida offers a 20% discount to passengers who are willing to buy non-refundable tickets (which may be transferred to another passenger, if necessary) in order to limit the number of "no-shows." On certain flights, New York Air requires a passenger making a reservation by phone to provide a credit card number, and charges that account $20 if the passenger does not notify the airline at least 30 minutes before departure that the reservation will not be used. For almost 10 years Eastern Airlines has offered "conditional reservations" on fully booked flights, and has had one of the lowest involuntary bumping rates in the industry. World Airways subtracts substantial cancellation penalties from ticket refunds. Many carriers now combine advance purchase requirements and refund penalties with their discount fares. Some airlines rely heavily on stand-by passengers who pay lower fares than those with confirmed reservations.

The Board has been flexible in implementing Part 250. Airlines may offer passengers a choice of free tickets or cash payments as denied boarding compensation. The Board recently amended the rules in ER–1237, 46 FDR 42442, August 21, 1981, to exclude all operations using aircraft of 60 or fewer seats from the overbooking rules. Because of the disruption caused by the recent reduction in air traffic control personnel, the Board has temporarily relieved carriers of the double indemnity requirement (Orders 81–6–22, 81–8–86, 81–9–20 and 81–11–57).

In all, we believe the rules have served a useful purpose. They tend to reduce passenger inconvenience and financial loss occasioned by overbooking without imposing heavy burdens on the airlines or significant costs on the traveling public. In focusing only on the treatment of bumped passengers, we have avoided regulating carriers' reservations practices. As we consider the future of air transport regulations, however, the issue is whether detailed oversight of overbooking practices is justified in an increasingly deregulated industry and, if so, whether modifications of Part 250 are warranted in view of the more competitive environment.

Option 1: Revocation of the Oversales Rule.

Under this option, the Board would revoke part 250, *Oversales,* prior to sunset. This could be done at once, or the Board could adopt one of the two phased alternatives:

(1) Suspend Part 250 with automatic revocation in a year absent further Board action; or

(2) Retain Part 250 for one year with automatic revocation thereafter absent further Board action, but freely grant exemptions to allow any carrier to implement alternative means of handling oversales, provided carriers give adequate notice to passengers.

If we determined that the rules should be abolished, we would be reluctant to do so immediately. Rather, we would want to have some limited transition period during which we could monitor the impact on consumers of the relaxation of the oversales regulation and could act quickly to address any pervasive abuses that might occur.

The fundamental issue raised in this proceeding is whether the government or the marketplace should allocate the various risks and responsibilities relating to the practice of overbooking. Presently, Part 250 establishes the basic ground rules for allocating the various risks and responsibilities between carrier and passenger as well as among passengers.

Those advocating abolition of the rules argue that carriers should be given as much discretion as possible to make marketing decisions about various price and service quality options such as overbooking practices, free baggage allowances, and other amenities. Government involvement in determining reservations and oversales treatment may not be necessary in a competitive environment where carriers have incentives to alert passengers of risks and maintain customer goodwill. Where such market conditions exist, government regulation cannot allocate risks as efficiently or respond as quickly to changing conditions as can the competitive marketplace. Retaining the regulation may also inhibit competition among carriers and stifle innovation by lessening competitive uncertainty. Carriers may have some confidence that their competitors will continue to follow traditional overbooking practices and that they will have advance notice of any carrier's attempt to adopt innovative procedures.

Several factors indicate that the domestic airline industry has the market characteristics necessary to discontinue government regulation of oversales. The industry under deregulation has become increasingly competitive. Carriers should have a strong incentive to maintain customer goodwill, because slight changes in load factors have such a substantial impact on carrier profitability that financial success depends on the ability of carriers to attract and maintain repeat business. Reasonable treatment of passengers (including limiting the number of passengers involuntarily denied boarding to the smallest possible number) is an element of service quality that consumers consider in their choice of air carriers. If passengers feel they are not being treated well, they will use other airlines or alternative means of transportation.

In the event we decided to revoke Part 250, adequate notice to consumers of a carrier's reservations and denied boarding practices would be esential to minimize consumer confusion and possible deception. The use of the term "confirmed reservation" combined with deliberate overbooking is inherently misleading unless a clear explanation is provided to all passengers. Absent clear disclosure, we would have no confidence at all that the marketplace would satisfactorily allocate the risks and responsibilities between carrier and passenger.

Whether, absent our rules, airlines will provide sufficient information so that passengers will understand an individual carrier's reservations practices and the risks associated with them is uncertain. More specific notice than our regulations presently require may be insisted upon by the courts if the regulations are abolished. The Part 250 notice requires each carrier to state that it overbooks and is occasionally unable to accommodate all ticket holders. While this might be sufficient in the context of a regulation prescribing generous compensation to involuntarily bumped passengers, it may not be adequate where the carrier provides little or nothing to most bumped passengers. It may be difficult for an individual to determine if a specific flight is oversold, and most passengers are not sufficiently informed to know what questions they should ask about a carrier's boarding priorities or compensation procedures. Until the courts determine that greater disclosure is required, airlines may believe it is in their interest not to provide any more information about overbooking than they feel they absolutely have to.

However without tariffs, the threat of common law actions may provide a significant incentive for carriers to give adequate notice of the risks and responsibilities they place on passengers in order to limit their own liability. That incentive may be even stronger in the case of deliberate overbooking which, without reasonable disclosure, would almost certainly be considered deceptive. *See e.g., Nader v. Allegheny Airlines,* 426 U.S.C 290 (1976).

Continuation of the rule may be advisable if it appears that competition cannot adequately address the problems caused by involuntary oversales. Denied boarding compensation is a negative service element that is only called into play when something goes wrong. Under a competitive system, carriers may not want to highlight any service failure that occurs. Even prior to the Airline Deregulation Act when airline competition was largely restricted to service quality, carriers generally did not compete on their oversales and other consumer protection practices. Today, there continues to be little competition on negative service elements. With the competitive pressures to keep load factors as high as possible, carriers feel increased pressure to minimize costs, and may consider denied boarding practices a fruitless area of competitive endeavor.

In this connection, there are a number of other issues that concern us if Part 250 is revoked, in addition to the adequacy of disclosure discussed earlier. Specifically, we question whether, under the discipline of the market without Part 250: (1) Airlines might increase the extent to which they overbook and thereby increase a passenger's risk of being bumped; (2) those involuntarily bumped may not be treated fairly or compensated adequately; and (3) airlines might abandon the volunteer solicitation process and bump passengers on an arbitrary and discriminatory basis. We discuss each of these concerns individually below.

Although Part 250 does not directly regulate overbooking, the requirement for denied boarding compensation payments provides some regulatory incentives for carriers to overbook prudently. Proponents of eliminating Part 250 might argue that, without the rule, carriers will have competitive incentives to moderate overbooking and oversales because of the importance to airlines of repeat business. Moreover, word of mouth information about an airline's services is often an important factor in a prospective passenger's choice of carriers. But competition may, at the same time, increase the pressure on airlines to adopt new ways of keeping load factors up, which could lead to far more overbooking than occurs now and perhaps many more bumped passengers. The extent to which a carrier can overbook without losing sales due to a reputation for unreliability is uncertain.

There is also the possibility that people who are involuntarily denied boarding will receive less compensation than they do under the present rules or even no compensation at all. In addition to competitive pressures to keep load factors as high as possible, carriers will feel increased pressures to minimize costs, including the costs of compensating bumped passengers. Despite the incentives to attract repeat business, they may consider an involuntarily bumped passenger a lost cause no matter what they pay. Carriers may find it uneconomic to pay denied boarding compensation voluntarily to all bumped passengers, since the costs of doing so might not be offset by lower complaint handling expenses, fewer instances of litigation, and reductions in revenue losses that occur when dissatisfied passengers take future business to competing airlines.

If we eliminate Part 250, there may be changes in the way in which airlines select bumped passengers. Under the rules, the carriers have a regulatory and economic incentive to seek volunteers. By so doing, the airline can, in most cases, reduce significantly the amount of compensation payments it has to pay. Board-prescribed involuntary denied boarding compensation payments made during the first six months of 1981 were roughly twice as high as payments to volunteers, averaging $232 and $120 respectively. But absent Board regulation, there may be a temptation for airlines to select the people to be bumped in an arbitrary and discriminatory manner. Carriers might want to avoid bumping those who appear to be business travelers because of their greater potential as repeat passengers, or they may arbitrarily select people who appear to be relatively unsophisticated or unassertive.

On a more general level, we have some reservations about revoking a rule that, overall, seems to work well in balancing risks and benefits between airlines and passengers. The cost of compensation is spread among all passengers and amounts to about 10 or 11 cents per flight coupon. The rule is flexible yet provides relatively clear criteria for implementation. It has facilitated the responsive reservations system that travelers now enjoy, without substantial advance purchase or cancellation charge burdens for normal fare service. At the same time, the number of seats that would fly empty is minimized, which benefits both the carriers and consumers.

If the oversales rule were eliminated, there would be a range of possible effective dates, and the Board requests comment on which would be the most appropriate. Also, comment is invited on whether there should be a limited transition period so that the Board could monitor the effect of deregulation in this area and reenter the field if problems develop. As noted earlier, we tentatively believe that a transition period is desirable. A related issue is the best method to eliminate the rule if this option is chosen. Should revocation be outright, or should the rule's effectiveness be suspended for some stated period with automatic revocation absent further Board action? Alternatively, instead of revolting the rule itself, the Board could announce a policy of freely granting exemptions from Part 250 to any carrier on the condition that the carrier remove any mention of its overbooking and oversales practices from its tariffs.

If this option were adopted, carriers could follow whatever practices they chose. Airlines could design their own forms of notice and could deal with oversales situation in any way they thought best.

Arguments for suspending Part 250's application in domestic markets may not apply to many international operations, where significant barriers to entry and limited pricing flexibility still limit the role of competitive forces in determining carrier behavior. In addition, airlines will continue to file tariffs governing international services, including rules tariffs that limit their liability for service failures such as oversales. As long as airlines are protected by these tariffs, we believe that air travelers' interests must be protected by governmental monitoring of the tariff provisions. We are inclined to suspend Part 250 for foreign air transportation only if (1) we do so domestically, (2) U.S. and foreign air carriers agree to remove all rules tariffs relating to overbooking and oversales, and (3) the passengers have adequate notice of the carriers' overbooking policy. We are, however, proposing a modification for inbound traffic if the rule is retained under Option 2, as discussed below.

A final issue raised by this option is whether the present reporting requirements found in § 250.10, *Reports of unaccommodated passengers,* should

be continued. Form 251 provides the Board and the public with information concerning the number of passengers boarded, the number of volunteers, and the number of passengers denied boarding involuntarily by all U.S. carriers on domestic flights, and for international flights subject to Part 250. The information provided by this form has helped the Board gauge the level of oversales and the effectiveness of the regulation . According to the Board's recent staff report, "CAB Information Systems and Early Sunset," the reporting requirements of Form 251 are informally scheduled to terminate at sunset. As an alternative to immediate termination, the reports could be retained for a limited period to help the Board monitor the effects of this change and see if any problems result.

Option 2: Retain the Current Rule with Some Modification

If the Board decides against Option 1, and retains a rule on oversales, it proposes to make some modification to reflect changes that have taken place during the transition to deregulation, and to reduce the rule's costs and burdens while maintaining most of its effectiveness. The proposed changes would be as follows:

(a) *Denied Boarding compensation on inbound foreign flights.* Apart from certain tariff, reporting, and notice provisions, Part 250 does not apply on a mandatory basis to flights on foreign air carriers from a foreign country to the United States. On comparable flights on U.S. air carriers, however, the rules do apply. Foreign airlines that do not voluntarily comply with the requirements for U.S. airlines now file tariffs governing the alternate practices and must use Board-prescribed counter signs and ticket notices to alert passengers that they offer less protection against overbooking than that provided for by Part 250. Some U.S. carriers, who are not exempt from the rules, argue that the voluntary nature of this provision has given foreign competitors an unfair advantage. Some foreign airlines, on the other hand, have complained about the negative effect of the notices to passengers. In this notice, we propose to amend § 250.2, *Applicability,* to reflect these concerns. All U.S. and foreign air carriers operating inbound flights from foreign points would have a choice of structuring their oversales practices in one of three ways. First, carriers could adhere to Part 250 by providing the regulatory notices and substantive protection. Alternatively, a U.S. or foreign carrier could adopt oversales practices that did not meet all the Part 250 requirements. If such a carrier wanted to file rules tariffs on this subject, it would have to provide the Board-prescribed notices set forth in § 250.11, *Public disclosure of deliberate overbooking and boarding procedures* and § 250.12, *Disclosure on inbound flights.* The § 250.12 notice would be amended to reflect the fact that carriers may offer different consumer protections on their inbound flights and that passengers should check with the airline or their travel agent for further details. A U.S. or foreign air carrier that chose not to comply with all the requirements of Part 250 and that did not wish to provide the notices required by § 250.11 and § 250.12 woud be required to withdraw relevant tariff rules for in-bound flights and to provide actual notice of their oversales practices to people who purchase tickets in this country. Such carriers would develop their own notices to inform passengers of their practices and provide the reports required by § 250.10. Under all three options, carriers would still be required to provide the reports required by § 250.10, *Reports of unaccommodated passengers.*

(b) *Calculation of involuntary denied boarding compensation payments.* In other proceedings, several carriers have raised objections to basing the amount of the denied boarding compensation payment on the value of the flight coupons to the passenger's next stopover or final destination. The current requirement was based on the fact that passengers with connecting flights may be more severely inconvenienced by oversales than point to point travellers, if they miss their connection. The current rule strengthens an airline's incentive to solicit volunteers to order to reduce costs. The provision, however, is burdensome for carriers operating in short-haul markets with relatively few frequencies and a large proportion of interline connecting traffic. Although we believe the rule has worked well, we invite comments and the submission of specific data on whether compensation should be based only on the oversold flight.

(c) *Exceptions to eligibility for denied boarding compensation.* In EDR–400 (45 FR 30086, May 7, 1980), the Board sought comments on an exception to the oversales rule for persons accommodated on extra sections of oversold flights. We proposed to allow the exception if extra sections depart within 1 hour of the original flight, because this type of relatively short delay seemed to be a reasonable adjustment by anyone who travels by air. The same rationale may apply when bumped passengers can be accommodated at no extra charge on regularly scheduled flights that get them to their ultimate destination within an hour of their original arrival time. By this notice, we propose to add an exception to § 250.6, *Exceptions to eligibility for denied boarding compensation,* so that carriers would not be required to make payments to passengers who can be accommodated on alternate flights that are scheduled to arrive within 1 hour of the original flight. This addition would eliminate the windfall currently given to oversold passengers who are not seriously inconvenienced. We recognize, however, that this change may lower the number of volunteers since carriers would more often avoid liability for involuntary compensation.

(d) *Minimum denied boarding compensation payments.* The minimum involuntary denied boarding compensation payment set by Part 250 is currently $75, or $37.50 if alternate transportation within 2 hours (4 for foreign air transportation), is arranged. Several carriers have proposed or begun to offer low-cost service in short and medium-haul markets at fares below these amounts. As a result, there is a possibility that the net financial effect on those carriers is proportionately higher than is the effect on other carriers with comparable bumping rates. To correct this disparity, we propose to remove the minimum payments from the rule. We request comments on whether this proposed change would make the amount of compensation so small in some cases as to provide no meaningful recompense.

(e) *Exemptions from Part 250.* The Board has already adopted a liberal policy when considering exemption requests from airlines that have asked permission to experiment with alternatives to our rules. To date, however, a few carriers operating large aircraft have asked for such exemptions, and those requested have not involved substantial deviations from the substantive requirements of Part 250.

In a recent Petition for Rulemaking, (Docket 39376) which was denied in Order 81–8–98, August 17, 1981, Transamerica petitioned the Board to carve out special exceptions for low-fare carriers in Part 250. We are hesitant to treat airlines differently solely on the basis of fare level. Low-fare air service varies greatly, as do the characteristics of the markets in which the carriers operate. The availability of alternate transportation (or lack of it) will affect the potential for severely disrupted travel plans. The nature of the

alternative to involuntary denied boarding compensation is also an important consideration, since whatever is offered should be of sufficient value to adequately compensate non-volunteers. The interrelationship of an airline's other practices such as no-show or cancellation penalties is another significant factor for consideration.

We do, however, want to encourage airlines to experiment with innovative alternatives to our requirements. If we were to allow exemptions that provided for less protection than that required by Part 250, we would require carriers to remove any provisions relating to oversales and denied boarding compensation from their passenger rules tariffs. While we would not prescribe the language of actual notices to passengers, carriers would be expected to convey adequate information to passengers about their oversales practices, their boarding priority and what, if any, compensation oversold passengers would receive.

We solicit comments on the need for a liberal exemption policy, considering the large degree of flexibility airlines already have to minimize their denied boarding compensation payments. Since the rules only apply to "confirmed" reservations, any tickets that a carrier wants to sell on a conditional or some other non-reserved basis are no subject to Part 250 at all. Additionally, carrier scan reduce the costs of overbooking with effective volunteer solicitation.

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, Pub. L. 96–354, the Board certifies that none of these proposed changes will, if adopted as proposed, have a significant economic impact on a substantial number of small entities. Board rules governing oversales and denied boarding compensation only include operations with large aircraft, which are the only operations that would be covered under any of the proposed options.

PART 250—OVERSALES

Accordingly, the Civil Aeronautics Board proposes to adopt one of the following two alternative options concerning 14 CFR Part 250, *Oversales*.

Option 1

Part 250, *Oversales*, would be removed. The Board would, by show cause order, cancel all tariff rules relating to overbooking and oversales. The Board specifically requests comments on an effective date, and whether the rule should be removed outright or suspended for a stated period with automatic revocation if the Board takes no further action. In addition, the Board request comments on whether the reporting requirements found in § 250.10, *Reports of unaccommodated passenger*, should be retained; and if so, in what form and for what period of time.

Option 2

1. Paragraph (b) of § 250.2, *Applicability*, would be amended as follows:

§ 250.2 Applicability.

* * * * *

(b) The requirements of this part other than §§ 250.10, 250.11, and 250.12 do not apply on a mandatory basis to flights from a foreign country to the United States. For those flights, only §§ 250.10, 250.11, and 250.12 are mandatory unless that carrier or foreign air carrier obtains an exemption according to the provisions set forth in §250.13.

2. Section 250.5 would be amended to remove the clauses describing the minimum level of compensation, so that it would read as follows:

§ 250.5 Amount of denied boarding compensation for passengers denied boarding involuntarily.

A carrier, as defined in §250.1, shall pay compensation to all passengers denied boarding involuntarily from its oversold flights at the rate of 200 percent of the value of the passenger's remaining flight coupons up to the passenger's next stopover, or if none, to the passenger's destination, with a $400 maximum. However, the compensation shall be one-half the amount described above, with a $200 maximum, if the carrier arranges for comparable air transportation, or other transportation, used by the passenger that, at the time either such arrangement is made, is scheduled to arrive at the airport of the passenger's next stopover or if none, at the airport of the passenger's destination, not later than 2 hours after the time the direct or connecting flight on which confirmed space is held is planned to arrive in the case of interstate and overseas air transportation, or 4 hours after such time in the case of foreign air transportation.

3. Section 250.6 would be amended by adding paragraph (d) as follows:

§250.6 Exceptions to eligibility for denied boarding compensation.

A passenger denied boarding involuntarily from an oversold flight shall not be eligible for denied boarding compensation if:

* * * * *

(d) The carrier arranges alternate air transportation at no extra cost to the passenger, or other transportation, used by the passenger that, at the time such arrangements are made, is scheduled to arrive at the passenger's next stopover or, if none, final destination within 1 hour after the scheduled arrival time of the passenger's original flight or flights.

4. The third and fourth portions of the written explanation that carriers must provide oversold passengers under §250.9 would be amended as follows:

§ 250.9 Written explanation of denied boarding compensation and boarding priorities.

* * * * *

Compensation for Denied Boarding

If you have been denied a reserved seat on (name of air carrier), you are probably entitled to monetary compensation. This notice explains the airline's obligations and the passenger's rights in the case of an oversold flight, in accordance with regulations of the U.S. Civil Aeronautics Board.

Volunteers and Boarding Priorities

If a flight is oversold (more passengers hold confirmed reservations than there are seats available), no one may be denied boarding against his or her will until airline personnel first ask for volunteers who will give up their reservation willingly, in exchange for a payment of the airline's choosing. If there are not enough volunteers, other passengers may be denied boarding involuntarily in accordance with the following boarding priority of (name of air carrier): (In this space carrier inserts its boarding priority rules or a summary thereof, in a manner to be understandable to the average passenger.)

Compensation for Involuntary Denied Boarding

If you are denied boarding involuntarily, you are entitled to a payment of "denied boarding compensation" from the airline unless: (1) You have not fully complied with the airline's ticketing, check-in, and reconfirmation requirements, or you are not acceptable for transportation under the airline's usual rules and practices, or (2) you are denied boarding because the flight is canceled; or (3) you are denied boarding because of government requisition of space or because a smaller capacity aircraft was substituted for safety or operational reasons; or (4) you are offered accommodations in a section of the aircraft other than that specified in your ticket, at no extra charge, (a

passenger seated in a section for which a lower fare is charged must be given an appropriate refund); or (5) the airline is able to provide another flight or flights that are scheduled to reach your destination within one hour of your original flight.

Amount of Denied Boarding Compensation

Passengers who are eligible for denied boarding compensation must be offered a payment equal to the sum of the face values of their ticket coupons, with a $200 maximum. However, if the airline cannot arrange "alternate transportation" (see below) for the passenger, the compensation is doubled. The 'value' of a ticket coupon is the one-way fare for the flight shown on the coupon including any surcharge and air transportation tax, minus any applicable discount. All flight coupons including connecting flights, to the passenger's destination or first 4-hour stopover are used to compute the compensation.

"Alternate transportation" is air transportation (by an airline licensed by the C.A.B.) or other transportation used by the passenger which, at the time the arrangement is made, is planned to arrive at the passenger's next scheduled stopover (of 4 hours or longer) or destination no later than 2 hours (for flights within U.S. points, including territories and possessions) or 4 hours (for international flights) after the passenger's originally scheduled arrival time.

Method of Payment

The airline must give each passenger who qualified for denied boarding compensation, a payment by check or draft for the amount specified above, on the day and place the involuntary denied boarding occurs. However, if the airline arranges alternate transportation for the passenger's convenience that departs before the payment can be made, the payment will be sent to the passenger within 24 hours.

Passenger's Options

Acceptance of the compensation may relieve (name of air carrier) from any further liability to the passenger caused by its failure to honor the confirmed reservation. However, the passenger may decline the payment and seek to recover damages in a court of law or in some other manner

5. Section 250.12 would be amended by removing the word "foreign" from the title and by revising paragraph (a), to read as follows:

§ 250.12 Disclosure by air carriers on inbound flights.

(a) Any air carrier engaged in foreign air transportation that does not have on file with the Board tariffs conforming with §§ 250.3 and 250.4 of this part for inbound traffic to the United States shall include the following statement at the end of the notices required by paragraphs (a) and (b) of § 250.11:

Although some airlines do not apply these consumer protections to travel from some foreign countries, other consumer protections may be available. Check with your airline or travel agent.

* * * * *

6. The title of § 250.12 would be amended by removing the phrase "by foreign air carriers," so that it would read, *Disclosure on inbound flights.*

7. A new § 250.13, which would allow for exemptions from Part 250, would be added as follows:

§ 250.13 Exemptions from this part.

(a) Any carrier that wishes to obtain an exemption from this part to experiment with alternative practices for compensating oversold passengers shall file a petition with the Board's Bureau of Domestic Aviation;

(b) Any U.S. or foreign air carrier, as a condition for obtaining such an exemption, shall remove from its passenger rules tariffs all provisions relating to its overbooking and oversales practices and provide actual notice to passengers of such practice;

(c) The granting of an exemption to this part in no way implies Board approval of the reasonableness of the exempt carrier's alternate practices or the adequacy of notice provided to passengers.

(Secs. 204, 401, 402, 403, 404, 407, 411, 416, 1002 of Publ. L. 85-726, as amended, 72 Stat. 743, 754, 757, 758, 760, 766, 769, 771, 788; 49 U.S.C. 1324, 1371, 1372, 1373, 1374, 1377, 1381, 1386, 1482)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 239 and 274

[Release Nos. 33-6367, 34-18338, IC-12108; File No. S7-854]

Withdrawal of Proposed Amendments of Investment Company Report Forms

AGENCY: Securities and Exchange Commission.

ACTION: Withdrawal of proposals.

SUMMARY: The Commission is withdrawing two proposed form amendments concerning the annual reporting by management investment companies of portfolio transactions. Under the proposed amendments, reporting companies would have included in their annual updating amendments to their registration statements a table of portfolio information virtually identical to the table heretofore required by Item 1 of Form N-1Q.

DATE: Effective December 16, 1981.

FOR FURTHER INFORMATION CONTACT: Anthony A. Vertuno, Esq. (202) 272-2107, or Jane A. Kanter, Esq. (202) 272-2033, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: On November 25, 1980, the Commission published for comment revisions to Form N-1Q [17 CFR 274.106] and amendments to Forms N-1 [CFR 239.15, 17 CFR 274.11] and N-2 [17 CFR 239.14, 17 CFR 274.11a-1].[1]

In conjunction with its proposal to eliminate Item 1 from Form N-1Q, the Commission had proposed to amend Form N-1, which is used by open-end management investment companies to update their registration statements under the Investment Company Act of 1940 [15 U.S.C. 80a-1-80a-64], and Form N-2, which is used by closed-end management investment companies for the same purpose. Under the proposed amendments, reporting companies would have included in Part II of their annual updating amendments to their registration statements a table of portfolio information virtually identical to the table heretofore required by Item 1 of Form N-1Q. Reporting companies would have been required to show in a tabular format: (a) The number of shares (or other units) of equity securities or principal amount of debt securities acquired or disposed of for their portfolios during the preceding fiscal year; (b) their holdings of such securities and cash at the end of the fiscal year; and (c) their holdings of all other securities as of the end of the fiscal year.

The Commission has determined to withdraw these proposed form amendments for the reasons stated in Release No. 33-6366 (December 16, 1981) published under Rules and Regulations in this issue.

1 Securities Act Release No. 6263 (November 17, 1980) [45 CFR 78158 (November 25, 1980)].

By the Commission.
George A. Fitzsimmons,
Secretary.
December 16, 1981.

BILLING CODE 7020-01-M

INTERNATIONAL TRADE COMMISSION

19 CFR Part 210

Procedures for Initial Determination and Discretionary Review, Investigations of Unfair Practices in Import Trade

AGENCY: International Trade Commission.
ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rules would amend Part 210 of the Commission's rules of practice and procedure governing investigations under section 337, which covers investigations of unfair practices in import trade, of the Tariff Act of 1930 (19 U.S.C. 1337). The effect of the amended rules would be to provide procedures in section 337 investigations for an initial determination by the presiding officer regarding violation of section 337 and discretionary review of the initial determination by the Commission. This would alter current Commission practice, which requires the presiding officer to file a recommended determination that is reviewed by the Commission before it issues a final determination.

DATES: Comments will be considered if received on or before February 8, 1982.
ADDRESS: Comments should conform with Commission rule § 201.8 (19 CFR 201.8) and should be addressed to Kenneth R. Mason, Secretary, U.S. International Trade Commission, Washington, D.C. 20436.

FOR FURTHER INFORMATION CONTACT: Michael P. Mabile, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C., telephone 202–523–1625.

SUPPLEMENTARY INFORMATION: Authority for the proposed rulemaking is contained in 19 U.S.C. 1335, which authorizes the Commission to adopt such reasonable procedures and rules and regulations as it deems necessary to carry out its functions and duties, including those exercised under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Authority is also derived from the Administrative Procedure Act (5 U.S.C. 551, et seq.), which authorizes the adoption of certain procedures in an adjudicative proceeding when an agency does not preside over the hearing at which the evidenced is received. Under 5 U.S.C. 557, the agency may require the presiding officer to make an initial decision that becomes the decision of the agency without further proceedings unless the decision is appealed to, or reveiwed by, the agency. Alternatively, the agency may require that the entire record be certified to it for decision with a recommended decision by the presiding officer.

The purpose of these proposed amendments to the Commission's rules is to adopt an initial determination procedure, with discretionary Commission review, in section 337 investigations. Present Commission practice calls for the presiding officer to issue a recommended determination which is subject to full Commission review with regard to every issue arising in the investigation, regardless of its significance or potential impact upon Commission policies. It is believed that the proposed rules changes would permit the Commission to make better use of its time and resources by allowing it to focus its attention on the most substantial issues coming before it in unfair import trade practice investigations, and also would diminish the amount of time required for adjudication of less complex investigations.

Explanation of Proposed Rules

§ 210.21 The response.

Section 210.21 is amended to conform its provisions with the proposed initial determination procedure by changing "recommended determination" to read "initial determination."

§ 210.22 Amendments to pleading and notice of investigation.

The first sentence of paragraph (a) is amended to conform it to the procedures set forth in proposed § 210.53(c), under which the presiding officer is to grant a motion by filing an initial determination or deny the motion by issuing an order directing denial.

§ 210.36 Failure to make discovery; sanctions.

Paragraph (b)(5) is amended to conform its provisions with the proposed initial determination procedure by changing "recommended" to read "by initial determination" and "recommended determination" to read "initial determination."

§ 210.43 Record.

Paragraph (c) is amended to conform its provisions with the proposed initial determination procedure by changing "a recommended determination" to read "an initial determination."

§ 210.50 Summary determinations.

The second of paragraph (f) is amended to conform its provisions with the proposed initial determination procedure by changing "a recommended determination" to read "an initial determination."

§ 210.51 Termination of investigation.

The revisions of § 210.51 are technical in nature, designed to conform the section with the proposed initial determination procedure. In the final sentences of paragraph (c)(2), (d), and (e), the reference to "§ 210.55" is changed to read "§ 210.56(c)" to reflect that the rule governing Commission determinations is found in § 210.56(c) under the proposed rules. Paragraph (e) is also revised by changing "a recommended determination" to read "an initial determination."

§ 210.53 Initial Determination.

(Present §§ 210.53 through 210.55 are replaced by proposed §§ 210.53 through 210.56, and present §§ 210.56 through 210.58 are redesignated §§ 210.57 through 210.59).

Paragraph (a) and (b) are drafted to remove all intermediary deadlines to which the presiding officer is presently subject in the conduct of a hearing and the rendering of a determination in a section 337 investigation. The amended language makes reference only to a final deadline for filing an initial determination and removes all reference to hearing deadlines and the amount of time allowed for the drafting and filing of such a determination. This would allow the presiding officer to conduct the hearing according to a schedule appropriate to the nature and complexity of the investigation, while retaining a final deadline to insure timely conclusion of the investigation. The time periods stated are applicable to hearings on the violation phase of an investigation only. They do not take into account any additional time that may be necessary for the creation of a record on the public interest factors enumerated in 19 U.S.C. 1337(d), (e), and (f), and in 19 CFR 210.14(a)(2) in the event the presiding officer is ordered by the Commission to take evidence and hear argument on those matters.

Paragraph (c) provides for use of the initial determination procedure with respect to certain interlocutory motions that significantly affect the conduct of the investigation. It is intended to shorten the time required for resolution of these motions. The four motions

concerned are those under the current rules that require a recommended determination from the presiding officer. Proposed paragraph (c) also follows current practice with the exception of practice pertaining to motions for amendment of the complaint or notice), which provides that the presiding officer shall grant a motion by filing a recommended determination or deny the motion by issuing an order which is not certified to the Commission for further action.

Proposed paragraph (d) defines the contents of an initial determination more generally than do the current rules. The intent is to give the presiding officer the option of discussing the findings of fact and conclusions of law in a general manner throughout a written opinion. Section 210.53(b) of the present rules requires the recommended determination to set out in separate sections specific findings of fact and conclusions of law; these findings and conclusions usually must be repeated in the discussion of the written opinion. The proposed rule introduces flexibility in the format of an initial determination. The presiding officer may, depending on the complexity of the issues involved, either discuss the material facts in the body of an opinion or use the format presently required. The rule's description of contents is designed to encompass either broad treatment for initial determinations issued following the close of the hearing or narrow treatment for initial determinations on motions under proposed § 210.53(c). This section additionally provides for notice to the parties of the effect of the initial determination in the event it is not reviewed by the Commission.

Paragraph (e) is similar to current § 210.53(c), but alters the existing provision by requiring an initial determination from the presiding officer who presided over "the investigation" rather than "the hearing." This language change is intended to clarify that the presiding officer is required to render an initial determination on motions ruled upon without hearings as well as motions and determinations based on hearings. This subsection, like its counterpart in the current rules, is patterned after the provision of the Administrative Procedure Act in 5 U.S.C. 554(d).

Paragraph (f), with a minor change, tracks § 210.53(d) of the rules now in effect.

Proposed paragraph (g) is the heart of the initial determination procedure. Under it, the initial determination would become the determination of the Commission after the passage of a certain period of time if the Commission does not order a review on the petition of a party or on its own motion. The time period of thirty days in paragraph (g)(i) before an initial determination can become the determination of the Commission allows for the expedited conclusion of an investigation when there are no objections to the initial determination. It also provides adequate opportunity for the Commission to review an initial determination and decide whether to initiate review on its own motion or to grant a petition for review. The ten-day period allowed for filing a petition for review is the same as that provided under the present rules for the filing of exceptions to a recommended determination.

Paragraph (g)(2) provides fifteen days before an initial determination would become the Commission's determination with respect to rulings on requests for temporary relief and the four types of motions mentioned in paragraph (c). The fifteen-day period is intended to reflect the need for prompt resolution of the issues involved, while allowing adequate time for consideration and responsive action by the parties and the Commission.

Paragraph (h) provides for notice to the parties in the event that an initial determination becomes the determination of the Commission.

§ 210.54 Petition for review.

Paragraph (a) of proposed section 210.54 grants "any party to an investigation" the right to request review of an initial determination. As written, it does not exclude parties who are in default or otherwise did not participate in the evidentiary hearing. This extensive grant of authority to request review may be limited in the rule concerning default, Commission Rule 210.21(d), 19 CFR 210.21(d), in which default is deemed to constitute a waiver of a party's right to appear. Otherwise, the provision is consistent with the broad authority for seeking judicial review granted by 19 U.S.C. 1337(c), which extends to "[a]ny person adversely affected by a final determination."

Paragraphs (2) and (4) not only set forth portions of what the petition for review shall contain, but also establish standards for review. In addition to the other standards for review enumerated, paragraph (2) allows review when an initial determination on an issue is rendered without the benefit of controlling precedent or rule. This gives the Commission an express procedural vehicle for establishing policy in those areas not addressed or resolved in prior Commission determinations.

Paragraph (a) provides for waiver or abandonment of any issues not sought for review in the petition. The intent of this provision is to give final effect to all unreviewed portions of the initial determination. Paragraph (a) also establishes time limits for filing responses to the petition. No limitations on the contents of the response to the petition are set forth, as they are for the petition. The rule provides that any party, and not just those parties opposed to the petition for review, may file a response to the petition.

Paragraph (b) establishes a time limit of thirty days within which the Commission is to decide whether to grant review of an initial determination on the petition of a party. It is the same amount of time allowed the Commission by proposed rule § 210.55 for deciding whether to grant review on its own motion. This provision permits the Commission the option of requiring oral argument and written submissions with respect to the petition for review, if necessary.

Proposed paragraph (b) allows the Commission to grant a petition for review on the vote of at least one of the Commissioners participating in the vote. Should the Commission grant review, under this rule it shall issue an order establishing the issues to be reviewed and specifying provisions for briefs and oral argument, along with a notice to the parties that further action respecting the initial determination is being taken.

§ 210.55 Commission review on its own motion.

Proposed § 210.55 provides for Commission review *sua sponte* of an initial determination. The number of Commissioners' votes required for review of an initial determination on the Commission's own initiative is the same as that for granting a petition for review under proposed § 210.54(b). As in § 210.54(b), provision is made for an order establishing the issues to be reviewed and a notice to the parties of the Commission's action.

§ 210.56 Review by Commission.

Paragraph (a) leaves to Commission discretion the size, nature and timing of briefs on issues granted review, since the number and complexity of issues brought before the Commission will vary from case to case. The Commission has the option of requiring oral argument, if deemed appropriate.

Proposed paragraph (b) limits review to those issues specifically granted review by the Commission, and complements the third paragraph of

proposed § 210.54(a) concerning abandonment of issues.

Proposed paragraph (c) enumerates the actions the Commission may take upon review of an initial determination.

§ 210.60 Interlocutory appeals.

The first sentence of § 210.60 is revised to conform its provisions with the proposed initial determination procedure by changing "recommended determination" to read "initial determination."

PART 210—ADJUDICATION PROCEDURES

19 CFR Part 210 is proposed to be amended as set forth below.

1. In § 210.21, paragraph (d) is revised to read as follows:

§ 210.21 The response.

* * * * *

(d) *Default.* Failure of a respondent to file a response within the time provided for in paragraph (a) of this section may be deemed to constitute a waiver of its right to appear and contest the allegations of the complaint and of the notice of investigation, and to authorize the presiding officer, without further notice to that respondent, to find the facts to be as alleged in the complaint and notice of investigation and to enter an initial determination (or a determination if the Commission is the presiding officer) containing such findings.

2. In § 210.22, paragraph (a) is revised to read as follows:

§ 210.22 Amendments to pleadings and notice of investigation.

(a) *By leave.* If and whenever disposition of the issues in an investigation on the merits will be facilitated, the presiding officer, upon such conditions as are necessary to avoid prejudicing the public interest and the rights of the parties to an investigation, may allow appropriate amendments to pleadings: Provided, however, that a motion for amendment of a compliant after the institution of an investigation shall be made to the presiding officer, who shall grant the motion by filing with the Commission an initial determination, or shall deny the motion issuing an order directing denial; the motion shall be decided according to the standards of § 210.20(d) of this part. A motion for amendment of a notice of investigation shall be dealt with as provided for with respect to motions for amendment of a complaint.

* * * * *

3. In § 210.36, paragraph (b)(5) is revised to read as follows:

§ 210.36 Failure to make discovery; sanctions.

* * * * *

(b) * * *

(5) Rule that a motion or other submission by the party concerning the order or subpoena issued be stricken or rule (by initial determination where the presiding officer is not the Commission) that a determination in the investigation be rendered against the party, or both. Any such action may be taken by written or oral order issued in the course of the investigation or by inclusion in the initial determination of the presiding officer when the presiding officer is not the Commission. It shall be the duty of the parties to seek, and that of the presiding officer to grant, such of the foregoing means of relief or other appropriate relief as may be sufficient to compensate for the lack of withheld testimony, documents, or other evidence. If in the presiding officer's opinion such relief would not be sufficient, the presiding officer shall certify to the Commission a request that court enforcement of the subpoena or other discovery order be sought.

4. In § 210.43, paragraph (c) is revised to read as follows:

§ 210.43 Record.

* * * * *

(c) *Certification of record.* The record shall be certified to the Commission by the presiding officer upon his filing of a initial determination or at such earlier time as the Commission may order.

5. In § 210.50, paragraph (f) is revised to read as follows:

§ 210.50 Summary determinations.

* * * * *

(f) *Order of summary determination.* An order of summary determination shall constitute a determination of the Commission under § 210.56(c) of this part when the Commission is the presiding officer. An order of summary determination shall constitute an initial determination of the presiding officer under § 210.53 of this part when the presiding officer is not the Commission.

6. In § 210.51, paragraphs (c)(2), (d) and (e) are revised to read as follows:

§ 210.51 Termination of investigation.

* * * * *

(c) * * *

(2) The motion, licensing or other agreement and any agreements supplemental thereto, and affidavit shall be certified by the presiding officer to the Commission with a recommendation. The Commission shall promptly publish notice of such motion along with a nonconfidential summary of the licensing or other agreement in the **Federal Register** and, unless otherwise ordered, for a period of thirty (30) days thereafter receive and consider any comments that maybe filed by interested persons concerning the agreement. An order of termination based upon such licensing or other agreement shall not constitute a determination of the Commission under § 210.56(c).

(d) *Consent order settlement.* An investigation before the Commission may be terminated as provided in paragraph (a) of this section on the basis of a consent order settlement under §211.20(b). An order of termination based upon such a settlement shall not constitute a determination of the Commission under § 210.56(c).

(e) *Effect of termination.* Except as provided in paragraphs (c) and (d) of this section, an order of termination issued by the Commission shall constitute a determination of the Commission under § 210.56(c), and an order of termination issued by the presiding officer (when not the Commission) shall constitute an initial determination of the presiding officer under § 210.53.

7. Sections 210.53, 210.54, and 210.55 are revised to read as follows:

§ 210.53 Initial determination.

(a) *On issues concerning permanent relief.* Following a hearing for the taking of evidence and hearing of arguments and within nine months, or within fourteen months in a more complicated case, of the date of publication in the **Federal Register** of the notice instituting the investigation, the presiding officer shall certify the record to the Commission and shall file with the Commission an initial determination as to whether there is a violation of section 337 of the Tariff Act of 1930.

(b) *On issues concerning temporary relief.* Following a hearing for the taking of evidence and hearing of arguments and within four months of the date of publication in the **Federal Register** of the notice instituting the investigation, the presiding officer shall certify the record to the Commission and shall file with the Commission an initial determination as to whether there is reason to believe there is a violation of section 337 of the Tariff Act of 1930.

(c) *On motions for summary determination, termination, finding of default, or amendment to complaint or notice.* Following the filing of a motion for summary determination pursuant to § 210.50, motion for termination pursuant to § 210.51, motion for a finding of default pursuant to §§ 210.21(d) and § 210.51(b), or motion to amend the

complaint or notice of investigation pursuant to § 210.22(a), the presiding officer shall grant such motions by filing with the Commission an initial determination, or shall deny such motions by issuing an order directing denial.

(d) *Contents.* The initial determination shall include: an opinion stating findings (with specific page references to principal supporting items of evidence in the record) and conclusions and the reasons or bases therefor necessary for the disposition of all material issues of fact, law or discretion presented in the record; and a statement that pursuant to § 210.53(g) of these rules the initial determination shall become the determination of the Commission unless a party files a petition for review of the initial determination pursuant to § 210.54 of these rules, or the Commission pursuant to § 210.55 of these rules orders on its own motion a review of the initial determination or certain issues therein.

(e) *Initial determination made by the presiding officer.* The initial determination shall be made and filed by the presiding officer who presided over the investigation, except when that person is unavailable to the Commission.

(f) *Reopening of proceedings by the presiding officer.* At any time prior to the filing of the initial determination, the presiding officer may reopen the proceedings for the reception of additional evidence.

(g) *Effect.* (1) An initial determination filed pursuant to § 210.53(a) shall become the determination of the Commission thirty (30) days after the service thereof, except:

(i) The initial determination shall not become the determination of the Commission if any party shall have filed a petition for review of the initial determination within ten (10) days after the service thereof pursuant to § 210.54; or

(ii) The initial determination shall not become the determination of the Commission if within thirty (30) days after the date of filing of the initial determination the Commission shall have ordered review of the initial determination or certain issues therein pursuant to § 210.55, or by order shall have changed the effective date of the initial determination.

(2) An initial determination filed pursuant to § 210.53 (b) or (c) shall become the determination of the Commission fifteen (15) days after the service thereof, except:

(i) The initial determination shall not become the determination of the Commission if any party shall have filed a petition for review of the initial determination within five (5) days after the service thereof pursuant to § 210.54(a); or

(ii) The initial determination shall not become the determination of the Commission if within fifteen (15) days after the date of filing of the initial determination the Commission shall have ordered review of the initial determination or certain issues therein pursuant to § 210.55, or by order shall have changed the effective date of the initial determination.

(h) *Notice of determination.* In the event an initial determination becomes the determination of the Commission, the parties shall be notified thereof by the Secretary. The notice shall also state that the time for filing a petition for review of the initial determination has expired and that the Commission has decided not to review the initial determination on its own motion.

§ 210.54 Petition for review.

(a) *The petition and responses.* (1) Any party to an investigation may request a review by the Commission of an initial determination by filing with the Secretary a petition for review pursuant to § 210.53(g)(1)(i) or § 210.53(g)(2)(i). A petition for review shall:

(i) identify the party seeking review;

(ii) specify the issues presented for review regarding a finding or conclusion of material fact which is clearly erroneous, a legal conclusion which is erroneous or without governing precedent, rule or law, an abuse of discretion, or a decision affecting Commission policy;

(iii) set forth a concise statement of the facts material to the consideration of the stated issues; and

(iv) present a concise argument setting forth the reasons why review by the Commission is necessary or appropriate to resolve an important issue of fact, law or policy.

(2) Any issue not raised in the petition for review filed pursuant to this rule will be deemed to have been abandoned and may be disregarded by the Commission in reviewing an initial determination.

(3) Any party may file a response to the petition for review within five (5) days after service of the petition.

(b) *Grant or denial of review.* (1) The Commission shall decide whether to grant in whole or in part, a petition for review filed pursuant to § 210.53(g)(1)(i) within thirty (30) days of the filing of the initial determination, or a petition for review filed pursuant to § 210.53(g)(2)(i) within fifteen (15) days of the filing of the initial determination, or by such other time as the Commission may order.

(2) The Commission shall decide whether to grant a petition for review, based upon the petition and response thereto, without oral argument or further written submissions unless the Commission shall order otherwise.

(3) The Commission shall grant a petition for review and order review of an initial determination or certain issues therein when at least one of the participating Commissioners votes for ordering review. In its order, the Commission shall establish the scope of the review and the issues that will be considered and make provisions for filing of briefs and oral argument if deemed appropriate by the Commission. The order and notice that the Commission has granted the petition for review shall be served on all parties by the Secretary.

§ 210.55 Commission review on its own motion.

Within the time provided in § 210.53(g)(1)(ii) or § 210.53(g)(2)(ii), the Commission on its own initiative may order review of an initial determination or certain issues therein when at least one of the participating Commissioners votes for ordering review. In its order, the Commission shall establish the scope of the review and the issues that will be considered and make provisions for filing of briefs and oral argument if deemed appropriate by the Commission. The order and notice that the Commission has directed review on its own initiative shall be served on all parties by the Secretary.

§§ 210.56, 210.57 and 210.58 [Redesignated as §§ 210.57, 210.58 and 210.59].

8. Present §§ 210.56, 210.57, and 210.58 are redesignated §§ 210.57, 210.58, and 210.59, respectively.

9. A new § 210.56 is added to read as follows:

§ 210.56 Review by Commission.

(a) *Briefs and Oral Argument.* In the event the Commission orders review of an initial determination the parties may file review briefs concerning the issues on review at a time, and of a size and nature set forth in the order granting the petition for review. The parties within the time provided for filing the review briefs may submit a written request for a hearing to present oral argument before the Commission, which the Commission in its discretion may grant or deny.

(b) *Scope of review.* Only the issues set forth in the order granting review, and all subsidiary issues therein, will be considered by the Commission.

(c) *Determination on review.* On review the Commission may affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part, the initial determination of the administrative law judge and make any findings or conclusions which in its judgment are proper based on the record in the proceeding.

10. In § 210.57 (formerly § 210.56), as redesignated, paragraph (a) is revised to read as follows:

§ 210.57 Implementation of Commission action.

(a) *Service of Commission determination upon the parties.* A Commission determination pursuant to § 210.56(c) or a termination on the basis of a licensing or other agreement or consent settlement pursuant to §§ 210.51 (c) and (d), respectively, shall be served upon each party to the investigation.

* * * * *

11. The introductory text of § 210.60 is revised to read as follows:

§ 210.60 Interlocutory appeals.

Rulings by the presiding officer on motions may not be appealed to the Commission prior to the presiding officer's issuance of his initial determination except in the following circumstances:

* * * * *

By order of the Commission.

Issued: December 15, 1981.

Kenneth R. Mason,

Secretary.

[FR Doc. 81-36874 Filed 12-22-81; 8:45 am]

BILLING CODE 7020-02-M

VETERANS ADMINISTRATION

38 CFR Part 1

Demand for Repayment, Offset, Refund, Committee on Waivers and Compromises Authority

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration proposes to change the procedures it uses to collect debts owed to it by beneficiaries of VA programs. These changes are necessary to comply with recent court decisions and laws which afford greater procedural protections to these beneficiaries. Some of these changes have already been implemented in order to afford beneficiaries an opportunity to exercise their legal rights. These regulations will principally affect the manner and timing of recoupment of an overpayment from other VA benefits. In addition, the procedures for considering a request for waiver of an indebtedness are revised to comply with recent court decisions which require that an agency afford a beneficiary the right to request an oral hearing on their waiver request.

DATE: Comments must be received on or before January 25, 1982. It is proposed to make these regulations effective upon final approval.

ADDRESS: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. Comments will be available for inspection at the above address only between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until February 8, 1982. Any person visiting Central Office for the purpose of inspecting such comments will be received by the Central Office Veterans Service Unit in room 132. Such visitors to any field station will be informed that records are available for inspection only in Central Office and furnished the above address and room number.

FOR FURTHER INFORMATION CONTACT: Peter T. Mulhern, (202) 389-3405.

SUPPLEMENTARY INFORMATION: Califano v. Yamasaki, 442 U.S. 682 (1979) and Pub. L. 96-466 "Veterans Rehabilitation and Education Amendments of 1980" require that benefit overpayments cannot be recouped from current or future benefit payments unless the debtor is first notified of the indebtedness and also of certain waiver, hearing, and appellate rights. In addition, recoupment cannot be initiated until after a decision is reached on either a waiver request or dispute concerning the indebtedness filed within a specified period of time after the initial notification of such rights. Recoupment from other VA benefit payments of a loan indebtedness arising from participation in the loan guaranty program is now permitted without the debtor's written consent.

In the event that recoupment is made either prior to a request for waiver or prior to a decision on a request for waiver, new Veterans Administration policy requires that the entire amount of the overpayment be considered for waiver and refunded in full if waiver is granted.

As the result of increased handling time and rising administrative costs, single signature waiver authority is now granted for debts of $1,000 or less, exclusive of interest. Such authority had previously been extended only to debts of $500 or less, exclusive of interest.

The Administrator hereby certifies that these proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-602. Pursuant to 5 U.S.C. 605(b), these proposed rules are therefore exempt from the initial and final regulatory flexibility analyses requirements of Sections 603 and 604. The reason for this certification is that the proposed rules affect only those individuals indebted to the U.S. Government as a result of participation in Veterans Administration benefit payment programs. These proposed rules have also been reviewed under E.O. 12291 and have been determined to be nonmajor because they only revise Veterans Administration debt collection, refund, and waiver procedures and do not have any adverse economic impact on or increase costs to consumers, individual industries, Federal, State and local government agencies, or geographic regions. There is no Federal Catalog of Domestic Assistance Number.

Approved: December 4, 1981.

Robert P. Nimmo,

Administrator.

PART 1—GENERAL PROVISIONS

38 CFR Part 1 is amended as follows:

1. Section 1.911 is revised to read as follows:

§ 1.911 Demand for repayment.

(a) The Veterans administration shall make written demands for the payment of all debts which arise from its activities in terms which inform the debtor of the consequences of the failure to cooperate with collection efforts. The Veterans Administration shall normally make three written demands for repayment at not more than thirty day intervals. The initial demand letter shall be issued as soon as possible after the decision which causes the indebtedness. The third letter of demand for repayment shall normally be the agency's final demand for such repayment. Three demand letters will not be necessary if—

(1) The Administrator determines that further demand will be futile;

(2) The debtor has responded to a previous demand letter and indicated that he/she will not repay the indebtedness; or

(3) Prompt suit/attachment is indicated to protect the interest of the government.

(b) The initial notice of indebtedness shall—

(1) State the exact amount of the indebtedness;

(2) State the reasons for the establishment of the indebtedness;

(3) State that the debtor has the right to appeal the decision which causes the indebtedness or its amount;

(4) State that the debtor has the right to request a waiver of the collection of the indebtedness;

(5) State that the debtor has the right to request an oral hearing in conjunction with the waiver issue which would be held prior to a waiver determination;

(6) State the statutory time limit in which to request a waiver;

(7) State that offset from current or future awards will be initiated unless the debtor, within thirty days of the date of this notice of indebtedness, disputes the creation of the indebtedness or its amount or requests a waiver and/or a hearing in conjunction with such waiver request;

(8) State that if a dispute or a request for waiver is filed within thirty days, the time limit set forth in paragraph (b)(7) of this section, offset will not be initiated until a determination is rendered on the dispute or request for waiver, except in the circumstances specified in § 1.912(c);

(9) State that failure to repay the debt, in full, within thirty days of the initial notice of the indebtedness will result in the charging of interest or administrative costs or both by the Veterans Administration.

(c) Further explanation may be found for—

(1) Notification of appellate rights in § 19.109;

(2) Notification of any decision affecting the payment of benefits or granting relief in § 3.103(e);

(3) Right to appeal a waiver decision in § 1.958; and

(4) Repayment to a successful waiver applicant of money already withheld in § 1.967.

(d) Notification shall be considered sufficient when effected by ordinary mail, addressed to the last known address, and such notice is not returned as undeliverable by postal authorities.

(e) An individual may informally dispute the accuracy of an indebtedness or request additional information regarding it without filing an appeal in accordance with § 19.109. The Veterans Administration shall review the decision which is the basis of the dispute and either affirm or revise such decision. (38 U.S.C. 3102, 3114)

2. Section 1.912 is revised to read as follows:

§ 1.912 Collection by offset.

(a) The Veterans Administration shall initiate collection by offset against current or future benefit payments when an indebtedness is of record as a result of a payee's participation in a benefit program administered by the Veterans Administration.

(b) Offset shall not be initiated in accordance with paragraph (a) of this section unless the debtor is—

(1) Notified of the proposed offset;

(2) Notified of the right to dispute the existence or amount of the indebtedness in accordance with § 19.109;

(3) Notified of the right to request a waiver of collection of the indebtedness and a hearing in conjunction with the waiver request in accordance with §§ 1.955–1.970;

(4) Notified that if a dispute concerning the indebtedness or its amount or a waiver request and a hearing in conjunction with the waiver is received within thirty days of the notification of such rights, offset shall not be initiated until an initial station decision has been reached upon the dispute of the indebtedness or waiver request.

(c) Offset may be initiated prior to a decision described in paragraph (b)(4) of this section where recovery of the overpayment is jeopardized by delaying offset beyond the termination of a debtor's running award status. However, every effort should be made to reach an initial station decision on such dispute or waiver request prior to the termination of a running award status.

(d) If the Veterans Administration obtains a judgement against the debtor as the result of an indebtedness owed the Veterans Administration, the amount of such indebtedness shall be immediately offset from current or future benefit payments without providing the notice set forth in paragraph (b) of this section. However, a waiver request received within the statutory two year time limit will be considered even if received after a judgement has been obtained, and all amounts of the indebtedness that have been recouped will be refunded in event that waiver is granted.

(e) Collection by offset from persons receiving Veterans Administration pay or compensation for services rendered shall be effected over a period not greater than the period during which such pay or compensation is to be received. (See 5 U.S.C. 5514) Appropriate use should be made of the cooperative efforts of other agencies in effecting collection by offset, including utilization of the Army Holdup list. (38 U.S.C. 3114, ch. 37)

§ 1.916 [Amended]

3. Section 1.916 is revised by changing the word "his" to the words "his/her".

§ 1.930 [Amended]

4. Section 1.930 is revised by changing the word "his" to the words "his/her".

5. In § 1.955, paragraph (d) is revised to read as follows:

§ 1.955 Regional office committees on waivers and compromises.

* * * * *

(d) *Single signature authority.* Where a request is for waiver of collection of a debt of $1,000 or less, exclusive of interest, the Chairperson shall designate from members and/or alternates one person, with special competence in the program area where the debt arose, to consider the question. His/her signature alone to the decision will suffice. In compromise cases, however, three person panels are always required regardless of the amount of the debt. (38 U.S.C. 210(c)(1))

§ 1.966 [Amended]

6. In § 1.966, paragraph (b)(2)(ii) is removed.

7. Section 1.967 is revised to read as follows:

§ 1.967 Refunds.

(a) Except as provided in paragraph (c) of this section, any portion of an indebtedness which has been recovered by the U.S. Government will also be considered for waiver action, as long as such request for waiver is timely filed in accordance with § 1.963(b). If collection of an indebtedness is waived, such portions of the indebtedness previously collected will be refunded. Entitlement will be charged for any amounts of an educational benefits indebtedness which are waived.

(b) Any collected portions of an indebtedness arising from erroneous payment of pay or allowances shall be considered for waiver regardless of the date of request for waiver, as long as such request is filed timely in accordance with § 1.963a(c)(1). If collection is waived, refund will be made to the employee: *Provided*, That application for refund is made no later than two years following the date of the waiver.

(c) Refund of amounts collected will not be made when only a part of the debt is waived or when collection of the balance of a loan guaranty indebtedness by the Veterans Administration from obligors, other than a husband or wife of the person requesting waiver, will be adversely affected. Only where the amount waived exceeds the balance of the indebtedness still in existence will a refund be made in the amount of the difference between the two. Otherwise, refunds will be made in accordance with

paragraph (a) of this section. (38 U.S.C. 3102; 5 U.S.C. 5584)

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. AH300g/IVA; A-3-FRL 2001-3]

Commonwealth of Virginia; Proposed Revisions of the State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: On July 3, 1981, and on August 10, 1981, the Commonwealth of Virginia submitted Rules and Regulations governing the State's automobile inspection and maintenance (I/M) program and mobile source emission standards for inclusion in its State Implementation Plan (SIP). These regulations will apply only to vehicles registered in the Northern Virginia ozone nonattainment area. EPA is today proposing to approve these regulations as part of the Virginia SIP.

DATE: Comments must be submitted on or before January 22, 1982.

ADDRESSES: Copies of the proposed SIP revisions and the accompanying support documents are available for inspection during normal business hours at the following addresses:

U.S. Environmental Protection Agency, Region III, Air Media & Energy Branch (3AH13), Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, ATTN: Ms. Eileen M. Glen

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street SW (Waterside Mall), Washington, D.C. 20460

Virginia State Air Pollution Control Board, Ninth Street Office Building, Room 1106, Richmond, Virginia 23219, ATTN: Mr. John M. Daniel, Jr.

All comments on the proposed revisions submitted within 30 days of publication of this Notice will be considered and should be directed to Mr. James E. Sydnor, Chief of the WVA/VA Section at the EPA, Region III address above. Please reference the EPA Docket number found in the heading of this Notice.

FOR FURTHER INFORMATION CONTACT: Ms. Eileen M. Glen at the EPA, Region III address or telephone 215/597-8187.

SUPPLEMENTARY INFORMATION: Under Section 172 of the Clean Air Act, nonattainment plans for major urban areas which require an extension beyond 1982 for attainment of a standard for ozone or carbon monoxide, are required to include a vehicle I/M program as an element of the 1979 SIP revision. Full implementation of that program, in accordance with EPA's established I/M policy, is required in all cases by December 31, 1982.

Virginia included I/M as an element in its 1979 SIP revision. EPA's evaluation of and action on the I/M portion of Virginia 1979 SIP revision is documented in 45 FR 55180 (August 19, 1980), 46 FR 22185 (April 16, 1981) and 46 FR 45628 (September 14, 1981).

On May 15, 1980, the Commonwealth submitted a schedule for implementation of the I/M program in Northern Virginia. EPA will be publishing full approval of that schedule, as revised by an April 3, 1981 submittal, shortly (EPA Docket No. AH300a/b/eVA). Two of the increments of progress in this schedule pertain to the adoption of Administrative and Procedural Regulations, and Motor Vehicle Emission Standards. The proposed SIP revisions which are the subject of today's Notice satisfy these increments. The I/M program itself will be implemented by January 1, 1982.

EPA published the 1982 SIP policy (part of which pertains to I/M programs) on January 22, 1981 (46 FR 7182). As discussed in that policy, states with areas that have I/M programs under development or operational as part of their 1979 SIP revisions were required to submit only qualitative descriptions of the I/M program elements in the 1979 SIP submittal. The 1982 SIP revision to be submitted to EPA on or before July 1, 1982, must include, unless already submitted and approved as part of a previous SIP submittal, rules and regulations and all other I/M elements which could affect the ability of the I/M program to achieve the minimum emission reduction requirements. More specifically, the 1982 submittal must include the following critical elements: (1) inspection test procedures; (2) emission standards; (3) inspection station licensing requirements; (4) emission analyzer specification and maintenance/calibration requirements; (5) recordkeeping and record submittal requirements; (6) quality control, audit, and surveillance procedures; (7) procedures to assure that non-complying vehicles are not operated on the public roads; (8) any other official program rules, regulations and procedures; (9) a public awareness plan; and (10) a mechanics training program, if additional emission reduction credits are being claimed for mechanics training.

EPA will determine the overall adequacy of the critical elements of each I/M program and, therefore, the approvability of the 1982 SIP by comparing those elements to established I/M policy. I/M program elements must be consistent with EPA policy or a demonstration must be made that the program elements are equivalent.

State or local governments that have I/M programs, but plan to increase the coverage and/or stringency of the programs in order to achieve greater reductions and to demonstrate earlier attainment of the standards, must submit the program modifications in legally enforceable form through the 1982 SIP revision process.

In the case of a partial submittal, EPA's action will be limited to the submitted program elements. Final action on the total I/M program must be reserved until all elements are submitted and reviewed in order to assure that the program satisfies the requirements of Part D of the Clean Air Act.

Virginia has submitted the following elements to satisfy part of the I/M requirements for the 1982 SIP revision:

(1) Inspection test procedures—Sections 3, 4 and 5 of the July 13, 1981 submittal require an idle exhaust emission test to be performed for initial inspections and reinspections.

(2) Emission standards—Part IV, Section 4.103 of the Virginia Regulations for the Control and Abatement of Air Pollution prescribes carbon monoxide and hydrocarbon emission limitations for the motor vehicles subject to the I/M regulations. This proposed revision to the Virginia SIP was submitted on August 10, 1981. EPA is proposing approval of these emission standards but, as part of the 1982 SIP revision, Virginia will have to demonstrate that these standards, in combination with other elements of the I/M program, will be adequate to attain the required emission reductions from the program.

(3) Inspection Station Licensing Requirements—Section 1 of the July 13, 1981 submittal describes the Licensing requirements for private garage inspection facilities. These requirements include: (1) having an analyzer which meets State's specifications; (2) employing an inspector who has demonstrated proficiency and has been trained in the use of analyzers and their calibration, test procedures and I/M rules and regulations; and (3) maintaining and periodically submitting records on vehicle inspections.

(4) Emission analyzer specifications and maintenance/calibration requirements—Sections 2, 6, and 7 of the July 13, 1981 submittal prescribe the minimum instrument specifications and maintenance/calibration requirements.

(5) Recordkeeping and record submittal requirements—Section 1 of the July 13, 1981 submittal provides that garages maintain records on vehicle inspection and submit these records to the State for auditing and is acceptable to EPA. However, no information has yet been submitted to EPA concerning what inspection data will be collected and submitted to EPA to verify that the program is effective and adequately enforced. Therefore, although these regulations are approvable, this element will not be fully complete until the State has submitted, as part of the 1982 SIP revisions, an adequate description of the inspection data.

(6) Quality control, audit, and surveillance procedures—Sections 6 and 7 of the July 13, 1981 submittal prescribes the quality control procedures which must be followed by the garages and is acceptable to EPA. However, the procedures to be followed by the State in conducting unannounced, unscheduled audits have not yet been submitted and, therefore, this element will not be fully complete until these procedures are submitted.

(7) Procedures to assure that non-complying vehicles are not operated on the public roads—The Virginia I/M legislation prohibits the registration or re-registration of vehicles which have not passed the I/M test or have not received a waiver from passing the I/M test. In addition, Section 8 of the I/M regulations provide for the issuing of windshield stickers to those vehicles which have either passed or failed the I/M test or have received a waiver. Although the windshield sticker program will augment the procedures to prevent non-complying vehicles from operating on public roads, it is EPA's understanding that the primary procedure to prevent non-complying vehicles from operating on public roads is denial of registration, and it is on these basis that EPA is proposing approval of Virginia's procedures to prevent non-complying vehicles from operating on public roads.

(8) Other program rules, regulations and procedures—The geographic coverage area is described in the section entitled SCOPE. Mandatory I/M is scheduled to start January 1, 1982 as specified in House Bill No. 116 passed by 1980 Virginia General Assembly. The classes and ages of subject vehicles were also specified in House Bill No. 116 (the most recent eight model years of motor vehicles with a registered gross vehicle weight of less than 6,000 pounds). Provisions for referee stations, also required by House Bill 116, have also been submitted.

(9) Public Awareness Plan—Virginia is in the process of developing a public awareness plan, but it has not yet been submitted.

(10) Mechanics Training Plan—Virginia has not claimed any emission reduction credits for mechanics training and, therefore, a mechanics training plan does not have to be submitted.

The Commonwealth of Virginia submitted proof that appropriate public hearings were held with respect to these amendments.

In summary, EPA is proposing to approve all those completed elements described above, namely, the inspection test procedures, the emission standards, the inspection station licensing procedures, the emission analyzer specifications and maintenance/calibration requirements, the procedures to assure that non/complying vehicles are not operated on the public roads, and the other program rules, regulations and procedures describing the geographic coverage area, the start-up date, and the classes and ages of subject vehicles as well as the provisions for referee stations. We are also proposing to approve the regulations submitted by the Commonwealth on July 13, 1981 and August 10, 1981 which only partially satisfy the following elements: recordkeeping and record submittal requirements; and the quality control, audit, and surveillance procedures. Additional information, as outlined above, must be submitted before these elements will be fully satisfied. Furthermore, today's action is *not* intended, nor should it be interpreted, as complete approval of Virginia's total I/M program or the total I/M section of Virginia 1982 SIP revision. Approval of the total I/M program and the I/M section of the 1982 SIP revision can only be granted after all of the remaining elements, as specified above, required by the 1982 SIP policy (46 FR 7181, January 22, 1981) are submitted and reviewed in order to assure that Virginia's total I/M program and I/M section of Virginia's 1982 SIP satisfy the requirements of Part D of the Clean Air Act.

The public is invited to submit, to the address stated above, comments on whether the proposed revisions should be approved as revisions of the Virginia State Implementation Plan.

The Administrator's decision to approve or disapprove the proposed revisions will be based on the comments received and on a determination whether they meet the requirements of Sections 110 and 172 of the Clean Air Act and 40 CFR Part 51, Requirements for Preparations, Adoption, and Submittal of State Implementation Plans.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because this action, if promulgated, only approves State actions and imposes no new requirements.

Pursuant to the provisions of 5 U.S.C. Section 605(b), the Administrator has certified that this action will not have a significant economic impact on a substantial number of small entities. (46 FR 8709) This action, if promulgated, constitutes a SIP approval under Sections 110 and 172 of the Clean Air Act and only approves State actions. It imposes no new regulatory burden on anyone.

Dated: October 19, 1981.

Alvin R. Morris,

Acting Regional Administrator.

BILLING CODE 6560-38-M

---

40 CFR Part 180

[OPP-300054; PH-FRL-2013-7]

Dimethylformamide (DMF); Proposed Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that dimethylformamide (DMF) be exempted from the requirement of a tolerance. The exemption is limited to use by the U.S. Department of Interior (USDI) in formulations of the lamprecide sodium salt of alpha, alpha, alpha-trifluoro-4-nitro-meta-cresol or 4-nitro-3-(trifluoromethyl)phenol (also called TFM) in the Great Lakes.

DATE: Written comments must be received on or before January 22, 1982.

ADDRESS: Written comments to: Peter Gray, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Peter Gray (703-557-7110).

SUPPLEMENTARY INFORMATION: In 1976, the Fish and Wildlife Service, USDI, submitted a petition (6E1743) for an exemption from the requirement for a tolerance for sodium salt of alpha,

alpha, alpha-trifluoro-4-nitro-meta-cresol or 4-nitro-3-(trifluoromethyl)phenyl, (also called TFM) in water for control of the sea lamprey. Since DMF is solvent for the TFM, the USDI also requested an exemption for DMF.

In the course of scientific review, it was concluded that the DMF exemption should be announced simulataneously with the exemption of TFM. Since announcement by the agency of TFM exemption is imminent, the DMF exemption is necessary.

Inert ingredients are all ingredients which are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as water; baits such as sugar, starches, and meat scraps; dust carriers such as talc and clay; fillers; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term inert is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

Preambles to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and toxicological and other scientific basis used in arriving at a conclusion of safety in support of the exemption.

Name of Inert Ingredient. Dimethylformamide (DMF).

Name and Address of Requestor. U.S. Department of the Interior, Fish and Wildlife Service, Washington, DC 20240.

Basis for Approval

1. A 119-day mouse feeding study indicated that the no-observed-effect-level (NOEL) was 540 parts per million (ppm) (systemic).

2. A 13-week rat feeding study indicated that the NOEL (systemic) was 750 ppm.

3. Use of the DMF solvent is quite limited.

Based on the above information, and review of its use, it has been found that, when used in accordance with good agricultural practices, this ingredient is useful and does not pose a hazard to humans or to the enviornment. It is concluded, therefore, that the proposed amendment to 40 CFR Part 180 will protect the public health, and it is proposed that the regulation be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains this inert ingredient may request, on or before January 22, 1982, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition and document control number "[OPP-300054]". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the Process Coordination Branch (TS-767C), Rm. 514D, CM#2, 1921 Jefferson Davis Highway, Arlington, VA from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, EPA has determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this regulation from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register on May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514; (21 U.S.C. 346a(e)))

Dated: December 9, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, it is proposed that 40 CFR 180.1046 be amended by designating the existing text as paragraph (a) and adding paragraph (b) to read as follows:

§ 180.1046 Dimethylformamide; exemption from requirement of tolerance.

* * * * *

(b) Dimethylformamide (DMF) is exempted from the requirement of a tolerance, when used by the U.S. Department of Interior, Fish and Wildlife Service, as a solvent for the lamprecide, sodium salt of alpha, alpha, alpha-trifluoro-4-nitro-meta-cresol, or 4-nitro-3-(trifluoromethyl)phenol in the Great Lakes.

40 CFR Part 180

[PP 6E1856/P206; PH-FRL-2013-1]

MCPA; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that tolerances be established for the herbicide 2-methyl-4-chlorophenoxyacetic acid (MCPA). This proposed amendment to establish a maximum permissible level for residues of MCPA in or on certain raw agricultural commodities was submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments must be received on or before January 22, 1982.

ADDRESS: Written comments to: Donald R. Stubbs, Emergency Response Section, Registration Division (TS-767C), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703-557-7123).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition number 6E1856 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Illinois, Iowa, Michigan, Minnesota, South Dakota, and Wisconsin. This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide MCPA in or on the forage legumes alfalfa, clovers, lespedeza, trefoils, and vetches at 20 parts per million (ppm). The petition was later amended to propose a tolerance of 0.1 ppm in or on alfalfa, clovers, lespedeza, trefoils, vetches, and the hay of each. Residues will be as a result of treatment of small grains underseeded with the named forage legumes.

The data submitted in the petiton, and all other relevant material, have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerances were: A 90-day rat

feeding study resulting in a NOEL of 8 mg/kg/day (80 ppm); a 13-week dog feeding study resulting in a NOEL of 4 mg/kg/day (160 ppm); two rat studies and a mouse teratology study negative for teratogenic effects; and a rat metabolism study showing no bioaccumulation.

Data which are lacking include the following studies: Acute neurotoxicity (chicken); 2-year feeding study in rats; a 6-month or longer feeding study in dogs; oncogencity in two species; and 3-generation reproduction (rat). No regulatory actions are pending against MCPA at this time.

The nature of the residues is adequately understood and an adequate analytical method (gas chromatography) is available for enforcement purposes. Residues of MCPA in milk, meat, fat, and meat byproducts resulting from the proposed use will be adequately covered by existing tolerances of 0.1 ppm for these food items. Consequently, human exposure to MCPA will not be affected by the requested tolerances.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.339 would protect the public health. It is proposed, therefore, that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, which contains any of the ingredients listed herein, may request on or before January 22, 1982, that this proposed rulemaking be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposed regulation. Comments must bear a notation indicating the document control number "[PP 6E1656/P206]". All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, the EPA has determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this proposed regulation from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels, or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Effective on: December 23, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, it is proposed that 40 CFR 180.339 be amended by adding and alphabetically inserting in paragraph (a) the raw agricultural commodities "alfalfa", "clovers", "lespedeza", "trefoils", and "vetches" and the hay of each to read as follows:

§ 180.339 2-Methyl-4-chlorophenoxyacetic acid; tolerances for residues.

(a) * * *

Commodity	Part per million
Alfalfa	0.1
Alfalfa hay	0.1
Clovers	0.1
Clover hay	0.1
Lespedeza	0.1
Lespedeza hay	0.1
Trefoils	0.1
Trefoil hay	0.1
Vetches	0.1
Vetch hay	0.1

[FR Doc. 81-36844 Filed 12-22-81; 8:45 am]

BILLING CODE 6560-32-M

GENERAL SERVICES ADMINISTRATION

Federal Property Resources Service

41 CFR Part 101-47

Airport Disposals

AGENCY: General Services Administration.

ACTION: Proposed rule.

SUMMARY: The General Services Administration proposes to provide clarification as to the proper statute under which federally owned real property may be disposed of for airport purposes.

DATE: Comments must be received on or before February 22, 1982.

ADDRESS: Written comments should be sent to the General Services Administration (DR), Washington, DC 20406.

FOR FURTHER INFORMATION CONTACT: James H. Pitts, Office of Real Property (703-557-2531).

SUPPLEMENTARY INFORMATION: GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweight the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

PART 101-47—UTILIZATION AND DISPOSAL OF REAL PROPERTY

Accordingly, it is proposed to amend 41 CFR Part 101-47 as follows:

Subpart 101-47.3—Surplus Real Property Disposal

1. Section 101-47.308-2 is amended by adding a new subsection (i) immediately following (h). It should read as follows:

§ 101-47.308-2 Property for public airports.

* * * * *

(i) It should be emphasized that section 23 of the Airport and Airway Development Act of 1970 (Airport Act of 1970) is not applicable to the transfer of airports to State or local agencies. The transfer of airports to State and local agencies may be made only under section 13(g) of the Surplus Property Act of 1944 which is continued in effect by the Act. Only property which the holding agency determines cannot be reported excess to GSA for disposition under the Act, but which, nevertheless, may be made available for use by a State or local public body for public airport purposes without being inconsistent with the Federal program of the holding agency, may be conveyed under section 23 of the Airport Act of 1970. In the latter instance, section 23 may be used for the transfer of nonexcess land for airport development purposes providing that such real property does not constitute an entire

airport. An entire, existing and established airport can only be disposed of to a State or eligible local government under section 13(g) of the Surplus Property Act of 1944.

(Sec. 205(c), 63 stat. 390; 40 U.S.C. 486(c))

Dated: Dec. 4, 1981.

Roy Markon,

Commissioner, Federal Property Resources Service.

[FR Doc. 81-36088 Filed 12-22-81; 8:45 am]

BILLING CODE 6820-26-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 638

Gulf of Mexico Fishery Management Council and South Atlantic Fishery Management Council; Public Hearings

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The Gulf of Mexico and South Atlantic Fishery Management Councils will be holding public hearings for the purposes of public input on the Draft Environmental Impact Statement/Fishery Management Plan for Coral and Coral Reefs.

DATES: Written comments on the coral and coral reefs plan from members of the public may be submitted no later than January 31, 1982.

Individuals or organizations wishing to comment may do so at public hearings to be held as follows:

January 12, 1982—Houston, Texas
January 19, 1982—Marathon, Florida
January 20, 1982—Daytona Beach, Florida
January 21, 1982—St. Petersburg, Florida

All of the above hearings will start at 7:30 p.m. and adjourn at 10:00 p.m.

The hearings will be tape recorded and the tapes will be filed as an official transcript of the proceedings. A written summary will be prepared on each hearing.

ADDRESS: Send comments to:

Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609, or
Chairman, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, South Carolina 29407, or
Harold B. Allen, Acting Regional Director, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

HEARING LOCATIONS:

January 12, 1982—Garden Center, 1500 Hermann Drive, Houston, Texas.
January 19, 1982—Marathon High School Cafeteria, Sombrero Beach Road, Marathon, Florida.
January 20, 1982—Holiday Inn Surfside, 2700 N. Atlantic Avenue, Daytona Beach, Florida.
January 21, 1982—Bayfront Center—Posno Room, 400 First Street South, St. Petersburg, Florida.

FOR FURTHER INFORMATION CONTACT:

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609, (813) 228–2815, or
David Gould, Executive Director, South Altantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, South Carolina 29407, (803) 571–4366, or
Harold B. Allen, Acting Regional Director, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702, (813) 893–3141.

SUPPLEMENTARY INFORMATION: The hearings will deal with a proposal to implement a fishery management plan for coral and coral reefs in the geographical area of authority of the Gulf of Mexico and South Atlantic Fishery Management Councils under the Magnuson Fishery Conservation and Management Act (MFCMA).

The environmental impact statement is a review of the plan and a statement of its expected impacts. A fishery management plan is a major Federal action significantly affecting the human environment and requires the approval of the Secretary of Commerce prior to implementation.

The plan for coral and coral reefs, when approved, will manage the resource for optimum yield (OY) and therefore, contains regulatory measures applicable to domestic fishing. The fishery for coral and coral reefs as addressed in this plan is located in the Gulf of Mexico, and the waters of the Atlantic Ocean from the Texas-Mexican border through North Carolina.

The management unit consists of the coral and coral reefs of the fishery conservation zone (FCZ) of the Gulf of Mexico and South Atlantic Fishery Management Councils. Management measures in the plan will be recommended to adjacent States where appropriate.

Included in this management unit are:

A. Corals: The corals of the class Hydrozoa (stinging and hydrocorals) and the class Anthozoa (sea fans, whips, precious corals, sea pen, and stony corals).

B. Coral Reefs: The hard bottoms, deepwater banks, patch reefs, and outer bank reefs as defined in the plan.

With the existing data, a single maximum sustainable yield (MSY) for the entire management unit is incalculable.

The OY is the level of coral harvest as authorized pursuant to the permitting criteria established in this plan. Based on available data it is the Councils' intent to allow the existing level of legal, reported harvest consistent with the objectives of this plan.

The OY for stony corals is to be zero (0) except as may be authorized for scientific and educational purposes. The current level of harvest for this purpose is estimated to be 140 kilograms per year.

The OY for octocorals is the amount of harvest which is authorized pursuant to this plan. Octocorals, except for sea fans, are identified as presently being harvested without apparent stock damage. Present directed level of harvest is estimated to be about 5,845 colonies, 1,463 of which come from the FCZ.

The estimated domestic annual harvest is to be equal to OY.

The total allowable level of foreign fishing is to be zero.

Primary Management Objective

Optimize the benefits generated from the coral resource while conserving the coral and coral reefs.

Specific Management Objectives

1. Develop scientific information necessary to determine feasibility and advisability of harvest of coral.
2. Minimize, as appropriate, adverse human impacts on coral and coral reefs.
3. Provide, where appropriate, special management for coral habitat areas of particular concern.
4. Increase public awareness of the importance and sensitivity of coral and coral reefs.
5. Provide a coordinated management regime for the conservation of coral and coral reefs.

Management Measures

Catch Limitations

A. Total allowable level of foreign fishing—none. The expected domestic annual harvest will equal the OY.

B. Types of catch limitations:

(a) Prohibit the taking of stony coral and sea fans (*Gorgonia flabellum* or *G. ventalina*) or the destruction of these corals and coral reefs in the FCZ of the Gulf and South Atlantic Fishery Management Councils' geographical

area of authority, except as provided for in the plan.

(b) Stony corals and sea fans taken incidentally in other fisheries must be returned to the water in the general area of capture as soon as possible. An exception is provided for the groundfish, scallop, or other similar fisheries, where the entire unsorted catch is landed. In such instances the stony corals and sea fans may be landed but may not be sold.

(c) Should harvest of octocorals become accelerated and, in the Councils' judgment, is threatening the habitat in localized areas, the Councils may request the Secretary to take available measures designed to eliminate such threat of damage to the resource and fishery habitats.

Permits

Establish a permit system for:

A. The use of toxic chemicals in taking fish or other marine organisms which inhabit coral reefs.

B. For taking protected corals for scientific and educational purposes.

Types of Vessel, Gear, and Enforcement Devices

Prohibit the use of toxic chemicals in taking fish and other marine organisms which inhabit coral reef areas except under permit as may be specified in this or any other fishery management plan.

Identify habitat areas for corals which may be threatened or subject to degradation and provide a management program for them. These habitat areas of particular concern are recognized as providing habitat to valuable or special assemblages of corals or coral reefs. Some of these areas are presently under management programs, some are under consideration for inclusion in such programs, and others are presently without management. Identified coral habitat areas of particular concern and proposed measures are:

A. East and West Flower Garden Banks (nominated National Marine Sanctuary). The taking of all corals is prohibited except as authorized by permit. Bottom longlines, traps and pots, bottom trawls, and anchoring by vessels 100 feet or more in registered length are prohibited within the 100 meter isobath.

B. Florida Middle Grounds—the northernmost shallow reef-type coral community in the Gulf of Mexico. The area is bounded on the north by latitude 28°45′ N.; on the south by latitude 28°11′ N.; on the east by longitude 84°00′ W.; and on the west by longitude 84°25′ W. The taking of all corals is prohibited except as authorized by permit. Within the 34 by 22 mile area, bottom longlines, traps and pots, and bottom trawls are prohibited.

Special Recommendations

1. Recommended that the Secretary establish a communication/coordination system in support of the coral management program.

2. Recommended that the Secretary establish a procedure to coordinate coral management activities in the FCZ and territorial sea within the Councils' geographical area of authority.

3. Recommended that the States and NMFS monitor at least at the present level of effort the condition of the octocorals and report damage or threat of damage to their habitat. The Councils believe under existing monitoring regime, these agencies can effectively carry out this request without a significant increase in current expenditure.

Dated: December 17, 1981.

William H. Stevenson,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

50 CFR Part 661

Pacific Fishery Management Council and Its Salmon Subpanel Scientific and Statistical Committee; Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of public meetings with a partially closed session.

SUMMARY: As required by the Federal Advisory Committee Act, this notice sets forth the schedule and proposed agendas of the forthcoming separate public meetings of the Pacific Fishery Management Council, its Scientific and Statistical Committee and Salmon Subpanel. The Pacific Fishery Management Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265), and the Council has established a Scientific and Statistical Committee and Salmon Subpanel to assist the Council in carrying out its responsibilities.

DATES: January 25–28, 1982.

ADDRESS: All meetings will take place at the Holiday Inn, 17338 Pacific Highway South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 SW. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221–6352.

AGENDAS:

Council (open meeting)—January 26–28, 1982 (2 p.m. to 5 p.m. on January 26; 10 a.m. to 5 p.m. on January 27; 8 a.m. to 5 p.m. on January 28)—consideration of the draft 1982 amendment to the ocean salmon fishery management plan (FMP) and consideration of 1982 foreign fishery applications. Oral comments or questions by the public will be invited beginning at 4 p.m., on January 26, 1982.

Council (closed session)—January 27, 1982 (8 a.m. to 10 a.m.)—discussion of the status of maritime boundary and resource negotiations between the U.S. and Canada. Only those Council members and selected staff having security clearances will be allowed to attend this closed session.

Scientific and Statistical Committee (open meeting)—January 25–26, 1982 (1 p.m. to 5 p.m. on January 25; 8 a.m. to 5 p.m. on January 26–28). The Committee will consider the 1982 amendment to the ocean salmon FMP and an amendment to the anchovy FMP; evaluate and develop recommendations on issues referred to the Committee by the Council; conduct a public comment period beginning at 3:30 p.m. on January 26.

Salmon Subpanel (open meeting)—January 26, 1982 (8 a.m. to 5 p.m.). The Subpanel will meet to consider the 1982 amendment to the ocean salmon FMP and will also meet in joint session with the Scientific and Statistical Committee in the forenoon on January 26.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of the General Counsel, formally determined on October 14, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the agenda item covered in the closed session is exempt from the provisions of the Act relating to open meetings and public participation therein, because the meeting will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(1), as information which will disclose matters that are (A) specifically authorized under criteria established by an executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such executive order. (A copy of the determination is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, Department of Commerce.) All other portions of the Council's meeting will be open to the public.

Dated: December 17, 1981.

Jack L. Falls,

Chief, Administrative Support Staff, National Marine Fisheries Service.

[FR Doc. 81-36513 Filed 12-22-81; 8:45 am]

BILLING CODE 3510-22-M

Notices

Federal Register
Vol. 46, No. 240
Wednesday, December 23, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Agricultural Conservation Program (ACP) Payments; Determination of Primary Purpose for Amounts That May Be Excluded From Income Under Section 126 of the Internal Revenue Code of 1954 as Amended

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of Determination.

SUMMARY: The purpose of this notice is to announce the determination by the Secretary of Agriculture that certain Federal payments made to farmers under the Agricultural Conservation Program (ACP) are deemed by the Secretary to have been made primarily for purposes of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife. This determination by the Secretary is made in accordance with Section 126(b) of the Internal Revenue Code of 1954, as amended by Section 543 of the Revenue Act of 1978 and the Technical Corrections Act of 1979. The effect of this determination is to make it possible for recipients of these payments to exclude some or all of them from gross income for Federal income tax purposes if certain other conditions are met.

FOR FURTHER INFORMATION CONTACT: Dirctor, Conservation and Environmental Protection Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, (202) 447–6221.

SUPPLEMENTARY INFORMATION: This action has been reviewed in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified as "not major." It has been determined that these program provisions will not result in an annual effect on the economy of $100 million or more; would not cause a major increase in costs or prices for consumers, individuals, industries, Federal, State or local government agencies or geographic regions; and would not cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

The titles and numbers of the Federal Assistance Program to which this notice applies are: Title Agricultural Conservation Program; Number—10.063; as found in the Catalog of Federal Domestic Assistance. This action will not have a significant impact specifically on area and community development. Therefore, review as established by OMB Circular A–95 was not used to assure that units of local governments are informed of this action.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of determination since ASCS is not required to publish a notice of proposed rulemaking pursuant to 5 U.S.C. 553 or any other provision of law with respect to the subject matter of this determination.

Section 126 of the Internal Revenue Code of 1954, as amended by the Revenue Act of 1978 and the Technical Corrections Act of 1979, provides that certain payments which are made to persons under designated programs administered by the Department of Agriculture may be eligible for exclusion from gross income if certain determinations are made. One such determination involves the Secretary of Agriculture who must determine whether certain payments issued to persons under designated programs listed in Section 126(a) are "made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife." In making any such determination the Secretary of Agriculture must evaluate each of those designated programs based upon criteria set forth at 7 CFR Part 14.

One of the conservation programs listed in Section 126(a) is the Agricultural Conservation Program (ACP) authorized by the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590a). This program is funded annually by agriculture appropriations acts.

The ACP provides technical and financial assistance to agriculture through annual and long-term (3 to 10 years) agreements to assure the continued supply of food and fiber necessary for the maintenance of a strong and healthy people and economy, and to provide for environmental conservation or enhancement.

Cost-share payments are made to eligible producers under the program for the satisfactory installation of conservation practices developed primarily to meet a definite need to accomplish one or more of the following:

(a) Establish long-lasting protective cover to conserve soil and water resources and protect the environment.

(b) Improve or sustain existing protective cover to prevent soil erosion and excessive surface water runoff.

(c) Conserve or safely dispose of water to prevent soil erosion, protect the environment and prevent water pollution.

(d) Benefit wildlife by providing an improved habitat while conserving soil.

(e) Establish or improve stands of forest trees for soil protection, forestry purposes and enhance the environment.

(f) Give protection against soil erosion to conserve our soil and water resources and abate pollution.

(g) Prevent or abate agricultural related pollution of water, land and air to protect the environment.

(h) Meet special State or county conservation needs by conserving soil and water resources, protecting or restoring the environment, improving forests or providing a habitat for wildlife.

The ACP authorizing legislation, regulations, and operating procedures have been carefully examined using the criteria established by the Department of Agriculture under 7 CFR Part 14 for making "primary purpose" determinations. The Department has concluded that the payments under the ACP are made for the purpose of providing financial assistance to agricultural producers for carrying out enduring conservation and environmental enhancement measures. An "Agricultural Conservation Program (ACP) Record Decision: Primary Purpose Determination for Federal Tax Purposes" has been prepared and is

available upon request from the Conservation and Environmental Protection Division, ASCS.

Determination

Therefore, the Secretary of Agriculture has determined that in accordance with Section 126(b)(1) of the Internal Revenue Code of 1954, as amended, all payments made for those conservation practices approved by the Secretary under the ACP after September 30, 1979 are made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife.

Signed at Washington, D.C. on December 16, 1981.

John R. Block,

Secretary, U.S. Department of Agriculture.

BILLING CODE 3410-05-M

Agricultural Marketing Service

Hop Marketing Advisory Board; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-436; 86 Stat. 770), notice is given of a meeting of the Hop Marketing Advisory Board at 9:00 a.m., local time, January 8, 1982, in Portland, Oregon, at the Imperial Hotel.

The purpose of the meeting is to discuss marketing policy, and related matters. The meeting will be open to the public.

The Hop Marketing Advisory Board is established under Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production. The marketing order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

The names of Board members, agenda, location of meeting, summary of the meeting and other information pertaining to the meeting may be obtained from Robert H. Eaton, Hop Administrative Committee, Room 1002, Corbett Building, 430 S.W. Morrison Street, Portland, Oregon 97204, telephone (503) 224-1823.

Dated: December 18, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

CIVIL AERONAUTICS BOARD

[Docket 31290; Order 81-12-107]

Establishment of Interim Standard Industry Fare Level

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 17th day of December, 1981.

The Airline Deregulation Act of 1978 requires that we compute a "standard industry fare level" (SIFL) based upon the fare level in effect on July 1, 1977, and, not less than semiannually, update the SIFL by increasing or decreasing it by the percentage in actual operating costs per available seat-mile (ASM) for interstate and overseas transportation combined. Once computed, the SIFL becomes the benchmark for measuring the statutory zone of reasonableness.

Applying our methodology to the year ended September 1981 financial data and October 1981 fuel costs[1] and projecting fuel and nonfuel costs to April 1, 1982 (the midpoint of the January-June period) results in a cost escalation factor of 1.8342 over July 1, 1977, or an increase over the last SIFL adjustment of about 2.9 percent. (See Appendix).

Revisions to the SIFL adjustment factor also control the upward flexibility in connection with the zone of limited suspension for domestic passenger fares. The calculation is described in 14 CFR 399, *Statements of Gneral Policy*. Section 399.32(d)(1) currently provides flexibility of up to 30 percent above the sum of the SIFL plus $16. These regulations also provide that each time we adjust the SIFL for cost increases, we will adjust the $16 figure by the same percentage rounded to the nearest whole dollar. However, the current SIFL adjustment of 2.9 percent does not result in any change in the current $16 amount.

TRUNK AND LOCAL SERVICE CARRIER, SCHEDULED SERVICE FUEL PRICE CALCULATION

[In cents]

Month	Price/gallon	Change from prior month
July	102.80	-0.77
August	102.48	-.32
September	101.99	-.49
October	101.54	-.45

Our usual methodololgy projects the average change in price over the last four months to the chosen future date, then adds the projected change to the current fuel price. However, in this case, due to the moderation of the downward trend of fuel prices and recent OPEC actions in moving toward a uniform price and cutting production to maintain price stability, we have based our current fuel projection on the latest actual fuel price—October. Consequently, we projected a cost of 101.54 cents per gallon as of April 1, 1982.

We intend to monitor closely fuel prices over the coming months and, if necessary, we shall revise the SIFL should the actual fuel prices fluctuate significantly, either up or down, from our projection.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly section 1002.

1. We set the cost adjustment factor for the Standard Industry Fare Level effective January 1, 1982, at 1.8342.

2. We set the Standard Industry Fare Level formula effective January 1, 1982, as follows:

Terminal charge, $29.64, plus $0.1621 per mile (0 to 500 miles); $0.1236 per mile (501 to 1,500 miles); $0.1189 per mile (over 1,500 miles).

This order shall be served on the Air Transport Association of America, all certificated carriers, and shall be published in the **Federal Register.**

By the Civil Aeronautics Board.[1]

Phyllis T. Kaylor,

Secretary.

APPENDIX A—METHODOLOGY FOR DETERMINING CHANGE IN OPERATING EXPENSE PER AVAILABLE SEAT-MILE

	Trunks	Local	Trunks plus locals	Total passenger/cargo [1 6]
Year ended September 1981:				
Total operating expense (mils)[1]	$22,254	$4,025	$26,279	$26,852
Less:				
All-cargo expenses[2]	329		329	329
Belly offset[3]	1,178	176	1,354	1,429
Nonscheduled[4]	93	35	128	152
Trans-related[5]	456	42	500	511

APPENDIX A—METHODOLOGY FOR DETERMINING CHANGE IN OPERATING EXPENSE PER AVAILABLE SEAT-MILE—Continued

	Trunks	Local	Trunks plus locals	Total passenger/cargo [16]
Plus: Capitalized lease adjustment [10]				
Passenger operating expense			23,903	24,402
Passenger fuel cost [11]			7,566	NA
Passenger nonfuel cost			16,365	NA
Scheduled service ASM's (mils)			319,789	326,260
Passenger nonfuel operating expense per ASM (dollars)			0.05117	NA
Passenger fuel expense per ASM (dollars)			0.02379	NA
Total passenger expense per ASM (dollars)			0.07493	0.07479
Year ended September 1982				
Total operating expense (mils) [1]	$20,002	$3,299	$23,901	$24,489
Less:				
All cargo expense [2]	288		288	288
Belly offset [3]	1,125	155	1,280	1,344
Nonscheduled [4]	147	35	182	208
Trans. related [5]	424	41	465	475
Plus: Capitalized lease adjustment [10]				
Passenger operating expense	18,875	3,068	21,740	22,174
Passenger fuel cost [11]			7,035	NA
Passenger nonfuel cost			14,711	NA
Scheduled service ASM's (mils)			332,398	339,366
Passenger nonfuel operating expense per ASM (dollar)			0.04426	NA
Passenger fuel expense per ASM (dollar)			0.02116	NA
Total expense per ASM (dollar)			0.06542	0.06593
Percent change in Nonfuel operating expense per ASM (percent)			15.61	NA
Projected change in nonfuel expense from April 1, 1981 to April 1, 1982 [6]			15.61	NA
Estimated change in fuel cost, year ended September 1, 1981, average to April 1, 1982 [14]			2.66	NA
Nonfuel operating expense per ASM at April 1, 1982 (dollar) [7]			0.05116	NA
Fuel expense per ASM at April 1, 1982 (dollar) [7]			0.02444	NA
Total expense per ASM at April 1, 1982 (dollar) [7]			0.08360	[15] 0.08344
Year ended March 1977				
Total operating expense (mils) [1]	$11,726	$1,590	$13,316	$13,801
Less:				
All-cargo expense [2]	238		238	238
Belly offset [3]	729	96	825	865
Nonscheduled [4]	220	35	255	266
Trans. related [5]	427	111	538	554
Passenger operating expense	$10,112	$1,348	$11,460	$11,878
Capitalized lease adjustment [10]				(112)
Revised passenger operating expense				$11,566
Scheduled service ASM's (mils)			303,021	295,837
Operating expense per ASM (dollars)				0.04351
Projected expense per ASM (dollars) as at July 1, 1977 [13]				0.04549
Projected operating expense per ASM as at April 1, 1982 (page 1) (dollar)				0.08344
Cost adjustment factor [8]				83.42
Change from prior SIFL				+2.94

[1] Total operating expense for all operations and service (in millions).
[2] Scheduled all-cargo operations expense.
[3] Total scheduled-service cargo revenue, less scheduled all-cargo operations revenue, carried as a by-product in aircraft belly compartments. Includes freight, express, priority and non-priority U.S. mail, and excess baggage.
[4] Total non-scheduled revenues times .95, assuming charter operations would only be conducted at a profit.
[5] Total transport-related expense, less any excess of expense over total transport-related revenues.
[6] We here project costs from April 1, 1981, (the midpoint of the data year ended September 1, 1981) to April 1, 1982 the resultant increase factor effective through June 30, 1982.
[7] Operating expense per ASM for year-ended September, 1981 times projected change.
[8] Projected operating expense per ASM on April 1, 1982 divided by the operating expense as at July 1, 1977.
[9] Adjustment results in a 2.94 percent increase.
[10] Now that all appropriate leases have been capitalized, we have discontinued our adjustment of current data by restating the base period.
[11] Total fuel cost, scheduled service, times complement of rate of All-Cargo expense to total Operating Expense.
[12] Order 77-7-28.
[13] Year ended March 1977 cost per ASM, times cost escalation factor of 1.04543 (to July 5, 1977). See DPFI workpapers, Y.E. March, 1977.
[14] Estimated average cost per gallon for the trunk plus local service carriers at April 1, 1982 divided by the average for the year ended September 1981 (99.72¢).
[15] Change in Trunks plus Locals cost per ASM as at April 1, 1982 to year ended September, 1981 times Total Passenger/Cargo cost for the year ended September, 1981.
[16] Includes Alaskan, Hawaiian and other regional carriers.

Notes:
D.P.F.I. Formula effective July 15, 1977 (Order 77-7-28). Terminal charge, $16.16; plus: $0.0884 per mile (0 to 500 miles); $0.0574 per mile (501 to 1,500 miles); $0.0346 per mile (over 1,500 miles).
SIFL formula through June 30, 1982. (Adjustment results in a 2.94 percent increase). Terminal charge, $29.84; plus: 0.1621 per mile (0 to 500 miles); 0.1238 per mile (501 to 1,500 miles); 0.1189 per mile (over 1,500 miles).

DEPARTMENT OF COMMERCE

International Trade Administration

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of

whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, on or before January 12, 1982.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, in Room 2119 of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 82–00042. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550. Article: Mass Spectrometer, Model ISOMASS 54E and Accessories. Manufacturer: VG Isotopes Limited, United Kingdom. Intended use of article: The article is intended to be used for studies of lunar samples, meteorites, geological samples, and materials of interest to the nuclear weapons test program. The article will be used for high-precision measurements of the isotopic composition of various elements isolated from the above-cited materials. Elements to be analyzed shall include but not be limited to Li, K, Ca, Tl, Rb, Sr, Nd, Sm, Gd, Pb, U, and Pu. The experiments to be conducted will include the following:

(a) Studies of isotopic anomalies in extra-terrestrial materials.

(b) Studies of cosmic-ray irradiation effects in extra-terrestrial materials.

(c) Chronology studies in terrestrial and extra-terrestrial materials.

(d) Development of isotopic analysis techniques of use to the nuclear weapons test program.

Application received by Commissioner of Customs: November 9, 1981.

Docket No.: 82–00050. Applicant: Butterworth Hospital, 100 Michigan N.E., Grand Rapids, MI 49503. Article: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for the ultrastructural morphology/investigation of human surgical and autopsy tissue specimens. Experiments will be conducted to increase the capability of the surgical pathology department to make the correct diagnosis in those cases in which the light microscopic findings are equivocal. A second objective will be to examine and record the ultrastructural morphology of specific pathologic diseases in order to further increase knowledge and understanding of pathogenesis, cell type and morphology with the ultimate objective of increasing the specificity and accuracy of light microscopic diagnoses. The article will also be used in an electron microscopy training course which will provide the residents with the ability to interpret and understand the medical literature, to be able to eventually direct their own programs and apply electron microscopy to surgical pathology in their own institutions if they wish to specialize in this field or to understand when and if the use of electron microscopy is appropriate and applicable to an individual problem in surgical pathology, even if they do not choose to specialize in the field themselves. Application received by Commissioner of Customs: November 18, 1981.

Docket No.: 82–00051. Applicant: Baylor University Medical Center, 3500 Gaston Avenue, Dallas, Texas 75246. Article: TP–11 Radiotherapy Planning System. Manufacturer: Atomic Energy of Canada, Ltd., Canada. Intended use of article: The article is intended to be used for studies of the efficacy of the use of radiation in the treatment of cancer patients along with the various implications and attendant effects of the use of this modality. The interaction of a number of different types of radiation is to be investigated for the individual patient having a diagnosis of cancer and being treated in a medical center. In addition, the article will be used for educational purposes in the courses: Radiation Physics, Computer Applications in Medicine, Dosimetry of Treatment Planning, and Review of Radiation Physics for Residents. Application received by Commissioner of Customs: November 18, 1981.

Docket No. 82–00052. Applicant: Pacific Dental Research Foundation, University of the Pacific, School of Dentistry, 2155 Webster Street, San Francisco, CA 94115. Article: Titanium Product System for Osseointegration. Manufacturer: Bofors Nobelpharma, Sweden. Intended use of article: The article is intended to be used for a research project based upon the principle of osseointegration, developed by a team of Swedish scientists. The principle of osseointegration denotes permanent anchoring of the titanium implants by direct connection of the implants to vital remodelling jawbone without any intermediary connective tissue coat. This bio-mechanical connection requires a combination of surgical techniques and specialized instrumentation, based upon biological knowledge about optimization of the healing process of bone tissue in contact with the inert implant material with a special micro-structure. Application received by Commissioner of Customs: November 18, 1981.

Docket No. 82–00053. Applicant: Texas Tech University School of Medicine, Department of Anatomy, Texas Tech University Health Sciences Center, Lubbock, TX 79430. Article: Electron Microscope, Model H–600–3 and Accessories. Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of article: The article is intended to be used for cell biological research primarily in the field of teratology. In these studies, material examined will be rat embryonic hearts from normal controls and animals with environmentally-induced cardiac malformations. Results will be compared with comparably staged defective human hearts obtained from stillborn or spontaneously aborted fetuses. Experiments conducted on rats include determination of the relationship of mucopolysaccharide metabolism to cardiac defects and intra-amniotic therapy with mucopolysaccharide precursors in preterm diagnosis of a defect. Additional experiments are designed to screen the ultrastructural effects of various drugs on cardiac developments. The overall objective of the research is to examine cogenital cardiac defects, induced by a variety of teratogens, as to their cellular mechanisms of formation.

In addition to the above research, the article may be used by other researchers whose work involves:

1. Morphological and histochemical studies of tanycytes in the third ventricle of the brain.

2. Morphological, histochemical and autoradiography studies into the development of smooth muscle implants in cardiac tissue.

3. Morphological studies into the development of the endocardium and extracellular matrix in developing systems.

The article will also be used to train graduate students working for the Ph.D. degree in Anatomy. Application received by Commissioner of Customs: November 18, 1981.

Docket No.: 82–00054. Applicant: Northwestern University Medical School, Department of Molecular Biology, 303 East Chicago Avenue Searle 4–541, Chicago, IL 60611. Article: Electron Microscope, JEM 100S with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies

of the following materials or phenomena:

(a) Plasmid DNA molecules isolated from prokaryotic and eukaryotic cells.

(b) DNA-binding proteins from bacterial cells.

(c) RNA molecules during transcription.

(d) DNA—histone complexes from eukaryotic cells.

(e) Hormone receptors on cell membranes.

(f) Replicating DNA molecules from extrachromosomal genomes.

(g) Ultrastructural studies of differentiating cells.

The article will also be used for the training of Ph. D. candidates, postdoctoral students, and medical and dental students in molecular biology and biochemistry. Application received by Commissioner of Customs: November 18, 1981.

Docket No.: 82-00055. Applicant: Indiana University, Purchasing Department (for Fine Arts), 1101 East Seventeenth St., Bloomington, IN 47405. Article: Infrared Reflectography Equipment. Manufacturer: Grundig Nederland, B.V., The Netherlands. Intended use of article: The article will be used for the following purposes:

(1) to examine art works to reveal underdrawing and stages of the painting process in art historical research.

(2) to assist in determining the authenticity of works of art in the Indiana University Museum of Art.

(3) to determine the condition of works of art in problems of conservation.

(4) to instruct undergraduate and graduate students in art history, conservation, and museology in the operation of the equipment and the interpretation of the technical documents obtained when using infrared reflectography. Application received by Commissioner of Customs: November 18, 1981.

Docket No.: 82-00056. Applicant: University of Minnesota, 111 Church Street, SE., Minneapolis, MN 55455. Article: Hexagonal Concave Mirrors. Manufacturer: Boussois, S.A., France. Intended use of article: The articles will be used to concentrate sunlight to a very high intensity so that it can be used to heat materials to very high temperatures. High temperature thermochemical properties of refractory metals and ceramic materials are to be studied. The properties to be investigated include vaporization rates, deformation characteristics, and chemical reactivity. Application received by Commissioner of Customs: November 18, 1981.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Racing Plates (Aluminum Horseshoes) From Canada; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on racing plates (aluminum horseshoes) from Canada. The review covers the two known exporters of this merchandise to the United States during the review period, February 1, 1980 through January 31, 1981. There are no known unliquidated entries.

As a result of this review, the Department has preliminarily determined to require cash deposits equal to the calculated margin for the last shipments by that firm for which information was available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 23, 1981.

FOR FURTHER INFORMATION CONTACT: E. Valerie Newkirk or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-5345/5289).

SUPPLEMENTARY INFORMATION:

Procedural Background

On December 29, 1980, the Department published in the **Federal Register** (45 FR 85494) the final results of its first administrative review of the antidumping finding on racing plates (aluminum horseshoes) from Canada (39 FR 54388, February 27, 1974). The Department announced in the **Federal Register** of March 16, 1981 (46 FR 16921) its intent to conduct the next administrative review by the end of February 1982. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review of the finding on racing plates (aluminum horsehorses) from Canada.

Scope of the Review

The imports covered by this review are racing plates (aluminum horseshoes) that are used on race horses, polo, jumping, hunting, and other performing horses, as differentiated from pleasure any work horses, are made of aluminum, may have cleats or caulks, and come in a variety of sizes. Racing plates (aluminum horseshoes) are currently classifiable under item 652.4200 of the Tariff Schedules of the United States Annotated (TSUSA).

The Department knows of two Canadian exporters of racing plates (aluminum horseshoes) to the United States during the period of review, Canadian Racing Plate Co. Limited, and Equine Forgings Limited. The review covers the period February 1, 1980 through January 31, 1981.

There were several small shipments from each firm during this period. In each case the entries were inadvertently liquidated by the Customs Service. Since Canadian Racing Plate Co. Ltd. had no sales in Canada for the period we are unable to calculate a cash deposit rate based on this period; therefore, the best information for cash deposit purposes is the rate established in the prior review. The response received from Equine Forgings Limited was inadequate; therefore, we used the best information available to determine the estimated deposit rate. The best information available is the rate for Canadian Racing Plate Co. Limited. There are no known unliquidated entries for the review period.

Preliminary Results of the Review

As provided by §353.48(b) of the Commerce Regulations, we preliminary determine that a cash deposit of estimated duties of 31.94 percent of the entered value, based on the margin calculated on the last shipments by Canadian Racing Plate Co. Limited for which information was available, shall be required on all shipments of racing plates (aluminum horseshoes) from Canada entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the administrative review. For any shipments from a new exporter not covered in this administrative review, unrelated to any covered firm, a cash deposit shall be required at the highest rate for responding firms with shipments during the most recent period in which shipments occurred. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results on or before January 22, 1982, and may request disclosure and/or a hearing on or before January 7, 1982. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

(Section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and §353.53 of the Commerce Regulations (19 CFR 353.53))

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 10, 1981.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council's Anchovy/Jack Mackerel Subpanel; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), has established an Anchovy/Jack Mackerel Subpanel which will meet to discuss amendment #3 to the northern Anchovy Fishery Management Plan and the calibration of the 1982 biomass estimate. Information obtained at this meeting will be presented to the Council at its January 26-28, 1982, meeting in Seattle, Washington.

DATE: The public meeting will convene on Thursday, January 21, 1982, at approximately 10 a.m., and will take place in the auditorium of the California State University Headquarters, 400 Golden Shore, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street—Second Floor, Portland, Oregon 97201, Telephone: (503) 221-6352.

Dated: December 17, 1981.

Jack L. Falls,

Chief, Administrative Support Staff, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

Privacy Act of 1974; Deletions of Systems Notices

AGENCY: Office of the Secretary of Defense (OSD).

ACTION: Deletions of systems notices.

SUMMARY: The Office of the Secretary of Defense proposes to delete the notices for systems of records: DPA DXA.A 07, "Personnel Files," DPA DDI.B 03, "Portrait-Photograph File," DPA DDI.C 04, "Case Files," and DPA DDI.A 02, "Biography File" subject to the Privacy Act of 1974. It has been determined that the personnel data contained in these systems duplicates the information contained in Privacy Act systems of records maintained by the Military Services and by OPM/GOVT-1.

DATES: These deletions shall be effective January 22, 1982.

ADDRESS: Send any comments to the System Managers identified in the systems notices (44 FR 74088) December 17, 1979.

FOR FURTHER INFORMATION CONTACT: Norma Cook, Privacy Act Officer, ODASD(A), Room 5C315, Pentagon, Washington, D.C. 20301. Telephone: (202) 695-0970.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense (OSD) systems notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a) Pub. L. 93-579 were published in the **Federal Register.**

BILLING CODE 3810–01–M

DEPARTMENT OF EDUCATION

National Advisory Council on Bilingual Education; Meeting

AGENCY: National Advisory Council on Bilingual Education.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Bilingual Education. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES:

January 16, 1982—Public Hearings—9:00 a.m.–4:00 p.m.
January 28, 1982—Public Hearings—9:00 a.m.–5:00 p.m.
January 29–31, 1982—Business Meetings—9:00 a.m.–5:00 p.m.

ADDRESSES: The Public Hearings of January 16, 1982 will be held at the San Francisco Downtown Hilton Hotel, Mason & O'Farrell Streets, San Francisco, CA. The January 28, 1982 Public Hearings will be held at the HHS North Building Auditorium, 330 Independence Avenue, SW., Washington, DC. The Business Meetings of January 29–31, 1982 will be held at the Reporters Building, 300 7th Street, SW., Room 402, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ramon Ruiz, Designated Federal Official, Room 421, Reporters Building, 400 Maryland Avenue, SW., Washington, DC 20202 (202–245–2600).

SUPLEMENTARY INFORMATION: The National Advisory Council on Bilingual Education is established under Section 732(a) of the Bilingual Education Act (20 U.S.C. 3242). The Council is established to advise the Secretary of the Department of Education concerning matters arising in the administration of the Bilingual Education Act and other laws affecting the education of limited English proficient populations.

The meeting of the Council is open to the public. The proposed agenda includes the following:

January 16, 1982 and January 28, 1982

The Council will take testimony from 9:00 a.m. to 4:00 p.m. (January 16) and 9:00 a.m. to 5:00 p.m. (January 28) on the following topics:

(1) 1983 Reauthorization.
(2) Research.
(3) Reports of the Effectiveness of Bilingual Education.
(4) Structure of Education Foundation and the Role of the Office of Bilingual Education and Minority Languages Affairs and other language related programs.
(5) Interrelations and Interdependency of Bilingual Education and Modern Language Teachers.
(6) Importance of Bilingual Education on International Trade and Commerce.

The following procedures shall be observed during the public hearings:

(1) Witnesses shall be heard on a first come basis.
(2) Witnesses shall limit their testimony to twenty minutes.
(3) All testimony shall be tape recorded.
(4) Exceptions to the aforementioned procedures shall be at the discretion of the Chairperson.

January 29–31, 1982

The Business Meeting agenda includes the following:

I. Call to Order.
II. Approval of the Minutes.
III. Committee Reports.
IV. Other Reports.
V. Committee Reports & Action Items.
VI. Old Business.
VII. New Business.
VIII. Other.
IX. Adjournment.

Records are kept of all Council proceedings, and are available for public inspection at the Office of Bilingual Education and Minority Languages Affairs, Room 421, Reporters Building, 400 Maryland Avenue, SW., Washington, DC 20202 from the hours of 9:00 a.m. to 5:00 p.m.

Dated: December 18, 1981.

Jesse M. Soriano,

Director, Office of Bilingual Education and Minority Languages Affairs.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Extension of Comment Period for the Draft Northeast Regional Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of extension of the comment period on the Draft Enviromental Impact Statement (DEIS).

SUMMARY: The Department of Energy (DOE) announced the availability of the Draft Northeast Regional Environmental Impact Statement (DOE/EIS–0083–D) on November 17, 1981 (46 FR 56494). In that notice written comments on the document were invited and receipt was requested by January 5, 1982, in order to insure consideration in preparing the final environmental impact statement. In response to requests for an extension of time, DOE is extending the comment period to February 5, 1982.

ADDRESS: Comments should be sent to: Ms. Marsha S. Goldberg, Department of Energy, Office of Fuels Conversion, Economic Regulatory Administration, 2000 M Street, NW., Room 6128, Washington, D.C. 20461, Phone No. (202) 653–3374.

Issued in Washington, D.C., December 17, 1981.

William A. Vaughan,

Assisant Secretary, Environmental, Protection, Safety, and Emergency Preparedness.

[FR Doc 81–36001 Filed 12–22–81; 8:45 am]
BILLING CODE 6450–01–M

Economic Regulatory Administration

Summit Transportation Co.; Action Taken on Consent Order

Correction

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken on consent order—correction.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of a correction to the **Federal Register** Notice published on June 1, 1981, which gave notice of a Consent Order issued as signed.

DATE: December 11, 1981.

FOR FURTHER INFORMATION CONTACT: William Harrison, Division Director, Crude Producers and Crude Resellers, Office of Special Counsel, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633–9640.

SUPPLEMENTARY INFORMATION: On March 4, 1981, 46 FR 15203 (1981), the Office of Enforcement of the ERA published notification in the **Federal Register** that it had executed a Consent Order with Summit Transportation Company (Summit) on January 6, 1981. Interested persons were invited to submit comments concerning the terms, conditions or procedural aspects of the Consent Order.

On June 1, 1981, the Office of Enforcement of the ERA erroneously published notification in the **Federal Register**, "Although interested persons were invited to submit comments

regarding the Consent Order to the DOE, no comments were received." One comment, however, was received. The commentor recommended that the Consent Order be modified to require that refunds be paid to those customers which were directly overcharged by Summit. The terms of the Consent Order do not direct a specific distribution of the refunds and do not prevent the distribution suggested by the commentor. The ERA has therefore determined that the Consent Order should not be modified.

Issued in Washington, D.C. on the 11th day of December, 1981.

Robert D. Gerring,

Director, Program Operations Division, Economic Regulatory Administration.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59074; TSH-FRL-2012-4]

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the Federal Register of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by: January 7, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS-59074]" and the specific TME number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E-401, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M Street SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on TMEs received by the EPA:

TME 81-49

Close of Review Period. January 28, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:

Annual sales—Less than $1,000,000.

Manufacturing site—Pacific region.

Standard Industrial Classification Code—284.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Protein associated biopolymer.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a biosurfactant.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. Claimed confidential business information.

Toxicity Data

Acute oral toxicity LD_{50}—>5g/kg.

Acute dermal toxicity LD_{50}—>5g/kg.

Skin irritation—Mild dermal irritant.

Eye irritation—Mild to moderate irritant.

Environmental Test Data

Inhalation toxicity LC_{50} 1 hr. (rat)—>0.47 mg/1.

Exposure. The manufacturer states that the new chemical substance is biodegradable and the only adverse effect known from the manufacture and/or use of the new chemical is inhalation of dust of the new chemical substance when it is in a powdered form, may produce temporary flu-like systems. However, after initial exposure, persons have appeared to develop an immunity to the dust. Further, the dust problem will be substantially eliminated by use of breathing devices during manufacture and blending of the new chemical substance. The new chemical substance will be dispersed or dissolved in a liquid medium during use. Use of the compound will involve exposure to non-chemical industrial and commercial employees no more than 5 times per week with potential skin contact.

Environmental Release/Disposal. The manufacturer states that the substance will be used in an open use that will release from about 5,000 kg/yr to 50,000 kg/yr to the environment. There will be release in an industrial waste stream to a publicly owned treatment works (POTW).

TME 81-50

Close of Review Period. January 28, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:

Annual sales—$500,000,000.

Manufacturing site—Atlantic region.

Standard Industrial Classification Code—739.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Saturated dicarboxylic acid diamine polyamide.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used in an open use that will release less than 50 kg of the substance (landfill) during the test market period.

Production Estimates

	Kilograms	
	Minimum	Maximum
3 months	200	1,000

Physical/Chemical Properties.

Flash point, open cup—275°C.

Viscosity (Brookfield) at room temperature—610 poise.

Density—0.994.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that a maximum of 2 workers/day for 3 hrs/day for 25 days may have dermal exposure during packaging and clean-up operations at one site and 3 workers/week for 8 hrs/day for 20 days may have dermal exposure at another site. The use may also involve a restricted and minimal consumer exposure to the substance as part of an article.

Environmental Release/Disposal. The manufacturer states that less than 50 kg of the substance will be released to the environment (landfill) during the test marketing period.

Released material would be in the form of a viscous liquid from vessel cleanout and maintenance and would be disposed of at an EPA approved landfill.

Dated: December 15, 1981.

Woodson W. Bercaw,

Acting Director, Management Support Division.

[FR Doc 81-36646 Filed 12-22-81; 8:45 am]

BILLING CODE 6560-31-M

[OPTS-51368; TSH-FRL-2012-2]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of two PMNs and provides a summary of each.

DATES: Written comments by:
PMN 81-630—February 7, 1982.
PMN 81-631—February 8, 1982.

ADDRESSES: Written comments, identified by the document control number "[OPTS-51368]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202-426-2601).

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81-630

Close of Review Period. March 9, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:
Annual sales—$450,000,000.
Manufacturing site—South Atlantic region.
Standard Industrial Classification Code—282.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Poly(ester)—Co-poly(ether).

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used in a commercial and consumer textile fiber.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. Claimed confidential business information.

Toxicity Data

Acute dermal toxicity LD_{50}—Non-irritating and non-sensitizing.
Skin irritation—Non-toxic.
Skin sensitization—Non-toxic.
Repeated insult patch test/photosensitization study in human subjects—Non-toxic.

Exposure. Claimed confidential business information.

Environmental Release/Disposal. Disposal is to an approved landfill.

PMN 81-631

Close of Review Period. March 10, 1982.

Manufacturer's Identity. Franklin Chemical Industries, Inc., 2020 Bruck Street, Columbus, OH 43207.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Polymer of mixed alkyl acrylates and methacrylates.

Use. The manufacturer states that the PMN substance will be used as a pressure-sensitive adhesive for packaging tapes, labels, etc.

PRODUCTION ESTIMATES

	Kilograms per year	
	Minimum	Maximum
1st year	250	15,000
2d year	15,000	50,000
3d year	50,000	100,000

Physical/Chemical Properties

PH—4-5.
Specific gravity—1.02-1.03.
Boiling point—210° F.
Viscosity—500-3,000 cps.
Solubility:
Water—Dispersible.
Percent solids—58-60.
Biodegradability—Very slow.
Chemical oxidation—Very slight.
Particle size—0.1 to 0.2 microns.
Hydrolysis—Slight.
Photochemical degradation—Very slight.

Toxicity data. No data were submitted.

Exposure. The manufacturer states that during manufacture, use and disposal 7 workers may experience dermal exposure up to 8 hrs/day, up to 37 days/yr.

Environmental Release/Disposal. The manufacturer states that 100-1,000 kg/yr will be released to water 0.5 hr/day, up to 37 days/yr. Disposal is by publicly owned treatment works (POTW) and approved landfill.

Dated: December 11, 1981.

Woodson W. Bercaw,

Acting Director, Management Support Division.

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81-632

Close of Review Period. March 11, 1982.

Manufacturer's Identity. S. C. Johnson & Son, Inc., 1525 Howe Street, Racine, WI 53403.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Methacrylate copolymer.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used in a highly dispersive manner.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. No data were submitted.

Toxicity Data

Oral toxicity LD_{50}—Very low order.

Dermal toxicity LD_{50}—Not dermally absorbed.

Skin sensitization—No known sensitizers.

Exposure. Claimed confidential business information.

Environmental Release/Disposal. Disposal is by landfill and incineration.

PMN 81-633

Close of Review Period. March 11, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:

Annual sales—$5,000,000,000.

Manufacturing site—Middle Atlantic region.

Standard Industrial Classification Code—285.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Hydroxy alkenyl borate.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used in a contained use.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties.

Appearance—Light tan liquid.

Flash point—354°F.

Viscosity Gardner-Hodlt @ 210F°—12.2 cSt.

Density (20°C)—0.95.

Vapor pressure @ 70°F—.002 Psia.

Toxicity Data

Acute oral toxicity LD_{50}—5 g/kg.

Acute dermal toxicity LD_{50}—2 g/kg.

Skin irritation—4.0/8.0.

Eye irritation—6.7 at 1 hr. decreasing to 0.0/110 by 72 hrs.

Ames salmonella—Negative.

Exposure. Claimed confidential business information.

Environmental Release/Disposal. Claimed confidential business information.

Dated: December 14, 1981.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of four PMNs and provides a summary of each.

DATE: Written comments by: PMN 81-634, 81-635, 81-636, and 81-637, February 12, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS-51370]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Room E-409, 401 M Street, SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-216, 401 M Street, SW., Washington, D.C. 20460, (202-426-2601).

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81-634

Close of Review Period. March 14, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:

Annaul sales—Under $1,000,000.

Manufacturing site—Pacific region.

Standard Industrial Classification Code—284.

Specific Chemical Identify. Claimed confidential business information. Generic name provided: Protein associated biopolymer.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a biosurfactant.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. Claimed confidential business information.

Toxicity Data.

Acute oral toxicity LD_{50} (rat)—5 g/kg.

Acute dermal toxicity LD_{50} (rat)—2 g/kg.

Primary skin irritation (rabbit)—slight irritant.

Primary eye irritation (rabbit)—Moderate irritant.

Skin sensitization (guinea pig)—Non-sensitizing.

Exposure. The manufacturer states that during manufacture, processing, use, and disposal workers may experience dermal and inahlation exposure.

Environmental Release/Disposal. Claimed confidential business information.

PMN 81-635

Close of Review Period. March 14, 1982.

Manufacturer's Identity. E. I. du Pont de Nemours and Company, Inc., 1007 Market Street, Wilmington, DE 19898.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Metal salt of the coupling product of amino naphthalene sulfonic acid and β-oxynaphthoic acid.

Use. The manufacturer states that the PMN substance will be used in the paint and plastics market.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties

Appearance—Dry solid powder.

pH—8-9.

Specific gravity—1.52.

Solubility: water—Trace.

Color—Red.

% volatiles by weight—3-4%.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that during manufacture a total of 120 workers may experience dermal and inhalation exposure 8 hrs/day, up to 10 days/yr.

Environmental Release/Disposal. Disposal is to a publicly owned treatment works (POTW), an off-site land disposal, and air emissions.

PMN 81-636

Close of Review Period. March 14, 1982.

Manufacturer's Identity. E. I. du Pont de Nemours and Company, Inc., 1077 Market Street, Wilmington, DE 19898.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Metal salt of the coupling product of amino naphthalene sulfonic acid and β-oxynaphthoic acid.

Use. The manufacturer states that the PMN substance will be used in the ink, paint, and plastics market.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties.

Appearance—Powder solid.
pH—6.0–9.5.
Specific gravity—1.6–2.1.
Boiling point—760 mm Hg decomposes.
Melting point—Decomposes.
Solubility: water—Not soluble.
Color—Red.
% volatiles by weight—< 4% (depending on code)

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that during manufacture a total of 120 workers may experience dermal and inhalation exposure up to 8 hrs/day, up to 44 days/yr.

Environmental Release/Disposal. Disposal is to a POTW, an off-site land disposal, and air emissions.

PMN 81-637

Close of Review Period. March 14, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:
Annual sales—Over $500,000,000.
Manufacturing site—Atlantic region.
Standard Industrial Classification Code—282.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Saturated dicarboxylic acid diamine polyamine.

Use. Claimed confidential business information.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties.

Flash point, (open cup)—275°C.
Solubility: water—Essentially insoluble.
Density—0.994.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that during manufacture and processing 9 workers may experience exposure 8 hrs/day, 75 days/yr during maintenance, packaging and cleanup operations.

Environmental Release/Disposal. Disposal is to an approved landfill.

Dated: December 15, 1981.

Woodson W. Bercaw,

Acting Director, Management Support Division.

[FR Doc. 81-36649 Filed 12-22-81; 8:45 am]
BILLING CODE 6560-31-M

[PF-160B; PH-FRL-2013-6]

Dow Chemical Co.; Amendments to Pesticide Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Dow Chemical Co. has amended a pesticide petition by proposing to increase established tolerances for the combined residues of chlorpyrifos and its metabolite in or on certain raw agricultural commodities.

ADDRESS: Written comments to: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Written comments may be submitted while the petition is pending before the agency. The comments are to be identified by the document control number "[PF-160B]" and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger (703-557-2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice of filing in the **Federal Register** of December 12, 1979 (44 FR 71895) that Dow Chemical Co., PO Box 1706, Midland, MI 48640, had submitted a pesticide petition (PP OF2281) to EPA. The petition proposed that 40 CFR 180.342 be amended by establishing tolerances for the combined residues of the insecticide chlorpyrifos [*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate] and its metabolite 3,5,6-trichloro-2-pyridinol in or on the raw agricultural commodities alfalfa green forage at 4.0 parts per million (ppm) and alfalfa hay at 15.0 ppm.

Dow Chemical Co. has submitted amendments to the petition by increasing the established tolerances for fat, meat, and meat byproducts of cattle from 1.5 ppm to 2.0 ppm and milk, fat with 0.01 ppm (N) in whole milk from 0.25 ppm to 0.5 ppm with 0.02 ppm (N) in whole milk. The proposed analytical method for determining residues is by gas chromatography equipped with a hydrogen flame ionization detector.

(Sec. 408(d); 21 U.S.C. 346a)

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-32-M

[PF-30B; PH-FRL-2013-5]

FMC Corp.; Pesticide Petition; Corporation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice corrects a pesticide petition proposing the establishment of a tolerance for residues of the insecticide carbofuran and its metabolites.

ADDRESS: Written comments to: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger (703-557-2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of October 15, 1981 (46 FR 50842) that FMC Corp. Agricultural Chemical Group, 2000 Market St., Philadelphia, PA 19103, had submitted an amendment to pesticide petition (PP 6F1789) by adding a tolerance proposal for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate), its carbamate metabolite, 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N*-methylcarbamate, and the phenolic metabolites, 2,3-dihydro-2,2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol, and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol in or on the raw agricultural commodity squash at 0.8 part per million (ppm), of which not more than 0.6 ppm is carbamates.

In FR Doc. 81-29823, appearing in the third column of page 50842 under "SUPPLEMENTARY INFORMATION" under the petition number (PP 6F1789), line 15 the word "squash" is corrected to read "pumpkins" at the same tolerance levels.

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 135))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-32-M

FEDERAL COMMUNICATIONS COMMISSION

FCC Public-Use Forms Approved by OMB

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires all agencies to submit public reporting requirements to the Office of Management and Budget (OMB) for approval. Forms used to report information to the Commission must have OMB approval numbers by 1 January 1982. The public protection clause of the Act (section 3512) states that "* * * no person shall be subject to any penalty for failing to maintain or provide any information * * * if the information collection request was made after December 31, 1981, and does not display a current control number assigned by the Director * * *"

Until the Paperwork Reduction Act was passed, the General Accounting Office (GAO) was responsible for reviewing FCC forms and all FCC forms have a GAO clearance number indicating their approval. Recently, all of the Commission's public use forms were given OMB approval numbers. However, many of these forms are printed and stocked in large quantities by the Commission to ensure availability. For this reason, the Commission holds supplies of these forms printed prior to OMB's review and approval, which do not show the appropriate numbers. These forms have been approved as required and should be used as before. Attached is a list of all FCC forms, showing the new OMB number assigned, the former GAO code, the FCC form number, and the title of the form. When current stocks are depleted, new forms showing the OMB numbers will be printed. Until that time, the current forms should be used. Unless directed otherwise, all forms on the list will continue to be required and should be submitted within established deadlines.

For further information, contact Richard D. Goodfriend, Office of Managing Director, (202) 632-7513.

William J. Tricarico,

Secretary, Federal Communications Commission.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10327; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: T-4007.

Filing Party: Mr. Carl S. Parker, Jr., Traffic Manager, Port of Galveston, P.O. Box 328, Galveston, Texas 77553.

Summary: Agreement No. T-4007 between the Board of Trustees of the Galveston Wharves (Galveston Wharves) and Southern Stevedoring Co., Inc. (Lessee), provides for the lease by Galveston Wharves of premises located at Piers 19 and 21 in the Port of Galveston to be used as a public terminal for the handling of bananas, other tropical fruit and other general cargo. As rent Lessee shall pay to the Galveston Wharves $40,000 per annum. The term of the lease is for one year, with an option for one renewal period of one year. Rental for the option period will be renegotiated. Indemnity, insurance, liabilities, maintenance and repair are as agreed to by the parties.

Agreement No.: 17-41.

Filing Party: Mr. Elkan Turk, Jr., Burlingham Underwood and Lord, One Battery Park Plaza, New York, New York 10004.

Summary: Agreement No. 17-41 modifies the basic agreement of the Far East Conference to comply with the Commission's General Order 7 requirements.

Agreements Nos.: 4610-29 and 8120-22.

Filing Party: Mr. Nathan J. Bayer, Freehill, Hogan & Mahar, 21 West Street, New York, New York 10006.

Summary: Agreements Nos. 4610-29 and 8120-22 amend the basic agreement of the United States Atlantic & Gulf/Jamaica Conference and the United States Atlantic & Gulf-Haiti Conference to (1) allow the parties to vote to suspend self-policing provisions when there are less than three parties to the agreement and (2) provide for automatic reinstatement of the self-policing provisions thirty days from the effective date of membership of an additional party.

By order of the Federal Maritime Commission.

Dated: December 17, 1981.

Francis C. Hurney,

Secretary.

[FR Doc. 81-36680 Filed 12-22-81; 8:45 am]

BILLING CODE 6730-01-M

Filing and Approval of Agreement

The Federal Maritime Commission hereby gives notice that on November 30, 1981, the following agreement was filed with the Commission pursuant to section 15 of the Shipping Act, 1916, as amended by section 4 of the Maritime Labor Agreements Act of 1980, Pub. L. 96-325, 94 Stat. 1021, and was deemed approved that date, to the extent it constitutes an assessment agreement as described in the fifth paragraph of section 15, Shipping Act, 1916.

Agreement No. LM-82.

Filing Party: James Patrick Cooney, Esquire, Royston, Rayzor, Vickery & Williams, 2200 Texas Commerce Tower, Houston, Texas 77002.

Summary: Agreement No. LM-82 is a Resolution of the West Gulf Maritime Association (WGMA) establishing the Guaranteed Annual Income Program and Fringe Benefits Contract Administration Assessment. The Assessment will be collected and administered by WGMA for funding various agreements between WGMA and the South Atlantic and Gulf District, International Longshoremen's Association including, but not limited to, the Guaranteed Annual Income Program, the Manpower Development Program, implementation of the Stabilization and Decasualization Program, Safety Training Program, and general expenses of administering such agreements.

By order of the Federal Maritime Commission.

Dated: December 17, 1981.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 2077-R]

Jester International Forwarding Co., Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.15(d) of Federal Maritime Commission General Order 4 further provides that a license shall be automatically revoked for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of Jester International Forwarding Company, Inc., 2408 Timberlock Place, D-2, Woodlands, TX 77380 was cancelled effective February 1, 1980.

Jester International Forwarding Company, Inc., has failed to furnish a valid bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised), § 10.01(f) dated November 12, 1981;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 2077-R be and is hereby revoked effective February 1, 1980.

It is ordered, that Independent Ocean Freight Forwarder License No. 2077-R issued to Jester International Forwarding Company, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon Jester International Forwarding Company, Inc.

Albert J. Klingel, Jr.,

Director, Bureau of Certification and Licensing.

FEDERAL RESERVE SYSTEM

Aktivbanken A/S; Formation of Bank Holding Company

Aktivbanken A/S, Vejle, Denmark, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of National Bank of Long Beach, Long Beach, California. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than January 15, 1982. Any comment on an application that request a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, December 16, 1981.

Theordore E. Downing, Jr.,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Banks County Financial Corp.; Formation of Bank Holding Company

Banks County Financial Corporation, Homer, Georgia, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent (less directors' qualifying shares) of the voting shares of Bank of Banks County, Homer, Georgia. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than January 15, 1982. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, December 16, 1981.

Theodore E. Downing, Jr.,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Climbing Hill Bancshares, Inc.; Formation of Bank Holding Company

Climbing Hill Bancshares, Inc., Climbing Hill, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Climbing Hill Savings Bank, Climbing Hill, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Climbing Hill Bancshares, Inc., Climbing Hill, Iowa, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire

the business of Hoyd Insurance Agency, Climbing Hill, Iowa.

Applicant states that the proposed subsidiary would engage in general insurance agency activities in a town with a population of under 5,000. These activities would be performed from offices in Climbing Hill, Iowa, and the geographic area to be served is Climbing Hill, Iowa. This activity has been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than January 9, 1982.

Board of Governors of the Federal Reserve System, December 17, 1981.

Theodore E. Downing, Jr.,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Deutsche Bank AG; Proposed Acquisition of Freightliner Credit Corporation

Deutsche Bank AG, Frankfurt, Federal Republic of Germany, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Freightliner Credit Corporation, Portland, Oregon, through its indirect subsidiary, Mercedes Benz North America, a Delaware corporation.

Applicant states that the proposed subsidiary would make or acquire for its own account loans and other extensions of credit such as would be made or acquired by a finance company; lease personal property or act as agent, broker, or adviser in leasing such property; and act as agent or broker for credit life insurance that is directly related to extensions of credit. The indirect subsidiary and Freightliner Credit Corporation also propose to engage *de novo* in dealer inventory financing for dealers of all present and future affiliates of Mercedes Benz North America; retail financing; full pay-out leasing with respect to products sold by its various automobile and truck retail affiliates; and to act as insurance agent or broker for credit accident and physical damage insurance that is directly related to extensions of credit by Freightliner Credit Corporation.

These activities will be conducted from offices in Portland, Oregon; Claymont, Delaware; Atlanta, Georgia; Oak Brook, Illinois; and through various retail subsidiary dealerships of the automobile and truck affiliates throughout the United States, servicing the entire United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received no later than January 3, 1982.

Board of Governors of the Federal Reserve System, December 15, 1981.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Neurological and Communicative Disorders and Stroke; Neurological Disorders Program-Project Review B Committee; Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Neurological Disorders Program-Project Review B Committee, National Institutes of Health, February 12, and 13, 1982, in Conference Room 7, Building 31, NIH Bethesda, Maryland 20205.

The meeting will be open to the public from 8:00 a.m. until 9:00 a.m. on February 12th, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(4), and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on February 12th from 9:00 a.m. to adjournment on February 13th, for the review, discussion and evaluation of individual grant applications. The applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which could constitute a clearly unwarranted invasion of personal privacy.

Sylvia Shaffer, Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, MD 20205, telephone 301/496-5751, will furnish summaries of the meeting and roster of committee members.

Dr. Ellen G. Archer, Executive Secretary, Federal Building, Room 9C10B, Bethesda, MD 20205, telephone 301/496-9223, will furnish substantive program information.

(Catalog of Federal Domestic Assistance program No. 13.852, Neurological Disorders Program, National Institutes of Health)

National Institute of Allergy and Infectious Diseases and American Academy of Allergy; Symposium

The National Institute of Allergy and Infectious Diseases and the American Academy of Allergy will hold a symposium on February 25, 1982, entitled Occupational Immunologic Lung Disease. The program will cover immunologic aspects and other mechanisms of the disease and the state-of-the-art in hazard measurement, risk assessment, disease detection and measurement and patient evaluation. Participants will include medical scientists drawn from industry, health care delivery systems and government agencies, institutes and bureaus, and representatives of consumer, labor and industrial organizations.

The symposium, to be held in Washington, D.C. at the Department of Health and Human Services North Building Auditorium at 330 Independence Avenue, SW., is sponsored jointly by the Institute's Asthma and Allergic Disease Centers Program and the American Academy of Allergy. There is no registration fee, but pre-registration is required, and attendance will be limited.

For registration forms or additional meeting information call: Marsha Ryan at (301) 299–4380. For technical information call: Robert Goldstein at (301) 496–7104 or Janet Ayres at (301) 496–7551.

Dated: December 15, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4140–01–M

Neurological Disorders Program Project Review A Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Neurological Disorders Program Project Review A Committee, National Institutes of Health, February 16, 17 and 18, 1982 at the Monteleone Hotel, 214 Rue Royal, New Orleans, Louisiana 70140.

The meeting will be open to the public from 8:00 p.m. until 10:00 p.m. on February 16, 1982 to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(4), and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on February 17, 1982 from 8:00 a.m. to adjournment on February 18, 1982 for the review, discussion and evaluation of individual grant applications. The applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which could constitute a clearly unwarranted invasion of personal privacy.

Sylvia Shaffer, Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, MD 20205, (Tel. No. 301/496–5751) will furnish summaries of the meeting and roster of committee members.

Dr. Leon Jack Greenbaum, Jr., Executive Secretary, Federal Building, Room 9C14, Bethesda, MD 20205, telephone 301/496–9223, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.852, Neurological Disorders Program, National Institutes of Health)

NIH programs are not covered by OMB Circular A–05 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of that Circular.

Dated: December 11, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4140–01–M

National Advisory Child Health and Human Development Council; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, January 25–26, 1982, in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on January 25 from 9:00 a.m. to 5:00 p.m. with current status reports, review of the Reproductive Sciences Program, and scientific presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on January 26 from 9:00 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. The applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Council Secretary, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland 20205, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864, Population Research, and 13.865, Research for Mothers and Children, National Institutes of Health)

Note.—NIH programs are not covered by OMB Circular A–05 because they fit the description of "program not considered appropriate" in section 8(b) (4) and (5) of that Circular.

Dated: December 9, 1981.

BILLING CODE 4140-01-M

National Advisory General Medical Sciences Council; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory General Medical Sciences Council, National Institute of General Medical Sciences, National Institutes of Health, on January 28 and 29, 1982, Building 31, Conference Room 10, Bethesda, Maryland.

This meeting will be open to the public on January 28, 1982, from 9:00 a.m. to 3 p.m. for opening remarks; report of the Director, NIGMS; and other business of the Council. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public for approximately the last two hours of the day on January 28, 1982, and eight hours on January 29, 1982. It is estimated that the closed session will occur on January 28 from approximately 3:00 p.m. to 5:00 p.m., and on January 29, 1982, from 9:00 a.m. until adjournment, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Ellen Casselberry, Public Information Officer, National Institute of General Medical Sciences, National Institutes of Health, Room 9A12, Westwood Building, Bethesda, Maryland 20205, Telephone: 301, 496-7301 will provide a summary of the meeting and a roster of council members. Dr. Ruth L. Kirschstein, Executive Secretary, NAGMS Council, National Institutes of Health, Building 31, Room 4A52, Bethesda, Maryland 20205, Telephone: 301, 496-5231 will provide substantive program information.

BILLING CODE 4140-01-M

National Advisory Neurological and Communicative Disorders and Stroke Council and the Planning Subcommittee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council, January 28 and 29, 1982, at 9 a.m. in Building 31-C, Conference Room 6, National Institutes of Health, Bethesda, MD 20205. In addition, a meeting of the Planning Subcommittee of the above Council will be held on January 27, 1982, at 1 p.m. to approximately 5:30 p.m. in Building 31, Room 8A28, National Institutes of Health, Bethesda, MD 20205.

The meeting of the full Council will be open to the public from 9 a.m. until approximately 11:30 a.m. on January 28, 1982, to discuss administration, management and special reports. The meeting of the Planning Subcommittee will be open from 1 p.m. to approximately 3 p.m. on January 29 to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4), and 552b(c)(6) of Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the Advisory Council meeting will be closed to the public from approximately 11:30 a.m. on January 28, 1982, until the conclusion of the meeting that day, and from 8:30 a.m. until adjournment on January 29, 1982, for review, discussion and evaluation of Research Grant applications and applications for Teacher-Investigator Awards, Research Career Development Awards, and Institutional National Research Service Awards. The meeting of the Planning Subcommittee will be closed from approximately 3 p.m. to adjournment on January 29, 1982, also for the review, discussion and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Chief, Office of Scientific and Health Reports, Miss Sylvia Shaffer, Building 31, Room 8A06, NIH, NINCDS, Bethesda, Maryland 20205, telephone (301) 496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. John C. Dalton, Executive Secretary, Federal Building, Room 1016, Bethesda, Maryland 20205, telephone (301) 496-9248, will furnish substantive program information.

Public Health Service

Orderly Closure, Transfer, and Financial Self-Sufficiency of Public Health Service Hospitals and Clinics; Delegation of Authority

Notice is hereby given that in furtherance of the November 23, 1981, delegation by the Secretary of Health and Human Services to the Assistant Secretary for Health of authority concerning the orderly closure, transfer, and financial self-sufficiency of Public Health Service hospitals and clinics, the Assistant Secretary for Health has made the following delegations:

1. Delegation by the Assistant Secretary for Health to the Director, Medical Facilities Conversion Staff, Office of the Assistant Secretary for Health, with authority to redelegate, the authority delegated to the Assistant Secretary for Health under section 987, Subtitle J, Title IX of Pub. L. 97-35, Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 248b), concerning proposals for transfer or financial self-sufficiency of Public Health Service hospitals and clinics.

2. Delegation by the Assistant Secretary for Health to the Administrator, Health Services Administration, with authority to redelegate, the authority delegated to the Assistant Secretary for Health under section 988, Subtitle J, Title IX of Pub. L. 97-35, Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 249 note), concerning the continued care for merchant seamen hospitalized in Public Health Service Hospitals.

The July 1, 1973 delegation made by the Assistant Secretary for Health to the Administrator, Health Services Administration, has been superseded insofar as it pertains to the authorities under section 321 of the Public Health Service Act relative to the operation of the Public Health Service hospitals and clinics but only to the extent of the operation of the Public Health Service hospitals and clinics during the transition period pertinent to the orderly closure, transfer, and self-sufficiency of Public Health Service hospitals and clinics provided for under Subtitle J, Title IX of Pub. L. 97-35 the Omnibus Budget Reconciliation Act of 1981. Provision has been made for delegations and redelegations to other officials within the Public Health Service of the authority under section 321 of the Public Health Service Act to continue in effect provided they are consistent with the delegation to the Director, Medical Facilities Conversion Staff, Office of the Assistant Secretary for Health.

The above delegations became effective on December 3, 1981.

Dated: December 3, 1981.

Edward N. Brandt, Jr.,
Assistant Secretary for Health.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-81-1103]

General Prototype Housing Costs for One- to Four-Family Dwelling Units

Correction

In FR Doc. 81-34801 appearing on page 59494 in the issue of Friday, December 4, 1981, make the following corrections to the tables beginning on page 59494 and ending on page 59503:

(1) In the column headings, the dollar signs appearing with "Low Range", "Medium Range" and "High Range" should be removed. (The numbers refer to square-foot areas and not to dollars.)

(2) All of the boldface designations for the Field Offices should be moved above the column headings for "Market Area—Low Range—Medium Range—High Range".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Geological Survey

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Gulf of Mexico Outer Continental Shelf (OCS)

AGENCY: Geological Survey, Interior.

ACTION: Notice of availability of environmental documents prepared for OCS mineral exploration proposals on the Gulf of Mexico OCS.

SUMMARY: The USGS, in accordance with Federal Regulations (40 CFR Section 1501.4 and section 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related environmental assessments (EAs) and findings of no significant impact (FONSIs), prepared by the USGS for the following oil and gas exploration activities proposed on the Gulf of Mexico OCS. This listing includes all proposals for which environmental documents were prepared by the Gulf of Mexico OCS Region in the 3-month period preceding this Notice.

Activity/operator	Location	FONSI date
Sohio Production Co., EA No. 494, Plan Control No. N-0570.	OCS Block 563, Desoto Canyon Area; (44 mi from the Florida coast).	Aug. 5, 1981.

Persons interested in reviewing environmental documents for the proposals listed above or obtaining information about EAs and FONSIs prepared for activities on the Gulf of Mexico OCS are encouraged to contact the USGS office in the Gulf of Mexico OCS Region.

FOR FURTHER INFORMATION CONTACT: Deputy Conservation Manager, Offshore Operations Support, Gulf of Mexico OCS Region, U.S. Geological Survey, Post Office Box 7944, Metairie, Louisiana 70010, 504/837–4720.

SUPPLEMENTARY INFORMATION: The Conservation Division of the USGS prepares EAs and FONSIs for proposals which relate to exploration for oil and gas resources on the Gulf of Mexico OCS. The EAs examine the potential environmental effects of activities described in the proposals and present USGS conclusions regarding the significance of those effects. EAs are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA § 102(2)(C). A FONSI is prepared in those instances where the USGS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.

Lowell G. Hammons,

Conservation Manager, Gulf of Mexico OCS Region.

Bureau of Land Management

Miles City District Grazing Advisory Board; Meeting

December 14, 1981.

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Miles City District Grazing Advisory Board will be held January 25, 1982. The meeting will begin at 10:00 a.m. in the conference room at the Miles City District Bureau of Land Management Office, West Highway 10–12, Miles City, Montana.

The agenda is as follows:

(1) Maintenance Policy on Range Improvements;

(2) Categorizing Allotments;

(3) Wilderness EIS.

The meeting is open to the public. The public may make oral statements before the Grazing Advisory Board or file written statements for the board's consideration. Depending upon the number of persons wishing to make an oral statement, a per person time limit may be established.

Summary minutes of the meeting will be maintained in the Bureau of Land Management District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

For further information contact District Manager, Miles City District, Bureau of Land Management, P.O. Box 940, Miles City, Montana 59301.

Ray Brubaker,

District Manager.

BILLING CODE 4310–84–M

[M 059318]

Montana; Ordering Providing for Partial Opening of Public Lands

December 16, 1981.

The Federal Energy Regulatory Commission, in determination DA–206–Montana, issued April 7, 1981, found the withdrawal for Power Project No. 2188 would not be injured or destroyed for the purpose of power development by the disposal of 2.76 acres of land, subject to the provisions of Section 24 of the Federal Power Act and subject to the prior right of the licensee for Project No. 2188, its successors or assigns, to use the lands for project purposes as contemplated in the license for the project.

By virtue of the authority contained in Section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075, 16 U.S.C. 818), as amended, and pursuant to Bureau Order No. 701 of July 23, 1964, as amended, it is ordered as follows:

1. The segregative effect of the withdrawal for Project No. 2188 is lifted, in part, as to 2.76 acres, described below:

Principal Meridian

T. 14 N., R. 3 W.,

Sec. 34, 2.22 acres in the S½SW¼ and 0.54 acres in the SW¼SE¼.

These lands are located in Lewis and Clark County.

2. Effective December 23, 1981, this order restores 2.76 acres of Power Project No. 2188 to the operation of the mining laws (Act of August 11, 1955, 30 U.S.C. 621 (1976)), and to the operation of the public land laws for direct non-competitive sales (Selection 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2750; 43 U.S.C. 1713).

3. The lands have been open to applications and offers under the minerals leasing laws.

Inquires concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

Roland F. Lee,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310–84–M

Alaska Outer Continental Shelf; Availability of Draft Environmental Impact Statement and Intent to Hold Public Hearings Regarding Proposed Oil and Gas Lease Sale No. 71

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared a draft environmental impact statement relating to a proposed Outer Continental Shelf oil and gas lease sale of 372 tracts of submerged Federal lands in the Diapir Field region in Alaska.

Single copies of the draft environmental impact statement can be obtained from the Office of the Manager, Bureau of Land Management, Alaska OCS Office, P.O. Box 1159, Anchorage Alaska 99510 and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental impact statement will also be available for review in the following public libraries: Alaska Federation of Natives, 1577 "C" Street, Suite 304, Anchorage, AK 99501; Anchor Point Public Library, Anchor Point, AK 99556; Department of the Interior Alaska Resources Library, 701 "C" Street, Box 36, Anchorage, AK 99513; Cordova Public Library, Box 472, Cordova, AK 99574; Kenai Community Library, Box 157, Kenai, AK 99611; Elim Learning Center, Elim, AK 99739; Haines Public Library, P.O. Box 36, Haines, AK 99827; North Star Borough Library, Fairbanks, AK 99701; University of Alaska, Institute of Social and Economic Research Library, Fairbanks, AK 99801; Homer Public Library, Box 356, Homer,

AK 99603; Z.J. Loussac Public Library, 427 F Street, Anchorage, AK 99801; Juneau Memorial Library, 114 W. 4th Street, Juneau, AK 99824; Alaska State Library, Documents Librarian, Pouch G, Juneau, AK 99811; Ketchikan Public Library, 629 Dock Street, Ketchikan, AK 99901; Department of Defense, Army Corps of Engineers Library, P.O. Box 7002, Anchorage, AK 99501; Kodiak Public Library, P.O. Box 985, Kodiak, AK 99615; Metlakatla Extension Center, Metlakatla, AK 99926; Department of Interior, Bureau of Mines Library, AF–F.O. Center, P.O. Box 550, Juneau, AK 99802; Petersburg Extension Center, Box 289, Petersburg, AK 99833; Seldovia Public Library, Drawer D, Seldovia, AK 99663; Seward Community Library, Box 537, Seward, AK 99664; University of Alaska Juneau Library, P.O. Box 1447, Juneau, AK 91447; Sitka Community Library, Box 1090, Sitka, AK 99835; Douglas Public Library, Box 469, Douglas, AK 99824; University of Alaska Anchorage Library, 3211 Providence Drive, Anchorage, AK 99504; University of Alaska Elmer E. Rasmusson Library, Fairbanks, AK 99701; Wrangell Extension Center, Box 651, Wrangell, AK 99929.

We anticipate that public hearings will be held during the period of February 2–6, 1982, for the purpose of receiving comments and suggestions relating to the draft statement. The exact locations and dates of these hearings will be announced at a later date. Comments concerning the draft environmental impact statement will be accepted until February 12, 1982, and should be sent to the Manager, Alaska OCS Office, at the above listed address.

After the public hearings are held and comments are received and considered, a final environmental impact statement will be prepared.

Approved:

Arnold E. Petty,

Director, Bureau of Land Management.

Bruce Blanchard,

Director, Environmental Project Review.

National Park Service

Delta Region Preservation Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Delta Region Preservation Commission will be held at 7:30 p.m. CST on February 1, 1982, at the Jefferson Parish Council Chambers, 3330 North Causeway Boulevard, Metairie, Louisiana.

The Delta Region Preservation Commission was established pursuant to Pub. L. 95-265, section 907(a) to advise the Secretary of the Interior in the selection of sites for inclusion in Jean Lafitte National Historical Park, and in the development and implementation of a general management plan and of a comprehensive interpretive program of the natural, historic, and cultural resources of the Region.

During this time there will be an election of officers for the Commission and a final review of the General Management Plan for Jean Lafitte National Historical Park.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come, first-serve basis. Any member of the public may file a written statement concerning the matters to be discussed with the Superintendent, Jean Lafitte National Historical Park.

Persons wishing further information concerning this meeting, or who wish to submit written statements may contact James Isenogle, Superintendent, Jean Lafitte National Historical Park, 400 Royal Street, Room 220, New Orleans, Louisiana 70130, telephone area code 504-589-3882. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of Jean Lafitte National Historical Park.

Dated: December 16, 1981.

Robert L. Kerr,
Regional Director, Southwest Region.

BILLING CODE 4310-70-M

Gateway National Recreation Area; Gateway Advisory Commission Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Gateway National Recreation Area Advisory Commission will be held commencing at 3:00 p.m., Thursday, January 28, 1982, at the Peter W. Rodino, Jr. Federal Building, Room 730, 970 Broad Street, Newark, New Jersey.

The Commission was established by Pub. L. 92-552 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to

the development of Gateway National Recreation Area.

The matters to be discussed at this meeting include:

1. Discussion of public comments and reaction regarding formal proposal for Floyd Bennett Field development, at the January 11, 1982 public meeting.
2. Ferry Service: Coney Island—Gateway; Status of private funding request.
3. Sandy Hook: Plans and funding to resolve erosion problems.
4. Status of legislation extending Commission until 1992.
5. Fort Wadsworth: Status of litigation and impact of court decision.
6. Superintendent's report.
7. Set location for next Commission meeting.

The meeting will be open to the public. The facility at which the meeting will be held is considered physically accessible. If interpretive services are requested by deaf or hearing impaired individuals they should be sent to this agency within five working days before the meeting, and it will be provided. However, facilities and space to accommodate members of the public are limited, and persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements, may contact John Guthrie, Acting Superintendent, Gateway National Recreation Area, Headquarters, Building No. 69, Floyd Bennett Field, Brooklyn, New York 11234, (212) 630-0363.

Minutes of the meeting will be available for inspection four weeks after the meeting at the Gateway National Recreation Area Headquarters Building in Brooklyn.

Dated: December 14, 1981.

John Guthrie,

Acting Superintendent, Gateway National Recreation Area.

BILLING CODE 4310-70-M

Upper Delaware National Scenic and Recreation River; Meeting

AGENCY: National Park Service; Upper Delaware Citizens Advisory Council.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: January 22, 1982, 7:00 p.m.

ADDRESS: Arlington Hotel, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreation River, Drawer C, Narrowsburg, N.Y. 12764 (717/729-7135).

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include (1) implementation of section 704 of Pub. L. 95-625, (2) new business, and (3) installation of new members.

The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council, c/o Upper Delaware National Scenic and Recreation River, Drawer C, Narrowsburg, N.Y. 12764. Minutes of the meeting will be available for inspection four weeks after the meeting at the new headquarters site of the Upper Delaware National Scenic Recreational River in Damascus Township, Wayne County, Pennsylvania.

Dated: December 14, 1981.

Homer L. Rouse,

Acting Regional Director, Mid-Atlantic Region.

INTERSTATE COMMERCE COMMISSION

[Section 5b Application No. 2, 3 and 6]

Western, Eastern and Southern Railroads, Agreements

AGENCY: Interstate Commerce Commission.

ACTION: Clarification of prior notice of decision.

SUMMARY: The Commission issued a decision in this proceeding, served January 21, 1981 (46 FR 9218 January 28, 1981). Members of the major rail rate bureaus petitioned the Commission as to the status of newsprint delivery charge tariffs and the voting prohibitions of 49 U.S.C. 10706(a)(3)(A)(i). Except for certain affiliated carriers, where newsprint delivery charges are preceded by a joint line movement of this commodity tariffs containing these charges will not be considered single-line for the voting prohibitions.

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall (202) 275-7656.

SUPPLEMENTARY INFORMATION: On October 22, 1981, petitioners, the Traffic Executive Association—Eastern Railroads (TEA), the Western Railroad Association (WRA), and the Southern Freight Association (SFA) sought clarification of our January 21, 1981 decision, 364 ICC 635, with regard to newsprint delivery charges and the single-line voting prohibitions of 49 U.S.C. 10706(a)(3)(A)(i). That provision prohibits a rate bureau from permitting a member carrier to discuss, to participate in agreements related to, or to vote on single-line rates proposed by another carrier.

In a 1978 decision [1] in this proceeding, we held that where carriers under the same management and control propose, establish, or change rates, allowances or charges between them, such proposals shall be considered single-line. Later, in our January 21, 1981 decision, we stated

[1] 358 ICC 662, 670-672 (1978).

that car compensation, demurrage and car allowance would not be considered single-line rates, but surcharges and contract rates would. We also found that government rates under 49 U.S.C. 10721 would be treated as single-line, in a later decision served April 24, 1981.

Newsprint delivery charge tariffs generally provide for rail carriers to absorb local cartage charges on shipments of this commodity delivered from railheads to the consignee's location or to give an allowance to consignees who do their own unloading at their sidings. These tariffs are published by individual carriers although most tariffs cannot be promulgated by a single carrier since most shipments of newsprint are via joint-line movements. Accordingly, because each carrier participating in the movement must absorb its proportional share of the allowance or cartage charge, all involved carriers must consider and approve the tariff. The tariffs are not usually published in agency tariffs since delivery costs vary from railhead to railhead, city to city. Petitioners claim it would be extremely difficult to formulate an agency tariff to cover all eventualities, although SFA does publish newsprint delivery charge tariffs in an agency tariff. They allege these delivery charge tariffs are similar to car allowances but involve more joint and collective activity than demurrage, car compensation and allowances do. Petitioners ask that we find all newsprint delivery charge tariffs joint-line for the purposes of 49 U.S.C. 10706(a)(3)(A)(i).

Congress defines a single-line rate as "a rate or allowance proposed by a single rail carrier that is applicable only over its line and for which the transportation (exclusive of terminal services by switching, drayage or other terminal carriers or agencies) can be provided by that carrier." 49 U.S.C. 10706(a)(1)(B). Additonally, Congress specifically named three items which would not be considered single-line rates. These are car compensation, demurrage and car allowances. H.R. Rep. No. 96–1430, 96th Cong., 2d Sess. 114 (1980). These areas are of nationwide importance and require a high degree of coordination.

Given the great emphasis on individual and flexible ratemaking in the Staggers Rail Act of 1980 (See our January 21, 1981 decision for discussion), the Commission will not authorize additional exceptions to voting prohibitions without adequate justification. That has not been presented here to the extent necessary to support a total exception. While it is true that newsprint delivery charge tariffs are published by individual carriers, they most often involve two or more carriers participating in the joint-line movement prior to the delivery. In such instances, concurrence on the level of charges is required and antitrust immunity is available. We see no compelling reason to expand immunity beyond this situation and, by so doing, allow anticompetitive behavior.

For purposes of 49 U.S.C. 10706(a)(3)(A)(i), the pivotal issue is not whether newsprint delivery charges are involved, but, rather what type of movement preceded the delivery, single-line or joint-line. Except for certain affiliated carriers discussed in our 1978 decision, *supra*, where newsprint delivery charges are applicable and are preceded by a joint-line movement, we find that tariffs containing these charges will not be considered single-line rates. We remind petitioners that 49 U.S.C. 10706(a)(3)(A) (ii) and (iii), as well as other provisions and Commission decisions, govern proper activity for joint-line rate poroposals.

This decision will not significantly affect either the quality of the human environment or conservation of energy resources.

Authority: 49 U.S.C. 10706.

Dated: December 16, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–175

The following applications were filed in Region 2. Send protests to: ICC, Fed. Res. Bank Bldg., 101 North 7th St., Rm. 620, Philadelphia, PA 19106.

MC145880 (Sub-II–1–TA), filed December 10, 1981. Applicant: EUGENE W. BELL d.b.a. BELL TRUCKING, 1048 Shoemaker Ave., Shoemakersville, PA 19555. Representative: Milton W. Flack, 8383 Wilshire Blvd., Suite 900, Beverly Hills, CA 90211. *Contract Carrier,* Irregular routes: *Confectionery products* from West Reading, PA, to La Mirada and San Francisco, CA, Phoenix, AZ, Salt Lake City, UT, and Denver, CO, under continuing contract(s) with R. M. Palmer Company, for 270 days. An underlying ETA seeks 120 days authority. Supporting shipper: R. M. Palmer Company, 77 Second Ave., West Reading, PA 19611.

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Alternate Route Deviations

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Passengers (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this Federal Register notice.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

Motor Carriers of Passengers

MC 1934 (Deviation No. 6) THE ARROW LINE, INC., 105 Cherry St., E. Hartford, CT 06108, filed November 19, 1981. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *passengers and their baggage,* and *express* and *newspapers* in the same vehicle with passengers over a deviation route as follows: From Storrs, CT, over CT Hwy 195 to junction Interstate Hwy 86 to Tolland, CT, then over Interstate Hwy 86 to junction Interstate Hwy 84 in E. Hartford, CT, then over Interstate Hwy 84 to juction Interstate Hwy 684 in Brewster, NY, then over Interstate Hwy 684 to junction Interstate Hwy 287 in White Plains, NY, then over Interstate Hwy 287 to junction Interstate Hwy 87 in Elmsford, NY, then over Interstate Hwy 87 to New York, NY, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Storrs, CT, over CT Hwy 195 to junction CT Hwy 89, then over CT Hwy 89 to junction CT Hwy 32, then over CT Hwy 32 to junction CT Hwy 52, then over CT Hwy 52 to junction Interstate Hwy 95, then over Interstate Hwy 95 to New York, NY, and return over the same route.

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's *General Rules of Practice* (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

New York Docket No. T-664, filed November 17, 1981. Applicant: WEST FARMS EXPRESS, INC., 1095 Close Ave., New York, NY 10472. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of; General

commodities: Liquid petroleum products; forest products in packages.—Between New York City on the one hand, and, on the other, all points in Albany, Columbia, Delaware, Dutchess, Greene, Nassau, Ontario, Orange, Putnam, Rensselaer, Rockland, Suffolk, Sullivan, Ulster, Westchester Counties and New York City. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

By the Commission.

Agatha L. Mergenovich,

Secretary.

[Volume No. OP1-322]

Motor Carriers; Permanent Authority; Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register.

An original and one copy of opposing verified statements must be filed with the Commission within 45 days after the date of this Federal Register notice. Applicant may file a verified statement in rebuttal within 60 days. Such pleadings shall comply with 49 CFR 1100.247 (renumbered 1100.251) addressing specifically the issue(s) indicated as the purpose for republication. Special Rule 247 (renumbered 251) was published in the Federal Register of July 3, 1980, at 45 FR 45539.

MC 157441 (republication), filed July 31, 1981, published in the Federal Register August 13, 1981, and republished this issue. Applicant: TOM SORENSEN, d.b.a. SORENSEN ROCK AND GRAVEL, Rural Route Box 283–A, Weeping Water, NE 68463. Representative: Tom Sorensen (same address as applicant), (402) 267–4025. A decision by the Commission, Review Board #1, decided November 10, 1981, served November 23, 1981, finds that applicant is authorized to operate as a *common carrier*, by motor vehicle, in transporting over irregular routes, *sand, gravel, rock, dirt, and construction materials*, between points in Cass County, NE, on the one hand, and, on the other, points in Plymouth, Woodbury, Monona, Harrison, Pottawattamie, Mills, and Fremont Counties, IA, and Atchison and Holt Counties, MO. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to indicate that applicant has been granted authority in Atchison and Holt Counties, MO in lieu of Atchison and Holt Counties, IA.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Volume No. 212]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

December 17, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 85747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 35358 (Sub-64)X, filed November 20, 1981. Applicant: BERGER TRANSFER & STORAGE, INC., 3720 Macalaster Dr. N.E., Minneapolis, MN 55421. Representative: Andrew R. Clark, 1600 TCF Tower, Minneapolis, MN 55402. [Ex Parte No. 311]

Expedited Procedures for Recovery of Fuel Costs

December 17, 1981.

In our recent decisions, an 18.0-percent surcharge was authorized on all owner-operator traffic, and on all truckload traffic whether or not owner-operators were employed. We ordered that all owner-operators were to receive compensation at this level.

The weekly figures set forth in the appendix for transportation performed by owner-operators and for truckload traffic is 18.0-percent. Accordingly, we are authorizing that the surcharge for this traffic remain at 18.0 percent. All owner-operators are to receive compensation at this level.

No change is authorized in the 2.0-percent surcharge for United Parcel Service, the 3.1-percent on less-than-truckload (LTL) traffic performed by carriers not using owner-operators, or the 6.7-percent surcharge for the bus carriers.

Notice shall be given to the general public by mailing a copy of this decision to the Governor of each State having jurisdiction over transportation, by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. for public inspection and by depositing a copy to the Director, Office of the Federal Register, for publication therein.

It is ordered:

This decision shall become effective Friday, 12:01 a.m. December 18, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

December 14, 1981.

APPENDIX—FUEL SURCHARGE

Base date and price per gallon (including tax)	
Jan. 1, 1979	68.6¢
Date of current price measurement and price per gallon (including tax)	
Dec. 14, 1981	131.0¢

	Transportation performed by—			
	Owner-operator[1]	Other[2]	Line carrier	UPS
	1	2	3	4
Average percent fuel expenses (including taxes) of total revenue	[illegible]	2.9	[illegible]	[illegible]
Percent surcharge developed	[illegible]	3.1	[illegible]	[illegible][3]
Percent surcharge allowed	[illegible]	3.1	[illegible]	[4] 2.0

[1] Apply to all truckload traffic.
[2] Including less-than-truckload traffic.
[3] The percentage surcharge developed for UPS is calculated by applying 81 percent of the percentage increase in the current price per gallon over the base price per gallon to UPS average percent of fuel expense to revenue figure as of January 1, 1979 (3.3 percent).
[4] The developed surcharge is reduced 0.8 percent to reflect fuel-related increases already included in UPS rates.

Agency for International Development

Housing Guaranty Program; Investment Opportunity

The Agency for International Development (A.I.D.) has authorized guaranties of loans to a number of developing countries as part of A.I.D.'s overall development assistance program. The proceeds of these loans will be used by these countries to finance shelter projects for low income families. Set forth below is the address of a country (the "Borrower") for which a loan has recently been authorized. The Borrower is interested in being advised of the terms and conditions at which financing would be available under current market conditions and requests proposals from U.S. lenders or investment bankers.

Dominican Republic

Project: 517-HG-009—$15,000,000, Gustavo Volmar, Financial Manager, Banco Nacional de la Vivienda, Apartado 1504, Santo Domingo, Dominican Republic, Telephone: 565-0621.

Additional projects will be advertised from time to time as they become ready for borrowing.

By this notice of investment opportunity, the Borrower is soliciting expressions of interest from U.S. lenders or investment bankers to counsel on loan timing, structure and features, and to manage the loans or underwritings. Interested investment bankers or lenders should contact the Borrower. Selection of an investment banker and/or lender and the terms of the loan are initially subject to the individual discretion of the Borrower and thereafter subject to approval by A.I.D. The lender and A.I.D. shall enter into a Contract of Guaranty covering the loan. Disbursements under the loan will be subject to certain conditions required of the Borrower by A.I.D. as set forth in an implementation agreement between A.I.D. and the Borrower.

The full repayment of the loan will be guaranteed by A.I.D. The A.I.D. guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority of Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

Lenders eligible to receive an A.I.D. guaranty are those specified in Section 238(c) of the Act. They are: (1) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least ninety-five percent (95%) owned by U.S. citizens; and (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for an A.I.D. guaranty, the loans must be repayable in full no later than the thirtieth anniversary of the disbursement of the principal amount thereof and the interest rates may be no higher than the maximum rate established from time to time by A.I.D.

Information as to the eligibility of investors and other aspects of the A.I.D. housing guaranty program can be obtained from: Director, Office of Housing, Agency for International Development, Room 625, SA/12, Washington, D.C. 20523, Telephone: (202) 632-9637.

Dated: December 16, 1981.

Fredrik A. Hansen,

Deputy Director, Office of Housing.

BILLING CODE 6116-01-M

[Delegation of Authority No. 133]

Senior Assistant Administrator, Science and Technology Assistant Administrator, Program and Policy Coordination Assistant Administrator, Food and Voluntary Assistance Assistant Administrator, Private Enterprise Regional Assistant Administrators; Authorization of Project and Non-Project Assistance

AID Delegation of Authority No. 133, dated February 1, 1979 (44 FR 8050, February 8, 1979), as amended, is revised to read as follows:

Section 1. Issuance Authority

This delegation is issued pursuant to IDCA Delegation of Authority No. 1, dated October 1, 1979.

Section 2. Purpose

The purpose of this delegation is to delegate authority to approve project and non-project assistance. Authority to approve or to extend AID project and non-project assistance occurs principally at three levels of authority within the Agency. These levels are:

The Administrator (including the Deputy Administrator); Designated Assistant Administrators (including their Deputies); and

Designated Mission Directors or other principal officers of field posts and Designated AID/Washington officers.

Within the limits prescribed by law, the Administrator may approve any project, amend any project authorization, and approve any project extension. Assistant Administrators are given limited authority to approve and amend projects, to extend the life of projects, and to redelegate such authorities within their respective Bureaus.

Section 3. Definitions

a. "Project", for purposes of this delegation, includes project and non-project assistance.

b. "Project Assistance Completion Date" (PACD) is the estimated date by which all AID-financed goods are to have been delivered or all services performed under the Project Agreement. In non-project assistance, the equivalent date is the terminal date for requests for disbursement authorizatons.

c. "Life of Project" is the planned length of the project as determined in project preparation. The life of project runs from the estimated date of signature of the Project Agreement or other obligating document to the PACD.

Section 4. Authorities Delegated to Assistant Administrators

a. The following authorities are delegated to the Senior Assistant Administrator for Science and Technology, the Assistant Administrator for Program and Policy Coordination, the Assistant Administrator for Food and Voluntary Assistance, the Assistant Administrator for Private Enterprise, the Assistant Administrator for Near East, the Assistant Administrator for Latin America and the Caribbean, the Assistant Administrator for Africa, and the Assistant Administrator for Asia, within their respective areas of responsibility;

(1) The authority to authorize a project, if the project:

(a) Does not exceed $20 million over the approved life of project (except as provided in subparagraph (2) below);

(b) Does not present significant policy issues;

(c) Does not require issuance of waivers that may only be approved by the Administrator or if such waivers are required they are approved by the Administrator prior to such authorization; and

(d) Does not have a life of project in excess of ten years.

(2) The authority to amend project authorizations executed by any AID official, if the amendment:

(a) Does not result in a total life of project funding of more than $30 million;

(b) Does not present significant policy issues; and

(c) Does not require issuance of waivers that may only be approved by the Administrator or is such waivers are required they are approved by the Administrator prior to such authorizations.

(3) The authority to approve extensions of the life of a project, provided that the extension does not result in a total life of project (from point of initial obligation to revised PACD) of more than ten years.

b. Authorities delegated under this section may be exercised by persons performing the functions of the Assistant Administrator in an "Acting" capacity.

Section 5. Authorities That May Be Redelegated to AID/Washington Officers

Assistant Administrators may, each within their respective Bureaus, redelegate the authorities delegated to them under Section 4 to Deputy Assistant Administrators, and, in the case of the Bureau for Science and Technology, to the Agency Directors for Food and Agriculture, Energy and National Resources, Human Resources and Health and Population. Authorities so redelegated may be exercised by persons performing the functions of the designated AID/Washington officer in an "Acting" capacity but may not be redelegated.

Section 6. Authorities That May Be Redelegated to Principal Officers of Field Offices

a. Regional Assistant Administrators may, each within their area of responsibility, redelegate the authorities delegated to them under Section 4, at their discretion and in accordance with criteria established by the Bureau, to Mission Directors or other principal officers of field posts.

b. The Senior Assistant Administrator for Science and Technology, and Assistant Administrators for Program and Policy Coordination, Food and Voluntary Assistance and Private Enterprise may redelegate authorities delegated to them under Section 4 to Mission Directors or other principal officers of field posts for individual projects, with the concurrence of the relevant Regional Assistant Administrator.

c. Authorities redelegated hereunder may be exercised by persons performing the functions of the Mission Director in an "Acting" capacity and may be redelegated by the Mission Director to the principal deputy of the Mission Director, but may not be further redelegated. Authorities redelegated to principal officers of field posts other than Missions may be exercised by persons performing the functions of the principal officer in an "Acting" capacity, but may not be redelegated.

Section 7. Miscellaneous

a. Technical Review of Project Actions.—Technical review, including legal, shall be completed prior to the exercise of the authorities delegated herein, in accordance with procedures established by each Bureau.

b. Concurrent Authority and Instructions.—I retain for myself concurrent authority to exercise any of the functions herein delegated, and such authorities shall be exercised subject to instructions issued by me or my designee.

c. Effective Date.—This delegation is effective immediately.

Dated: December 11, 1981.

M. Peter McPherson,

Administrator.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-92]

Certain Airtight Wood Stoves; Denial of Motion To Withdraw Action and Order of Termination and To Order Hearing

AGENCY: U.S. International Trade Commission.

ACTION: Denial of motion to withdraw action and order of termination and to order hearing.

SUPPLEMENTARY INFORMATION: On November 2, 1981, the Commission received a Motion to Withdraw Action and Order of Termination and Order Hearing (Motion 92-13) from Energy Harvesters Corp., the complainant in the above-captioned investigation. Complainant requests that the motion be granted because the Commission's ordering of the termination of the investigation without a hearing allegedly violates the Fifth Amendment to the U.S. Constitution and 5 U.S.C. 554.

This motion follows the termination of this investigation on October 9, 1981 based upon mootness. The Commission stated in its Memorandum Opinion of October 9, 1981, that as a result of the issuance of consent orders in investigation No. 337-TA-106 the stove under investigation in this case was no longer to be imported. Thus, Energy Harvesters had already received all of the relief that it could possibly receive under section 337.

On December 14, 1981, the Commission denied Energy Harvesters' motion. Copies of the Commission's Action and Order and all other nonconfidential documents in the record of this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202-523-0161.

FOR FURTHER INFORMATION CONTACT: Jeffrey S. Neeley, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0359.

By order of the Commission.

Issued: December 17, 1981.

Kenneth R. Mason,

Secretary.

[FR Doc. 81-36826 Filed 12-22-81; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. TA-203-12]

Clothespins; Report to the President

December 7, 1981.

To the President:

In accordance with section 203(i)(2) and 203(i)(3) of the Trade Act of 1974 (19 U.S.C. 2253(i)(2) and (i)(3)), the United States International Trade Commission herein reports the results of an investigation concerning clothespins.

Summary of advice of the Commission

Commissioners Alberger, Calhoun, Stern, Eckes, and Frank advise, on the basis of information obtained in the investigation, that the termination or reduction of the import relief presently in effect will have an adverse economic

effect on the domestic industry producing clothespins and that such relief therefore should be extended at the level presently in effect for the full 3-year period allowed.

Background

The Commission instituted this investigation on July 20, 1981, following receipt, on July 10, 1981, of a petition filed on behalf of Diamond International Corp., Forster Manufacturing Co., National Clothespin Co., and Penley Corp. Public notice of the investigation and hearing was given by posting copies of the notice at the office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** of July 29, 1981 (46 FR 38779). A public hearing was held in connection with this investigation on October 5, 1981, in Portland, Maine. All interested persons were afforded an opportunity to be present, to present evidence, and to be heard.

The information in this report was obtained from field work, questionnaires sent to domestic producers and importers, the Commission files, other Government agencies, briefs filed by interested parties, and other

Statement of the Commission

Based on information presented to the Commission in this investigation, it is our judgment that termination or reduction of import relief for spring-type clothespins would have an adverse economic effect on the domestic clothespin industry.[1] We therefore recommend extending this relief at existing levels for an additional 3 years to provide the domestic industry more time to complete its orderly adjustment to import competition.

This advice is based on our assessment of several factors. These include the present condition of the industry, levels and trends of imports during the relief period, the effectiveness of further relief, efforts made by the industry to adjust during the relief period, and the factors set forth in section 202(c) of the Trade Act of 1974.

In essence, the Commission believes that the domestic clothespin industry can become efficient and profitable without the aid of import restraints if temporary protection is extended now to allow the industry to implement fully its adjustment plans.

[1] The relief presently in effect is that provided for in Presidential Proclamation 4640 of Feb. 23, 1978.

The product

Import relief covers two categories of clothespins—spring-type clothespins of wood and spring-type clothespins of plastic. It does not cover spring-type clothespins of materials other than wood or plastic or nonspring-type clothespins (such as round-head clothespins).

Imported wooden clothespins are in two sizes, a small clothespin measuring 2⅞ inches in length and a larger "regular-sized" clothespin measuring 3 to 3¼ inches in length. The smaller clothespins are imported primarily from Taiwan and China, and the larger primarily from Poland, West Germany, and other European countries. Plastic clothespins are imported primarily from Taiwan and Hong Kong. The larger European clothespins are considered to be stronger and more durable than those from the Far East and are also considerably more expensive.

Domestic producers manufacture four types of clothespins—spring-type clothespins of wood, spring-type clothespins of plastic, roundhead (or square head) nonspring-type clothespins of wood, and roundhead nonspring-type clothespins of wood that are iron bound. The bulk of domestic production is in the form of spring-type clothespins of wood, which are the second least expensive of the four types. For their principal use the different types of imported and domestic clothespins are functionally interchangeable.

Imports during the relief period

Import relief has been effective. As a result of quantitative restrictions, imports have declined both in absolute terms and relative to U.S. consumption. The share of the U.S. market accounted for by imports declined from an average of 48 percent in 1976–77 to approximately * * * percent during the relief period.[2] Imports of wood spring clothespins exceeded 3 million gross in 1976 and 1977, declined to slightly over 2 million gross in 1978 and fell below 2 million gross as the quota became effective.[3]

The import quotas cover three price categories of clothespins (not over 80 cents per gross, over 80 cents but not over $1.35 per gross, and $1.35 but not over $1.70 per gross) and are on a fiscal-year basis (February 23 to February 22), with quarterly limitations. The quotas limit total imports for the three categories to 2 million gross annually. The quarterly quotas for each of the two lower price categories have been filled in each quarter since the relief went into effect, indicating that imports in those price categories could have been substantially higher in the absence of quotas. Quarterly quotas for the highest price category have been substantially filled in recent quarters.[4]

Taiwan has been the most important supplier of imported wood and plastic spring-type clothespins since 1976. Its share of imports during the relief period ranged from 47 percent in 1978 to 88 percent in 1979, 60 percent in 1980, and 62 percent in January-June 1981. The bulk of the imports from Taiwan enter in the two lower price categories. Imports from the traditional European suppliers of more expensive clothespins declined during the relief period in terms of quantity, value, and share of total imports.

Condition of the domestic industry

With the domestic industry's recapture of a 70 percent share of the U.S. market as a result of the relief, its condition has improved significantly. Production, capacity utilization, and employment have all increased, and the industry, which had operated at a loss in 1978, is once again profitable.

U.S. production of clothespins (including the nonspring types) increased from 4.4 million gross in 1978, the year prior to the imposition of relief, to 4.9 million gross in 1979, before declining slightly to 4.8 million gross in 1980.[5] Production increased from 2.5 million gross in January-June 1980 to 3.1 million gross in January-June 1981, an increase of 29 percent, largely due to a significant increase in spring-type wood clothespin production.[6]

Capacity utilization similarly increased during the period from 59 percent in 1978 to 65 percent in 1979, 64 percent in 1980, 65 percent in January-June 1980, and 84 percent in January-June 1981.[7] Industry capacity remained at a constant 7.5 million gross during the period.[8]

Employment rose irregularly during the relief period. The number of persons employed in producing clothespins rose from 387 in 1978 to 400 in 1979, declined to 388 in 1980, and increased to 427 in January-June 1981. Hours worked followed similar trends.[9] Hourly compensation increased modestly during the period from $4.14 per hour in 1978 to $4.40 per hour in 1979, $4.51 per

hour in 1980, and $4.93 per hour in January-June 1981.[10] Labor productivity, as measured in gross per hour, was at its highest level of the period in January-June 1981.[11]

The net operating profit (before income taxes) of wood spring-type clothespin operations of U.S. producers increased substantially from a negative (i.e., loss) of $614,000 in 1978 to a positive $499,000 in 1979 and $1.2 million in 1980.[12] The net profit in January-June 1980 was $467,000, and it increased to $695,000 in January-June 1981.[13] The ratio of net operating profit (before income taxes) to sales increased from a negative 8.2 percent in 1978 to a positive 5.6 percent in 1979, and 10.3 percent in 1980.[14] This ratio increased further from 8.6 percent in January-June 1980 to 12.8 percent in January-June 1981.[15]

In summary, the relevant economic indicators show the industry to be in considerably better condition at the present time than it was in 1978, the year before import relief was proclaimed. This improved condition is primarily the result of import relief.[16] The industry, however, clearly has not yet adjusted to import competition. As discussed more thoroughly below under "Extension of relief," the economic conditions indicating serious injury which existed just prior to the imposition of relief are likely to return quickly if import relief is terminated at this time.

Efforts to adjust

U.S. producers have invested approximately $700,000 in plant and equipment since January 1979.[17] However, this represents only about 20 percent of the domestic industry's total planned adjustment effort. Producers project an additional $3.3 million investment in 1982–84.[18] The magnitude of these investments is significant given the cash-generating capabilities of the industry today.

To date, most of the funds invested have been allocated to modify or repair existing equipment to improve machine efficiency.[19] The current relief period has also been used to develop plans for more substantial changes. There is no machine building industry oriented to the production of clothespins. Therefore, machinery improvements must be self-instituted and implemented by the clothespin producers. Future expenditures would be used to purchase and install new systems and equipment, simplify production methods, and improve productivity.[20] These changes would require several years for further planning and implementation.

If the domestic producers are to compete successfully with imports when restrictions are removed, the margin of import underselling must be reduced.[21] This will not be possible unless domestic industry costs are lowered through improved production methods. Profitability increases realized during import relief have underwritten improvements already made. Unless relief is continued, however, producers may not be willing or able to commit or attract funds for the more substantial changes envisioned.[22]

Reduction of the price differential is only one element in establishing a competitive posture. The domestic industry also reports that it has adopted or is devising new marketing strategies. As part of this effort, firms have improved their sales forces and changed their product mix.[23] Further improvements in this area along with reduction of the margin of import underselling should place the industry in a more competitive position at the end of the 3-year relief extension period.

Extension of relief

We believe relief should be extended for the maximum 3-year period at present levels for three reasons.

First, we believe that any effective long-term adjustment to import competition is contingent upon implementation of the industry's plan to bring on-stream new equipment and production techniques. In the absence of relief, the industry is unlikely to have adequate profits or the ability to attract capital to finance the acquisition of new equipment.[24]

Second, and corollary to the first point, we believe that there would be a substantial increase in clothespin imports, especially of those in the two lower price categories, if import relief were terminated. As noted above, the import quotas for the two lower priced categories have been filled in all of the quarterly periods under the relief program, and the quarterly quotas for the third category have been substantially filled in recent quarters.[25]

Imports exceeded 3 million gross in 1976 and 1977 and thus were more than 50 percent above the present annual quota level of 2 million gross.[26] We have no information that would lead us to believe that foreign producers are not capable of reestablishing the import levels they obtained in 1976 and 1977. In fact, if relief is terminated, imports may exceed the 1976–77 levels. If increases in imports since 1977 from countries included in the 1976 and 1977 figures are added to the 1976 and 1977 totals, one can easily conceive of imports doubling in the absence of quotas.[27]

Taiwan has clearly strengthened its position as a supplier of inexpensive clothespins during the relief period.[28] The largest supplier of imported clothespins since 1976, its 1979 exports to the U.S. market were fully double the 1976 levels. While imports from Taiwan declined in 1980 to 1.16 million gross from the 1979 level of 1.49 million gross, imports in January–June 1981 were running about 44 percent over the January–June 1980 level and, if continued for the duration of 1981, will nearly equal the 1979 level.[29]

China remains an important threat to the domestic industry. Imports from China, which had been nil as late as 1974, rose to 669,000 gross in 1976 before declining to 24,000 gross in 1979 and 48,000 gross in 1980.[30] However, imports from China of 88,000 gross in the first 6 months of 1981 have already exceeded total imports from China for calendar years 1978 and 1979, and China reportedly is committed to exporting several times that amount to the U.S. market in 1982.[31]

[14] Id.
[15] Id. Commissioner Stern points out that financial information is not evaluated in a vacuum. It is assessed in light of all relevant market conditions. For example, in investigation No. TA–203–7 on non-rubber footwear, the improved profitability of the domestic industry indicated some adjustment toward open trading conditions. Improvements in the profitability of footwear producers occurred despite the fact that imports did not decline over the relief period. In contrast, for clothespin producers, profitability rose as import levels fell and most likely reflects the assistance given the industry by the quotas.
[16] Commissioner Frank notes, notwithstanding the industry's short-term improvement manifested by certain operational and profitability indices, that its overall financial condition remains hampered by an inability to attract outside equity investment and debt capital.

Other past significant suppliers such as Poland, Hong Kong, West Germany, Romania, and Czechoslovakia could pose a significant threat to the U.S. industry if they resume exporting to the U.S. market at the levels of the years preceding the imposition of relief.[32] There is also a potential for increased imports from Portugal.[33]

Third, we are convinced that the domestic clothespin industry could be viable, although we believe it is unlikely that its prices will match those of low-valued imports for the foreseeable future.[34, 35] Competition in the clothespin industry encompasses many factors besides price. These include service, quality, delivery, diversified product line, and long-term business relationships.[36] In these areas, the domestic industry often has a comparative advantage over imports.

Reduction of relief

In instituting the investigation under section 203(i)(2) as well as section 203(i)(3), the Commission indicated it would consider reduction of relief as an alternative to termination or full extension. Since apparent consumption of clothespins is relatively constant at 6.0 to 6.5 million gross a year, any reduction in import relief will most likely result in significantly increased market penetration by imports with a concomitant decrease in domestic market share.[37] As we have already indicated above (under extension of relief), a decline in market share would jeopardize the industry's impressive adjustment efforts planned for the next 3 years. We therefore advise against any reduction of relief.

We note that inflation is reducing the effective protection provided in the quota categories.[38] The extent of inflation-induced reduction cannot be quantified.[39] However, the large increases in imports in the $1.35–$1.70 per gross quota category and in imports outside the quota over the relief period indicate that this effect is occurring.

Recognizing that relief is already being phased down over time as a result of inflation, we advise against any further reduction. Possible actions that could reduce the effect of relief include: (1) increasing the size of the quota; (2) eliminating or reallocating the value categories; (3) substituting an annual for a quarterly restriction; or (4) exempting a product now covered by the quota, such as plastic clothespins.

Increasing the size of the quota obviously would increase the flow of imports and harm the domestic adjustment program.[40] These negative effects need no further explanation, but the other options warrant discussion. The second option, eliminating or reallocating the value categories, would result in increased imports of lower valued clothespins, the very ones that create the most competition for U.S. producers.[41] The third option, eliminating the quarterly provision, would put increasing downward price pressure on both domestic and imported clothespins of lower value during the peak selling season and would increase the volume of imported clothespins available at that time.[42] It would have no effect on the total annual volume of imports of clothespins valued under $1.35 per gross but possibly could lead to an increase in imports of clothespins valued at $1.35–$1.70 per gross.[43]

The fourth option, exempting plastic clothespins from relief, is the most difficult to assess.[44] Shipments of plastic clothespins comprise only a small volume of total industry shipments. However, planned adjustment efforts will increase domestic industry competitiveness in this market and import penetration is still quite high. Imports of plastic clothespins under the lower two quota categories have been limited,[45] and the third category has not had a restraining effect on imports. Information is not presently available concerning the potential of foreign producers to supply plastic clothespins at low prices. The extent to which plastic clothespins compete with wood clothespins also has not been documented. Domestic producers have stated that wood and plastic clothespins are often sold as companion products, leading to the conclusion that removing plastic clothespins from the quota would result in lost sales of both wood and plastic clothespins. Some producers have reported that plastic clothespins are an important part of their profit picture, although separate profitability data for plastic clothespins were not available. Since higher value plastic clothespins are not specifically limited by the quota and inflation causes an increasing number of plastic clothespin imports to fall outside the quotas, we have concluded that an exemption for plastic clothespins, while providing little additional benefit to U.S. consumers, could jeopardize the industry's adjustment plans.

Section 202(c) considerations

We have examined the considerations set forth in section 202(c) of the Trade Act and our detailed findings with respect to each of the nine considerations are set forth in the attached report.[46] In those findings, we conclude that the relief has been very effective in limiting imports, and that relief has had a minimal effect on consumers.[47] Also, because of the concentration of domestic production in four small towns in Maine and two in Vermont, we conclude that termination or reduction of relief could have a significant adverse impact on the communities involved.[48] We also noted that several of the largest exporters to the U.S. market are not signatories to the GATT and that there have been no requests for compensation under Article XIX of the GATT.[49]

Conclusion

Based on the information before us, the Commission advises that relief be extended at present levels for 3 years. The domestic industry needs additional time in which to complete its adjustment process. Termination or reduction in relief at this time is likely to lead to a large increase in imports. This result would seriously undermine the adjustment effort.

By Order of the Commission.

Issued: December 7, 1981.

[34] During the last few years the domestic firm that gained significant market share in wood spring clothespins advanced its delivered prices on these clothespins faster than any of the other three producers. This company has increased its sales despite the fact that its prices were frequently higher than those of its competitors. Report, p. A–89.

[35] Commissioner Frank believes, in the absence of detailed comparative production and other relevant cost data between such imported and domestic products and despite oft-recognized labor cost advantage held by certain imported products, such a view on future price differential patterns cannot be made with sufficient assurance at this time.

[Investigation No. 337-TA-3]

Doxycycline; Motion To Modify Exclusion Order

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received a motion to modify the exclusion order issued at the conclusion of the above-captioned investigation. In conformity with § 211.57 of the Commission's Rules of Practice and Procedure (46 FR 17533, Mar. 18, 1981), the motion and this notice will be served on each former party to the investigation. Within 30 days of such service, any former party served may file an answer to the motion.

DATE: Answers to the motion will be considered if received within 30 days of service upon the former party. Answers should conform with § 201.8 of the Commission's Rules of Practice and Procedure (19 CFR 201.8), and should be addressed to Kenneth R. Mason, Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

SUPPLEMENTARY INFORMATION: On April 12, 1979, the Commission issued an order excluding the importation into the United States of doxycycline falling within claim 10 of U.S. Letters Patent 3,200,149 for the remaining term of the patent except under license. That order is now in force.

On November 5, 1981, Danbury Pharmacal, Inc., a former respondent in doxycycline investigation, filed a motion with the Commission seeking modification of the doxycycline exclusion order to permit the importation of small quantities of doxycycline to be used for testing or research purposes required to obtain Food and Drug Administration certification under 21 U.S.C. 357, and not for sale to the consuming public.

FOR FURTHER INFORMATION CONTACT: Lairold M. Street, Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436; telephone 202-523-3395.

By order of the Commission.

Issued: December 10, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-101]

Certain Hot Air Corn Poppers and Components Thereof; Settlement Agreements, Recommended Termination, and Request for Public Comments

AGENCY: U.S. International Trade Commission.

ACTION: Notice of settlement agreements and request for public comments on the recommended termination of certain parties as respondents to the investigation.

SUMMARY: Notice is hereby given that the presiding officer in this investigation has issued an order recommending that the Commission grant a joint motion by the complainant and certain respondents to terminate the investigation with respect to those respondents on the basis of settlement agreements entered into by the parties. Before taking final action on the motion, the Commission seeks written comments on the proposed termination from interested members of the public.

DEADLINE: All comments must be received on or before January 22, 1982.

SUPPLEMENTARY INFORMATION: The Commission is conducting investigation No. 337-TA-101 to determine whether there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States of certain hot air corn poppers and components thereof, or in the sale of such articles, which are alleged to infringe claims 1, 2, 3, and 5 of U.S. Letters Patent 4,178,843, the effect or tendency of which to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

On October 13, 1981, the complainant, Wear-Ever Aluminum, Inc., and respondents General Electric Co. (G.E.), K Mart Corp. (K Mart), and the Stop & Shop Companies, Inc. (Stop & Shop) filed a joint motion (Motion No. 101-19) to terminate the investigation with respect to those respondents under the provisions of § 210.51 of the Commission's Rules of Practice and Procedure (19 CFR 210.51). The grounds for the proposed termination are settlement agreements between the complainant and each of the respondents named above. The motion was supported by the Commission investigative attorney and opposed by respondent Sunbeam Corp. On November 19, 1981, the presiding officer issued an order recommending that Motion No. 101-19 be granted. The settlement agreements and the proposed termination are now before the Commission for final action.

The substantive provisions of the settlement agreement between Wear-Ever and G.E. are as follows:

1. G.E. warrants that (a) it ceased importing the accused corn poppers prior to the institution of the investigation, (b) it has not, since such time, placed any purchase orders for the importation of additional accused corn poppers, and (c) the total number of accused corn poppers imported by G.E. has not exceeded the amount reported to the complainant.

2. G.E. will not hereafter import, cause to be imported, purchase, sell, give, own, or consign additional units of the accused corn poppers, except pursuant to a duly granted license under U.S. Letters Patent 4,178,843.

3. G.E. will not hereafter import, cause to be imported, purchase, sell, give, own, or consign any device which infringes the subject patent or any component thereof which constitutes a material part of the invention claimed in the patent and is not a staple article or commodity of commerce.

4. G.E. admits that U.S. Letters Patent 4,178,843 is valid and enforceable.

5. The entire stock of accused corn poppers in the possession of or under the control of G.E. or its customers, K Mart and Stop & Shop, as of July 1, 1981, may be disposed of (by way of sale or otherwise) by G.E. or the said customers for and in consideration of each of the covenants contained in the agreement by G.E. and upon the payment of a certain sum to Wear-Ever within 10 days of the date of the agreement. The right to dispose of the accused corn poppers shall survive the termination of proceedings in the investigation, and any appeals thereof, including the issuance of an exclusion order at the conclusion of lthe investigation.

6. The parties to the agreement agree that the payment provided for in paragraph 5 above does not constitute and shall not be construed as a payment for royalty for a license under U.S. Letters Patent 4,178,843. Further, no license under that patent is granted to G.E. under the agreement.

7. With respect to the accused corn poppers which are subject to, or disposed of in conformity with, the terms and conditions of the agreement, Wear-Ever releases and discharges G.E., together with its officers, directors, agents, employees, purchasers, customers, successors, and assigns, from all causes of action and claims for damage that Wear-Ever may have against them relating to unfair methods of competition and unfair acts or any

other matter—including, without limitation, patent infringement—arising out of the importation, use, or sale of the accused corn poppers. The foregoing release and discharge may be extended to respondent Yamada Electric Industries, Ltd., to the extent that Yamada has made the accused corn poppers for G.E., at the option of Yamada and upon express acceptance by Yamada. The release and discharge also may be extended to respondent Maxim Associates Corp., to the extent that Maxim has any connection with the corn poppers made by Yamada for G.E., at the option of Maxim, upon express acceptance by Maxim. Acceptance by Yamada or by Maxim shall operate to extend the release and discharge only to those respective companies with respect to the corn poppers sold to G.E., and shall not constitute any admission by the acceptor with respect to either U.S. Letters Patent 4,178,843 or the accused corn poppers.

8. G.E. agrees to give Wear-Ever reasonable notice, not less than 4 months, of its intent to import hot air corn poppers, or components thereof, that are not staple articles or commodities of commerce. During the 4-month period, Wear-Ever and G.E. agree to exert their best efforts to resolve any issues relating to such importation, including any issue of alleged infringement of the subject patent by the proposed imported products. Further, in any further proceedings before any tribunal, the burden of establishing infringement with respect to any product made, sold, or imported by or on behalf of G.E. shall remain on Wear-Ever or the owner of U.S. Letters Patent 4,178,843.

9. G.E. and Wear-Ever agree that the agreement shall be binding upon and inure to the benefit of Wear-Ever and G.E., their respective officers, directors, agents, successors, and assigns, and all persons acting by, through, under, or in active concert or participation with them.

10. The obligation of G.E. under paragraphs 2, 3, 4, and 8 above shall cease upon any determination by the International Trade Commission or any final determination by any United States court of competent jurisdiction that U.S. Letters Patent 4,178,843 is invalid or unenforceable.

11. The agreement shall be considered as a contract made by and under the laws of the State of Ohio.

The substantive provisions of the settlement agreements between Wear-Ever and K Mart and between Wear-Ever and Stop & Shop are as follows:

1. K Mart and Stop & Shop warrant that (a) they did not import the accused corn poppers prior to the institution of the investigation, (b) they have not, since such time, placed any purchase orders for the importation of additional accused corn poppers, and (c) they have only purchased the accused corn poppers from G.E.

2. K Mart and Stop & Shop will not hereafter import, or cause to be imported, said accused corn poppers. Nothing in the agreements shall prohibit K Mart and Stop & Shop from selling or otherwise disposing of all imported accused corn poppers presently in inventory, the quantities of which have been disclosed to Wear-Ever by G.E. and may be disposed of pursuant to and in compliance with the written agreement between Wear-Ever and G.E.

3. K Mart and Stop & Shop will not hereafter import, or cause to be imported, any device adjudicated to be an infringement of U.S. Letters Patent 4,178,843, or component thereof which constitutes a material part of the invention claimed therein and is not a staple article or commodity of commerce, provided such adjudication is by the Commission or by any final determination of any United States court of competent jurisdiction. Furthermore, Wear-Ever shall have notified K Mart and Stop & Shop of any such adjudication prior to the time K Mart and Stop & Shop imported or caused to be imported that device.

4. No license under U.S. Letters Patent 4,178,843 is granted to K Mart or to Stop & Shop under the agreements.

5. With respect to the accused corn poppers which are subject to or disposed of in conformity with the agreements, Wear-Ever releases and discharges K Mart and Stop & Shop, only to the extent that they have sold accused corn poppers purchased from G.E., together with their officers, directors, agents, employees, purchasers, customers, successors, and assigns from all causes of action and claims for damage that Wear-Ever may have against them relating to unfair methods of competition and unfair acts arising out of the importation, use, or sale of the accused corn poppers. Wear-Ever also agrees to take no action against K Mart and Stop & Shop—only to the extent that K Mart and Stop & Shop have sold accused corn poppers purchased from G.E.—together with their officers, directors, agents, employees, purchasers, customers, successors, and assigns by reason of any prior use or sale of the accused corn poppers which were imported into the United States prior to the date of the investigation.

6. K Mart, Stop & Shop, and Wear-Ever agree that the agreements shall be binding upon and inure to the benefit of Wear-Ever, K Mart, and Stop & Shop, and all persons acting by, through, under, or in active concern or participation with them.

7. The agreements shall be considered as contracts made by and under the laws of the State of Ohio.

The settlement agreements (except for confidential business information contained therein) are available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

All comments must conform to the requirements of § 201.8 of the Commission's rules (19 CFR 201.8) and must be addressed to the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–111]

Certain Vacuum Cleaner Brush Rollers; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on October 23, 1981, amended on November 5, 1981, and December 3, 1981 under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of The Scott & Fetzer Co., 14600 Detroit Ave., Lakewood, Ohio 44107. The amended complaint (hereinafter the complaint) alleges unfair methods of competition and unfair acts in the importation of certain vaccum cleaner brush rollers into the United States, or in their sale, by reason of the alleged infringement by said brush rollers of the claims of U.S. Letters Patent 3,367,728. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry.

efficiently and economically operated, in the United States.

The complainant requests that, after a full investigation, the Commission issue both an order excluding said articles from entry into the United States and an order directing respondents to cease and desist from engaging in said unfair acts.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure.

SCOPE OF THE INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on December 10, 1981, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unauthorized importation of certain vaccuum cleaner brush rollers into the United States, or in their sale, by reason of the alleged infringement by said brush rollers of the claims of U.S. Letters Patent 3,367,728, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—The Scott & Fetzer Co., 14600 Detroit Ave., Lakewood, Ohio 44107.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Hornleon Co., Ltd., P.O. Box 67–327, 11F, 150 Chi Lin Road, Taipei 104, Taiwan

Vacuum Parts Unlimited, Inc., 1403 Cherry Ave., Long Beach, CA 90813

(c) John Milo Bryant, Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determiation containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretay, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: John Milo Bryant, Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–0419.

By order of the Commission.

Issued: December 15, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 701–TA–82 (Preliminary)]

Hard-Smoked Herring Filets From Canada

Determination

On the basis of the record developed in investigation No. 701–TA–82 (Preliminary), the Commission determines that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of imports from Canada of hard-smoked herring filets, provided for under item 111.80 of the Tariff Schedules of the United States, which are allegedly being subsidized by the Canadian Government.[1]

Background

On November 2, 1981, the McCurdy Fish Co., Lubec, Maine, filed a petition with the U.S. International Trade Commission and the U.S. Department of Commerce (Commerce) alleging that the Canadian Government is providing subsidies for the processing of hard-smoked herring filets and that, by reason of imports of this allegedly subsidized product, an industry in the United States is being materially injured or threatened with material injury.[2] Accordingly, on November 17, 1981, the Commission instituted a preliminary countervailing duty investigation (No. 701–TA–82) under section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b). Notice of the institution of the Commission's investigation was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on November 20, 1981 (46 FR 57144). A public conference was held in Washington, D.C., on November 30, 1981, at which all interested persons were afforded the opportunity to present information for consideration by the Commission.

Views of Chairman Alberger, Vice Chairman Calhoun, and Commissioners Stern and Eckes

Introduction

After considering all the available information, we conclude that there is no basis for continuing this investigation. Factors bearing on this decision include the current economic condition of the domestic hard-smoked herring filet industry, historic pattern of import penetration, and our assessment of recent marketing conditions.

Domestic industry

Section 771(4)(A) of the Tariff Act of 1930 defines the term "industry" as the "domestic producers as a whole of a like product or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product."[3] "Like product" is defined as a product which is like, or in the absence of like, most similar in characteristics and uses with, the article under investigation.[4]

The imported products which are the subject of this investigation are hard-

---

[1] Commissioner Frank determines that there is a reasonable indication of threat of material injury to the domestic industry by reason of these imports.

[2] McCurdy Fish Co. had previously filed a petition with the Commission and Commerce on September 30, 1981. The Commission instituted a preliminary countervailing duty investigation on October 2, 1981. After Commerce found that the information furnished in support of the alleged subsidies was insufficient, the McCurdy Fish Co. withdrew its petition, and the Commission terminated that investigation (No. 701–TA–81).

[3] Section 771(4)(A) of the Tariff Act of 1930.

[4] Section 771(10).

smoked herring filets[5] from Canada. Hard-smoking is a method of preserving and flavoring herring before consumption. The herring are immersed in a salt brine and then smoked for 4 to 6 weeks. The process gives the herring a distinct taste and reduces the need for refrigeration. After hard-smoking, the fish's head, tail, vital organs, backbone, and skin can be removed. The remaining halves are called filets. Herring is the only type of hard-smoked fish imported or produced in the United States.

Only one company produces hard-smoked herring filets in the United States. U.S. companies also produce "smoked" fish, but "smoking" is a different process, producing a smoke-flavored rather than smoke-cured product. Smoked herring has a relatively short preparation time and is much more perishable than hard-smoked fish.[6]

Therefore, we conclude that the only product like the imported product is hard-smoked herring filets and that the domestic industry consists of the only U.S. producer—the petitioner, the McCurdy Fish Company.

No Resonable Indication of Material Injury by Reason of Imports

Section 771(7) of the act directs the Commission to consider, among other factors, (1) the volume of imports of the merchandise under investigation, (2) their impact on domestic prices, and (3) the consequent impact on the domestic industry.[7]

Imports. For many years the 40 Canadian producers of hard-smoked herring filets have been a dominant factor in the U.S. market. During the period of this investigation, the volume of imports from Canada varied from 594,644 lbs. in 1978 to 1,019,449 lbs. in 1979, 693,350 lbs. in 1980, and 622,212 lbs. in the first nine months of 1981.[8] Canadian import market penetration also has shown no particular trend since 1978, moving from 74.9 percent in that year to 84.5 percent in 1979, 77.9 percent in 1980, and 84.2 percent in January–September 1981.[9]

Effect on domestic prices. From January 1979 to January 1981, the price of hard-smoked herring filets rose steadily, primarily due to shortages of fresh herring. From January to September 1981, producers' prices declined by 12 percent.[10] This decline was triggered by the buying practices of one large buyer in the New York area.[11] Since July of 1981, prices have increased again.

No precise price comparisons can be made between the U.S. and Canadian-produced product because prices change frequently in this industry and price information provided to the Commission on U.S. prices by importers is not complete as that provided by the petitioner. From 1978 to 1980 there were no reported incidents of price cutting attributable to imports from Canada. The 1981 buying practices of the New York purchaser, mentioned above, caused other New York area buyers to demand similar low prices for hard-smoked herring filets in order to remain competitive. This caused price reductions in the entire marketing area for both the domestic and Canadian producers. This situation appears to have reversed.[12]

Condition of the industry. Economic data indicate that the domestic industry is currently in good health. The petitioner's net sales increased by almost 50 percent from 1978 to 1980, and net operating profits doubled during the same period. Although reported on a calendar year basis, McCurdy estimates that its profits will remain at its 1980 level at least through September 1981.[13]

Domestic shipments were equal to production during the investigation period, dropping about 5 percent in 1979 and then holding relatively steady. In terms of value, however, shipments increased by nearly half between 1978 and 1980, and rose again in January–September 1981. As a result of this value increase, the shipment decrease in 1979 was not reflected in the profitably figures, which showed a significant increase in the ratio of net operating profit to new sales for that year.[14]

The 1980 data are surprising in that production, shipments and profits remained at approximately 1979 levels, despite a 26 percent drop in apparent U.S. consumption. (Consumption rose again in the first nine months of 1981, 19 percent over the comparable 1980 period.)[15]

Slight declines in production and shipments in January–September 1981 were in part the result of a raw herring shortage in September. This also affected the otherwise high capacity utilization figures, which declined 1.5 percent in that period after a 5 percent drop from 1978 to 1980.[16]

Employment levels also were affected by the shortage. Prior to 1981, however, the seasonal pattern of employment in the industry did not vary from year to year, and easing of the shortage has returned employment levels to normal.[17]

No Reasonable Indication of Threat of Material Injury

Congress directs that a Commission determination that a domestic industry is threatened with material injury "shall be based upon evidence showing that the threat is real and imminent and not upon mere supposition or conjecture."[18] The record in this investigation does not support such a determination.

Canadian producers are, like McCurdy Fish Co., small operations. They too are vulnerable to forces outside their control such as weather and fish availability. They purchase their fish from many of the same sources as the petitioner and are subject to the same shifts in the price of fresh fish. Canadian producers have for many years prior to 1978 supplied the bulk of U.S. consumption of hard-smoked herring filets, and there is no indication of any move to capture the rest of the U.S. market.

In our view, it is particularly significant that the recent narrow fluctuations in import share and price pressures did not adversely affect the domestic industry. To the contrary, the petitioner indicated that domestic profits which doubled from 1978–80 have been maintained in 1981. Though inherently vulnerable, the petitioner's position does not appear to be so precarious as to be materially affected by small fluctuations in imports or short periods of price competition.

Conclusion

All of the information available to the Commission indicates that petitioner's profits have increased substantially during the period investigated, despite both a decline in production and shipments and a temporary decline in prices during 1981. Accordingly, there is not reasonable indication that the industry is materially injured. Moreover, there is not information to reasonably indicate that a threat of material injury is imminent.

---

[5] "Fillets" and "filets" are different terms for the same product. The domestic industry, however, calls its product "filets" and we have adopted its terminology.

Views of Commissioner Frank

On the basis of the record developed in Investigation No. 701–TA–82 (Preliminary), I determine that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports from Canada of hard-smoked herring filets, provided for in item 111.80 of the Tariff Schedules of the United States, which are allegedly being subsidized by Canada.

Domestic industry

Section 771(4)(A) of the Tariff Act of 1930 defines the term "industry" as the "domestic producers as a whole of a like product or those producers whose collective output of the like product constitutes a major proporation of the total domestic production of that product."[19] "Like product" is defined as a product which is like, or in the absence of like, most similar in characteristics and uses with, the article under investigation.[20]

The imported products which are the subject of this investigation are hard-smoked herring filets [21] from Canada.

Hard-smoking is a method of preserving and flavoring herring before consumption. In the process of hard-smoking, the herring are immersed for 4 to 6 days in a salt brine, after which they are smoked in an enclosure for 4 to 6 weeks at room temperature. The process gives the herring a distinct salt-smoked taste and also reduces the need for refrigeration.

After hard-smoking, the herring can be fileted, that is, the fish's head, tail, vital organs, backbone, and skin can be removed. The remaining two halves of the fish are the filets.

One company produces hard-smoked herring in the United States. U.S. companies also produce "smoked" fish, but "smoking" is a different process from "hard-smoked" because a smoked fish is smoke flavored as opposed to a hard-smoked fish which is smoke cured. Smoking is also secondary to the processing, not primary. Unlike a hard-smoked herring which has been immersed in salt brine for 4 to 6 days and then cured by smoking for 4 to 6 weeks, a smoked herring has been prepared for 4 to 6 hours in ovens at 250 degrees and subjected to smoke while heating. A hard-smoked herring is salted, dehydrated, tough in consistency, and can be preserved with little refrigeration. A smoked herring is unseasoned, moist, brittle and perishable. Smoked herring will not keep indefinitely unless sealed in airtight containers.

Because of these differences, a smoked herring is not like a hard-smoking herring. Herring, moreover, is the only type of fish produced or imported into the United States that is hard-smoked. We, therefore, conclude that the only product like the imported product is hard-smoked herring.

The domestic industry, therefore, consists of the only producer of hard-smoked herring in the United States—the petitioner, the McCurdy Fish Company.

Conditions of the U.S. industry

The petitioner, the McCurdy Fish Company, Lubec, Maine, accounts for all the hard-smoked herring produced in the United States. Annual U.S. production of hard-smoked herring filets declined by 5.2 percent from 1978 to 1980, and declined further in January–September 1981, relative to the comparable 1980 record by 1.7 percent, although the latter decline was attributed mainly to difficulties in obtaining fresh herring for processing. Inventories were negligible or shipments were approximately the same as production during the period.[22] Likewise, industry capacity utilization showed substantial reduction during this period. These trends occurred during a period when apparent domestic consumption increased irregularly both in terms of quantity and value and from January–September 1980 to the comparable period of 1981 and apparent domestic consumption evidenced marked increases in quantity and value of 19 percent and 15 percent, respectively.[23] This is reflective of increased import penetration discussed later herein.

Employment data from 1978 to July of 1981 showed little change and continued to reflect the seaonal nature of the industry, although there was a marked drop-off in the following two months, attributed to lack of fresh herring available. Employment has since returned to normal levels since the arrival of fresh herring in late October. Total hours worked followed a similar trend and the hours worked per employee showed no change during the period.

The financial performance of the industry from the standpoint of sales, gross and net operating profit, reflected steady improvement during the 1978 through 1980 period for which quantitative financial information was available, and it is estimated that in 1981, at least through September, the industry was as profitable as in 1980.[24] However, this financial picture should be viewed in a proper perspective. Due to the relatively low capital intensiveness and concomitant fixed costs, the nature of labor and othe cost inputs such as recent lower costs for fresh herring affecting gross margins, the industry was able to adjust financially to reduced operating capacity rates and lower prices for hard-smoked herring in 1981. There is no assurance such a propitious scenario will reoccur in the future, however, should prices evidence a decline similar to 1981. Further, the industry's financial position should be viewed in the context of its relatively minor position in the U.S. market (it does not export) vis-a-vis particularly the Canadian imports and increased Canadian import penetration.

The domestic industry's condition, considering the size and scope of its operations relative to high levels of imports, and notwithstanding somewhat stable employment, trends, and slightly improved financial position, while not demonstrating reasonable indication of injury at present, causally linked to imports, shows, however, a reasonable indication of substantial susceptibility to import related injury.

Reasonable Indication of Threat of Material Injury

As the Senate Finance Committee report in the Trade Agreements Act of 1979 makes clear, an affirmative finding in the question of threat of material injury "must be based upon information showing that the threat is real and injury is imminent, not a mere supposition or conjecture." (S. Report 96–249, 96th Cong., 1st Session (1979) at 88–89.)

Since 1978, Canada has accounted for no less than 97 percent of U.S. imports of hard-smoked herring filets. U.S. imports from Canada increased irregularly over the period: over 70% from 1978 to 1979; down 32 percent in 1980; up 26 percent in the January–September 1981 period relative to the comparable 1980 period.[25] Although imports from Canada increased in 1981 from 1980, average unit values declined somewhat.[26] As a share of irregularly increasing domestic consumption, imports from Canada also registered substantial albeit irregular increases: increasing from 74.9 percent in 1978 to 84.5 percent in 1979; declining to 77.9

[19] Section 771(4)(A) of the Tariff Act of 1930.
[20] Section 771(10).
[21] "Fillets" and "filets" are different terms for the same product. The domestic industry, however, calls its product "filets" and we have adopted its terminology.
[22] Staff Report at A–9.

[26] *Id.*

percent in 1980; increasing in the January–September 1980–January–September 1981 period from 79.9 percent to 84.2 percent. Imports from other sources were relatively negligible compared to Canadian levels of penetration.[27]

Although in the preliminary investigation data on shipments, exports, capacity, and planned changes in capacity for the Canadian producers was not available, information on import penetration obtained to date and overall shipments to the U.S. market show without a doubt an increasing dominance in market presence over the domestic industry even assuming 100 percent domestic capacity utilization—for 1980 for example reflecting over 3 times domestic capacity.[28]

Notwithstanding the industry's continued profitability through September 1981, there appear certain elements in the market which may adversely affect its future performance. In New York where traditionally much of the industry's product has been sold, the effect of imports from Canada purchased by one large importer was to reduce prices substantially between January and May of this year. Prices declined in other markets also, although less severely.[29] As stated earlier, reduced average cost of fresh herring during this period mitigated this price decline and thus the industry's profitability was not adversely affected. However, fresh herring costs in October and November have risen substantially. In February of this year, at least one of petitioner's shipments (representing over 8% of its 1980 shipments) was rejected in favor of the Canadian product by a major purchaser for the sole reason of price.[30] Although no precise price comparisons of Canadian-produced filets can be made with the domestic industry, pricing patterns show mixed results in comparability that call for further inquiry. Although Canadian producers' net prices were approximately consistent with the domestic industry from January 1979 to January 1981, after January 1981 prices for the Canadian product fell in line with the domestic industry except in New York where the price fell more rapidly and to a lower level.[31] There appears to be indication of concentrated buying power exercised by a major import/buyer in the New York area, causing a general price decline throughout the Atlantic seaboard that is thought to explain this trend. Since July prices have again increased.[32] Yet it must be stated the Canadians' apparent acquiescence to this import-buyer dominance evidently exacerbated the general price decline in view of their high penetration already obtained in the U.S. market. Although prices have again increased since July, many importers report that Canadian producers' prices are currently about 10 percent below McCurdy's.[33]

Thus, despite conflicting signals derived from the pricing data obtained to date in this preliminary investigation, I am of the view that there appears to be a reasonable indication of potential price depression and distortion due to Canadian imports which warrants further investigation, that is further underscored by the massive and increasing presence of such imports in the U.S. market today.

Conclusion

The domestic industry, despite certain modest indications of financial health and stable employment, is in a fragile position relative to Canadian imports. The size and scope of the domestic industry's operations make the sole U.S. producer particularly vulnerable to variations in income, notwithstanding relatively low fixed costs. Canadian imports, previously having captured a significant share of the U.S. market, have continued to increase their penetration into the U.S. market. The dynamics of pricing patterns between domestic and Canadian imported products show reasonable indication of a potential further price depressive effect of imports on the domestic product. With possible onset of further concentrated buying power exercised by dominant importers/buyers in the New York area as long as a competitive product from Canada is available, future price depressive and suppressive actions may ensue to the detriment of the sole domestic producer. There is also testimony of significant general overall underselling by Canadian imports which warrants further scrutiny. The industry's profitability in 1981 was not adversely affected due to such trends primarily because while prices for the finished product declined, the cost of fresh herring—a substantial production cost factor—also declined. It is not likely such a coincidence would continue to occur in the future.

Therefore, in view of the above, I have determined that there is a reasonable indication of threat of material injury to the domestic hard-smoked herring filet industry be reason of imports of Canadian hard-smoked herring filets.

By order of the Commission.

Issued: January 17, 1981.

Kenneth R. Mason,

Secretary.

[Investigation No. 751–TA–5]

Salmon Gill Fish Netting of Manmade Fibers From Japan; Public Hearing and Extension of Deadline for Completion of Investigation

AGENCY: United States International Trade Commission.

ACTION: Scheduling of public hearing and extension of deadline for completion of investigation No. 751–TA–5, Salmon gill fish netting of manmade fibers from Japan.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission will conduct a public hearing in connection with the subject investigation. The hearing will be held on February 16, 1982 in Portland, Oregon. The Commission also gives notice that it has waived the 120 day limit for completion of this investigation. The new administrative deadline for completion is March 31, 1982.

EFFECTIVE DATE: December 11, 1981.

SUPPLEMENTARY INFORMATION: On November 18, 1981, the Commission received a request to waive the 120 day time limit for completion of the subject investigation upon the condition that a public hearing be held in Portland, Oregon or Seattle, Washington subsequent to December 1981. On November 24, 1981, the Commission voted to postpone the December 17, 1981 hearing scheduled to be held in Washington, D.C. (46 FR 58618). Since salmon fishing is centered in the rivers and offshore waters of the Pacific Northwest the majority of importers and users of salmon gill fish netting are located in that area. A public hearing in Portland will provide these groups with the opportunity to present oral testimony to the Commission.

Written submissions.—Any person may submit to the Commission on or before February 24, 1982, written statements of information pertinent to the subject matter of the investigation. A signed original and nineteen true copies of such statements must be submitted in accordance with § 201.8 of the Commission's Rules of Practice and Procedure, 19 CFR 201.8 (1980).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately and each sheet must be clearly marked at the top "Confidential business data." Confidential submissions must conform with the requirements of § 201.6 of the Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except confidential business data, will be available for public inspection. A staff report containing preliminary findings of fact will be available to all interested parties on January 26, 1982.

Public hearing.—The Commission will hold a public hearing in connection with this investigation on February 16, 1982, beginning at 10:00 a.m., p.s.t., in room 223 of the New Federal Building, 1220 South West 3rd Street, Portland, Oregon. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m., e.s.t.) on January 29, 1982. All persons desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 2:00 p.m., e.s.t., on February 2, 1982, in Room 117 of the U.S. International Trade Commission Building and must file prehearing statements on or before February 10, 1982. For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subpart C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

The Commission has waived Commission rule § 201.12(d), "Submission of prepared statements," in connection with this investigation. This rule states that "Copies of witnesses prepared statements should be filed with the Office of the Secretary of the Commission not later than 3 business days prior to the hearing and submission of such statements shall comply with §§ 201.6 and 201.8 of this subpart". It is nevertheless the Commission's request that parties submit copies of witnesses prepared testimony as early as practicable before the hearing in order to permit Commission review.

FOR FURTHER INFORMATION CONTACT: Daniel Leahy, investigator, Office of Investigations, U.S. International Trade Commission, (202) 523–1369 or Jane Albrecht, attorney, Office of the General Counsel, U.S. International Trade Commission, (202) 523–1027.

By Order of the Commission.

Issued: December 14, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-133]

Trends in International Trade in Printed Circuit Boards and Base Material Laminates

AGENCY: United States International Trade Commission.

ACTION: Following receipt on November 18, 1981, of a request from the Chairman of the Subcommittee on Trade of the Committee on Ways and Means of the U.S. House of Representatives, the Commission, on its own motion, instituted investigation No. 332–133 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), for the purpose of gathering and presenting information on trends in international trade in printed circuit boards and base material laminates and the factors affecting the competitiveness of U.S. producers of such products. This study will present a profile of the United States market and industry, and to the extent possible, the Canadian, European, and Japanese markets and industries and their comparative technical and economic strengths.

EFFECTIVE DATE: December 10, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Nelson Hogge or Mr. Harold Graves, Machinery and Equipment Division, U.S. International Trade Commission, Washington, D.C. 20436, telephone 202–523–0377 or 202–523–0360, respectively.

PUBLIC HEARING: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m., e.d.t., on May 12, 1982, to be continued on May 13, 1982, if required. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, not later than noon, May 5, 1982.

WRITTEN SUBMISSION: In lieu of or in addition to appearance at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desired the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be ensured of consideration by the Commission, written statement should be submitted at the earliest practicable date, but no later than May 20, 1982. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: December 14, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket Nos. 81-7, 8, 9, 10, and 13]

Loyd B. Rapp, et al.; Approval of Limited Registrations

On March 11, 1981, the Administrator of the Drug Enforcement Administration issued Orders to Show Cause proposing to deny the application for registration submitted by Loyd B. Rapp, N.D., Ralph R. Weiss, N.D., Donald C. Walker, N.D., Edmonde G. Samuel, N.D., and Joseph A. Rombough, N.D. (Respondents). The Orders to Show Cause were issued because the Drug Enforcement Administration (DEA) was unable to determine whether the Respondents, Naturopathic Physicians licensed to practice naturopathic medicine by the Naturopathic Board of Examiners of the State of Oregon, were authorized to utilize controlled substances under the laws of the State of Oregon regulating the practice of naturopathic medicine and the use of controlled substances.

The Respondents, through counsel, requested hearings on the issues raised by the Orders to Show Cause and these matters were placed on the docket of Administrative Law Judge Francis L. Young. Since the issues involved in all five cases were identical, Judge Young consolidated them for hearing and other proceedings.

Prior to the scheduled hearing in these matters, counsel for the Government and counsel for the Respondents filed a Stipulation of Settlement which resulted in the termination of the proceedings pending before the Administrative Law

Judge. Accordingly, these matters have been submitted to the Acting Administrator for his independent review and determination in light of the Stipulation of Settlement filed by the parties.

Naturopathy is an unusual branch of medicine, the practice of which is permitted in a dwindling number of states. The naturopathic physician practices a hearing art which appears to be a mixture of modern medicine and old world herbalism. The practice generally eschews the use of modern drugs which are usually of synthetic origin. The Oregon Naturopathic Board of Examiners defines the duties of a naturopathic physican in the following manner:

> Treats the patient by maintaining or restoring the human body to a normal physiological state of health. He prescribes and dispenses botanical medicines, nature's agents, forces, processes and products. He may also do minor surgery, treat fractures and practice obstetrics. He uses all recognized and accepted physical and laboratory diagnostic procedures which include X-ray and the taking of body fluids and tissues. His practice does not include major surgery, medical drugs, or radiation for therapeutic purposes.

The Acting Administrator finds that the Respondents are Doctors of Naturopathy or naturopathic physicians, licensed by the Naturopathic Board of Examiners of the State of Oregon to practice naturopathic medicine pursuant to the provisions of Chapter 685, Oregon Revised Statutes ("ORS"). Naturopathic, physicians are generally prohibited, pursuant to ORS 685.030(2), from administering, prescribing or dispensing "drugs," as that term is defined in ORS 685.010(2). However, these practitioners are permitted to use local anesthetics in connection with minor surgery as defined in ORS 685.010(3) and to otherwise use, prescribe and dispense in the usual course of their professional practice "nonpoisonous plant substances" as referred to in ORS 685.010(2) and as defined in section 850-10-005(5) of the Oregon Administrative Regulations ("OAR").

The Attorney General of the State of Oregon, in Opinion No. 7887, dated April 11, 1980, has determined that naturopathic physicians may, consistent with the intent of ORS Chapter 685, purchase and use in the course of their professional practice prescription drugs and controlled substances, to the extent that such substances are local anesthetics used in connection with the performing of minor surgery; and that naturopathic physicians may purchase and use, prescribe and dispense prescription drugs and controlled substances to the extent that such substances come within the definition of nonpoisonous plant substances.

The Drug Enforcement Administration is required to register "practitioners," as defined in 21 U.S.C. 802(20), to the extent that such practitioners are authorized to prescribe, administer, dispense or otherwise handle controlled substances under the laws of the state in which they practice; see 21 U.S.C. 823(f). The Respondents have individually applied for such registration. In some states, the fact of "state authorization" is easily determined, since practitioners and other legitimate handlers of controlled substances are required to obtain separate state registrations which document their authority to use these substances under state law. However, practitioners otherwise licensed under the laws of the State of Oregon, and authorized to dispense or administer controlled substances by their licensing authority, need not obtain separate state registrations from the Oregon Board of Pharmacy, the agency responsible for administering the Oregon Uniform Controlled Substances Act (ORS 475.005, *et seq.*). Unfortunately, neither the Naturopathic Board of Examines, which is the "licensing authority" in this instance, nor any other executive, legislative or judicial authority of the Sate of Oregon has definitely ruled which, if any, controlled substances may be considered to be nonpoisonous plant substances or local anesthetics medically appropriate for use in connection with minor surgery. These questions ought to be answered by responsible authorities in the State of Oregon. Such central questions of state law are not properly the subject matter for administrative determination by an agency of the Federal Government. State officials and the courts of the State of Oregon will, no doubt, eventually rule upon the issues which have been herein discussed. However, these issues have been unresolved for a number of years and it would be unfair for the Drug Enforcement Administration to deny registration to these Respondents while awaiting definitive state action. Accordingly, the Acting Administrator has decided to grant the Respondents limited registrations pursuant to the Stipulation of Settlement entered in the proceeding before the Administrative Law Judge.

For the limited purpose of settling this matter, the parties have stipulated that codeine sulfate tablets, codeine phosphate tablets, paregoric, tincture of opium and Dovert's powder, when dispensed or administered in usual dosages, may be considered to be nonpoisonous plant substances, and that solutions of cocaine hydrochloride may, in certain very limited situations, be appropriate for use as a local anesthetic in connection with minor surgery. To enable the Respondents to utilize the above-listed substances in their professional practices, the Acting Administrator has decided to issue to each of the Respondents a DEA registration limited to Schedules II (Narcotic) and III (Narcotic). The Respondents have agreed to withdraw such portions of their applications as pertain to controlled substances in Schedules other than II (Narcotic) and III (Narcotic).

State authorization is the key element of the Federal controlled substance registration system where practitioners are concerned. Accordingly, should the appropriate authorities of the State of Oregon, by way of statutory amendment, judicial determination, or administrative rule or regulation, determine that there are substances other than those listed above which may be lawfully utilized in the practice of naturopathy, the list of substances will be considered expanded accordingly. If such other substances are found in schedules other than II (Narcotic) and III (Narcotic), the Respondents may individually apply for modification of their registrations and the Drug Enforcement Administration will honor such requests for modification.

It is possible that the Oregon authorities may determine one or more of the substances discussed above is inappropriate for use by naturopathic physicians. If this occurs, the list of controlled substances will be dimished accordingly and the schedules for which the Respondents have been registered will be likewise adjusted. Furthermore, the Oregon authorities may ultimately determine that no controlled substance is appropriate for use by naturopaths. Should this occur, the Respondents have agreed that they will immediately surrender their registrations, obviating the necessity of formal revocation proceedings under 21 U.S.C. 824.

The Acting Administrator is aware of the fact that there are a number of additional naturopathic physicians in Oregon who have filed applications for registration under the Controlled Substances Act. Any of these other applicants who file with the Drug Enforcement Administration a written acknowledgement of the Stipulation of Settlement filed in this case, together with an agreement to accept a limited registration pursuant to the terms and conditions of the aforementioned Stipulation of Settlement, will be issued

a limited certificate of registration such as that previously discussed in this order.

In order to ensure that authorities in the State of Oregon are aware of these proceedings and to give those authorities an opportunity to resolve the ultimate question of naturopath's authorization to handle controlled substances under Oregon law, the Acting Administrator directs that copies of this order and of the Stipulation of Settlement filed herein be provided to the Oregon Naturopathic Board of Examiners, the Oregon Department of Human Resources, the Oregon Board of Pharmacy and the Office of the Attorney General of the State of Oregon.

Pursuant, therefore, to the authority vested in the Attorney General by Section 303 of the Controlled Substances Act, as redelegated to the Acting Administrator of the Drug Enforcement Administration, the Acting Administrator hereby directs that certificates evidencing registration in Schedule II (Narcotic) and Schedule III (Narcotic) be issued to Loyd B. Rapp, N.D., Ralph R. Weiss, N.D., Donald C. Walker, N.D., Edmonde G. Samuel, N.D., and Joseph A. Rombough, N.D.

Dated: December 16, 1981.

Francis M. Mullen, Jr.,

Acting Administrator, Drug Enforcement Administration.

LEGAL SERVICES CORPORATION

Grants and Contracts

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355a, 88 Stat. 378, 42 U.S.C. 2996-2996*l*, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly . . . such grant, contract, or project. . . ."

The Legal Services Corporation hereby announces publicly that it is considering the grant application submitted by: Legal Services of North Florida, Inc., in Tallahassee to serve Okaloosa and Walton Counties.

Interested persons are hereby invited to submit written comments or recommendations concerning the above application to the Regional Office of the Legal Services Corporation at: Legal Services Corporation, Atlanta Regional Office, 615 Peachtree Street, N.E., 9th Floor, Atlanta, GA 30308.

Dan J. Bradley,

President.

BILLING CODE 6820-35-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 74 to Facility Operating License No. DPR-31, and Amendment No. 68 to Facility Operating License No. DPR-41 issued to Florida Power and Light Company (the licensee), which revised Technical Specifications for operation of Turkey Point Plant, unit Nos. 3 and 4 (the facilities) located in Dade County, Florida. The amendments are effective as of the date of issuance.

The amendments add the option of using the ΔT versus reactor power curve during shift checks of the Nuclear Power Range instrument channels.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) The application for amendments dated January 25, 1977, as supplemented March 20 and May 1, 1980, (2) Amendments Nos. 74 and 68 to License Nos. DPR-31 and DPR-41, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 7th day of December 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 81-36538 Filed 12-22-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-206]

Southern California Edison Co. and San Diego Gas & Electric Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 59 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas & Electric Company (the Licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station Unit No. 1 (the facility) located in San Diego County, California. This amendment is effective as of its date of issuance.

The amendment approves changes to the Appendix A Technical Specifications which incorporate certain clarifications related to Amendment No. 58 dated November 6, 1981.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated December 8, 1981, (2) Amendment No. 59 to License No. DPR-

13, and (3) the Commission's transmittal letter which includes its evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California. A single copy of items (2) and (3) may be obtained by request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 17th day of December 1981.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

Screening Committee for Lawyer Vacancies on the Atomic Safety and Licensing Board Panel; Meeting

Notice is hereby given in accordance with section 10 of the Federal Advisory Committee Act that the NRC's Screening Committee for Lawyer Vacancies on the Atomic Safety and Licensing Board Panel will hold a meeting on January 11, 1982 and if necessary the morning of January 12, 1982. The meeting will begin at 9:00 a.m. each day at East West Towers, 4350 East West Highway, Room 415, Bethesda, Maryland 20014.

The Committee will meet in order to interview and consider the qualifications of administrative law judges who may be assigned to the Atomic Safety and Licensing Board Panel. All sessions will be closed.

I have determined in accordance with Subsection 10(d) of Public Law 92-463 that it is necessary to close these meetings in order to protect information, the release of which would represent an unwarranted invasion of personal privacy under 5 U.S.C. 552b(c)(6). Any discussion not involving personal privacy will be inextricably intertwined with discussion of Exemption 6 matters.

For further information, contact Charles J. Fitti, Assistant Executive Secretary, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Telephone: 301/492-7816).

Issued at Washington, D.C., this 18th day of December 1981.

John C. Hoyle,

Advisory Committee Management Officer.

POSTAL RATE COMMISSION

[Order No. 414; Docket No. A82-3]

West Barnet, Vt.; Order Granting Postal Service Extension of Time To File Brief

In the matter of: West Barnet, Vermont 05870, Richard Beardsworth, Petitioner, Docket No. A82-3; order granting Postal Service an extension of time to file brief (Issued December 17, 1981).

On December 16, 1981, the Postal Service filed a motion requesting that the Commission either dismiss the proceeding or, in the alternative grant an extension of time for the filing of the Postal Service's brief. The Postal Service explains that the Petitioner did not file his brief on schedule and the Postal Service did not receive a copy of it until December 15, 1981. The Postal Service also states that it has not received a copy of the Petitioner's appeal letter.

We believe that dismissal is too drastic a remedy for the procedural problems in this case. We agree, however, that the Postal Service should be given adequate time to review the Petitioner's pleadings and prepare its response. Therefore, we are granting the Postal Service's motion to extend the date for filing its answering brief until January 4, 1982. We are extending the time for the Petitioner's reply brief. We are also directing the Secretary of the Commission to provide the Postal Service with copies of the Petitioner's pleadings.

The Commission Orders.

(A) The schedule attached to this order is established for Docket No. A82-3.

(B) The Secretary of the Commission is to provide the Postal Service with copies of the Petitioner's pleadings.

By the Commission.

David F. Harris,

Secretary.

Appendix—West Barnet

October 26, 1981—Commission received Petition

November 1981—Notice and Order of Filing of Appeal

November 27, 1981—Last day for filing of petitions to intervene [see 39 CFR 3001.111(b)].

December 7, 1981—Petitioner's initial brief [see 30 CFR 3001.115(a)].

January 4, 1982—Postal Service answering brief [see 39 CFR 3001.115(a)].

January 19, 1982—(1) Petitioner's reply brief, should petitioner choose to file such brief [see 39 CFR 3001.115(c)].

(2) Deadline for motions by any party requesting oral argument. The Commission will exercise its discretion, as the interests of prompt and just decision may require, in scheduling or dispensing with oral argument.

BILLING CODE 7715-01-M

SMALL BUSINESS ADMINISTRATION

Interest Rates

The interest rate on section 7(a) Small Business Administration direct business loans (as amended by Pub. L. 97-35) and the SBA share of immediate participation loans is fifteen and one-fourth (15¼) percent for the fiscal quarter beginning January 1, 1982.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 120.3(b)(2)(iii)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the January-March quarter of 1982, this rate will be fourteen and seven-eighths (14⅞) percent.

Dated: December 18, 1981.

Edwin T. Holloway,

Acting Associate Administrator for Finance and Investment.

DEPARTMENT OF STATE

[Public Notice CM-8/458]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting on January 12, 1982, of the Working Group on Transborder Data Flows of the Advisory Committee on International Investment, Technology, and Development. The Working Group will meet from 10:00 a.m. until 12:00 noon. The meeting will be held in the Loy Henderson Conference Room of the State Department, 2201 C Street, N.W., Washington, D.C. 20520. The meeting will be open to the public.

The purpose of the meeting will be to review positions for the meeting of the Experts Group on Transborder Data Flows scheduled for January 26-27 in Paris.

Requests for further information on the meeting should be directed to Philip T. Lincoln, Jr., Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may be

reached by telephone on (area code 202) 632–2728.

Members of the public wishing to attend the meeting must contact Mr. Lincoln's office in order to arrange entrance to the State Department building.

The Chairman of the Working Group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: December 11, 1981.

Philip T. Lincoln, Jr.,

Executive Secretary.

BILLING CODE 4710–07–M

[Public Notice CM–8/469]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting on January 12, 1982, of the Working Group on Accounting Standards of the Advisory Committee on International Investment, Technology, and Development. The Working Group will meet from 2:00 p.m. until 4:30 p.m. The meeting will be held in Room 2722A of the State Department, 2201 C Street, NW., Washington, D.C. 20520. The meeting will be open to the public.

The purpose of the meeting will be to discuss U.N. and OECD work on accounting standards; in particular, preparations for the next U.N. Ad Hoc Accounting Standrds Working Group.

Requests for further information on the meeting should be directed to Philip T. Lincoln, Jr., Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may be reached by telephone on (area code 202) 632–2728.

Members of the public wishing to attend the meeting must contact Mr. Lincoln's office in order to arrange entrance to the State Department building.

The Chairman of the Working Group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: December 11, 1981.

Philip T. Lincoln, Jr.,

Executive Secretary.

Oceans and International Environmental and Scientific Affairs Advisory Committee; Open Meeting

The General Panel of the Oceans and International Environmental and Scientific Affairs Advisory Committee will meet at 9:00 a.m. on Thursday, January 7, 1982, in Room 150, National Academy of Sciences, 2101 Constitution Avenue, N.W., Washington, D.C.

At this meeting, officers responsible for law of the sea and oceans affairs and international environmental affairs in the Department of State and members of the Advisory Committee will discuss U.S. activities and policies relating to polymetallic sulfides and acid rain problems. This session will be open to the public, which will be admitted to the limits of seating capacity. Individuals may be given the opportunity to participate in discussions according to the instructions of the Chairperson.

Requests for further information on the meeting may be directed to Felix Dorough, OES, Department of State (202) 632–3632.

Dated: December 15, 1981.

James L. Malone,

Chairman.

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea; Meeting

The Working Group on Radiocommunication of the Subcommittee on Safety of Life at Sea will conduct an open meeting at 9:30 a.m. on January 7, 1982 in Room 9230 of the Department of Transportation Building, 400 7th St., S.W., Washington, D.C. 20590.

The purpose of the meeting is to prepare position documents for the Twenty-Fourth Session of the Subcommittee on Radio-communications of the Intergovernmental Maritime Consultative Organization (IMCO) to be held in London on March 15, 1982. In particular, the working group will discuss the following topics:

—Maritime distress system
—Performance standards for shipboard radio equipment
—Life-saving radio equipment
—Digital selective calling
—Matters related to ITU WARC for Mobile Transportation
—Matters related to CCIR Study Group 8

For further information contact Mr. R. L. Swanson, USCG, (G–TTM–S/32), Washington, D.C. 20593. Telephone (202) 426–0517.

Dated: December 11, 1981.

John Todd Stewart,

Chairman, Shipping Coordinating Committee.

Study Group 5 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 5 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on January 12, 1982 from 9:00 a.m. until 2:00 p.m. in Room OT8–8 in the Engineering Building, University of Colorado Campus, Boulder, Colorado.

Study Group 5 deals with propagation of radio waves (including radio noise) at the surface of the earth, through the non-ionized regions of the earth's atmosphere, and in space where the effect of ionization is negligible. The purpose of the meeting is to review the conclusions of the international meeting of Study Group 5 in 1981 and the documents to be considered by the CCIR XVth Plenary Assembly, and to outline the program of work for the next Plenary cycle.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Requests for further information should be directed to Mr. Gordon Huffcutt, State Department, Washington, D.C. 20520, telephone (202) 632–2592.

Dated: December 3, 1981.

Gordon L. Huffcutt,

Chairman, U.S. CCIR National Committee.

Study Group 6 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 6 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet January 12, 1982 at 9:00 a.m. in Room 3012 of the Department of

Commerce Boulder Laboratories Building, 325 Broadway, Boulder, Colorado.

Study Group 6 deals with matters relating to the propagation of radio waves in and through the ionosphere. The purpose of the meeting will be to review the work of the Study Group 6 final meeting held in the fall of 1981, and to plan the activities of the Study Group for the 1982–1986 period.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Requests for further information should be directed to Mr. Gordon Huffcutt, State Department, Washington, D.C. 20520, telephone (202) 632–2592.

Dated: December 3, 1981.

Gordon L. Huffcutt,

Chairman, U.S. CCIR National Committee.

SYNTHETIC FUELS CORPORATION

Synthetic Fuels Projects; Supplement to the Initial Solicitation

AGENCY: Synthetic Fuels Corporation.

ACTION: Issuance of Supplement to Initial Solicitation for Synthetic Fuels Projects.

SUMMARY: Notice is hereby given that the United States Synthetic Fuels Corporation in accordance with the Energy Security Act of 1980 (Pub. L. 96–294) has published a supplement dated December 11, 1981 to its Initial Solicitation for Synthetic Fuels Projects which was dated November 21, 1980. The supplement to the Initial Solicitation is only applicable to those concerns that submitted proposals to the Corporation pursuant to the Initial Solicitation on or before March 31, 1981, the closing date under said solicitation.

EFFECTIVE DATE: December 11, 1981.

FOR FURTHER INFORMATION CONTACT: The Projects Office, United States Synthetic Fuels Corporation, 2100 M Street, NW, Suite 607, Washington, DC 20586, (202) 653–4530.

FOR COPIES OF THE SUPPLEMENT CONTACT: Catherine McMillan, Director of Public Disclosure, United States Synthetic Fuels Corporation, 2000 L Street, NW., Washington, DC 20586, (202) 653–4620.

United States Synthetic Fuels Corporation.

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Supplement to Department Circular; Public Debt Series No. 38-81]

Interest Rate on Notes of Series Y-1983

December 17, 1981.

The Secretary announced on December 16, 1981, that the interest rate on the notes designated Series Y–1983, described in Department Circular—Public Debt Series—No. 38–81 dated December 10, 1981, will be 13 percent. Interest on the notes will be payable at the rate of 13 percent per annum.

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the departmental procedures applicable to such regulations.

Paul H. Taylor,

Fiscal Assistant Secretary.

FEDERAL RESERVE SYSTEM

BOARD OF GOVERNORS

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 46 FR 61199, Tuesday, December 15, 1981.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Friday, December 18, 1981.

CHANGES IN THE MEETING: One of the items announced for inclusion at this meeting was consideration of any agenda items carried forward from a previous meeting; the following such closed item(s) was added:

Federal Reserve Bank and Branch director appointments. (This matter was originally announced for a meeting on Monday, December 7, 1981.)

BILLING CODE 6210–01–M

2

NUCLEAR REGULATORY COMMISSION

DATE: Tuesday, December 22, 1981 (revised).

PLACE: Commissioners' Conference Room, 1717 H Street, N.W., Washington, D.C.

STATUS: Open/closed.

MATTERS TO BE CONSIDERED: *Tuesday, December 22:*

10:00 a.m.: Briefing on an Investigation and a Proposed Enforcement Action (closed meeting)

3:00 p.m.: Affirmation/Discussion Session (public meeting) (as announced; items revised)

Items to be affirmed and/or discussed:

a. Proposed Rulemaking, "Environmental Qualification of Electric Equipment for Nuclear Power Plants"

b. Final Rule for Pending CP/ML Applications

c. Review of Order Concerning Sua Sponte Issues (in the Matter of Texas Utilities Generating Company, et al.)

ADDITIONAL INFORMATION: Discussion of Policy and Planning Guidance, scheduled for December 16, was cancelled. Affirmations of Final Rule on Intransit Physical Protection of Special Nuclear Material of Moderate Strategic Significance and Proposed Amendment to 10 CFR Part 50, Appendix E, Frequency of Emergency Preparedness Exercises, scheduled for December 17, were cancelled. Briefing on Status and Plan for Severe Accident Rulemaking, announced for December 22, has been cancelled.

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Gary Gilbert, (202) 634–1410.

December 18, 1981.

POSTAL SERVICE

Board of Governors

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 10:30 a.m. on Wednesday, December 23, 1981, in the Benjamin Franklin Room, 11th Floor, 475 L'Enfant Plaza, Washington, D.C. The meeting is open to the public. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at (202) 245–4632.

The only agenda item to be discussed at this meeting is the adjustment of rates for preferred rate mailers as a result of a decrease in Congressional appropriations, in accordance with section 108 of Pub. L. 97–92. The Board will consider increases in the rates for all preferred-rate categories except second-class within-county and fourth-class library rates for the full "step 16" level of the schedules contained in Appendix Two of the Governors Decision of September 29, 1981 (46 FR 51691–92). Second-class within-county rates and forth-class library rates are proposed to be adjusted to the "step 13" level.

By a recorded vote taken on December 21, 1981, the members of the Board determined that Postal Service business requires the instant meeting to be called on December 23. Section 108 of Pub. L. 97–92 requires that the Postal Service "promptly" adjust preferred rates in accordance with that section, and any unnecessary delay in making the adjustments may result in substantial financial losses to the Postal Service.

Louis A. Cox,

Secretary.

Part II

Environmental Protection Agency

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines: Certification and Test Procedures; Non-Methane Hydrocarbon Standards for Mobile Sources

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 86

[AMS-FRL 1952-4]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines: Certification and Test Procedures; Non-Methane Hydrocarbon Standards for Mobile Sources

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rule would establish non-methane hydrocarbon (NMHC) exhaust emission standards for light-duty vehicles, motorcycles, light-duty trucks and heavy-duty engines while also permitting vehicle manufacturers, at their choice, to continue to use total hydrocarbon (THC) exhaust emission standards. This proposed rule addresses one of the actions which the Environmental Protection Agency stated would be taken to reduce the regulatory burden on the motor vehicle industry (46 FR 21628, April 13, 1981). The purpose of the regulatory relief actions is the reduction of costs to manufacturers and consumers while incurring little or no air quality penalty.

Please note that EPA specifically requests comments on a number of items near the end of this preamble. EPA encourages all individuals and organizations which are interested in this rulemaking to participate in the public hearing and/or to submit their comments to the docket.

DATES: EPA will hold public hearings on this notice on January 22, 1982 beginning at 9:00 am. Pursuant to Section 307 of the Clean Air Act, the record of the public hearing will be kept open for 30 days following the close of the hearing, to provide an opportunity for submission of rebuttal and other information. Comments must be received, therefore, on or before February 22, 1982. The 1983 model year vehicles will be the first affected by the proposed action.

ADDRESSES: The public hearing will take place in the Conference Room at the EPA Motor Vehicle Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105. Interested persons may submit written comments on this rulemaking to the U.S. Environmental Protection Agency, Central Docket Section, (A-130), Attn: Docket No. A-81-24, 401 M Street SW, Washington, D.C. 20460. Two copies of comments are requested but not required.

Supporting material relevant to this proposal has been placed in the docket. Docket No. A-81-24 is open to the public and is located in the U.S. Environmental Protection Agency, Central Docket Section, West Tower Lobby, Gallery I, 401 M Street, SW, Washington, D.C. The docket may be inspected between 8 am and 4 pm on weekdays, and a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. F. Peter Hutchins, U.S. Environmental Protection Agency, Emission Control Technology Division, 2565 Plymouth Road, Ann Arbor, MI. 48105, (313) 668-4340.

SUPPLEMENTARY INFORMATION:

Continuation of Summary

The proposed non-methane hydrocarbon standards represent the same percentage reduction in non-methane hydrocarbon emissions from base year vehicles as is required by the corresponding total hydrocarbon standards for total hydrocarbon emissions from base year vehicles. The proposed non-methane hydrocarbon standards and the corresponding total hydrocarbon standards are tabulated as follows:

CURRENT TOTAL HYDROCARBON AND PROPOSED NON-METHANE HYDROCARBON EXHAUST EMISSION STANDARDS

Vehicle class	1983 model year		1984 model year and later	
	THC	NMHC	THC	NMHC
Light-duty vehicles	0.41 g/mi	0.39 g/mi	0.41 g/mi	0.39 g/mi.
Light-duty trucks	1.7 g/mi	1.62 g/mi	0.80 g/mi	0.76 g/mi.
Motorcycles	5.0 g/km	4.75 g/km	5.0 g/km	4.75 g/km.
Heavy-duty engines	(a) 1.5 g/BHP-hr and THC+NOx=10 g/BHP-hr or. (b) THC+NOx=5 g/BHP-hr.		1.30 g/BHP-hr	1.24 g/BHP-hr.

A non-methane hydrocarbon standard is not proposed for 1983 MY heavy-duty engines because of the incompatibility between sampling procedures applicable to that model year and analytical procedures used for determining the methane content.

If these regulations are promulgated as a final rule, EPA anticipates that there will be no significant difference in the ambient ozone level improvements achieved within the next ten years. By the year 2000, it is projected that the improvement in ambient ozone levels, relative to the levels which prevailed in 1979, will be approximately 1 percent less with non-methane hydrocarbon standards than with total hydrocarbon standards; i.e., a 17 percent reduction in ambient ozone levels rather than an 18 percent reduction at low altitude and a 20 percent reduction rather than a 22 percent reduction at high altitude.

I. Background

Background materials pertinent to this action are divided into three general areas. These areas cover: A. Factors leading to the existing total hydrocarbon standards; B. Procedures applicable to air quality impact determination and; C. Waiver of Federal Preemption for the State of California.

A. The material referred to as exhaust hydrocarbon emissions, while measured and reported as a single entity, is composed of dozens of separate and distinct hydrocarbon compounds or species. Each species, within the total, exhibits a different level of reactivity in the ozone (photochemical smog) formation process. The need to control hydrocarbon emissions from mobile sources was and is, therefore, based on the part played by each species in the formation of photochemical smog. Methane was recognized as being nonreactive in this process and was excluded, therefore, in the rollback model developed prior to 1970 by the National Air Pollution Control Administration for projecting future motor vehicle emission control requirements. These projections formed the basis for the 1970 Clean Air Act Amendments applicable to motor vehicles. The degree of hydrocarbon exhaust emission control required by the Clean Air Act Amendments of 1970 was expressed as a 90 percent reduction from the levels allowable for the 1970 model year.

The definition of hydrocarbon exhaust emission and, therefore, the standard applicable to any model year vehicle has historically been based upon the test procedure and the type of instrument used in routine analyses of vehicle exhaust hydrocarbon samples. In 1970, when the Clean Air Act was amended, and future control requirements specified, the type of analytical instrument used for measuring exhaust hydrocarbons was the non-dispersive infrared (NDIR) type. This type of instrument (NDIR) did not provide a uniform response (reported as carbon) to each species in the exhaust sample. The effects of this characteristic of the instrumentation were that hydrocarbon exhaust emissions allowable from 1970 model year light-duty vehicles were expressed neither as total hydrocarbons, non-methane hydrocarbons nor as reactive hydrocarbons and that the total amount of hydrocarbon in the exhaust gases was under-reported. Examples of hydrocarbons for which the NDIR gave low response were: methane, ethylene, propylene, acetylene, benzene, etc. Beginning with the 1972 model year, EPA required a change in the type of instrumentation used in the determination of vehicle exhaust hydrocarbon emissions. The type of instrument specified was the flame ionization detector (FID). This type of instrument (FID) provided an almost uniform response to each hydrocarbon species. As a result of this change in instrumentation, all hydrocarbons in the exhaust gases were and are fully reported (total hydrocarbon), both the nonreactive and the reactive species. EPA did not exclude the methane fraction at that time despite the change in instrumentation because: (1) The methane fraction of the baseline year exhaust hydrocarbons was taken to be inconsequentially low, and (2) emission control systems were expected to reduce all hydrocarbons equally. Additionally, techniques for the routine measurement of methane were not considered to be available when the change in instrumentation was required.

Introduction of catalyst technology to control vehicle exhaust emissions altered the composition of the exhaust hydrocarbons emitted into the atmosphere. This change in composition resulted from preferential oxidation of heavier species in the catalytic converter. Because methane is not readily oxidized in the catalytic converter, the methane fraction in the exhaust gases increases relative to the total hydrocarbon emissions.

In 1973, the Ford Motor Company petitioned EPA to exclude methane from the exhaust hydrocarbon standards for 1975 model year vehicles because of the anticipated use of catalysts to control emissions and because of the nonreactivity of methane. On May 10, 1974, EPA published an ANPRM pertaining to the exclusion of methane from the exhaust emission standards. On February 10, 1976, EPA distributed the summary and analysis of the comments to the ANPRM. EPA concluded that substantiation had not been provided for the benefits claimed by vehicle manufacturers for non-methane hydrocarbon standards. EPA could not justify, therefore, the allocation of Agency resources necessary for conversion to non-methane standards.

On October 20, 1978, the Ford Motor Company again petitioned EPA for exclusion of methane in hydrocarbon exhaust emission standards. This petition was directed to 1980 and 1981 model year vehicles. On February 16, 1979, EPA responded to this petition and elected to continue to include methane in the hydrocarbon standards. As a result of EPA's denial of its petition, Ford sought court review of the hydrocarbon exhaust emission regulations on the grounds that EPA had exceeded its authority by including methane in the regulations.

On July 3, 1979, the U.S. Court of Appeals for the District of Columbia Circuit found that the regulations, which included methane as a measured hydrocarbon, were within the scope of EPA's authority. *Ford Motor Company* v. *EPA*, 604 F. 2d 685 (D.C. Cir., 1979).

B. On July 8, 1977, EPA published a "Recommended Policy on Control of Volatile Organic Compounds" (42 FR 35314) which classified two hydrocarbons as having negligible photochemical reactivity. The hydrocarbons were methane and ethane. Because of their negligible reactivity, EPA concluded that these hydrocarbons should be exempt from regulations under State Implementation Plans. The effect of this recommended policy is that ambient concentrations of methane and ethane, irrespective of the source, are not included in determinations of compliance with National Ambient Air Quality Standards.

EPA policy on vehicle exhaust hydrocarbon emissions has been to obtain the maximum reduction in reactive species through the application of total hydrocarbon emission standards while using only the reactive hydrocarbon fraction in air quality impact calculations. Consistent with this policy, EPA computations of air quality benefits attributable to vehicle exhaust emission standards exclude the methane fraction of exhaust emissions.

C. Section 209(b) of the Clean Air Act requires EPA to waive Federal preemption of state emission standards for a state which had promulgated standards before March 30, 1966 unless the Administrator finds that the state's determination that its standards, in the aggregate, are at least as protective of public health and welfare as applicable Federal standards is arbitrary and capricious. EPA waived Federal preemption with respect to hydrocarbon exhaust emission standards for the State of California and permitted the adoption of California optional non-methane hydrocarbon standards for light-duty vehicles. Adoption of the optional standards became effective with the 1980 model year in California. The standards which California adopted for light-duty vehicles were 0.41 g/mile total hydrocarbons or 0.39 g/mile non-methane hydrocarbons. One result of the waiver of Federal preemption was the purchase of appropriate analytical equipment by vehicle manufacturers for measuring non-methane hydrocarbon emissions. Procurement leadtimes and cost of analytical equipment are, therefore, not significant factors in this action.

II. Option Selection

Selection of either the NMHC standard or the THC standard will be at the discretion of the vehicle manufacturer and will be made for each engine family. Option selection on the basis of engine families will maximize the flexibility provided by this action; i.e., manufacturers will not be required to select the same option for all of their products. The option selected will be applicable for all testing (Certification, Selective Enforcement Audit, Recall, etc.) performed in the determination of compliance with the emissions standards.

EPA does not anticipate any impact on state inspections (short tests) as a result of this action. The reasons for this conclusion are that: (1) Equipment employed in inspection stations usually utilizes NDIR analyzers with the associated low methane response, and (2) short test cut points are designed to identify those vehicles with very high emission levels and will, therefore, not be impacted by the small differences which may exist between the two options.

III. Alternatives Considered

The four alternatives to the existing standards which were considered were: (1) Non-methane hydrocarbon standards with optional total hydrocarbon standards, (2) hydrocarbon reactivity standards with optional total hydrocarbon standards, (3) adoption of non-methane hydrocarbon standards only and (4) adoption of hydrocarbon reactivity standards only. The factors considerd in comparing the alternatives were: (a) the effect on air quality, (b) availability, purchase costs and operational costs of instruments for rapid, routine analyses, (c) the data base for individual hydrocarbon species of base year vehicles, (d) reactivity scale for the hydrocarbon species, (e) development of reactivity indices where these did not exist, and (f) methodology for determining a composite reactivity index of base year vehicles.

Implementation of either the non-methane alternative or non-methane standards only would require a relatively simple and low cost instrument for measuring methane as an addition to existing equipment. These instruments are being marketed and most laboratories are using them. A usable methane fraction data base exists for most vehicles which will be affected (light-duty vehicles). Extrapolation of the mass fraction of one hydrocarbon species (non-reactive methane) from the light-duty vehicle data base to light-duty trucks and motorcycles involves only that component which is non-reactive. Any resulting error, if there is one, will tend to be small.

In the case of the hydrocarbon reactivity standard alternative, instrumentation for *low cost, rapid, routine* analysis of exhaust gases is not available (gas chromatographic analyzers are costly and the analyses are time consuming and, therefore, also costly). Even if appropriate instrumentation were available, there is no single, agreed-upon scale of reactivity for all of the species present in the exhaust gases. Additionally, the data base for light-duty vehicles is inadequate for establishing a reactivity index based on the reactivity of individual species for base year vehicles; i.e., a relatively small error in the assigned fraction of a highly reactive hydrocarbon will result in a relatively large change in the computed composite reactivity index.

Alternative 1, the non-methane hydrocarbon mass standards with optional total hydrocarbon mass standards, was selected because: (1) Essentially equal effects on air quality can be expected for each of the alternatives, (2) it offers essentially the same benefits to vehicle manufacturers as the other alternatives, (3) it allows each manufacturer to select the most cost-effective option for its individual situation, and (4) it can be rapidly implemented at low cost. It is anticipated that motorcycle and heavy-duty engine manufacturers will not choose the non-methane option and are, therefore, not expected to be affected by this action.

IV. Discussion of Issues

A. Interpretation of the Statute With Respect to the Inclusion/Exclusion of Methane as a Regulated Exhaust Hydrocarbon

As explained in Section I, Congress established the statutory standard for hydrocarbon exhaust emissions in 1970 for light-duty vehicles, requiring manufacturers to reduce those emissions by 90 percent from the level allowable for the 1970 model year. In 1977, Congress extended this standard to cover heavy-duty vehicles and motorcycles.

The legislative history of this provision shows that the need for controlling hydrocarbon exhaust emissions from vehicles was based upon the formation of photochemical smog (ozone) from oxides of nitrogen and hydrocarbons under the influence of sunlight.[1] It was recognized even in 1970 that methane did not react this way and was not a factor in the formation of smog: the rollback model used to project the required level of control for motor vehicles excluded methane, and methane was not treated as a controlled hydrocarbon in the preparation of air quality criteria documents for hydrocarbons. However, as explained in Section I, the instrument used in 1970 to measure vehicle exhaust hydrocarbon emissions did not uniformly measure each species present, both reactive and non-reactive species, and undercounted the total.

To provide more accurate measurements, in 1972 EPA required a change in the instrumentation used to determine vehicle exhaust hydrocarbon emissions. The new instrument fully and uniformly measures each species present in the exhaust gases (including methane). Nevertheless, there is no indication that Congress considered the implications of this new instrumentation. While Congress did subsequently alter the statutory deadlines for compliance with hydrocarbon emissions limitations, it did not change the standards themselves from the numbers originally promulgated in 1970.

In the case of *Ford Motor Company* v. *EPA supra*, the Court of Appeals found that the Clean Air Act permits EPA to regulate vehicle exhaust hydrocarbon emissions on the basis of total hydrocarbons, i.e., including methane. The court did not decide, however, whether EPA was *required* to regulate hydrocarbons in this way.

Certainly there is nothing in the legislative history of the 1970 statute or later amendments to suggest that Congress wished to limit EPA's flexibility to refine emission standards and make them more precise, as technical capabilities in this field improved. Hence, EPA has indicated in the past that it believes the Act gives it discretion to promulgate an alternative non-methane standard, 44 FR 20048 (April 4, 1979). The Agency believes that present circumstances make it proper to exercise this discretion.

Recognition by EPA of the need to control the cost of regulations has lead to the reevaluation of existing regulations. As a result of the reevaluation, EPA has concluded that provision of optional standards to permit exclusion of methane as a measured exhaust hydrocarbon: (1) Conforms with the need for control of reactive exhaust hydrocarbons, (2) is within the authority of the Agency, (3) provides the opportunity for a degree of cost reduction and (4) will have little or no significant impact on air quality.

B. Optional Non-Methane Hydrocarbon Standards vs. Either Optional Reactive Hydrocarbon Standards or Optional-Non Methane/Ethane Hydrocarbon Standards

As part of the reevaluation of the existing standards, EPA considered ethane for exclusion along with methane as well as the potential for adoption of reactive hydrocarbons standards.

The ethane content of exhaust gases from 1970 model year vehicles was on the order of ½ percent. With catalyst vehicles, the ethane content is on the order of 1 to 1½ percent. Because of these very low concentrations of ethane, it appears unlikely that there will be any benefits attainable through the exclusion of ethane which are not achieved by the exclusion of methane. Determination of the ethane content in vehicle exhaust gases would necessitate the introduction of gas chromatographic equipment capable of measuring each of the hydrocarbon species. This type of equipment is costly and sample analysis

[1] *A Legislative History of the Clean Air Act Amendments of 1970*, Volume 1, p. 425–28 and 701–771.

time is measured in hours rather than minutes. The implementation costs of non-methane/ethane hydrocarbon standards for analytical equipment, performance of analyses, equipment maintenance, etc., would be expected to be 5 to 10 times higher than the costs of non-methane standards. Additionally, the leadtime necessary for implementation would change from almost zero (analytical equipment for non-methane standards can be considered to be in place) to a few years. EPA has concluded, therefore, that the costs of non-methane/ethane standards exceed any possible benefits to vehicle manufacturers, but would welcome comments on this issue.

Because of the differences in the reactivities of the hydrocarbon compounds which collectively constitute hydrocarbon exhaust emissions, an exhaust hydrocarbon reactivity standard would be the ideal method for the control of these materials. Major problems associated with this approach to the control of hydrocarbon exhaust emissions are: (1) The lack of an adequate data base upon which to establish the composition of base year hydrocarbon exhaust emissions, (2) the lack of a universally accepted and proven reactivity scale for hydrocarbon compounds, and (3) the costs of the analytical equipment for determining the composition of each exhaust sample coupled with the time and, therefore costs of each analysis. For these reasons, EPA does not view an exhaust reactivity standard as being practical at this time.

It is the conclusion of EPA that the non-methane hydrocarbon standards option is the most cost-effective approach. Again comments are welcome on this point.

C. Determination of the Optional Non-Methane Standards

The procedure used in establishing the non-methane hydrocarbon standards is the same as that which was used for establishing the existing total hydrocarbon standards; i.e., the optional non-methane hydrocarbon standards represent the same percentage reduction in non-methane hydrocarbons from base year vehicles as are required by the total hydrocarbon standards for total hydrocarbons.

The data base for determining the methane content of base year, light-duty vehicles is not large. It consists of data compiled pursuant to the 1974 ANPRM [2], testing of two non-catalyst vehicles by Gulf Research and Development as part of a contract with EPA [3], and data collected by EPA contractors in tests of in-use vehicles [4]. The data base is adequate, however, for making the determination of the methane content in exhaust gases of base year light-duty vehicles. The average methane content was five percent.

While the emission standards for heavy-duty diesel engines are determined on the basis of emissions from base year gasoline engines, the data base for diesel engines was surveyed to identify any potential problems. In the case of heavy-duty diesel engines, the data base on methane is very small. Two sources are available. Reference [5] indicates that the average methane fraction in the exhaust of four heavy-duty diesel engines tested was approximately ⅓ that of the methane content of one industrial gasoline engine tested, on the test procedure used. The methane fraction reported for the industrial gasoline engine was, however, five to six times higher than the methane fraction determined for light-duty vehicles on the Federal Test Procedure. The second source [6], in-house testing of diesel engines, indicates methane contents approaching four to five percent.

EPA testing of heavy-duty gasoline engines [7], shows an average methane content in the exhaust gases of approximately seven percent.

Five percent was chosen as being representative of the methane fraction in the exhaust gases of heavy-duty engines (diesel and gasoline).

A data base does not exist for determining the base year methane fraction of hydrocarbons in the exhaust of light-duty trucks and motorcycles. The methane fraction was selected as five percent because of the similarities in: (1) Engine technologies between base year light-duty vehicles, light-duty trucks and motorcycles, (2) test cycles, and (3) because the same fuel (gasoline) is used in nearly all of these base year vehicles. It is recognized that, relative to light-duty vehicles and light-duty trucks, the higher average rotational speed of motorcycle engines may have some small effect on the size of the methane fraction.

D. Analytical Equipment for Routine Testing and Lead-time for Implementation

The adoption by the State of California of a non-methane hydrocarbon standard for light-duty vehicles has resulted in either the purchase and installation of appropriate test equipment or the securing of access to the use of the equipment by these vehicle manufacturers. Because light-duty vehicle manufacturers are often also manufacturers of light-duty trucks (e.g., General Motors, Ford, Chrysler, American Motors, VW, Nissan, Toyota) most, if not all, manufacturers of light-duty trucks have the required equipment in-use.

On the basis of the responses to the ANPRM (1974), it appears that most heavy-duty engine manufacturers would have chosen to use the total hydrocarbon option, thus removing the need to purchase the equipment necessary for determining methane. EPA is presently modifying the 1984 heavy-duty engine standard to levels not expected to require the use of catalysts. It is expected, therefore, that heavy-duty engine manufacturers will choose not to use the non-methane option. If a heavy-duty engine manufacturer wishes to use the non-methane option, equipment modifications will be similar to that made for light-duty vehicles and light-duty trucks; i.e., the addition of the methane analyzer. The samples would then be analyzed for total hydrocarbons and for methane.

In the case of motorcycles, it is anticipated that very few manufacturers would have the necessary analytical equipment on hand for determining methane. Honda and BMW would be expected to have the appropriate equipment because both companies also produce light-duty vehicles. However, when catalyst technology is not used in achieving the required emission levels (catalysts are not used on motorcycles), the methane fraction of exhaust gases from new vehicles is expected to be essentially the same as the methane fraction in base year vehicles. Using the existing total hydrocarbon standards would, therefore, permit these manufacturers to forego the purchase of equipment for determining methane.

If motorcycle manufacturers were to choose the non-methane option, leadtime for purchasing and installing the necessary test equipment could become a factor. Instrument manufacturers are, however, producing the necessary equipment. Representative delivery times are two to four months for analytical equipment used in exhaust gas measurements.

In total, leadtime is not anticipated to be a problem for those manufacturers which might choose the non-methane option.

V. Environmental Impact

Under either the total hydrocarbon standards or the optional non-methane hydrocarbon standards the emission rates of reactive hydrocarbons from mobile sources are very low. In the case of light-duty vehicles, the emission rates of reactive hydrocarbons would be between 0.35 gm/mile and 0.29 gm/mile for a total hydrocarbon standard of 0.41 gm/mile vs. a rate of 0.39 gm/mile for the non-methane standard.

In 1982, mobile sources will contribute just over ⅓ of the total anthropogenic emissions of reactive hydrocarbons at low altitudes. At high altitudes, mobile source contributions will be just over one-half. The projections for mobile source contribution to the total reactive hydrocarbon emissions inventory in 1990 are for just under ⅙ at low altitude and just under ⅓ at high altitude. In the year 2000, the relative contributions from mobile sources are projected to be slightly lower than in 1990. For the U.S., the total anthropogenic and the mobile source contributions for the years 1982, 1990 and 2000, together with mobile source contributions expressed as a percentage of the total, are presented in tabular form below.

TOTAL NON-METHANE HYDROCARBONS EMISSIONS

(1000 tons/year)

	1982			1990			2000		
	Total	Mobile sources	Percent of total	Total	Mobile sources	Percent of total	Total	Mobile sources	Percent of total
Low Altitude									
THC Stds	4,119	1,400	34	3,514	516	15	3,905	524	13
NMHC Stds	4,119	1,400	34	3,560	588	16	4,040	629	16
High Altitude									
THC Stds	169	83	54	111	33	30	120	32	27
NMHC Stds	165	83	54	113	35	31	126	38	30

Comparison of the predicted effects on ambient ozone concentrations of total hydrocarbon and non-methane hydrocarbon standards (assuming 30 percent methane in the exhaust and Inspection and Maintenance) shows that there is negligible, if any, effect through the 1988 to 1990 timeframe. In the year 2000, the predicted effect is for a reduction (improvement) in ambient ozone concentrations relative to 1979 levels of 18 percent with total hydrocarbon standards and of 17 percent with non-methane hydrocarbon standards at low altitude. Comparable figures for high altitudes are 22 percent and 20 percent, respectively.

The projected effect of this proposed action on the ambient air, expressed in terms of air quality regions above standards and exceedances are as follows. In 1982 it is projected that there will be 17 low-altitude regions and two high-altitude regions which exceed standards. The projections for the year 2000 are for 15 low-altitude regions to exceed standards if the total hydrocarbon standards were maintained for mobile sources and the 16 low-altitude regions to exceed standards with non-methane hydrocarbon standards for mobile sources. With either the total hydrocarbon standards or the non-methane hydrocarbon standards, one high-altitude region is projected to exceed standards in the year 2000. The projected number of exceedances in 1982 are 95 at low altitude and eight at high altitude. The projections for the year 2000 are for four exceedances at high altitude with either the total hydrocarbon or the non-methane hydrocarbon standards for mobile sources. At low altitudes, the projections are for 85 exceedances with the total hydrocarbon standards and 90 exceedances with the non-methane hydrocarbon standards for the year 2000.

In the aggregate, reactive hydrocarbon emissions from mobile sources are projected to be a small fraction of the total and differences between THC standards or NMHC standards are not considered to be substantial.

VI. Economic Impact

This proposed rule will affect costs only for those manufacturers which choose the non-methane hydrocarbon option. Because the non-methane hydrocarbon standard is optional, only those manufacturers who can realize either a total savings from vehicle modifications or anticipate a marketing advantage, e.g., improved fuel economy or driveability, would be expected to adopt the option. It is anticipated that light-duty vehicle and light-duty truck manufacturers will choose the non-methane option because their products incorporate catalysts (gasoline-fueled vehicles) and that motorcycle and heavy-duty engine manufacturers will choose the existing total hydrocarbon standards. Light-duty vehicle and light-duty truck manufacturers are either already using methane analyzers or have access to that equipment because of the non-methane option adopted by California. Anticipated costs in this area are, therefore, judged to be negligible.

Some costs are expected for recalibration of the catalyst and other engine/emissions control components in the first model year following introduction of the optional NMHC standards. In subsequent years, these costs will not occur. It is expected, however, that these first year costs will be counterbalanced by savings attributable to the reduced use of catalytic materials or the substitution of lower cost components; e.g., use of a reed valve aspirator in place of an air pump. The cost of recalibrations and savings from reduced catalyst loading, etc., are expected to vary by engine family. EPA has not, therefore, attempted to quantify these values.

Vehicle manufacturers have indicated that some small improvements in vehicle driveability and fuel economy may result, for some vehicle specifications, from the adoption of a non-methane hydrocarbon option.

In the aggregate, it is expected that there will be no cost burden to the vehicle manufacturers who choose the option and that a small fuel savings

could result from the adoption of the non-methane hydrocarbon option.

Public Participation and Request for Comments

Interested persons may participate in this rulemaking by submitting written comments to the Administrator, by attending the public hearing, or both. To the extent possible the Agency requests that written comments be submitted prior to the public hearing. It is EPA's intention to assure all interested parties an opportunity to study all information which may become the basis for EPA's final action in this proceeding. Accordingly, the Agency will not consider in this rulemaking any material which cannot be made available to the public. Parties who wish to submit information in response to this Notice of Proposal Rulemaking are cautioned that EPA will not consider, but will return to the commenter, any comments which are claimed, in whole or in part, to be confidential.

All interested parties are encouraged to comment on this action. Comments are specifically requested on the subjects listed below. Identification of these specific subjects does not preclude the presentation of comments on other relevant subjects.

Please comments on or provide answers to each of the following:

1. Comment on the concept of optional non-methane and total hydrocarbon standards.

2. Comment on the relative benefits and costs associated with non-methane standards, non-methane/ethane standards and hydrocarbon reactivity standards. Please quantify either benefits or costs where possible.

3. Comment on the numerical values of the non-methane standards proposed.

4. Will there be a reduction in catalyst loading and by what amount as a result of choosing the non-methane option?

5. What are the projected cost savings to the manufacturer and to the consumer?

6. Will the benefits in fuel economy and driveability, previously indicated as potential benefits by manufacturers, be realized?

7. Will these benefits be realized with all vehicles or with only some of the vehicles meeting the non-methane option? What is the anticipated magnitude of the fuel economy benefit?

8. Will there be other benefits to the vehicle manufacturer or to the consumer?

9. Are there additional data which support/refute the methane fraction in base year vehicle exhaust gases for the four classes of vehicles?

10. Is the extrapolation from light-duty vehicle baseline data to light-duty trucks and motorcycles reasonable?

11. Do any manufacturers, other than light-duty vehicle and light-duty truck manufacturers, expect to use the non-methane option?

12. If there are others, will leadtime for instrumentation pose any significant problems?

13. Please comment on the legal authority to permit optional standards.

Administrative Designation

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a "Regulatory Impact Analysis." This regulation is not major because it invovles no negative cost impacts and has not significant effect on competition, productivity, investment, employment or innovation.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Impact on Small Entities

Section 605 of the Regulatory Flexibility Act requires that the Administrator certify regulations that do not have a significant impact on a substantial number of small entities. I certify that this regulation does not have such an effect because it affects motor vehicle and engine manufacturers, and among this group there are not a substantial number of small entities. Also, the primary effect of this regulation is the potential for a positive economic benefit to the industry, so no private parties should see any substantial adverse impact.

Impact of Recording Requirements

The information collection requirements in this proposed rule will be submitted to the Office of Management and Budget (OMB) for clearance under the Paperwork Reduction Act of 1980 (Pub. L. 95-511). The information requirements or recordkeeping in this proposed rule will not take place until it has been cleared by OMB. If OMB approves, the information collection requirements will take effect as set forth in this proposed rule. If not, EPA will revise the information requirements (and this rule, if appropriate) to comply with OMB's determination.

Authority

The statutory authority under which these actions are proposed are sections 202, 206, and 301 of the Clean Air Act.

Dated: December 11, 1981.

Anne M. Gorsuch,

Administrator.

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES: CERTIFICATION AND TEST PROCEDURES

Part 86 of Chapter I, Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

1. A new § 86.083–2 is proposed to read as follows:

§ 86.083–2 Definitions.

The following definitions apply beginning with the 1983 model year. Section 86.082–2 remains effective.

"Hydrocarbon(s)" (HC) and "total hydrocarbon(s)" (THC) means those substances as determined by a flame ionization detector (FID) as specified in: (1) Section 86.111–82 for Light-Duty Vehicles and Light-Duty Trucks; (2) § 86.1309–84, § 86.1310–84, § 86.1311–84 for Heavy-Duty Engines and (3) § 86.511–78 for Motorcycles.

"Non-methane hydrocarbon(s)" (NMHC) means those substances defined as hydrocarbon(s) or total hydrocarbon(s) less that part which is methane.

2. Section 86.084–2 is proposed to be amended by revising the introductory text to read as follows:

§ 86.084–2 Definitions.

The following definitions apply beginning with the 1984 model year. Sections 86.080–2 and 86.083–2 remain effective except those definitions which are hereby superseded.

* * * * *

3. A new § 86.083–3 is proposed to read as follows:

§ 86.083–3 Abbreviations.

The following abbreviations apply beginning with the 1983 model year. Section 86.078–3 remains effective.

THC—Total Hydrocarbon(s)
NMHC—Non-Methane Hydrocarbon(s)
CH_4—Methane
GC—Gas Chromatograph

4. A new § 86.084–3 is proposed to read as follows:

§ 86.084–3 Abbreviations.

(a) The abbreviations in this section are compiled from §§ 86.073–3 and 86.083–3 and apply to this subpart and also to Subparts B, D, H, I, J, N, O, and P of this part and have the following meanings:

accel.—acceleration.
AECD—auxiliary emission control device.
API—American Petroleum Institute.

ASTM—American Society for Testing and Materials.
BHP—brake horsepower.
BSCO—brake specific carbon monoxide.
BSHC—brake specific hydrocarbons.
BSNOx—brake specific oxides of nitrogen.
C—Celsius.
cfh—cubic feet per hour.
CFV—critical flow venturi.
CFV-CVS—critical flow venturi-constant volume sampler.
CH_4—methane.
CL—chemiluminescene.
CO_2—carbon dioxide.
CO—carbon monoxide.
conc.—concentration.
cfm—cubic feet per minute.
CT—closed throttle.
cu. in.—cubic inch(es).
CVS—constant volume sampler.
decel.—deceleration.
EP—end point.
evap.—evaporative.
F—Fahrenheit.
FID—flame ionization detector.
FL—full load.
ft.—feet.
g—gram(s).
gal.—U.S. gallon(s).
GC—gas chromatograph.
GVW—gross vehicle weight.
GVWR—gross vehicle weight rating.
h—hour(s).
H_2O—water.
HFID—heated flame ionization detector.
Hg—mercury.
hi—high.
hp—horsepower.
IBP—initial boiling point.
ID—internal diameter.
in.—inch(es).
K—kelvin.
kg—kilograms.
km—kilometer(s).
kPa—kilopascal(s).
lb.—pound(s).
lb.-ft.—pound-feet.
m—meter(s).
max.—maximum.
mg—milligram(s).
mi.—mile(s).
min.—minute(s).
ml—milliliter(s).
mm—millimeter(s).
mph—miles per hour.
mv—millivolt(s).
N_2—nitrogen.
NMHC—non-methane hydrocarbon(s).
NDIR—nondispersive infrared.
NO—nitric oxide.
NO_2—nityrogen dioxide.
NOx—oxides of nitrogen.
No.—number.
O_2—oxygen.
Pb—lead.
pct.—percent.
PDP-CVS—positive displacement pump-constant volume sampler.
ppm—parts per million by volume.
ppmC—part per million, carbon.
psi—pounds per square inch.
psig—pounds per square inch gauge.
PTA—part throttle deceleration.
R—rankin.
rpm—revolutions per minute.
RVP—Reid vapor pressure.
s—second(s).
SAE—Society of Automotive Engineers.
SI—International system of units.
sp.—speed.
TEL—tetraethyl lead.
THC—total hydrocarbon(s).
TML—tetramethyl lead.
UDDS—urban dynamometer driving schedule.
V—volt(s).
vs—versus.
W—watt(s).
WF—weighting factor.
WOT—wide open throttle.
wt.—weight.

5. A new § 86.083–8 is proposed to read as follows:

§ 86.083–8 Emission standards for 1983 and later light-duty vehicles.

(a)(1) Manufacturers may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. The standards set forth in paragraphs (a) through (c) of this section shall apply for vehicles sold for principal use at other than designated high-altitude locations. Exhaust emissions from 1983 and later model year light-duty vehicles shall not exceed:

(i) *Total hydrocarbons.* 0.41 grams per vehicle mile (0.255 grams per vehicle kilometer). *Non-Methane hydrocarbons.* 0.39 grams per vehicle mile (0.243 grams per vehicle kilometer).

(ii) *Carbon monoxide.* 3.4 grams per vehicle mile (2.11 grams per vehicle kilometer).

(iii) *Oxides of nitrogen.* 1.0 gram per vehicle mile (0.62 gram per vehicle kilometer).

(iv) *Particulate emissions (diesels only).* 0.60 gram per vehicle mile (0.373 gram per vehicle kilometer).

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B of this part and measured and calcaluated in accordance with those procedures.

(b)(1) Fuel evaporative emissions from 1983 and later model year gasoline-fueled light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 2.0 grams per test.

(2) The standards set forth in paragraph (b)(1) of this section refer to a composite sample of the fuel evaporative emissions collected under the conditions set forth in Subpart B of this part measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1983 and later model year gasoline-fueled light-duty vehicle.

(d)(1) Model year 1983 and later light-duty vehicles sold for principal use at a designated high-altitude location shall be capable of meeting the following exhaust emission standards when tested under high-altitude conditions.

(i) *Total hydrocarbons.* 0.57 grams per vehicle mile (0.35 grams per vehicle kilometer). *Non-methane hydrocarbons.* 0.54 grams per vehicle mile (0.34 grams per vehicle kilometer).

(ii) *Carbon monoxide.* 7.8 grams per vehicle mile (4.8 grams per vehicle kilometer).

(iii) *Oxides of nitrogen.* The allowable levels of oxides of nitrogen from light-duty vehicles which are sold for principal use at designated high-altitude locations are the same as set forth in paragraph (a)(1)(iii) of this section.

(2) The standards set forth in paragraph (d)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B of this part and measured and calculated in accordance with those procedures.

(e)(1) Fuel evaporative emissions from 1983 and later model year gasoline-fueled light-duty vehicles sold for principal use at designated high-altitude locations shall not exceed 2.6 grams per test when tested under high-altitude conditions.

(2) The standard set forth in paragraph (e)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(f) No crankcase emissions shall be discharged into the ambient atmosphere from any 1983 and later model year gasoline-fueled light-duty vehicles sold for principal use at designated high-altitude locations.

(g)(1) All light-duty vehicles shall be capable (by initial design, adjustment, or modification) of meeting the applicable emission standards set forth in this section for any altitude of operation. Such adjustments and modifications shall:

(i) Be capable of being effectively performed by commercial repair facilities.

(ii) All adjustments and modifications recommended by the manufacturer to be performed on vehicles to satisfy this requirement must be included in the manufacturer's application for certification, and be approved in advance by EPA in accordance with § 86.079–22.

(2) Exemptions for vehicles from the high-altitude emissions standards as set forth in paragraph (d) of this section may be granted by the Administrator for vehicles that are expected to have unsatisfactory performance under high-

altitude conditions. Such exemptions will be granted upon petition by the manufacturers that the vehicle falls within the definition of vehicles eligible for exemption. A vehicle shall be considered eligible for exemption if its design parameters (displacement-to-weight ratio (D/W) and engine speed-to-vehicle speed (N/V)) simultaneously fall within the exempted range for that manufacturer for that year. The exempted range is determined according to the following procedure:

(i) The manufacturer shall graphically display the D/W and N/V data of all vehicle configurations it will offer for the model year in question. The axis of the abscissa shall be D/W (where (D) is the engine displacement expressed in cubic centimeters and (W) is the equivalent vehicle test weight expressed in pounds), and the axis of the ordinate shall be N/V (where (N) is the crankshaft speed expressed in revolutions per minute and (V) is the vehicle speed expressed in miles per hour). At the manufacturer's option, either the 1:1 transmission gear ratio or the lowest numerical gear ratio available in the transmission will be used to determine N/V. The gear selection must be the same for all N/V data points on the manufacturer's graph. For each transmission/axle ratio combination, only the lowest N/V value shall be used in the graphical display.

(ii) The product line is then defined by the equation, $N/V = C(D/W)^{-0.9}$, where the constant (C), is determined by the requirement that all the vehicle data points either fall on the line or lie to the upper right of the line as displayed on the graphs.

(iii) The exemption line is then defined by the equation, $N/V = C(0.84\ D/W)^{-0.9}$, where the constant, (C) is the same as that found in paragraph (g)(2)(ii) of this section.

(iv) The exempted range includes all values of N/V and D/W which simultaneously fall to the lower left of the exemption line as drawn on the graph.

(3) The sale of a vehicle for principal use at a designated high-altitude location that has been exempted as set forth in paragraph (g)(2) of this section will be considered a violation of Section 203(a)(1) of the Clean Air Act.

6. In § 86.085–8, the introductory text of paragraph (a)(1) and paragraph (a)(1)(i) are proposed to be revised as follows:

§ 86.085–8 Emission standards for 1985 light-duty vehicles.

(a)(1) Manufacturers may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from 1985 and later model year light-duty vehicles shall be exceed:

(i) *Total hydrocarbons.* 0.41 grams per vehicle mile (0.255 grams per vehicle kilometer). *Non-methane hydrocarbons.* 0.39 grams per vehicle mile (0.243 grams per vehicle kilometer).

* * * * *

7. In § 86.083–9, the introductory text of paragraphs (a)(1) and (d)(1) and paragraphs (a)(1)(i), and (d)(1)(i) are proposed to be revised as follows:

§ 86.083–9 Emission standards for 1983 light-duty trucks.

(a)(1) The standards set forth in paragraphs (a) through (c) of this section shall apply for trucks sold for principal use at other-than-designated high-altitude locations. Manufacturers of light-duty trucks may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from 1983 model year light-duty trucks shall not exceed:

(i) *Total hydrocarbons.* 1.70 grams per vehicle mile (1.058 grams per vehicle kilometer). *Non-methane hydrocarbons.* 1.62 grams per vehicle mile (1.008 grams per vehicle kilometer).

* * * * *

(d)(1) 1983 model year light-duty trucks sold for principal use at designated high-altitude locations shall be capable of meeting the following exhaust emission standards when tested under high-altitude conditions. Manufacturers may elect either a total hydrocarbons standard or a non-methane hydrocarbons emission standard. Exhaust emissions from 1983 high-altitude, light-duty trucks shall not exceed:

(i) *Total hydrocarbons.* 2.0 grams per vehicle mile (1.24 grams per vehicle kilometer). *Non-methane hydrocarbon.* 1.90 grams per vehicle mile (1.18 grams per vehicle kilometer).

* * * * *

8. In § 86.084–9, it is proposed to revise the introductory text of paragraph (a)(1), and paragraph (a)(1)(i) and to remove paragraphs (d) and (e) as follows:

§ 86.084–9 Emission standards for 1984 and later model year light-duty trucks.

(a)(1) Manufacturers of light-duty trucks may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from 1984 model year light-duty trucks shall not exceed:

(i) *Total hydrocarbons.* 0.80 grams per vehicle mile (0.498 grams per vehicle kilometer). *Non-methane hydrocarbons.* 0.76 grams per vehicle mile (0.473 grams per vehicle kilometer).

* * * * *

9. In § 86.084–10, the introductory text of paragraph (a)(1) and paragraph (a)(1)(i) are proposed to be revised as follows:

§ 86.084–10 Emission standards for 1984 and later model year gasoline-fueled heavy-duty engines.

(a)(1) Manufacturers of gasoline-fueled heavy-duty engines may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from new 1984 and later model year gasoline-fueled heavy-duty engines shall not exceed:

(i) *Total hydrocarbons.* 1.3 grams per brake horsepower hour, as measured under transient operating conditions. *Non-methane hydrocarbons.* 1.24 grams per brake horsepower hour as measured under transient operating conditions.

* * * * *

10. In § 86.084–11, the introductory text of paragraph (a)(1) and paragraph (a)(1)(i)(A) are proposed to be revised as follows:

§ 86.084–11 Emission standards for 1984 diesel heavy-duty engines.

(a)(1) Manufacturers of diesel heavy-duty engines may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emissions from new 1984 model year diesel heavy-duty engine shall not exceed:

(i)(A) *Total hydrocarbons.* 1.3 grams per brake horsepower hour, as measured under transient operating conditions (Subpart N). *Non-methane hydrocarbons.* 1.24 grams per brake horsepower hour, as measured under transient operating conditions (Subpart N) or,

* * * * *

11. In § 86.085–11, the introductory text of paragraph (a)(1) and paragraph (a)(1)(i)(A) are proposed to be amended as follows:

§ 86.085–11 Emission standards for 1985 diesel heavy-duty engines.

(a)(1) Manufacturers of diesel heavy-duty engines may elect either a total hydrocarbons exhaust emission standard or a non-methane hydrocarbons exhaust emission standard. Exhaust emission from new

1985 model year and later diesel heavy-duty engine shall not exceed:

(i)(A) *Total hydrocarbons.* 1.3 grams per brake horsepower hour, as measured under transient operating conditions (Subpart N). *Non-methane hydrocarbons.* 1.24 grams per brake horsepower hour, as measured under transient operating conditions (Subpart N) or,

* * * * *

12. Section § 86.084–21, paragraph (a) is proposed to be revised as follows:

§ 86.084–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards and each class of new motor vehicles or new motor vehicle engines. Such application shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

* * * * *

13. Paragraph (a)(3)(ii) of § 86.084–29 is proposed to be revised as follows:

§ 86.084–29 Testing by the Administrator.

(a) * * *

(3) * * *

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that point: *Provided,* That if the Administrator makes a determination based on testing under paragraph (a)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer: *And further provided,* That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provisions of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission or further information. If the manufacturer conducts more than one test on a vehicle, as authorized under § 86.084–26(a)(3)(i) or (b)(4)(i) the data from the last test in that series of tests on that vehicle, will constitute the official data.

* * * * *

14. In § 86.084–35, it is proposed to revise paragraphs (a)(1)(iii)(D) and (a)(2)(iii)(D) and to remove paragraphs (a)(1)(iii)(F) and (a)(2)(iii)(G) as follows:

§ 86.084–35 Labeling.

(a) * * *

(1) * * *

(iii) * * *

(D) Engine tune-up specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tune-up and what accessories (e.g., air conditioner), if any, should be in operation.

* * * * *

(2) * * *

(iii) * * *

(D) Engine tune-up specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, intial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tune-up and what accessories (e.g., air conditioner), if any should be in operation.

* * * * *

15. A new § 86.111–83 is proposed to read as follows:

§ 86.111–83 Exhaust gas analytical system.

(a) *Schematic drawings.* Figure B 83–1 is a schematic drawing of the exhaust gas analytical system. Figure B 83–2 is a schematic drawing of the instrument to measure methane. The schematic of the hydrocarbon analysis train for diesel fueled vehicles is shown as part of Figure B 82–3 (or Figure B 82–4). Because various configurations can produce accurate results, exact conformance with either drawing is not required. Additional components such as instruments, valves, solenoids, pumps and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Major component description.* The analytical system, Figure B 83–1, consists of a flame ionization detector (FID) for the determination of total hydrocarbons, gas chromatograph (GC) with a flame ionization detector for methane determination (for the non-methane option), non-dispersive infrared analyzers (NDIR) for the determination of carbon monoxide and carbon dioxide, and a chemiluminescence analyzer (CL) for the determination of oxides of nitrogen. A heated flame ionization detector (HFID) is used for the continuous determination of total hydrocarbons from diesel-fueled vehicles, Figure B 82–3 (or B 82–4). The exhaust gas analytical system shall conform to the following requirements:

BILLING CODE 6560-26-M

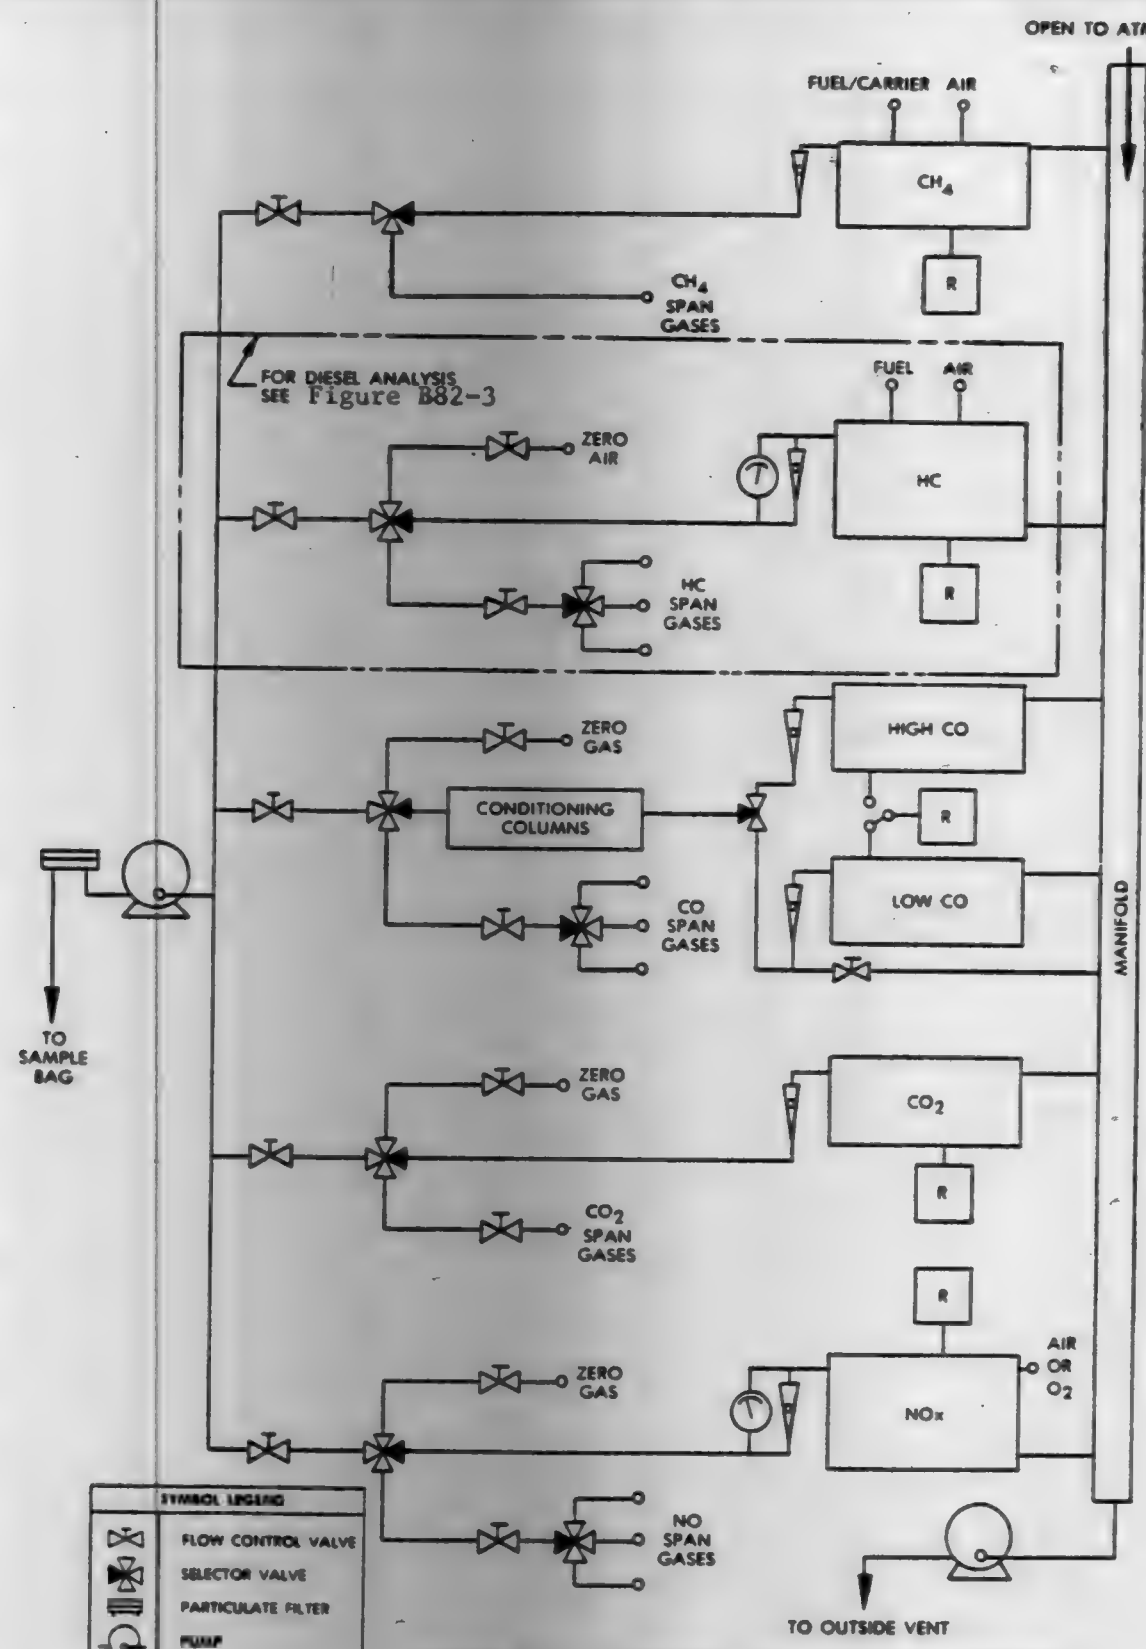

FIGURE B83-1 EXHAUST GAS ANALYTICAL SYSTEM

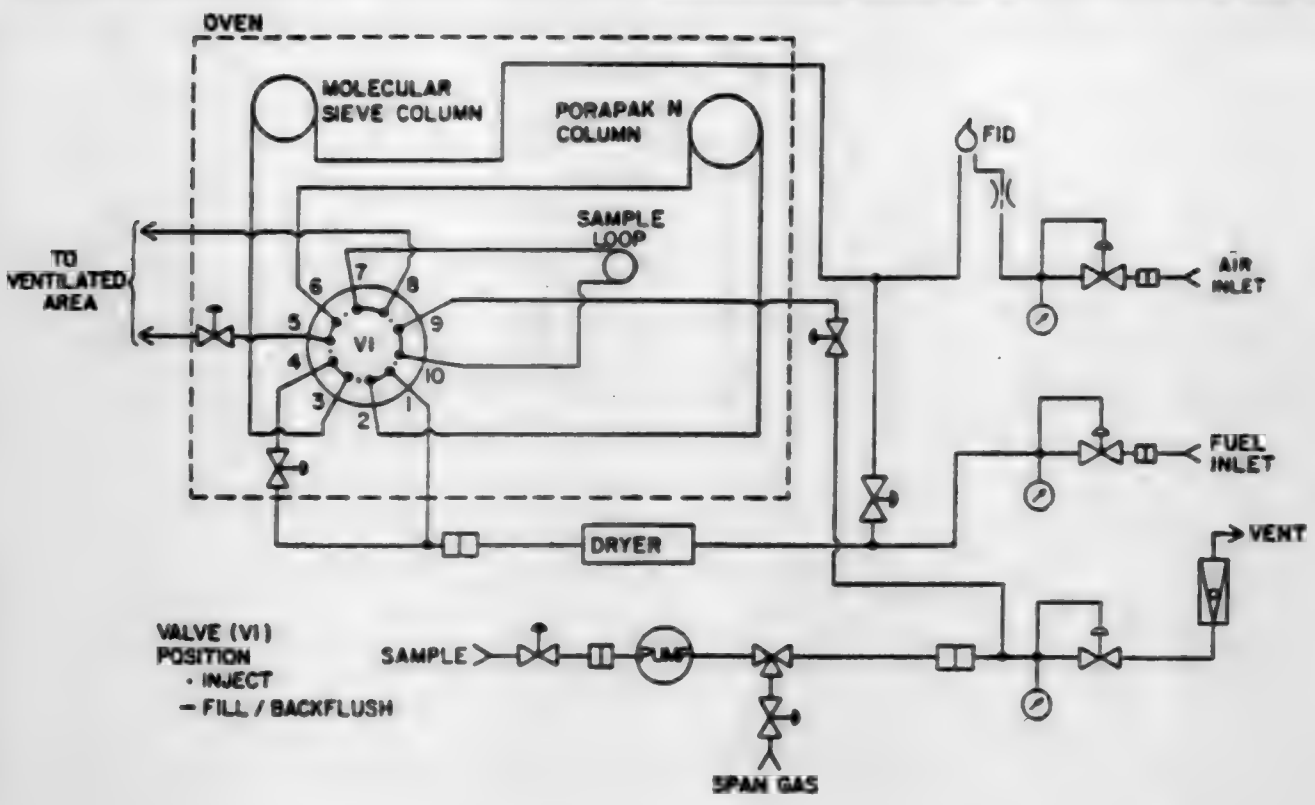

FIGURE B83-2 METHANE ANALYTICAL SYSTEM

BILLING CODE 6560-26-C

(1) The CL requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator.

(2) The carbon monoxide (NDIR) analyzer may require a sample conditioning column containing $CaSO_4$ or indicating silica gel to remove water vapor and containing ascarite to remove carbon dioxide from the CO analysis stream.

(i) If CO instruments which are essentially free of CO_2 and water vapor interference are used, the use of the conditioning column may be deleted, see § 86.122 and § 86.144.

(ii) A CO instrument will be considered to be essentially free of CO_2 and water vapor interference if its response to a mixture of 3 percent CO_2 in N_2 which has been bubbled through water at room temperature produces an equivalent CO response, as measured on the most sensitive CO range, which is less than one percent of full scale CO concentration on ranges above 300 ppm full scale or less than 3 ppm on ranges below 300 ppm full scale, see § 86.122.

(3) For diesel vehicles a continuous total hydrocarbon sample shall be measured using a heated analyzer train as shown in Figure B82–3 (or Figure B82–4). The train shall include a heated probe, a heated continuous sampling line, a heated particulate filter, and a heated total hydrocarbon instrument (HFID) compete with heated pump, filter, and flow control system.

(i) The response time of this instrument shall be less than 1.5 seconds for 90 percent of full scale response.

(ii) Sample transport time from sampling point to inlet of instrument shall be less than four seconds.

(iii) The sample line and filter shall be heated to maintain a sample gas temperature of 375°±10° F (191±6° C) before the filter and before the HFID.

(4) The optional methane analyzer requires a conditioning column (dryer) containing silica gel or molecular sieve material (or an equivalent) to remove water and organic contaminants from the carrier gas stream. The conditioning column shall be reconditioned bimonthly or as necessary by observing a visible indicating medium. The methane impurity of the carrier gas shall not exceed 0.5 ppm methane.

(c) *Other analyzers and equipment.* Other types of analyzers and equipment may be used if shown to yield equivalent results and if approved in advance by the Administrator.

16. A new § 86.114–83 is proposed to read as follows:

§ 86.114–83 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2, respectively, using nitrogen as the diluent.

(2) Gases for the total hydrocarbon analyzer shall be single blends of propane using air as the diluent. Gases for calibration of the optional methan analyzer shall be single blends of methane using air as the diluent.

(3) Gases for NOx analyzer shall be single blends of NO named as NOx, with a maximum NO_2 concentration of 5 percent of the nominal value, using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 40±2% hydrogen with the balance being helium. The mixture shall contain less than 1 ppm equivalent carbon response. Ninety-eight to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoxide, 0.04 percent (400 ppm) carbon dioxide and 0.1 ppm nitric oxide.

(6) "Zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(7) The use of proportioning and precision blending devices to obtain the required analyzer gas concentration is allowable provided their use been approved in advance by the Administrator.

(b) Calibration gases shall be traceable to within one percent of NBS gas standards, or other gas standards which have been approved by the Administrator.

(c) Span gases shall be accurate to within two percent of true concentration, where true concentration refers to NBS gas standards, or other gas standards which have been approved by the Administrator.

17. A new § 86.116–83 is proposed to read as follows:

§ 86.116–83 Calibrations, frequency and overview.

(a) Calibrations shall be performed as specified in § 86.117 through § 86.126.

(b) At least yearly or after any maintenance which could alter background emission levels, evaporative enclosure background emmission measurements shall be performed.

(c) At least monthly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Calibrate the total hydrocarbon analyzers (both evaporative and exhaust emission instruments), optional methane analyzer, carbon dioxide analyzer, carbon monoxide analyzer, and oxides of nitrogen analyzer.

(2) Calibrate the dynamometer. If the dynamometer receives a weekly performance check (and remains within calibration) the monthly calibration need not be performed.

(3) Perform a hydrocarbon retention check and calibration on the evaporative emission enclosure.

(4) Calibrate the gas meters or flow instrumentation used for providing total flow measurement for particulate sampling.

(d) At least weekly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Check the oxides of nitrogen converter efficiency, and

(2) Perform a CVS system verification.

(3) Run a performance check on the dynamometer. This check may be omitted if the dynamometer has been calibrated within the preceding month.

(e) The CVS positive displacement pump or Critical Flow Vernturi shall be calibrated following initial installation, major maintenance or as necessary when indicated by the CVS system verification (described in § 86.119).

(f) Sample conditioning columns, if used in the CO analyzer train, should be checked at a frequency consistent with observed column life or when the indicator of the column packing begins to show deterioration.

18. A new § 86.125–83 is proposed to read as follows:

§ 86.125–83 Methane analyzer calibration.

The methane analyzer shall receive the following initial and periodic calibration:

(a) *Initial and periodic optimization of detector response.* Prior to its introduction into service and at least annually thereafter the FID detector shall be adjusted for optimum methane response. Alternate methods yielding equivalent results may be used if approved in advance by the Administrator.

(1) Follow the manufacturer's instructions for instrument start-up and basic operating adjustment, using the appropriate fuel, carrier, and zero grade air.

(2) Optimize on the most commonly used range. Introduce into the analyzer a methane in air mixture with a methane concentration equal to approximately 90 percent of the most common range.

(3) Select an operating FID fuel flow rate that will give near maximum response and least variation in response with minor variations in fuel flow rate.

(4) To determine the optimum FID air flow rate, use the FID fuel flow setting determined above and vary air flow rate for maximum response.

(5) After the optimum flow conditions have been determined, actual flow rates are measured and recorded for future reference.

(b) *Initial and periodic calibration.* Prior to its introduction into service and at least monthly thereafter the methane analyzer shall be calibrated on all normally used ranges. Use the same flow rates when analyzing samples.

(1) Adjust analyzer to optimum flow conditions as determined above.

(2) Obtain a stable baseline reading using carrier gas.

(3) Calibrate on each normally used operating range with methane in air calibration gases having nominal concentrations of 15, 30, 60 and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less, or within 0.1 ppm methane of the value of each data point (excluding zero), a linear equation may be used to determine the methane concentration. If the deviation exceeds 2 percent or 0.1 ppm methane at any data point (whichever is highest), the best fit non-linear equation which represents the data to within 2 percent (or 0.1 ppm methane) of each point shall be used to determine the concentration. Use methane in air calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of each range for the calibration of non-linear instruments.

(4) A stable baseline must be obtained before and after the methane peak elution. A stable baseline is defined as the time equal to or greater than 25 percent of the methane peak width at half peak height. The methane peak must be resolved from other gases, such as oxygen, nitrogen, and carbon monoxide. Methane concentration shall be determined by peak height measurement or area integration.

19. A new § 86.140–83 is proposed to read as follows:

§ 86.140–83 Exhaust sample analysis.

The following sequence of operations shall be performed in conjunction with each series of measurements:

(a) Gasoline fueled vehicles. Total hydrocarbons, CH (non-methane option), CO, CO_2 and NO_x.

(1) Zero the analyzers and obtain a stable zero reading. Recheck after tests.
